We'll let you decide.

Come to our website: www.arnewsline.org and click on this week's script and select the Text script and scroll to this report to find the internet U-R-Ls leading directly to Brown's letter and FEMA's original December filing.

(Letter from Michael Brown, Undersecretary of Emergency Preparedness and Response, FEMA. January 8, 2004)

<http://gullfoss2.fcc.gov/prod/ecfs/retrieve.cgi?native_or_pdf=pdf&id_document=6516083909>

(FEMA's December 2003 filing)

<http://gullfoss2.fcc.gov/prod/ecfs/retrieve.cgi?native_or_pdf=pdf&id_document=6515292045>

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

In a communication posted to members of its Public Relations Reflector, the American Radio Relay League suggests avoiding references to the FEMA position for now in any BPL discussions or comments. (ARNewsline(tm))

**

THE BPL FIGHT: BIG NOISE IN MANASSAS

BPL has come to Manassas, Virginia and the hams there say that its not fun to listen to:

--

BPL audio

---

That's the racket being created by the latest of three Broadband Over Powerline or BPL installations opened in Manassas. This, as provided in a sound file on the www.W4OVH.org website, courtesy of George Tarnovsky, KE2AM. The interference level appears to be such that it would be all but impossible to hear a radio signal through it.

The kicker here is that this is reported to be an underground electrical feed that utilities claim are far less noisy than overhead wiring. However, having the wires underground does not seem to reduce the interference. At least not in this case.

And if you want to know more about the BPL hazard to America's communications, go get a copy of the of CQ. Joe Lynch, N6CL has an excellent analysis article in his "VHF Plus" column in the just out April issue of that magazine. (VHF Reflector, PR Reflector, W2VU)

**

## THE BPL FIGHT:  SOUTHERN OREGON GOES GLASS

Meantime, to the West in Oregon there's some good news on the BPL front.  It comes from southern Oregon where the obnoxious radio pollution of BPL has lost out to quiet fiber optic delivery.

According to Doug Beck, K6ZX, in the town of Merlin, a private company, forming public and private partnerships with local government has wired the city of Ashland with what's called the Ashland Fiber Network.  It has also extended fiber to the city of Medford with some 74 miles of glass cable connecting all schools to provide VOIP audio and video conferencing.

But that's not all.  The partnership is also in the process of connecting to Grants Pass and will wire all the local schools and government offices as well.  The best part is that all excess bandwidth is being made available to local citizens and wireless last mile technology is being explored to connect rural users.

Beck says over the VHF Reflector that the area is aiming to have a broadband connection available to all rural users without any Broadband over Powerlines in the area.  (VHF Reflector)

**

Break 1

>From beneath the Southern Cross in Auckland, New Zealand and from our studios in Los Angeles, California, this is the Amateur Radio Newsline, heard on bulletin stations around the world including the Metro Atlanta Telephone Pioneer Amateur Radio Club net in Atlanta Georgia.

(5 sec pause here)

**

## RESTRUCTURING: SWEDEN GOES CODE FREE

It now looks likely that Swedish radio amateurs with a Class 2 license which is the equivalent of our code free Technician class, will be allowed to operate on the High Frequency bands as of early April.  The decision to drop the Morse code requirement for an HF bands license in Sweden had been postponed from the 1st of January. A note in the March issue of QTC, the Swedish national society's magazine, suggested that on or about April 1st is when the change will be made.  (GB2RS)

**

ENFORCEMENT:  NO "DELIVER IT" ON 2 METERS

Using an illegal long range cordless telephone to deliver culinary delights is going to cost a New Jersey Chinese restaurant a good part of its profits.  This, after the FCC levies a $10,000 against the eatery for operating transmitting equipment on 2 meters without a license.  The FCC's Daryl Duckworth, NN0W, has more:

--

Duckworth: "A Notice of Apparent Liability to Monetary Forfeiture in the amount of $10000 went to Best Wok of Westville, New Jersey.  An agent of the Philadelphia office had DF'd the signal on 145.8376 MHz and inspected the base and mobile units.  The restaurant manager stated that he had purchased the long range cordless telephone system in another country and brought it to the United States to operate at the restaurant."

--

The FCC citation issued to Best Wok indicated that the telephone in question is not FCC Part 15 certified and is illegal to use in the United States.  (FCC, RAIN)

**

ENFORCEMENT:  IT AIN'T USER RIGHTS

A California ham is the latest to be told by the FCC that if he wants to challenge a repeater operators authority to kick him off a system, he will have to do it elsewhere.  That the FCC will nor reconsider the matter.

The situation involves Mark A. Glover, KE6TTL of Garden Grove. Apparently, Glover has complained to the FCC about his being banned from using a repeater owned by the Catalina Repeater Association with the apparent blessing of the FCC. This in a letter from the regulatory agency to Glover back on February 2nd.

In responding to Glover's February 26th complaint, the FCC says that its letter of February 2nd explained the right of the repeater association to make such a request. Also, if Glover has an objection to the decision of the repeater owner, that he is free to pursue legal action locally. But says the FCC it won't be involved. There are no Commission hearing procedures are provided in such matters. (FCC)

**

ENFORCEMENT: TWO PEOPLE - ONE CALL

The actions of a New York ham in obtaining a call sign have come under FCC scrutiny. Again, the FCC's Daryl Duckworth, N-N-Zero-W:

--

Duckworth: "A letter went to Frank C. Richards, KG2IJ, of Moers New York concerning an application filed in 1995 where he requested the call KB4VU be changed to the next systematically assigned, to change his address to New York, and to renew the license. Frank C. Richards of Ft. Meyers, Florida, claims that he is the real licensee of KB4VU, and filed no application for a call sign or address changes and has never lived in New York."

--

The FCC says that this raises questions about abuse of the licensing system and the agency is investigating. It has asked the New York Richards to provide documented information on where he previously lived in Florida, when he moved to New York and all FCC Amateur Service licenses that he previously held. (FCC, RAIN)

**

## WITH NEWSLINE:  MENTORING PROGRAM UNDERWAY

Joe Eisenberg, K0NEB, who is running the database for the Roy Neal, K6DUE, Amateur Radio Mentoring Project says that the first matches have been made.  These are in California with one being an e-mail only contact due to distance.

Joe says more match-ups are on the way.  Hopefully as the database builds we will be able to make all matches face to face.

If you want to volunteer for the program or are in need of an Elmer to help you learn more, just e-mail us.  The address is mentor@arnewsline.org.   (ARNewsline(tm))

**

## HAMFESTS:  GAITHERSBERG - RIP

Some news from the hamfest circuit.  After struggling to rebuild attendance from two moves the past four years, organizers in Maryland have canceled the 2004 descendant of what was once the popular "Gaithersburg Hamfest."  This was a show that dated back to the 1950s.  Amateur Radio Newsline's Newsline's Paul Courson, WA3VJB reports from Annapolis:

--

"There appears to be no support for this event from the member clubs of the Foundation or their respective members," according to Dan Blasberg, KA8YPY, president of the Foundation for Amateur Radio (FAR).

The group consists of a coalition of ham radio clubs in the Maryland, Washington, and northern Virginia region, and has used hamfest revenue to fund scholarships. In recent years it co-sponsored the event with one of its member clubs, the Columbia Amateur Radio Association (CARA).

Expressing his dismay that only two people had stepped forward from FAR to help stage the hamfest that had been scheduled for Sept. 11th and 12th Blasburg, said the lack of volunteer help is "not fair" to "carry the burden of a project of this magnitude and scope."

Blasburg concluded "it has been decided by the leadership of FAR and CARA to cancel Fall-Fest 2004 (due) to lack of volunteer participation." His note initially went out on an email reflector and since has circulated widely.

Blasburg this past week was hopeful his note would prompt people to step forward to help, but then, on March 27th, hamfest officials were openly talking about the cancellation and the withdrawal of the site reservation in West Friendship, Maryland.

What used to be the popular Gaithersburg Hamfest relocated to a parking lot outside a baseball field in Bowie Maryland in 1999, struggling as a local fleamarket no where near the size of the original site. A move to the Howard County Fairgrounds in 2002 did not help matters much, with attendance gaining marginally.

With the old Gaithersburg Hamfest now GONE, the successor as the largest in the mid-Atlantic region may now be the Timonium Hamfests at the Maryland State Fairgrounds north of Baltimore, where two clubs sponsor a Spring and a Fall Timonium

Paul Courson, WA3VJB, Annapolis reporting for Newsline.

--

Thanks Paul.  (ARNewsline(tm))

**

HAMVENTION 2004: THE FCC WILL BE THERE

Some much more positive news comes from Dayton, Ohio.  This with word that two of ham radio's most popular speakers will be back at Hamvention 2004.  Of coarse we are talking about the FCC's chief ham radio rules enforcer Riley Hollingsworth, K4ZDH, and FCC rules man Bill Cross, W3TN.

The two were missing from last years Hamvention due to a scheduling snafu.  As planners put together this years outing, the duo was among the very first scheduled in.  You will find them holding forth from on Saturday, May 15th from 10 a.m. to noon in Hara Arena Meeting Room 1. If you want to know exactly what's happening at the FCC and how it will affect ham radio, this is the event to be at. (ARNewsline (tm), Hamvention(r))

**

HAMFESTS: THE URUNGA RADIO CONVENTION

And speaking about hamfests, heres on that's a bit unusual. Its the annual Easter Convention scheduled for Saturday the 10th and Easter Sunday the 11th of April at the Senior Citizen's Hall in the city of Urunga, Uganda. Events include a 3.5 MHz mobile hunt, pedestrian on 2 meter T-Hunt, a 2 meter mobile multi transmitter hunt and lots more. Sunday will feature the famous Urunga scramble. A mini contest to see who can make the most contacts in 30 minutes. Its a great show, if you happen to be in Uganda an Easter weekend. (Q-News)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM HELP: GET WELL WALLY

Unless you live in the American West where this newscast is produced, you are not aware of the contributions of Wally Foster, N6CDJ. Those who do know that Wally has been a huge contributor to ham radio in the state of California.

Over the years, N6CDJ has been responsible for thousands of hours dedicated to installing the region's packet radio system. He has also introduced many to packet and APRS and volunteers a lot of time to emergency services, fundraising, climbing towers and doing a first-rate job with repeater and station installations.

Wally's in a tough personal battle right now. Please drop him a QSL with a "get well Wally" message top help keep his spirits up during a trying time. You can send your wishes to N6CDJ at his callbook address. (AA6JR)

**

EMERGING TECHNOLOGY: MESH NETWORKS RADIO RELAY SYSTEM

On the emerging technology front, Mesh Networks, whose emergency-response devices communicate through each other rather than through a centralized command is expanding its technology. This, to work on other kinds of wireless equipment including radios used by emergency service communicators. Rick Johnson, KA9VZD, has more:

--

Originally developed by the U.S. military, Mesh system of networking lets individual radios serve as repeaters and relay points. This means that a firefighter too far inside a building to reach his command post can communicate with a nearby firefighter, whose radio will then repeat the conversation to the next closest radio. This is similar to hams using a programmable mobile radio to extend the hand of their 2 meter or 70 centimeter H-T..

And just like hams have been experimenting, Mesh networks can transmit video, data and position information in addition to audio. But heres the departure fronm what radio amateurs are doing. The Mesh technology also has the ability to create super-sized Wi-Fi hot spots. This in itself gives the system wide utility in public service applications.

For the Amateur Radio Newsline, I'm Rick Johnson, KA9VZD, reporting.

--

Mesh Networks says that it is recognized as the leading developer of high performance and scaleable mobile ad hoc networking technology. More about the company and its products is on-line at www.meshnetworks.com. (Press release)

**

HAM AWARDS:  THE VP5 YOUNG CONTESTER

If you are age 18 or younger, a licensed radio amateur and have been dreaming about going on a D-X contest, listen up.  This next story is for you.

For the second year in a row, a competition has been announced for keen young contest operators with just such a dream.  The winner gets an all-expenses paid trip to the Turks and Caicos Islands to operate with the VP5X Contest Group in the CQ World Wide DX phone contest this October.

Applicants must send an essay of 500 words or more telling how they got started in ham radio.  It also must describe the person who helped them get started in the hobby and why you should be selected for this contest DX'pedition to VP5.

The winner must have his or her parents' written permission to make the trip on their own.  Parents may accompany the winner at their own expense. All entries should be sent by e-mail to contests@vp5x.com by the 31st of August.  (GB2RS)

**

HAM AWARDS:  2004 YHOTY NOMINATIONS BEING SOUGHT

And while we are at it, its time to announce the opening of the nominating period for the 2004 Amateur Radio Newsline Young Ham of the Year Award.  This program is open to any FCC licensed youngster age 18 or younger residing in the contiguous 48 states.  One who has made a significant contribution to the community, the nation or ham radio though the United States Amateur Radio Service.

As we have said in years past, this award is not a contest for a prize.  The person selected "Young Ham of the Year" is judged on his or her contributions to society through Amateur Radio.  By way of example, a youngster whose only claim to fame is that of being licensed as an Extra at age four would not necessarily be judge as having made a significant contribution to the Amateur Radio service. On the other hand, a 14 or 15 year old Novice or Technician running a net during a major disaster or crisis would definitely be given consideration.

More information and a downloadable on-line nominating form is at our website. That's in cyberspace at www.arnewsline.org. The cutoff for nominations this year is midnight on Tuesday, June 31st. (ARNewsline (tm))

**

DX

In D-X, W3EF reports that the 3B9C dxpedition has already made over 110,000 contacts and with any luck will soon be the biggest dxpedition in history. He says that besides the sheer volume, this has also been a carefully planned and executed operation with strict attention to details such as propagation on all bands to all regions. W3EF says it has been an absolute blast with a wonderful team from all over the world. At airtime the 3B9C operation continues. (W3EF)

In other D-X news, word that K5CM, N5KW and W5AO plan to operate portable VP5 from North Caicos island through the 7th of April. The island counts as NA-002 for the IOTA awards. (GB2RS)

Also, F8DVD, will be active slash JW from Svalbard on 80 to 10 meters to the 10th of April. He says that although it will be very hard to make contacts on 80 meters due to the very short night, he will make several attempts to do so. (GB2RS)

Lastly, PA9JJ will be active as C56JJ from Gambia until the 5th of April. Look for him especially on the WARC bands and on RTTY and PSK 31. For all these operations, QSL as directed on the air. (GB2RS)

**

THAT FINAL ITEM: FCC MAY MANDATE IONESPHERIC DELAY

And finally, a little-known provision of a bill to crack down on indecency on the airwaves may directly affect Amateur Radio. It went into effect at 00:01 UTC on April 1st. Roving reporter Pierre Pullinmyleg, F0OL, reports:

--

I'ts a rather -- er -- interesting -- audio only -- April 1st report. To hear it download the newscast MP3 file at http://www.arnewsline.org/quincy If you miss Pierre this week you will have to wait another year before he returns.

--

Thank you, Pierre, and we hope you can get back to warmer weather without any -- er -- long delay. (F0OL)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline. Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066 in the U-S-A.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Meachen, ZL2BHF, in Auckland, New Zealand, saying 73 and we thank you for listening. Amateur Radio Newsline is Copyright 2004. All rights reserved.

http://www.catalog-of-cool.com/coolradio.html

It's In The Fridge: Finding Cool Radio Now

In the introduction to 1993's Too Cool, we invited readers to "dig this book as paper radio." The allusion was to the inspirational role the medium once played: the voice in the night, discovery channel and deliverer of musical epiphanies from the ether.

Radio by and large chucked that role long ago. The idea of an excitement-generating show, action-packed with boss sounds and audio ephemera, is an antique notion. We're basically talking Top 40 AM in its commercial heyday, from the late '50s to the mid-'60s. You'd have to at least be in your late forties now to have any real-time recollection of it.

And yet, such radio--upbeat and rockin', unburdened by the cynicism and cruelty that today claim most dial positions--remains an irresistible dream to many: to hear it, do it, somehow participate in it.

You can still find cool radio. Both of the examples here stream live online, and one is archived, so you can dig it whenever you want.

In Los Angeles, Loyola-Marymount University's KXLU-FM hosts The Bomb Shelter, Uncle Tim McDermott's weekly barrage of R&B, ska, early rock 'n' roll, international Nuggets (plenty of Italian, Japanese and South American garagers), surf, gal-groups and '70s punk. The one-hour show wails wall-to-wall: brief intros and a local calendar are the only interruptions to James Brown and Jack McDuff, Los Straitjackets and a German cover of Napoleon XIV. I don't think I've ever listened to the show without hearing something utterly wild and new to me. Fridays, 8-9 pm PST. Access through http://www.kxlu.com or http://www.live365.com.

New Jersey's non-profit WFMU-FM offers Music To Spazz By. More produced than The Bomb Shelter, Dave the Spazz's program gives you a hit of what '60s shows like Mad Daddy's were smoking: a bubbling cauldron of background noise, weird commercials and fly-by-the-ear bites from old TV and films. At a manic musical pace. On one recent show: Stooges, Hasil Adkins, Modern Lovers, Marvin Rainwater, Little Killers, and the Electric Prunes demonstrating the wonders of the Vox wah-wah pedal. Thursdays, 8-11 pm, EST. Go to http://www.wfmu.org. It's archived.

New to us: Someone just pulled our coat to Pull The String, a show out of non-profit KSER-FM in Everett, Washington. Van Ramsey's presentation is low-key, but the puddin's hot. What we heard on a recent PTS: Buck Owens and Hank Penny, Deke Dickerson's Ecco-fonics (a burnin' version of Leiber-Stoller's "Hatchet Man"), Screamin' Jay and Cab Calloway. And a commercial for AIP's great 1972 Frogs flick, starring Ray Milland. Get strung. Saturdays, 2-4 pm, PST. http://www.kser.org.

The dearth of cool radio these days makes programs like these rare, precious, almost heroic. On a good night, with the volume up, they'll make your radio throw off steam. - Gene Sculatti

-----

�Hear Here: Vintage Cool Radio

We've touted some of these sources before, in our TALK TALK chapter, but we reprise 'em here as a service to newcomers who might want to check out vintage Top 40 as it actually sounded.

DJ's on CD:

Mad Daddy, Wavy Gravy: Atom Smashin' Zoomeratin' Mello Jello Radio Broadcasts 1958-64 : Cleveland's (and later New York's) Mad Daddy rhymes his way through show intros, song dedications, station ID's and commercials for razor blades and record stores ("Round sounds and none of the square/ The Rendezvous, sonny: Buy your records there!"). A document of an amazing talent.

Dewey Phillips, Red, Hot & Blue: Live Broadcasts from 1952-54: The first DJ to play Presley ("That's Allright, Mama," 1954), Memphis' Dewey Phillips speed-raps a blue streak, exhorting audiences "Let's wake up!!!" as he sings with, over and through the raw blues he spins. Superhuman but definitely of this earth.

Wolfman Jack, Howlin' On Air: XERB Radio Broadcats from 1968-70: Still crazed after all those years, Wolfie roars and cackles, breathes new life into oldies and braves his way through phone calls (the best part of this CD) and corny bits ("Wind-up Wolfman"). And, like Daddy and Dewey, spiels: "Just stack up that Country Club [malt liquor] and enjoy yourself!"

(The Aircheck Factory has an enormous inventory of radio airchecks for sale.)

Online Action: Among numerous sites offering radio airchecks online, we especially dig www.philaradio.com (Philadelphia area) and www.reelradio.com (national). --G.S.

### Cool Radio Then (1984-88)

Like we said, lots of folks have wanted to do cool radio. Us included. Details on our vainglorious fun-run are available by clicking on The Cool & The Crazy button below. --G.S.

### Dr. Demento

In 1970, mild-mannered record geek Barret Hansen became a DJ at Pasadena, Calif.'s KPCC FM, with a half hour rock rarities show. The audience response to the more humor-based records Hansen played inspired an all-humor playlist and a new identity, and he became Dr Demento. It caught on, big time and quickly, and Dr. Demento became a syndicated radio superstar, playing a mix of music so eclectic it defies description--except that it was all funny. If there has ever been a practical example of Unified Field Theory, it's the Dr. Demento playlist. Music of the 1910's rubbed shoulders with whatever comedic music came out last week. For many of us, especially those of us who came of age in the '70s, the Demento show was our first exposure to Louis Jordan and Frank Zappa, or to Jewish and Italian music. It was a broad and eclectic look into what made Americans laugh, and it was always loving and never ironic. The Doctor treated the Shaggs with the same respect he accorded Frank Zappa, which was as important a lesson as the music itself. The show is now coming into its 34th year, still a vital thing in most radio markets.--Skip Heller

Never mind, it's in stereo now! Got a message that the problem was
with the Motorola exciter. I suppose I was ready to assume the worst,
given how other formerly stereo stations have switched back to mono.

For how many of those 20 years has it been a talk station?

Back when I used to listen to it (60's through mid-70's) it had enough of a
variety of programming to make it worth using stereo, and none was
available.  But who needs stereo on a talk station?  It's a waste.

Hmm...when did the Texas outfit take them over? Last time I had anything
to do with them, they were in nearby Sacramento.

Anyway, there probably isn't a more reliable transmitter on the planet.
The tubes suffer physical decay before they fail electrically! The only
chronic problem I ever observed (on multiple transmitters) was the
constant failure of the feedback resistors in the modulator cabinet. We
kept lots of replacements on hand at all the locations.

Unfortunately, I suspect that the big tubes (4-1000A, 4CX5000) are not
cheap to replace. The ceramic tube can be rebuilt, but that isn't dirt
cheap. They all, however, last a long, long time.

Oh, and you might want to determine which high-voltage delta/wye
contactor your unit has and if it doesn't already have it, get the
vacuum switch. The clunky one that uses big ceramic insulators always
blows up.

Why is it a waste? Spots are stereo. Jingles are stereo. Bumpers are stereo and a creative programmer or engineer could easily make local interviews stereo by panning each person slightly off center.

If you take most syndicated programming, you're out of luck.

If for nothing else, then it's useful for the commercials.

Don't they still do a music program or two on weekends?

Music Rotation System 2.5b with Radio DJs on Mind!

Greetings: My name is Norberto and I am a Radio DJ.

I created a Music Rotation System for my own benefit and my audience. I thought the following information might be of interest to your staff in specific Radio Disc Jockeys (DJ's).

Music Rotation System (MRS) version 2.5b is an software application developed using MS Access 2000 and Visual

Basic.  It was developed with Radio DJ's in mind.
Specially, those who originates their own programming
as Radio DJ's in Community or Public Radio Stations do.

Our intent was (and still is) to assist in the
preparation of radio shows taking into consideration
factors such length of shows, tracking of the played
music (avoiding unnecessary repetitions), and
assisting the DJ in the organization of the musical
material; e.g., introducing the song: authors, bands,
solos, music tempo, notes about the songs. It works
great when you want to research your notes and prepare
special shows for your audience.

Now, MRS 2.5b has evolved in a way that it could be used for
the listening enjoyment at home. We have accomplished all
this and still giving the Radio DJs great flexibility to
mold their taste and personal choices into a rotation
system using artificial intelligence. In other words,
facilitating all the functions of today's Radio DJs.

If you think this might interest you or your staff,
click below to obtain more information and/or download
this great application.

http://www.geocities.com/norberto95aolcom/MRS.html

PD - I would appreciate if you may print this email
and post it into your bulleting board.

Thanks.

How many talk stations use the creative programing you suggest?

Would not think the spots etc. are sufficient reason to have stereo if the main program is null to stereo.

I use otsjuke at my home as well...only i'm not really thrilled with the processing.  It's not as good as a broadcast processor, but it works for keeping the sound card sane.

Ots is great at mixes...which is why I use it.

In article <c4um82$1sc$1@xuxa.iecc.com>, richbwood@comcast.net says...

> Why is it a waste? Spots are stereo. Jingles are stereo. Bumpers are stereo and a creative programmer or engineer could easily make local interviews stereo by panning each person slightly off center.

Back "in the old days" at my first commercial radio job we had a Sunday morning program with a preacher and a trio or quartet at an FM station in Urbana, Ohio -- COL since changed to Springfield. I would set the preacher up on the left channel and the singers on the right channel. I thought it sounded pretty cool at the time. But when you're 17 and in radio ANYTHING is cool.

The second or third Sunday I was there while the preacher was on the air, his well endowed niece tried to corner me while I was choosing records for my show (yeah, free format MOR!!). I was having a bit of fun until she told me she was only 14. My first and only encounter with a groupie.

I always wondered what happened to her.....

Hi, Scanner here...can somebody help me with this?

MPR bought a mansion for 1.6 million, which they plan on renting out( I read it in Twin Cities Business Journal). Does anybody know how they did that? Were membership dollars used? It's about as much as they raised their last pledge drive, so did they really use the money for this house and not programs as they said they were? What gives?

I'm less than enchanted with MPR these days. Since they decided they wanted to be a national network like NPR, PRI and Pacifica (my absolute favorite show is Democracy Now!), they've gotta be making money hand over fist: a friend of mine in NC says it costs his station $14,000/year to carry Garrison Keillor. Also, it seems stations now have to pay MPR some huge fee just to take their shows (Why? Special equipment?)

Anyway, they always seem to be asking for more money, and yet they're getting more and more from selling their shows: and now this house thing. Can anybody explain this to me?

For anyone interested, here's a reminder of upcoming DX tests; if anyone has any additions or corrections, please contact me. (BE SURE TO NOTE THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Daily, from 2:55am-3:05am EST - WRIB-1220, Providence, RI - This test is scheduled to run "through at least April (2004) and possibly into May".

Sunday, April 11, 2004 - WNNR-970, Jacksonville, FL 12:00-1:00 am EDT.
E-mail:wgsr1570@nrcdxas.org

Please remember, what's listed as being on, say, Monday *may* be what you think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message letting me know, and please, drop the station personnel a note, via e-mail or snail mail, thanking them for running the test! Also, for brevity's sake, I didn't post the QSL addresses; if you need these, let me know!

Lynn.

Here's the results of the most recent DX tests that have been received here:

Thursday, April 1, 2004 - WTBQ-1110, Warwick, NY tested 5:15-6:00am EST:

The only reports I received about this test were from those that were unable to hear the test; these included Russ Edmunds of Blue Bell, PA and Mike Hardester of Jacksonville, NC, who both had too much interference from WBT in Boston; Wade Smith in New Brunswick also mentioned problems with WBT, but also had CBE to deal with, and Eric Berger in Detroit, MI had WBT and KFAB taking over the frequency.

Sunday, April 4, 2004 - KEVA-1240, Evanston, WY tested 12:00-1:00am MST:

For this test, the only reports I received were from those that HEARD the test. Darwin Long in Thousand Oaks, CA heard the test, as did Patrick Martin in Seaside, OR, Tim Hall in Chula Vista, CA, Bruce Portzer in Seattle, WA, and Steve Ratzlaff in Elgin, OR (NE Oregon), who sent a detailed description of the CW. Pete Taylor of Tacoma, WA wasn't sure if it was KEVA he heard, as he wasn't able to make out the CW he heard.

That's all for now...

Lynn.

> vice-versa.

The proposed WWVA xmtr location is 20.6 miles NW of the WCUE xmtr location.
The WWVA xmtr is off the peak of the WCUE 6-tower pencil beam. The way I
read the rules the stations must have no more the 2 mV/m at the other's
25 mV/m contour and vv.

WWVA's proposed transmitter location and all other AM stations' are in the
latest AMSTNS data reflected in the M-FILES.ZIP available from my Web site
http://users.erols.com/rcarpen  This data will allow you to plot the xmtr
locations on any version of DeLorme Street Atlas. From my site you can link
to Vehorn's web site to get the full AMSTNS info, or get just the patterns
from www.fccinfo.com .

None of which addresses your point about WWVA having COL-grade coverage at
Stow.
WWVA's proposed pattern is very broad, and not down very far toward Cuyahoga
Falls.
(or Stow).  WCUE must not have a lot of sig at Stow because of its VERY

tight
pattern.  The outdated info I have lists the Stow ZIP code as having a
population
of a bit over 30,000, but that includes a lot more than just Stow.  Likewise
my
old population data shows just 32,000 for the Cuyahoga Falls ZIP.  Could it
be
that neither of these towns has more than 10,000 in its INCORPORATED area -
and may thus require only 2 mV/m signal.  Cuyahoga Falls is definitely in a
minor
lobe of WCUE's day signal.  There may be an agreement to mutually accept
some
interference over small areas outside their COLs.

I can't imagine that WCUE is worth very much - could there be an agreement
to
purchase and take dark not reflected in the WWVA application?

> I see no applications from WCUE in the database.  In any case, I thought
> the FCC summarily dismissed contingent applications?  (applications

See above.

Also note that there is an application by WRTK for 1180 days from WABQ's
site in the NE suburbs of Cleveland.

Perhaps it's not Stow, but Steubenville. Wheeling is across the river from
Steubenville, pretty much, but is nowhere near Stow, and I not only can't
see the FCC allowing 1170 and 1150 to be lit up in the same market, I can't
see the FCC allowing Clear Channel to remove an operational station from
one market to put it into another.

> On the other hand, I'm sure the engineering study for WWVA wasn't cheap

> get this change through.

I want to know what the point is. What are they going to put there? Someone
else owns the news-talker in Akron, they own ESPN 1350; Akron's a small market.
How many AMs do they expect the area to be able to support? There are a few
minor ones like WCUE in addition to 1350 and 1590 already.

It's my personal opinion that someone at Clear Channel needs to remove the
crack pipe from their anal cavity. ;)

Small doses is about right.  I burned out on Phil Hendrie after I realized I was constantly listening to a rehash of previous bits.

He only has a few hours of material in his repertoire.

Mark,

Have you tried continuous recording in WAV format?  Does this format also suffer from the 2-3 second gap in recording while the file is being saved?

Thanks,
Flintstone

>>

CC bought and took dark two full power (old rules) 1150s so it could pump its

L.A. 1150 to full power (new rules) ... 50 kW days, 44 kW nights.

The move of WWVA is indeed to Stow, OH, with the Tx site midway between Cleveland and Stow.

The proposed DA-D is most likely to protect adjacent-channel stations.

The proposed DA-N is to protect a co-channel station ... ex-KVOO being the only one that matters for 27 kW.

For 50 kW nights, the Class I-N in Alaska would have to be considered, and the DA-N would likely have to have more towers.

There are three Class As on 1170 ... all are U.S.

What are the other stations?

I would imagine that it's rather difficult to find available outlets
in the major markets for an unproved product, when the big stations
already run the rightwing stuff.

For sale:

With special permission from parole officer Larson E. Rapp. Zing Zing prision, Ossingstink, NY.

I am still trying to put together joint venture to acquire an AM/FM in a small Virginia college town. Only $400,000 total asking price with real estate included.

Active or inactive investors with at least $20,000 each are welcome. All investors would be on the board with full voting rights if desired. No individual can own over 49 percent and that means me too!

I am NOT a crook! I am also not an agent, broker, shill, owner or part owner.

The "Radio Crazy", it's baaaaaaakkk!! Hi!

Tel: (478)741-1710.

I am still offering an AM CP for sale, All of it. It is for Warner Robins, GA. Fulltime on 1600 KHz. 1 KW days, 250 watts nights, non-directional. City of about 53,000. 8th largest city in Georgia. Probably the fastest growing city in the state! $50,000 cash.

73,

Meyer Gottesman, W6GIV
aka "Radio Crazy"
aka Moron Gottesman

Comments from Clevelanders on another list indicate the incorporated
areas of the two towns border on each other.  (Steven S., do you know if

this is true?)

The Census Bureau's map page says the 1990 population of Stow was 27,702 and of Cuyahoga Falls 48,950.  (each spread across multiple ZIP codes) I'd think that would mean the incorporated area but could be wrong.

I guess if they only need 2mV/m then it works out from WCUE's standpoint.

> I can't imagine that WCUE is worth very much - could there be an agreement to purchase and take dark not reflected in the WWVA application?

My bet is this is what's going on.  Maybe CC will hand over one of their smaller Cleveland/Akron-area AMs in return?

> Also note that there is an application by WRTK for 1180 days from WABQ's site in the NE suburbs of Cleveland.

Yep, there are nearly 200 other applications for major changes.  WWVA's is the only one involving a 50,000-watt station, but there are some other big ones, sometimes involving moves to different markets.  For example, KBLU-560 Yuma, Arizona to Nellis AFB (Las Vegas), Nevada.  Or WCSJ-1550 (Morris, Illinois) to Amado, Arizona on 670...

There's also a pile of applications for completely new stations.  Some of them in surprisingly large cities - for example, for a new Class C station on 1400 in Philadelphia...

He is in a bad state. He is a drug offender and could face prison time. He should, given what he has said about drug offenders in the past. I have to wonder why he needed all those painkillers when he has such a cushy job in radio.

> G Gordon Liddy seems very opinionated.

He always was (so is Rush). Liddy's also a convicted felon; one of the "Watergate" conspirators.

> I quote from the programme "radio is to the right".

The people with money are generally conservative, so that's where they target the ads.

It's definitely Stow.
http://www.fcc.gov/fcc-bin/amq?
state=&call=WWVA&arn=&city=&freq=530&fre2=1700&type=0&facid=&list=1&dist=&dlat2=&m
lat2=&slat2=&NS=N&dlon2=&mlon2=&slon2=&EW=W&size=9

The map link shows a transmitter site just west of Strongsville.

> I can't
> see the FCC allowing Clear Channel to remove an operational station from
> one market to put it into another.

It's been done before... WHMA-100.5 Anniston, Alabama moving to College Park, Georgia (Atlanta suburb); KGYN-1210 Guymon, Oklahoma moving 200 miles to Oklahoma City (not yet implemented)...

> I want to know what the point is. What are they going to put there? Someone

Judging from the transmitter site their target market is Cleveland, not Akron. With 50,000/27,000 watts they'll have a far better signal across the city than probably anyone else except 1100 and 1220.

>I wonder if anyone knows *how*?

The presumption, by many of us following this move, is that CC has
made a deal with Family Radio to either shutter or move WCUE/1150
Cuyahoga Falls.

You're right, there's no way to plop 1170 on the dial licensed to Stow
(even if the tower is out past Strongsville) if 1150 is on in the
Falls.

Unfortunately, the WWVA move application has no attached PDF files, so
it's hard to tell how they're justifying the move technically re:

WCUE's presence. But I'd bet the farm that WCUE is either going to be paid to go dark, or move frequency. A friend suggested that 1140 might work, since two stations in the region that used to be on the frequency are no longer on the air...but I don't know if that third-adjacent would be enough.

I'm also unsure why a WCUE application hasn't ended up online yet, but this could all be already "covered", just not online at the FCC site yet.

I'd actually shed a tear for a dark WCUE, as it's the first radio station sort of in my resume, and a long-time Top 40 outlet locally back in the day.

Steve, the WWVA proposal is to serve Cleveland, but licensed to Stow. It would be 16 miles SW of the Terminal Tower, but 26 miles WNW of Stow. Stow obviously needs a "first local service", while Wheeling has a number of AM and FM stations (irony OFF).

WRTK Niles is proposing to move to 1180 with 3 towers at the WABQ site to serve "Lakewood". It is surely just a coincidence that the WABQ site is east of Cleveland while Lakewood is west.

If you're referring to the former KDAY in Santa Monica, it has a
decent signal to the North but does have to protect the Mexican (used
to be XEDM, I believe) on the same frequency.

>from God"!

I'm afraid the BBC is stuck in the last century. Rush Limbaugh has been using that slogan almost since day one well over a decade ago. It's a little like saying WINS is in a sad state because they've used "Give us 22 minutes and we'll give you the world." Sometimes a slogan stands up to the test of time. Advertising agencies have orgasmic incedents when they discover one of their slogans enters popular culture.

>G Gordon Liddy seems very opinionated.

Duh!

>I quote from the programme "radio is to the right".

Duh!

>I wonder if the new station, Air America,  will be welcomed to widen the
>dialogue.

First, a very small percentage of the population will have access to Air America programming compared with its conservative competition. It'll take many years to develop the coverage enjoyed by Limbaugh (600+ for Limbaugh. Fewer than 20 marginal signals for Air America). The conservatives already have the best signals on well branded stations.

New York will be very difficult because their outlet is solidly branded as a Black station, both Black talk and Dominican music. The WLIB heritage (sadly) will have to be destroyed before a new one can be created. That'll require a call letter change and very expensive promotion. Their competition will be WABC. WABC does a lot of transit promotion and television during important rating surveys. WABC and KFI, Los Angeles compete for the title of the most listened-to Talk station in the nation.

I have the feeling that Al Franken, in partifcular, will make it an "us vs. them" atmosphere. If he does, it'll be a wonderful promotional medium for conservative stations. The more he mentions O'Reilly and Limbaugh the more Air America should charge Premiere and Westwood One for advertising time. I say that sadly because I really like Al Franken and Randi Rhodes.

>Will advertisers aim to the liberal market?

By and large advertisers avoid any kind of controversy. That's why Laura Schlessinger lost 30 million in billing over her slam at the gay community and Michael Savage threatened to sue everyone on earth for complaining to his advertisers for something similar (excuse: "I didn't know the mic was on"). Large network advertisers avoid controversy like the plague. It doesn't matter if the controversy is on the right or the left.

I can't believe the BBC is just noticing that Talk Radio in the US is right wing.

Here in the DC area WGOP hasn't show up at all in the DC area Ratings and were at the bottom of the Frederick, MD., ratings in the past 2 years. It appears that in order to make *any* money, they're going the brokered route. The Greaseman is still on in the mornings but most of the rest of the day is brokered. On weekends I've heard Michael Medved which is interesting since he's no longer on live on WGOP during the weekdays.

I (well, actually my kids) wish this station would go the Radio Disney route. Barach, WGOP's owner, also owns AM540 in Pittsburgh which runs Radio Disney and my kids love to listen to that when we travel up there. It's a shame. They do have a decent daytime signal but nobody knows they exist -- and the few that did know won't listen to the brokered crap they're airing now.

Tom in Frederick, MD

> XM does not have any good host except Hannity.

That's not exactly what I'd call setting your standards high.

>> The open road would be good if they dumped Bozo.
>> He makes us all look like dumbies

The last sentence makes me understand why Hannity is your first choice.

What's a dumbie? An offspring of Dumbo?

Rich.

260 ft. Stainless G-25 tower, excellent condition, on ground. Sections are very heavy-duty weighing estimated 400-500 lbs each. All steel components are galvanized solid-rod, so interor corrosion is not possible. Leg diameter is 1.5". Cross brace diameter is half inch. Face width is 24". Bottom mounting plate is one inch thick with round pivot point.

Section flanges attach with one inch bolts. Located near Bowling Green, KY. For more information call C. Scott at 270-745-3834, or see photos on web page. Price is $3,200 - as is, where is - you load and move. Referral for moving and installation available. See: http://www.scott-inc.com/tower/stainless.htm

Hey, KGYN 1210 is one I've heard in Central Ohio
http://home.att.net/~rhhardin4/radio1210.kgyn.ra (real audio)

I suppose that will make it easier to hear by 200 miles.

On 29 Mar 2004 16:16:22 GMT, "R J Carpenter" <rcarpen@erols.com> wrote:

>Steve, the WWVA proposal is to serve Cleveland, but licensed to Stow. It would be 16 miles SW of the Terminal Tower, but 26 miles WNW of Stow. Stow obviously needs a "first local service", while Wheeling has a number of AM and FM stations (irony OFF).

And if you're trying to handicap the "first local service" thing, Stow would have great odds. It's grown like the proverbial weeds over the past 20 years. The population figure cited here (27,000) is probably more like 40,000 by now. Stow's eastern edge, near Kent, is dotted with a whole bunch of new housing developments, and a new giant Stow-Munroe Falls High School in that same area of town.

And among other "usual suspects" for the first local service petition, Stow has its own weekly newspaper, and they could probably make an argument that it has enough employment separate from Akron or Cleveland.

I'm just not sure why a Cleveland area community - within the proper signal range of the site in Lorain County near Strongsville, which would still provide a market signal over Cleveland - wouldn't work here...and why they had to reach clear to Stow to find a COL for the new 1170 app.

Mike

Which one? They only own one Akron AM and one Cleveland AM.

Hard to imagine they'd want to ditch the WLIB calls as they take on liberal talk. I noticed you mentioned WINS in the same post. Heavily branded Top 40 calls, and scandal-tarnished as well. Became quite a successful news brand nonetheless.

(You mentioned WABC as well. Highly branded calls but in that case obviously untouchable. I was amazed a few years back when they briefly experimented with "770" as their "channel brand.")

Rich,

Generally in the UK we have a relaxed and permissive attitude and on air presenters do not try to make fools of those who 'phone in.

Mike.

It is only moderately listenable in the San Fernando Valley in the daytime,
and virtually useless there at night. That is to the North.

1580 in the US protects, if I am not mistaken, the B assignments in both the
US and Canada.

And XEDM in Hermosillo, a non-directional 50 kw station, virtually wipes it out in the fringe areas at night.

And non-English brokered at that at times..

I gather that they are silent quite a bit of the time.

Their renewal is still on hold months after it would normally have been granted.

The owner is trying to move both WGOP and his station on 540 on the eastern side of Chesapeake Bay to Damascus, MD. (Not licensed to there of course). I think it's very iffy whether a county building permit will be issued.

How far north? It doesn't seem to put much of a signal into the
San Fernando Valley during the day (at night, all bets are off)....

I suppose the Akron one... (which one do they own?)

IIRC WTAM-1100 is their Cleveland AM - I'm sure they'll want to keep that - but nothing in Akron comes anywhere near the proposed Stow signal, IMHO they'd be glad to trade it to Family Stations if that gets them approval for the 1170 move.

Both stations took many years to change their branding. As I recall,
WINS took about 8 years to really take off. I don't believe WLIB will
have the luxury of that kind of time. Talk Radio is a slow build.

If the deal instantly makes WLIB profitable, Percy Sutton will give it
all the time it needs. Will Air America have the money it takes to
survive?

I hope it does and I hope they focus on entertainment rather than
rabid politics.

Rich

Maybe, but I don't think so.

My experience of news on the Internet is that it is rarely as immediate as radio. I have little experience of watches and phones as news media, but I can't imagine them as anything but subscription services. Radio is free and, moreover, something one can leave on as one goes about one's daily routine. It is always likely to be the first choice, except for CNN and its ilk.

Unless, of course, the broadcasters blow it.

Here in Boston there is very little news of value on the radio any more except on WBUR. That's sad, and presents a possible scenario by which radio might lose out to new media as a news source.

Broadcasters have to wake up, I think, and see what's happening to radio. At a time when XM and Sirius and establishing their beachheads like the Allies on D-Day, too many broadcasters are withholding their Panzers from the fight, perhaps because they think the expense wouldn't look good on Wall Street.

Radio isn't nearly as exciting as it used to be. The creative experiments and colorful rivalries of past decades have given way to a Borg-like uniformity of sound. The glamour and excitement are gone, and announcers seem more assembly line workers than entertainers. The whole industry seems asleep at the wheel. Science has eclipsed art, and that may be radio's downfall.

Unless, of course, I am wrong.

umar

Unfortunately, making fools of callers is what drives most US Talk Radio. We get a reprieve on the weekends when the "lifestyle" shows predominate. It's hard for a pet show to make mean-spiriited fun of someone who chooses a pig as a pet. You can criticize our President, but keep your opinions to yourself when it comes to our pets. In this case, the pig is smarter.

Rich

Clear Channel actually owns two AMs in this market (Akron). In addition to WTOU "Fox Sports 1350" (the historic country WSLR), which they picked up in the Barnstable deal with WKDD/96.5, they recently bought WHLO/640 from Salem. WHLO was flipped to a news/talk format shortly after the purchase.

My gut tells me that they won't give up either 640 or 1350 to Family Radio...and that somehow they'll move or pay FR to shutter 1150 to get the move accomplished.

Of course, since the Barnstable purchase, 96.5 - still licensed to Akron - became Cleveland market "96.5 Kiss FM", and the WKDD programming moved to 98.1 Canton...the former WHK-FM, once owned by Salem.

Where I live news on the radio is already a thing of the past. Radio "news" consists of reading the newspaper. Thank you Cumulus.

Which is what they did in CA to get two co-channel 1150s off of L.A.'s 1150 in order to do a 50/44 kW upgrade there.

Well, we've got WBZ, which is mostly short and sensational
stories; and then there are a bunch of stations that use Metro
News, which means they all share the same source, and that
source does a pretty poor job, sometimes not even getting basic
facts right.

If you want anything deeper than headlines, WBUR is pretty much
your only choice.

I'm always suspicious of the news on a radio station that is actually a PC on a desk and a satellite dish on the roof.  How can a radio station have instant local news when there's really NOONE EMPLOYED?

There's 5 stations in one office, here, and only one of them actually has a talking head live on the air.  He's also an automaton because the computer warns him he has 10 seconds before its his turn to talk and starts warning him he has 5 seconds to stop before the next row of 12 spots we've all heard a hundred times in the last 8 hours plays over again.

They don't even have an engineer, any more.....and it shows.

Listening to anything on radio is becoming increasingly difficult.
It's a tossup between the talking head saying "News-Talk 730 - WSC" 25
times every 10 minutes, trying to jack up the ratings by saturating
the listeners with RCA marine communication's shortwave callsign (730
is WSCC) and the saturation advertising playing the same spots 8 times
an hour in a string of like spots played 8 times an hour for 6 minutes
STRAIGHT with no programming whatsoever.

Is it any wonder noone is listening?

WCBN WILL DESTROY YOUR FEEBLE FORMATS
=20
WCBN - 30 Years of Freeing Your Mind - Listen to us online!
=20
WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

I'm aware there's at least one station in the US who uses a news feed
from our BBC.

Is there any interest in our slant on news?

It seems to me that what you're really lamenting is the state of radio broadcast journalism. However, it's not just radio Journalism, it's all Journalism.

Maybe it was always this way and we just didn't know any better. The Internet has suddenly exposed a cacophony of opinions and sources of information that the public simply had no exposure to before. And as the influence of the Internet spreads, it becomes possible to check up on what was difficult to research before. So it comes as no surprise to me that when the public lifts up this rock one can find all sorts of weird critters lurking under there.

Now, as to format: Attention spans are shortening among broadcasters. Many are looking for the quick attention grabbing headline and then forgetting to back it up with a real meaty story. Why bother? It's expensive to do good research. Only NPR puts stuff like that on the air, and most have no desire to compete against government funding. It's cheaper to produce another headline with a thin story behind it.

What these radio broadcasters don't recognize is the value of a long term investment. They flit from headline to headline until most of their listenership can barely lift their knuckles off of the floor. And by then, most of the advertising for smart people has long gone along with anyone who uses their opposable digits. This explains the inanity of most advertising you hear on the air.

Radio is hardly the only business which can't seem to focus on the long term. In my personal opinion, I think the future will see the audience slowly melt away toward other media. There is an article in the NYT recently (http://www.nytimes.com/2004/03/29/technology/29guy.html) about how 18-35 year old men are watching less and less TV. As broadband access improves, audio programs are getting easier to download. I expect more people will tend to download the programs they want to listen to rather than see what's on the radio.

Of course, this is just my speculation. It's worth only what you paid for it.

umarc> Well, we've got WBZ, which is mostly short and sensational
umarc> stories; and then there are a bunch of stations that use Metro
umarc> News, which means they all share the same source, and that
umarc> source does a pretty poor job, sometimes not even getting
umarc> basic facts right.

umarc> If you want anything deeper than headlines,
umarc> WBUR is pretty much your only choice.

Are you saying that WRKO and WTTK get all their news from
the same single place, and that it's often not right?

Could you give some examples of WBZ not getting their
basic facts right? Perhaps something they reported
wrong in the last two weeks would be funny.

But that WBUR does better? Cuz it seems to me like WBUR just has the single source NPR feed (same as WGBH), runs the BBC headline show, has far less local coverage than the others, and mostly just runs NPR entertainment.

The part I was most curious about your claim that things had changed in the market -- I am curious as to when it used to be any different.  Which stations had more news, and how was their coverage different?

I've only been listening in this market for about 24 years, and in that time it sounds all about the same to me, except for the addition of WBUR's change a while back to run NPR syndicated entertainment shows instead of I don't remember what. I like news, and would like to hear about how it used to be better, and how it might be driven that way again.

That was a Navy transmitter, not NIST. I was stationed at Lualualei
for almost two years in the mid '70s. I wonder if it is still on the
air now that they have switched most of their circuits to satellite.

=====================================================

6th Annual East Coast vs. West Coast Battle on the
Memory Lane Show in Rock-it Radio #901

It's time for the Sixth Annual East/West battle on THE MEMORY LANE SHOW. East Coast dj Bill Green joins our Lane Quigley in Studio B in the latest bicoastal skirmish for musical supremacy. Check it out at Rockitradio Show #901

Listeners are asked to vote, round-by-round, on their favorites. You can "copy and paste" the ballot below into an email, mark your choices, and send directly to Lane in Studio B at this email address: MemoryLaneShow@aol.com . Five lucky listeners will be selected at random to receive a CD compliments of Rock-it Radio of this show plus, there choice of actual vintage radio broadcasts of the 50's and early 60's from the Rock-it Radio Music Store. at: http://www.palmsradio.com/store.html

To tune in go to our archived show page at:
http://www.palmsradio.com/rockittext.htm
and click to show #901 to listen... the show will remain online for the entire month of March. Real Media Player is required to listen to Rock-it Radio programs.

Here's the playlist/ballot:(go ahead and cut and paste and send your ballot to memorylaneshow@aol.com )

ROUND ONE: THEY DIED TRAGICALLY
___EAST: Soul Twist - King Curtis 1962

___WEST:  Bonie Maronie - Larry Williams  1958

ROUND TWO: #1 IN 1950, LET'S DO IT AGAIN
___EAST:  Music Music Music - The Sensations  1961
___WEST:  Harbor Lights - The Platters  1960

ROUND THREE: BACK TO THE BEGINNING
___EAST:  It'S Too Soon To Know - The Orioles  1948
___WEST:  The Honeydripper - Joe Liggins  1945

ROUND FOUR: SOUNDALIKES?  BLAME THE PRODUCERS
___EAST:  Be My Girl - The Four Evers  1964
___WEST:  I Live For The Sun - The Sunrays  1965

ROUND FIVE: KATHY, YOUR ROOMMATES ARE INNOCENT
___EAST:  Please Love Me Forever - Cathy Jean & The Roommates  1961
___WEST:  A Thousand Stars - Kathy Young & The Innocents  1960

ROUND SIX: THE JOY OF SAX
___EAST:  Back Slop - Baby Ray & The Trini-Dads  1961
___WEST:  All Night Long - Joe Houston  1954

ROUND SEVEN: GUYS UP FRONT, GALS IN THE BACK
___EAST:  It's Almost Tomorrow - The Dream Weavers  1955
___WEST:  Come Softly To Me - The Fleetwoods  1959

ROUND EIGHT: SOCIAL COMMENTARY
___EAST:  Deep In The Heart of Harlem - Clyde McPhatter  1964
___WEST:  A Change Is Gonna Come - Sam Cooke  1965

ROUND NINE: FEATURING THE BACK-UP-ETTES
___EAST:  (Night Time Is) The Right Time - Ray Charles  1959
___WEST:  A Fool In Love - Ike & Tina Turner  1961

ROUND TEN: ALTERNATIVE ROCK
___EAST:  Funny (Alternate Take) - Maxine Brown  1961
___WEST:  Let's Get Together (Alternate take of "C'mon Everybody") - Eddie Cochran  1959

ROUND ELEVEN: CLASSICS
___EAST:  In The Still of The Night - The Five Satins  1956
___WEST:  Earth Angel - The Penguins  1954

So folks get those ballots in and we will have the results in Early April and will post them here in the Rock-it Radio newsletter.  Also, if you have any comments on the show or requests feel free to e mail Lane at:  Memorylaneshow@aol.com

And don't forget to check out the Rock-it Radio store for your home of actual 50's Radio Broadcasts including the likes of Allan Freed, Mad Daddy Pete Myers, Bill Balance plus all the music of that era the commercials and news broadcasts of that day.  At http://www.palmsradio.com/store.html

Here's the results of the most recent DX tests that have been received here:

Sunday, March 14, 2004 - KEVA-1240, Evanston, WY tested 1:00-2:00am MST:

This was a test heard mainly by those in the Western US and Canada, though not everyone in the West heard it. It was mentioned by many that the code for this test cut thru this crowded local channel especially well. Nigel Pimblett of Medicine Hat, AB and Nick Hall-Patch of Victoria, BC as well as Albert Lehr of Livermore, CA were some that mentioned the code cutting thru specifically. Also hearing the test were Patrick Martin of Seaside, OR, Mike Sanburn of Bellflower, CA, Kevin Redding of Mesa, AZ, and Don Kaskey of San Francisco, CA. Robert Wien in Azusa, CA also heard the test, but as he mentioned, it was rather weak. And Tim Hall of Chula Vista, CA and Gerry Thomas of Niceville, FL both reported hearing a jumble on 1240 kHz and were uncertain if the code they heard came from KEVA.

And several DXers, myself included, tried for the test and didn't hear it - for instance, Vaughn Martin of Helena, MT and R.C. Watts of Louisville, KY both mentioned that they had locals on 1240 that they were unable to null. Bruce Portzer in Seattle, WA, Martin Foltz in Mission Viejo, CA, Bill S. in Omaha, NE, and John West in Dallas, TX all tried for the test with no luck.

Sunday, March 14, 2004 - WTOP-1500, Wahington, DC tested 12:00-1:00am EST:

This test was heard mainly in the Eastern US and Canada. It ran at their full 50000w, on their day pattern, and 2 announcements concerning the DX test were made. And there were certainly plenty of DXers listening for the test - those that heard the test included:

John Fisher - North Chalmsford, MA
Mike Brooker - Toronto, ON
Adam Myrow - Memphis, TN
Andrew Lisowski - Springfield, VA
Gerry Bishop - Niceville, FL
Ron Gitscher - Palm Coast, FL
R. C. Watts - Louisville, KY
Patrick Rady - Ann Arbor, MI
Mike Hardester - Jacksonville, NC
Paul Smith - Sarasota, FL
Willis Monk - Old Fort, TN
Steve Francis - Alcoa, TN
Les Rayburn - Helena (near Birmingham), AL

Nick Hall-Patch in Victoria, BC wasn't sure if it was WTOP's code he heard. Several people mentioned they tried for the test with no success - many heard only a local or KSTP, or in my case, a station with SS. These included:

Patrick Martin - Seaside, OR
Chuck Boehnke - Keaau, HI
Niggel Pimblett - Medicine Hat, AB
Vaughn Martin - Helena, MT
Mike Sanburn - Bellflower, CA
Tim Hall - Chula Vista, CA
Craig B. - Denver, CO
Bill S. - Omaha, NE
Kevin Redding - Mesa, AZ
Robert Wien - Azusa, CA
Patrick Griffith - Westminster (near Denver), CO
Lynn Hollerman - Lafayette, LA

As a final note for this test, WTOP engineer Ken Sleeman asks that all QSL-related e-mail be directed to him at ksleeman@moremusic104.com.

That's all for now...

Lynn.

For anyone interested, here's a reminder of upcoming DX tests; if anyone has any additions or corrections, please contact me. (BE SURE TO NOTE THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Daily, from 2:55am-3:05am EST - WRIB-1220, Providence, RI - This test is scheduled to run "through at least April (2004) and possibly into May".

Sunday, March 21, 2004 - KEVA-1240, Evanston, WY 1:00-2:00 am MST (3:00-4:00 am EST).

Monday, March 29, 2004 - WXHL-1550, Elkton, MD 12:01-1:00 am EST.
E-mail:d_oetting@hotmail.com
Phone:410-398-3883

Thursday, April 1, 2004 - WTBQ-1110, Warwick, NY 5:15-6:00am EST.
WWW: http://www.wtbq.com

Sunday, April 11, 2004 - WNNR-970, Jacksonville, FL 12:00-1:00 am EST.
E-mail:wgsr1570@nrcdxas.org

Please remember, what's listed as being on, say, Monday *may* be what you think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message letting me know, and please, drop the station personnel a note, via e-mail or snail mail, thanking them for running the test! Also, for brevity's sake, I didn't post the QSL addresses; if you need these, let me know!

Lynn.

No, the second ticks are 5 cycles of 1000 Hz on WWV and 6 cycles of
1200 Hz on WWVH.

Yes.

>I was stationed at Lualualei
> for almost two years in the mid '70s. I wonder if it is still on the
> air now that they have switched most of their circuits to satellite.

We were there at the same time.  69-87 for me.

I once had to put in a buried seismic alarm system right across the street
from that transmitter.
Took some interesting filtering on the signal lines, not to mention three
weeks to ditch through the coral.

     You're right a wwv or wwvh clock both receive and decode
the same manner. Both wwv and wwvh transmit at 2.5, 5. 10, 15, & 20Mhz.
There is no 60Khz on Kiuai.

in
>Ft. Collins, Colorado on 60 kHz.

     Yes, not to belabor the subjct, but WWVB is 60Khz,
while WWV, & WWVH are 2.5...................20Mhz.

There is no voice with WWVB. Howver, for calibration purposes
WWVB is more stable, and accurate.

As far as I know, WHK/1220 is still on the same pattern.  It's what causes the station to become a rumor near Medina at night.

Another new "big exception" in the Cleveland market is WAKS/96.5 "Kiss FM", the Akron market move-in once known as WKDD (the latter, of course, now at 98.1 Canton).  They nudged the WAKS tower site up just north of the Cuyahoga Co./Summit Co. border in Brecksville, just off Rt. 21 near the Turnpike.  The old WKDD/96.5 already had fairly decent coverage in the Cleveland market, but this move was similar to CC moving the new WKDD/98.1 facility up closer to Akron.

As far as the OP goes - it looks like 96.5 is probably shaky where he is, too, at least according to the usual "for entertainment only" maps at Radio-Locator.com:

http://www.radio-locator.com/cgi-bin/pat?call=WAKS&service=FM&status=L&hours=U

He probably should still be able to hear "Kiss FM" with a decent antenna. (And he should plug in a few Cleveland stations into that Web site's search engine to get an idea of what he's dealing with...)

Oh, on a semi-related note, the CC Akron/Canton stations are moving into a new facility in Jackson Twp. (North Canton) area...just off the I-77/Portage St. exit north of Belden Village Mall, and just south of the Akron/Canton Airport. WKDD/98.1 made the move Friday, and WHLO/640 and WTOU/1350 are supposed to join them at the end of the month.

>Fear not, young trooper! You do have a choice. Clear Channel operates a bunch

>classic rock, whatever weird hybrid format Star 97.1 runs...)

Is WBKC/1460 still running a WCLV/104.9 Lorain simulcast after morning drive (and outside of Indians games)?

>I used to listen to 102 Zoo a lot, primarily because I enjoy listening to their
>morning team. They seem to focus more on Lake County than any of the Cleveland
>stations do.

And at times, almost more than they focus on Ashtabula and environs. That's probably because there's a lot more money in Lake County!

Mike

Does anyone in the Washington, D.C. area know why Bonneville has recently
turned off the RDS and the stereo pilot pn both WWZZ and WWVZ?  It also
sounds like someone has been mucking with the processing; they sound
"thinner".  Is the rumored format flip finally in the works?

I have one of the small desk clocks that synchronizes to WWVB at night.  It auto-adjusts the internal crystal (or says it does) to keep itself going during the day. I've found that it maintains accuracy very well: certainly good enough for anything short of atomic physics.

I live in the NorthEastern U.S., where the signal is relatively weak (look at the maps at the URL a previous poster supplied) and don't have any significant trouble with it.  I looked at the NIST web site, and I think they said something about boosting the power of the WWVB signal: so if you had trouble with it before, it might be worth trying again.

I guess you could say "HD Radio" is the DAB system in the United States.
  It is (very!) technically incompatible with the Eureka DAB system used
in Europe.  http://www.ibiquity.com .

HD Radio is also known as "IBOC" - "In Band, On Channel". It places digital carriers in the outer edges of the existing analog signal. (and for MW IBOC, in the adjacent channels) It offers a "hybrid mode" in which DAB and analog can be broadcast on the same frequency at the same time.

All U.S. stations are currently allowed to begin DAB broadcasts at any time, upon notifying the government. MW stations are only allowed to broadcast DAB during the day, though nighttime authorization has been requested. Very few stations are actually using DAB at this time - my guess would be roughly 50 (most of them VHF/FM) throughout the country.

It is (IMHO) specifically designed to maintain the relative coverage areas of different stations. (unlike, for example, the Eureka DAB in Canada where all Montreal DAB stations have equal coverage, regardless of the coverage of their associated analog stations)

>DAB... do you have that in the US?

We don't have DAB because the National Association of Broadcasters lobbied against it several years ago when they realized it would give all stations in a market essentially the same coverage and possibly allow new competitors into the game.

They do have DAB in Canada, but we have IBOC ("in-band, on-channel"), or "HD Radio" as it has been recently rebranded. HD Radio allows a station on the AM or FM bands to transmit a digital signal along with the conventional analog signal. The catch is that the maximum bit rate permitted by HD Radio is 96 kbps on the FM band and about 36 kbps on AM. By comparison, DAB allows up to 256 kbps.

Mike:

Just gave it another try.  A little pressed for time this morning, but in about 20 minutes there were no dropouts.  Audio was excellent quality.

Start with 2dB lift at 10kHz and 3.5kHz, and take about 2dB out at 400Hz. With a reasonable microphone, this is a very good starting point. Depending on room or aircon rumble you might want to use a high pass filter set at 60-90Hz, and this can be a little higher with a female voice if needed.

Cheers, Rob.

I whole-heartedly agree with you on your findings "Umarc". It really has nothing to offer the local **FM** listener. HOWEVER....in the Southern California market it would kick ass on the "AM" market with a vengence.A lot of the local AM outlets have sold out to the hispanic market because AM radio sounds so bad for music.Considering how much better AM IBOC sounds than analog, and the fact that the mexican government thinks it's cool to fire up 10Khz away from US stations..IBOC is just what the renagade beaner-blasters deserve.
I would like to see such stations like KNX,KFWB,KFI,KABC-AM (and some of the San Diego stations) push the IBOC music service, the data services and re-claim the 535-1710Khz band for use in the US of A.......Eddie

For sale:

(The "Radio Crazy" is baaaaakkkk but this time he is selling something and NOT looking for investors.)

AM construction permit for Warner Robins, GA. The 8th largest city in the state. Has the largest civilian employer in the state, Robins Air Force base.

I believe it is the fastest growing city in Georgia and the present population is about 53,000. Will probably reach 100,00 by the end of this decade.

The CP was (will be as it is a "shoe-in")granted as a result of my filing during the 1/26 to 1/30/2004 filing window and was unopposed.

It is for 1600 KHz, fulltime, 1 KW days, 250 watts nights.

I will sell for $50,000. My parole officer says I am not allowed to say this but I will. If you are a J_W or a B___K it is $100,000. If you are a Muslim it is $200,000! My parole officer is: Mr. Larson E. Rapp, c/o of ZingZing prison, Ossingstink, NY 12345. (I know, dude! I am not politically correct....so sue me!)

Only those fully identifying themselves can deal. I will need you SS number, age, race, religion, do you go to church? Do you mow your lawn? Medical records? Bank accounts. If you don't like, wait for the next FCC filing window probably circa 2054!!!!

I am NOT a crook! I am not an agent, shill, etc. This time I AM an owner!

This CP is real!!! This CP is real!!

Call (478)741-1710 in Macon, GA

This CP is real!!! This CP is real!!

73,

Meyer Gottesman, W6GIV
aka "Radio Crazy"
aka Moron Gottesman

PS, some of the nasty stuff is satire only and no offense is intended. If you really want the CP, you can live with that. It is on the FCC website for those "flamers" that think I am off the wall!

MG

My limited experience with AM IBOC is that it seems to sound worse than
the better quality AM analogue signals, and of course it makes it impossible
to put out a wideband analogue signal.  It's also going to be much more
subject to adjacent channel interference from Mexico.

I wish I could say IBOC would be the saviour of AM, because AM certainly
could use one.  I could at least believe IBOC will result in better quality
sound for the average listener on a cheap car radio listening in the daytime,
and you can argue that this is where the profit is.

>I would like to see such stations like KNX,KFWB,KFI,KABC-AM (and some of the

I'd be interested to see them try.  And I will say that stations that try

IBOC are forced to clean up their antenna system and deal with group delay problems, which will certainly benefit them if they should decide to move back to wideband analogue operation.

Actually, there are fewer Spanish AMs than there have ever been in the last
20 years. Only 1020, 1330, 830 and a simulcast of 1330 on 1220 are Spanish.
Gone are 1430, 1580, 1480, 1090, 1540, 900 and several others that were
intermittently Spanish (like 1500, 1510, 670, 1190, etc.)

Only one of the remaining ones is doing music (country standards) while the
rest are talk.

A lower percentage of Hispanics listen to AM than non-Hispanics.

Duh. WHK. I've even been on-air at WHK since the big flip (as a guest), and
I still forgot. :) (Not only that, I have friends at Salem... I should know

better...)

> Another new "big exception" in the Cleveland market is WAKS/96.5 "Kiss FM", the Akron market move-in once known as WKDD (the latter, of course, now at 98.1 Canton). They nudged the WAKS tower site up just north of the Cuyahoga Co./Summit Co. border in Brecksville, just off Rt. 21 near the Turnpike. The old WKDD/96.5 already had fairly decent coverage in the Cleveland market, but this move was similar to CC moving the new WKDD/98.1 facility up closer to Akron.

96.5 had decent coverage in Mentor and Painesville back when it was WKDD, but since moving I do believe the coverage has gone from decent to solid...

> As far as the OP goes - it looks like 96.5 is probably shaky where he is, too, at least according to the usual "for entertainment only" maps at Radio-Locator.com:

Nahhh, I can confirm from living in the area (not 20 minutes away from him) that Kiss has a good signal in northwest and north central Lake. Keep in mind, however, that I haven't lived in Ohio since the end of last June.

> Is WBKC/1460 still running a WCLV/104.9 Lorain simulcast after morning drive (and outside of Indians games)?

As far as I know. Listen to 104.9 to find out - at the top of the hour they'll ID WCLV *and* WBKC.

> And at times, almost more than they focus on Ashtabula and environs.
> That's probably because there's a lot more money in Lake County!

Ehhh. Most of their loyal sponsors are in Ashtabula and vicinity. The only sponsor that runs spots with any frequency on 102 Zoo out of Lake is the Classic Auto Group, which is all over the map - Wickliffe, Willoughby, Mentor and Painesville -- and, of course, they have a store in Madison, the last town on US 20 before you hit the Ashtabula County line.

It's interesting to hear their Cleveland ads which feature lavish production values and Founder/President Jim Brown's booming voice, and then hear their Ashtabula ads that.... don't. (The Ashtabula ads sound fine; they just aren't as fancy.)

People have been posting some cool stuff in there - like vintage Howard Stern from his DC101 days, old Larry Lujack stuff from 1964, an aircheck of actor Rick Moranis when he was a disc jockey, and lots more.  I'm surprised more people don't post tapes in that group.

Oddly enough, some of these ended up doing (or will end up doing) English-language talk or sports:

1580 - KBLA/Santa Monica, the L.A. affiliate of the new "Air America" liberal radio network
1540 - KMPC, the Sporting News Radio O&O now sporting the historic 710 calls
1090 - XEPRS out of Baja California, now doing English-language sports talk aimed at San Diego as "The Mighty 1090" (after the move of 690 Tijuana to a simulcast of KXTA/1150).

Mike

Unfortunately, in my observation, IBOC degrades the analog signal
noticeably, even on a narrowband car radio..  The problem with AM IBOC
is not only the quality of the digital sound (yes, I know, there's
supposed to be a new codec that's better, but I've never heard AM IBOC
that sounded anything but terrible). It also degrades the listening
experience for everyone listening in analog, which for the foreseeable

future means everyone, period.

There is also a serious adjacent-channel interference problem which
does affect stations outside the coverage area of an AM station
transmitting IBOC.  That is why it is not permitted at night, but the
problem also exists with daytime operation.

>
>>I would like to see such stations like KNX,KFWB,KFI,KABC-AM (and some of the
>>San Diego stations) push the IBOC music service, the data services and
>>re-claim the 535-1710Khz band for use in the US of A.......Eddie

IBOC may be a step to eliminating AM as an aural service, with the
allocations eventually used only for datacasting.  Whether or not that
is the plan, it is the likely result.  IMHO, IBOC will assure the end
of AM radio as we know it.  Why anyone in the broadcasting industry
supports it as the "savior of AM"  is utterly beyond my comprehension.
I find every argument advanced for it to be fallacious.   If this is
what's supposed to save AM, then AM can't, and maybe shouldn't, be
saved.

As far as I know, WHK/1220 is still on the same pattern.  It's what causes the station to become a rumor near Medina at night.
>>

WKNR was a legacy rock-'n'-roll call from Detroit/East Lansing (with WKFR ... both then owned by Knorr Foods, hence W-KNR).

The 1220 pattern was cast into concrete in 1938 with NARBA, finally implemented in 1941 as WGAR.

Carl Smith designed the array, and it has remained substantially the same (although the "six wire" line, the phasor and the center tower have all been replaced).

It's not *that* directional.

The entire U.S.-Mexican border is protected, as is the primary service area of first adjacent-channel WCAU.

Implemented by Smith using only five towers, the signal is intended to serve Cleveland and Akron, plus Canton, all of Ohio.

About 250 kW towards Cleveland. About one-half that towards Akron.

Grandfathered by NARBA as DA-1, even though DA-1 is no longer required under "Rio" rules.

A better pattern is possible, using more towers, but protection of Mexico, DF, and Philadelphia remain as absolute constraints. Plus, now, the many 1220s which are Class Bs, operating with very low, but conforming power.

At best, one "throw-away" mimima could be eliminated, that minima being essentially entirely over Lake Erie, and a new pattern might require an entirely new array concept, and most probably six to eight towers.

Given Salem's parsimoniousness, I seriously doubt that a megabuck, give-or-take, would be spent on this station to give it a more desirable pattern.

And I once interviewed for an off-air job at WKNR/1220 before it launched as a sports station.  My big problem?  My source neglected to indicate that WKNR would be a sports station...meaning all my talk about my news/talk radio experience was wasted.

Oh, not to mention the odd fact that the WKNR management at the time (in the Cablevision days) was insistent that everyone who worked there actually lived in the Cleveland market, in specific, Cuyahoga County. One of the interview questions was "would you move to the Cleveland area?", despite the fact I was roughly a half-hour drive from there from the Akron area.  Heck, I was closer to them than someone in, say, Lakewood, and certainly well within 1220's strong signal.

It didn't make any sense to me...for one, since it was signing on as a sports station, the Akron/Canton area is clearly within the market area for the major pro sports teams in Cleveland.

My response - no sports radio experience aside - may have been what doomed me...I basically said "huh, what do you mean?"

>96.5 had decent coverage in Mentor and Painesville back when it was WKDD, but
>since moving I do believe the coverage has gone from decent to solid...

It looks like they may have been able to squeeze a bit more out of
96.5 with the move.  98.1 couldn't do much, since it was kinda clamped
in, with the move to Hartville...their pattern pre/post Hartville was
almost identical.  Their aim was to get closer to Akron and provide
less of a "picket fence" signal.  96.5 seems to have actually picked
up some real estate with the move to Brecksville.

>Ehhh. Most of their loyal sponsors are in Ashtabula and vicinity. The only

>Mentor and Painesville -- and, of course, they have a store in Madison, the
>last town on US 20 before you hit the Ashtabula County line.

Maybe that's it...every time I tuned into 102 Zoo, I heard ads for the
Classic Auto Group.  They ran with a LOT of frequency the last time I
was up there.

One could assume that they turned off the stereo in order to get better coverage.  RDS could have been turned off to get back the few-percent of modulation it consumes.

WWZZ is a WAY-out rimshot, and has coverage problems in DC and northern suburbs.  Turning off the stereo gives them quite a few more dB signal to noise ratio in poor signal areas.

WWVZ is only Class A, and was bought to try to help in the northwestern DC suburbs.  But it's way out on the hill west of Frederick, MD, so every little bit of signal improvement helps - thus turn off stereo.

And don't think that I'm anti-stereo, after all I put on the first FM stereo station in the DC area - 102.3 Bethesda.  We suffered severe coverage problems due to being just Class A, and compounded by being stereo.  Rules have changed and 102.3 now has 12-times the power we had, and a much better antenna location at American U.  They cover very well these days - in stereo.

Long ago I characterized the present FM-stereo system as being the best mono system among the various proposed stereo systems.  By that I meant that it degrades the mono coverage less than most of the other proposed stereo systems.  But it takes a beating in stereo coverage because of this.

Hmm...I know that the "reception issue" has plagued WWZZ for a long time and I knew that improved reception is what drove Bonneville to turn off the stereo on the 107.7 signal for WTOP-FM.  I guess I just didn't realize that the signal improvements were *that* significant.   I hope they haven't deluded themselves into blaming the signal rather than the format for their current ratings situation...

I keep hearing rumors that Bonneville is looking for a broadcast signal for their Federal News Radio brand and I suppose I was speculating that they were tweaking "104" in preparation.  It was just a thought.

I would think that the "savior of AM" would be to provide programming that people would want to listen to and that can be received well in most of one's home market.

But aside from that, the FCC needs to do a little "birth control" -- or, more precisely, "euthanasia" -- by deleting operations who facilities are clearly too marginal to provide aural service to a majority of any given station's market area. The FCC, obviously, would rather not crack this particular nut -- it's easier to focus on boobies than it is on nuts-and-bolts infrastructure -- and has backed off the few cases where it has tried to reduce interference on the dial: for example, how many stations that "moved" to the expanded band actually have given up their previous facilities? Not many.

AM-Stereo, a previous savior, didn't kill AM, so now we have IBOC.

No, the FCC has a better solution - the recently-closed window which
gathered over 1500 applications for new stations and major changes.

I recall years ago there was an effort to make it easier to buy and turn off
stations.  The dreamers said that this would drive up the price of
stations - making them out of reach of new minority owners.  The "big boys"
quickly figured that (already owning the big stations) they'd rather split
the ad pie with lots of struggling little stations that didn't have enough

ad income to compete, rather than a smaller number of stations each of which got enough of the pie to be "dangerous". So the big station owners sided with the dreamers and we have more and more uneconomic stations interfering with each other.

I know of one x-band station that gave up its old channel. Since they also have FM I wonder how long before they turn in the x-band license. Maybe the PC in the closet which runs the AM doesn't cost enough to matter. Going from 3 towers to one must save money.

Doug Smith W9WI <w9wi@invalid.invalid> had written:

| All U.S. stations are currently allowed to begin DAB broadcasts at any
| time, upon notifying the government. MW stations are only allowed to
| broadcast DAB during the day, though nighttime authorization has been
| requested. Very few stations are actually using DAB at this time - my
| guess would be roughly 50 (most of them VHF/FM) throughout the country.

In the San Francisco area, there are five, all FM:
KZBR, KOIT-FM, KDFC, KFOG, KSAN.

None observed on AM so far, but given that Susquehanna owns the latter two stations listed above as well as KNBR(AM) and KTCT(AM), I think it might be merely a matter of time.

Bonneville, the other owner represented above, only owns one San Francisco AM, KOIT, which simulcasts the FM 100%. One suspects that Bonneville is unlikely to invest too much into that signal (which is ND fulltime).

On FM, the IBOC sideband noise that is generated is noticeable on a receiver of any but the worst quality. The KSAN IBOC signal (licensed frequency of 107.7 MHz) is blamed by some for blocking South Bay reception of Monterey Bay-area station KPIG (107.5 MHz).

I rather doubt that WWZZ is a good candidate for Federal News Radio.  FM
stations, even that one, are worth too much.  AM has building penetration
problems, but 1120 might be a tolerable choice - but it may be having enough
success with brokered time to cost too much as well. Drive time coverage in
the winter would be a problem for most AM stations.... except for 980 which
must be terribly underperforming at present.

Sorry, but there's not a lot to save here - watch E television version of

the HStern show, fairly disgusting at best.
Just my 2 cents worth . . .
regards,
Tom

The biggest problem here - the Cleveland metro area has grown towards
the southwest, into parts of Medina County that are mostly in the null
of 1220's pattern.

This, presumably, is due to the protection of the Mexican operations
you note in your original message.

Mike

European and Asian cellphones solved this problem a very long time ago. Look through the catalogs of Nokia, Sony/Ericsson, etc. You could probably dissect an asian cellphone to get at the audio switching circuitry and headphone drivers.

Ask around on the GSM cellphone groups.

Yes, and a change in site to accommodate the change in Cleveland's metro area would undoubtedly result in a severe ratcheting of the station's power. Perhaps to 25 kW.

Salem's "forced move" of its KFAX in S.F. would result in ratcheting to about 40 kW if Salem doesn't get a waiver. And, the move is well within the radius which is supposed to qualify an "in kind" move of an existing array. Salem is proposing retaining 50 kW, but with slight array parameter changes which somewhat mitigate the potential interference to several CP'd stations in Idaho and Nevada.

WOR met the same fate on its forced move, and its new pattern will provide better protection to a Canadian station which no longer exists (moved to FM), but remains "notified" on 710.

a city I visit frequently -or more precisely, it's exurban outskirts - has only one mellow-Jazz FM-broadcast station, the only one for many hundreds of miles.

thus I have decided to build my own single-station hi-performance receiver to get the one station.

I know enough to know that ideally, the bulk of the gain, directionality,  selectivity should be at the antenna itself. Or even more to the point, tower height.  At least ideally.   And hi-performance single FM channel yagi's are easily spec'd from a number of antenna houses.  So that issue is not being placed on this table.

The rest of the gain budget is.

Let the discussions begin.   For example, what approach do the known
"name" receivers (Kloss Model One, GE Super Radio) use?   can a
homebrewer do better?
Which commercial house  builds the best resonant chambers for the 108
Mhz frequency?   Can be be done easily at home?   how about the
demodulation and audio portions?

Building a good receiver of any kind is complex, if you really want good specs. Very few people have been able to accomplish this at home. Just for calibration, you will require the proper instruments and skills.

A good FM receiver with the proper antenna will do it, as long as the antenna can see over the horizon, and within your distance range there are no other stations at the same frequency. There are also the physical limitations to consider as well.

Since the range of an FM station is about 120 to 140 miles at the very best with a good antenna, there may be allowance for other stations to broadcast within a 150 mile radius. If there are other stations, these may be difficult to tune out.

You would be best off with an antenna that is cut to the frequency you want to recieve, it will have to be able to see over the horizon enough to see the transmitter site, have the proper directivity, and be very well impedance matched to the receiver.

All the high end FM tuners are designed to be able to use an external antenna, using a 75 ohm coax type hookup.

Have you considered calling this station to see if they are on the net, satellite service, or on your local cable TV service? Many of these small stations are on the net, and broadcast streamed programming. This way you can use your computer to listen to them. '

...

Exactly what will make it "hi-performance"?  I'd like to get this nailed down early here.  That is, it would really help to know answers to things like:

What distortion performance do you want to get?  (Will you be able to deliver a clean enough signal from the antenna to get to the desired performance level?)

What will the level of the desired signal be at the receiver antenna terminals?

What will the strongest unwanted signals be:  level and relative frequency?

What resources do you have available for design, construction and testing?

Will this receiver be in a fixed location, or do you want it to be easily portable?  How much power can it draw?

Others may well think of questions to add, before we go off into the weeds with unproductive answers.

Cheers,
Tom

Hi,

Please post a link to a Coast To Coast AM MP3 stream.
WGST use to have one but it switch over to a windows media format.

The MP3 streams are easier to access and has less overhead.

Thanks!

Phin

You need to look at your particular situation. It sounds like you are out in the desert. Is this the case? Are there other strong FM stations nearby? Any others close in frequency?

Sensitivity is relatively easy to come by. The "best" audiophile receivers are more about selectivity, which sounds like it might not be an issue in your case. There is a similar issue with antennas. Directionality is there more to combat multipath then it is to get gain. Is the terrain flat? If you are between a lot of buildings then nothing you do at the receiver will make up for what you don't do at the antenna.

You are right about needing to get your antenna high, but for a single, point to point circuit, there is such a thing as high enough. More won't help. But less will hurt dramatically.

The other big problem is getting the signal from the antenna to the radio. At FM frequencies, line losses are significant, as is noise pickup. If the signal is marginal, then you need to get an amplifier at the antenna. If what reaches the receiver is mostly noise then no amount of sensitivity at the receiver is going to help.

At any given frequency there is only a certain amount of sensitivity that you can use. At FM broadcast frequencies, that amount of sensitivity is easily obtainable these days. You can probably do "better" in terms of sensitivity by building something, but you wouldn't hear the station any better ... in fact, probably worse by having too much of a good thing.

..

An update on the KEVA-1240 test...

Due to a miscommunication, the KEVA-1240 test did NOT run as planned on 3/21/04;

it will instead run on 3/28/04 - at the time it was originally scheduled for,
1-2am MST. The station regularly plays classic country music, and the DX test
will have some voice and Morse code IDs mixed in.

Lynn.

Hello All,

I'm looking at designing a broadcasting system to broadcast a one way signal to a receiver within a large building for speech. I don't want it to be picked up on AM/FM radios and I also need a very inexpensive receiver to pick up that signal only. I have to admit, I know nothing in this field and any information would be greatly appreciated.

Darryl

Thought I posted a reply yesterday, but it doesn't appear to have made it.

Before we head off into the weeds with all sorts of opinions, how about some clarification?  I'd be interested in answers to several questions, and suspect others will add more.

o  What sort of distortion levels and signal to noise ratio are you wanting to achieve?

o  What level of desired signal will you be able to deliver to the receiver's input terminals?  Will it be strong enough, and free enough from multipath, to make the desired distortion and SNR practical?

o  What levels and relative frequencies will strong potentially interfering signals be?  --  Let's hope there's nothing significant on

an adjacent channel, and nothing really big on alternate channels
(+/-400kHz).

o  How skilled are you in RF and digital construction, and what tools
do you have available for design, construction and turn-on/alignment?

o  Do you want the receiver to be portable and battery-powered, or can
it be relatively large and line/mains powered?

(o  Why would you not just buy a good FM tuner, and perhaps just build
a preselector if alternate-channel stations were a problem?)

Cheers,
Tom

What is your budget?

You probably should look into cuing transmitters, as used for IFB to
newscasters and the like.  Vega makes a very popular system.

You may also be able to use one of the assisted listening systems that
work on the 72 MHz band (not the infrared ones).  This will be more wideband
and may be cheaper.

For about the last 15 years I have been listening to NPR at 89.5 MHz while riding my bike for an hour or two on nice days.  There are several locations where many radios don't receive  and  lose the station and sometimes capture another close station.  I've been buying used portables at garage sales for $10.00 or less and comparing their performance.  So far I haven't found any of the Walkmans or Sports radios that are acceptable and to date the best has been a Sony ICF-34, much better than my Grundig Yacht Boy 400, but I can't risk it to try my Sony 2010.   I've built and/or modified many radios and often thought about trying to make a better 89.5 radio but I don't think there's anyway I can beat the commercial jobs especially when I can get them for $10.00 or less.  Generally I prefer not to use headphones and instead fasten the portable to my handlebars so I can hear the radio and local sounds.  The radios take a pretty good beating but few have failed from the vibration or minor crashes.
In the past I've lived in somewhat remote locations where I couldn't get the stations I wanted and the best solution was a good antenna with directivity and gain as high up as you can get it!  But I can't do that on my bike.
However if you come up with a good home brew solution please let me know.

Alrighty then.

Why?

The original message was posted to *one* newsgroup (rec.radio.broadcasting) - unless it was multiposted to other groups that I didn't catch. As far as the URL is concerned, I post RRB submissions manually and don't typically bother checking URLs. The subject matter of the CafePress site to which the original URL forwards is NOT off-topic for rec.radio.broadcasting. I'll grant that it doesn't seem to actually be anything besides a cheap effort to sell T-shirts, but it wasn't off-topic.

What am I missing here?

I'm unsure on the budget for the transmitter - it will cost what it costs - but I want the receiving unit to be as low cost as possible

I lived in the Albany, NY area for many years, back when there were not too many local FM stations there (that is, the 1970's and early 1980's). I used an audiophile FM tuner board and a roof-mount Yagi FM antenna. Most of the local stations were southwest of my home. In any other direction but the southwest, I regularly pulled in stations up to 120 miles away. More distant stations were hit and miss, depending on tropospheric bending, etc. If your area is not saturated with local stations, you should have no trouble with a similar arrangement.

I am oging to implement a weather band receiver using a DSP chip.
Tunner is available. But i can not find too much information about
weather band. Could any one tell me the modulation method of weather
band and give me some useful link about the detail of weather band.

Thanks in advance

What is the latest on the move & upgrade of KBOC 98.3 Bridgeport, TX to the
Metroplex area?
I would appreciate any available information.

The C2CAM site has a page with all the affilliates listed, the ones with websites have links. Knock yourself out.

It's just wideband FM.  If you can pick up FM broadcast, you can just
slide that LO up a few MHz and get weather band.

Weather Band is FM -- 162.55 and adjacent frequencies I believe.

Just follow the links on:
http://www.nws.noaa.gov/nwr/
I didn't see any technical data listed through a brief browsing, but I only looked for a couple of minutes. You could probably contact someone somewhere there and get any details of data transmission protocols you might want.

The broadcasts seem to be NFM rather than WFM.

Seven frequencies are assigned to NWS: Think they start at 162.400

Steve

For anyone interested, here's a reminder of upcoming DX tests; if anyone has any additions or corrections, please contact me. (BE SURE TO NOTE THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Daily, from 2:55am-3:05am EST - WRIB-1220, Providence, RI - This test is scheduled to run "through at least April (2004) and possibly into May".

Sunday, March 28, 2004 - KEVA-1240, Evanston, WY 1:00-2:00 am MST (3:00-4:00 am EST).

Monday, March 29, 2004 - WXHL-1550, Elkton, MD 12:01-1:00 am EST.
E-mail:d_oetting@hotmail.com
Phone:410-398-3883

Thursday, April 1, 2004 - WTBQ-1110, Warwick, NY 5:15-6:00am EST.
WWW: http://www.wtbq.com

Sunday, April 11, 2004 - WNNR-970, Jacksonville, FL 12:00-1:00 am EST.

E-mail:wgsr1570@nrcdxas.org

Please remember, what's listed as being on, say, Monday *may* be what you
think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message letting
me know, and please, drop the station personnel a note, via e-mail or snail
mail, thanking them for running the test! Also, for brevity's sake, I
didn't post the QSL addresses; if you need these, let me know!

Lynn.

I have XM and the Talk Radio is better with FREE AM
XM does not have any good host except Hannity.
The open road would be good if they dumped Bozo.
He makes us all look like dumbies.

Note to moderator:  Yes, unfortunately this guy is for real.  He lives in

New Jersey...that might explain his addled brain (all the toxic fumes in
the air in that state).

Pfft, that can't be it, I have family in northern New Jersey (just outside
NYC) and there's nothing wrong with them. :)

Of course, southern NJ is a different matter altogether - my one memory of
Camden, collected while driving between Philadelphia and Atlantic City, is

not very pleasant. Mmm, actually, not sure whether it was Camden or Cherry Hill (it was 13 years ago), but the drive through whichever city it was was horrible; the place stunk. One would hope that they've cleaned things up by now...

Anyhow, I don't think that toxic fumes are necessarily to blame... this guy sounds like he has a lot of unrelated issues...

You were probably in Camden.  What you likely smelled was the result of industrial pollution that has to this day not been adequately cleaned up. Of course if you were driving by Campbell Soup, no comment.

We just would like to remind you that we have broadcasts for sale of actual Radio shows of Top 40 Radio of the 1950's and 1960's.  These shows include the music, ads and news and some even dedications from the broadcast of that day. Many of these broadcasts are quite rare and have been digitally remastered and placed on CD.
These shows go to continue and pay for the fees of our broadcasts and 100% Satisfaction is guaranteed.

We are busy continuously attempting to add more shows as time goes by and we invite you to check out our Rock-it Radio Music Store at:
http://www.palmsradio.com/store.html

Currently we have the following broadcasts for sale.

1. Alan Freed on WINS New York on 3/5/1955
2. Alan Freed on WABC New York on 11/5/1959
3. Ultra Rare Alan Freed Broadcasts - Series of 3 Rare Radio Broadcasts of the 1950's.
4. Mad Daddy Pete Myers at WJW in Cleveland -- November ?, 1958
5. Bill Balance on KFWB Los Angeles - 8/18/1959
6. Elliot Field on KFWB Los Angeles - 1/6/1961
7. Real Don Steele on KISN Portland, Oregon - 1/23/1964
8. Real Don Steele on KHJ Radio - Los Angeles - 1/21/1966
9. B. Mitchel Reed on KFWB Los Angeles -- 2/7/1963
10. Casey Kasem on KRLA Radio Los Angeles -- 5/27/1965
11. NEW - Classic Soul Radio -- featuring Jim Randolph at KGFJ Los Angeles on 4/28/1966; Herb Kent from WVOH in Chicago on 4/7/1970 & Wolfman Jack!!! on XERB Rosarito, Mexico from Dec. 1966
12. Top 40 Countdown from 4BC Radio - Brisbane Australia from Nov. 1979

---> Coming later this week -- Legends of New York Radio of the 60's.
featuring Murray the K and others.

*** Special Exclusive Broadcasts of Rock-it Radio ***

1. Hunter Hancock with Lane Quigley - After 32 years of Retirement Hunter Hancock comes in front of the Microphone and does a 90 minute show exclusively for Rock-it Radio. Features tons of 50's R&B tunes that he played back in the 50's for KGFJ in Los Angeles

2. Tribute to Johnny Cash -- Rock-it Radio show #764 Features Bennie Dingo playing a tribute to Johnny Cash on the morning of him passing away -- featuring primarily his Rockabilly SUN Record Recordings in Cash's early years.

If you would like to remember how Radio used to be in Top 40 Radio or would like to learn how Radio used to be, these shows are a blast to listen to just for the ads alone!

For a complete playlist on these shows you can check them out at:
http://www.palmsradio.com/store.html

Thank you for your support and all the best,

Bennie Dingo

We are setting up a small narrowcast radio station in our town (Kyogle Australia) and are not sure the best software to buy.  I've been looking at Raduga because it looks simple to use which is important because we will have a large group of opperatators who will not all be computer literate.

Any comment about this program or others we should consider?

Lewie

Amateur Radio Newsline=E2=84=A2 Report 1389 =E2=80=93 March 26,  2004

Amateur Radio Newsline report number 1389 with a release date of Friday, =
March
26th, 2004 to follow in 5-4-3-2-1.  =20
=20
The following is a QST.  A popular talk show host says =E2=80=9CNo=E2=80=9D=
 to BPL and
REACT gives its support to the Amber Alert system.  Find out the details =
on
Amateur Radio Newsline report number 1389  coming your way right now.

(Billboard Cart Here)=20
=20
**

THE BPL FIGHT:  ART BELL W6OBB VS. BPL.

If it did not know before, a large portion of the American public is now =
keenly
aware of the danger that Broadband Over Powerline Internet access poses t=
o the
nation's emergency communications infrastructure.  And you can thank radi=
o talk
show host Art Bell, W6OBB, and ARRL President Jim Haynie, W5JBP, for brin=
ging
it to everyone's attention.  Amateur Radio Newsline's Mark Abramowicz, NT=
3V,
had an opportunity to speak with the internationally famous radio talker =
and
has the rest of the story:

--

>From the high desert in the great American Southwest, a call to arms has =
been
sounded.

>From his home base in Pahrump, Nevada, W6OBB - better known to millions o=
f
commercial radio listeners as Art Bell - has called on America to stand u=
p and

fight what he charges is the greatest threat to the nation's security -
Broadband Over Powerline.

Bell charges BPL will cripple the nation's emergency communications backb=
one -
striking at the heart of homeland security.

Bell picked up the charge against BPL during his radio show broadcast Sat=
urday,
March 20 in which he introduced ARRL President Jim Haynie, W5JBP to his
audience.

Haynie and Bell pointed out the BPL interference threat extends far beyon=
d the
amateur bands. Both Haynie and Bell warned that many police and fire comp=
anies,
federal disaster agencies and the FBI and the military would be rendered
helpless if BPL is rolled out across the nation.

Bell says he's especially worried about the potential of another major at=
tack
against the United States and what BPL would do to our nation's ability t=
o
communicate.

"The emergency communications, my God, aircraft, amateur radio, FEMA, any=
 other
emergency agencies that are going to have to rely on HF communications," =
Bell
says.

"We certainly can't depend on satellites. As a matter of fact, if we shou=
ld get
into a conflict, some sort of major conflict the satellites will be the v=
ery
first thing that will go. And minus satellites for communications, we're
dependent on the good old-fashioned shortwave bands, VHF, UHF, the whole
schmear to keep our nation talking. And in a time of national emergency w=
e need
to be able to talk to each other."

Bell says he's appalled at the behavior of the Federal Communications
Commission. He says they're acting like cheerleaders instead of regulator=
s. He
charges corporate greed is driving BPL and ignoring  the studies showing =
the
technology - as proposed on the HF bands - won't work without causing mas=
sive
interference.=20

"I've always had the deepest respect for the Federal Communications
Commission," he says. "However, I think in recent years, there've been a =
lot of

changes at the FCC that include the fact that there aren't so many engine=
ers at
the commission any longer, but there are a lot of bureaucrats."

Bell says he believed after reading the Federal Emergency Management Agen=
cy's
assessment of BPL that the findings would have been enough to shut it dow=
n.

"The FEMA filing was very strong," Bell says. "They essentially said, 'Lo=
ok,
our receivers and transmitters are not going to be able to function with =
BPL in
place.' And, they specified the power levels they would have to go to con=
tinue
to communicate and suggested the taxpayers can't, wouldn't be able to aff=
ord
such changes.

"So, with that kind of filing, frankly when it came out I thought BPL was=
 dead.
Boy was I wrong!"

After doing more research, Bell says he decided to take the case to his
listeners. And he says the only way to do it is to point out the risk to =
their
safety.=20

"I don't think we're going to combat it by saying, 'Save ham radio." The =
public
doesn't care enough and I'm sorry to have to say that, but that's what I
believe," Bell says.=20

"I love ham radio. It's been my life. I've been a ham since I was 12. But=
 the
greater, larger American public just doesn't care enough about ham radio.

"And if they think they can plug in their computer to the wall and have i=
nstant
internet, that's a more attractive idea to them than the guy down the blo=
ck
with a tower in the air."

Bell says his mission is clear: "I do a radio program on 500 radio statio=
ns
nationwide, including the top 50 markets in the U.S., " Bell says. "And I=
'm
going to do everything I can to drive this home as hard as I can that
communications, and certainly ham radio is part of that emergency
communications chain, there's no question about that.

"But emergency communications across the board are threatened by BPL."

Bell says all hams need to wake up and heed his call to action.

"We have to get to the larger media in America and, as hams, we have to m=
ake
the general public, underline the word general public, aware that our eme=
rgency
communications are threatened," Bell says. "The American public remembers=
 9-11.
The American public knows what the continuing threat is.

"We've declared war against terrorism and why would we want to turn aroun=
d and
cripple our effective ability to wage war? And that's exactly what BPL is=
 going
to do."

Bell says if energized with information about BPL's risks to national sec=
urity,
millions of Americans can quickly become allies.

"We need to get the word out to the general public and begin to have them=
 write
to their congressmen, their senator," Bell says. "And that's the only app=
roach
that I see at this point with the juggernaut that is presently underway f=
rom
the Federal Communications Commission and the (BPL) industry, the only wa=
y
we're going to stop it is to make the general public aware of the threat.=
"

Bell says there are other issues, including interference to TV channels 2
through 6, residual noise to the AM radio bands and virtual loss of CB ba=
nds
used by the many truckers who listen to his show. He says there are also
privacy issues, especially the potential of the government and large comp=
anies
to track people and their habits and choices on a BPL system.
=20
For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V in Philadelphia.

--

Bell currently hosts the weekend edition of the Coast to Coast AM.  He al=
so
indicates that his presentation on Saturday, March 20th was only round on=
e.  He
is lining up other guests to talk about the BPL issues in the near future=
.  To
find out when, keep checking the shows website at www.coasttocoastam.com.=
=20
(ARNewsline(tm))

**

## THE BPL FIGHT:  HAM RADIO VS. THE WALL STREET JOURNAL

Meantime, a story in a recent issue of the Wall Street Journal about Amat=
eur
Radio=E2=80=99s stand against BPL is raising the eyre off many in the nat=
ions ham
radio community.  The item appears to take the position that radio amateu=
rs are
alone in opposing BPL.  Also, that their doing do is holding back the flo=
w of
progress in technology. =20

You can judge for yourself by taking your web browser to
http://tinyurl.com/357ye. That is if its still there by the time this new=
scast
goes to air.  (ARNewsline(tm))

**

## RFI: ELECTRIC BLANKETS - A NEW CHAPTER FOR AN OLD PROBLEM

As if BPL was not enough, now there=E2=80=99s another source of RFI to wo=
rry about.=20
Its things that keep us warm.

According to Roy Trumbull writing in the CGC Communicator, RF interferenc=
e from
electric blankets is another problem that can be added to a history of si=
milar
events.  The ones caused by heating pad thermostats and the class of
transformers used for door bells.  Turnbull says that RFI from these devi=
ces
can affect AM reception for quite a distance from the source. =20

Turnbull also adds this interesting aside concerning electric blanket saf=
ety.=20
He says a little noted change in product design took place when there was=
 that
firestorm some years ago over magnetic fields from power lines.  The elec=
tric
blanket makers got a jump on things by switching to twisted pair wiring. =
 This
says Turnbull solved the problem of the significant magnetic fields that =
were
produced by the earlier blanket design.  (CGC)

RESCUE RADIO:  REACT AND THE AMBER ALERT PROGRAM

Ham radio appears to be leaving itself behind in the area of responding t=
o
notices of kidnapped children called Amber Alerts.  Meantime REACT and ot=
her
citizens radio organizations are taking the point position in spreading w=
ord of
these vital searches.  Amateur Radio Newsline=E2=80=99s Bruce Tennant, K6=
PZW, takes a
look at how REACT has gotten involved:

--

Nobody seems to know why hams appear to have no interest in the Amber Ale=
rt
program, but other civic minded radio services are not standing still.  A=
nd the
April issue of Popular Communications magazine is highliting REACT as bei=
ng one
of those jumping in to providing communications for these alerts and sear=
ches.

The magazines Info Central column highlights the activities of REACT team=
s
across Ontario Canada and the northern United States.  This, as they  res=
ponded
 to an Amber Alert issued by the Ontario police after Cecelia Zhang was
abducted in Toronto. =20

Ron McCracken who is past President of REACT told Pop Comm that they were=
 given
details of the alert and were asked to broadcast it on C-B channel 19 to
truckers passing along the highways.  The alert included details of the k=
idnap
vehicle and the victim along with the suspects.

The broadcasts began at about 5:30 in the evening and went on through mid=
night.
 McCracken says that CB radio was combined with computers and e-mail to s=
pread
the word far and wide in a very short time.  This allowed truck drivers a=
ll
along the border to keep an eye out for both the little Cecilia and her

abductor. =20

According to McCracken, this was REACT=E2=80=99s first response to an Amb=
er Alert and
in his estimation it went very well. You can read the full story starting=
 on
page 5 of the April issue of Popular Communications magazine.

For the Amateur Radio Newsline, I=E2=80=99m Bruce Tennant, K6PZW, reporti=
ng.

--

The Amber Alert was created in 1997 as a tribute to 9-year-old Amber Hage=
rman.=20
She was kidnapped and brutally murdered while riding her bicycle in her
hometown of Arlington, Texas. =20

If you want to know more about how you can start an Amber Alert Plan in y=
our
area and involve your radio hobby, it can be found by taking your web bro=
wser
to www.missingkids.com.  Then click on the words Amber Plan.  (PopComm,
ARNewsline(tm))

**

## RESTRUCTURING:  SAN MARINO AND NORWAY EXPAND 40 METERS

Two more nations have gained spectrum at 7 MHz.  Both are in Europe.  Jer=
amy
Boot, G4NJH, in Nottingham in the UK has more:

--=20

Two more European countries have gained access to the 7100 to 7200 kHz se=
gment
of the 40-metre band.  San Marino, T7, has authorised amateur radio opera=
tion
in the 7100 - 7200 kHz band on a Secondary non-interference basis, with e=
ffect
from the 25th of February.=20

The Norwegian Post and Telecommunications Authority has also announced th=
at
Norwegian radio amateurs can use frequencies in the segment 7100 - 7200 k=
Hz
with secondary status starting from the 1st of April.=20

This is in addition to the existing segment 7000 - 7100 kHz where radio
amateurs have primary status. The maximum transmitter output power in the=
 7100

- 7200 segment will be 100 watts in Norway, and the maximum bandwidth 6kH=
z.=20

Jeramy Boot, G4NJH.

--

Croatia was the first European country to expand its 40 meter band.  That
happened last December. (GB2RS)

**

## RESTRUCTURING:  ARRL AND NCVEC PETITIONS ASSIGNED RM=E2=80=99S

Here in the U-S, our FCC has assigned rulemaking numbers to separate peti=
tions
for license restructuring and changes in code requirements filed by the A=
RRL
and the National Council of Volunteer Examiner Coordinators.  The ARRL pe=
tition
has been designated RM-10867 while the NCVEC petition is now RM-10870. =20

Two other petitions were released for comment at the same time - RM-10868=
 was
filed by the Radio Amateur Foundation, and RM-10869 by Ronald Lowrance of
Georgia. Both also seek changes in amateur licensing requirements, partic=
ularly
with relation to the code exam.

All petitions are available online via the FCC's Electronic Comment Filin=
g
System website.  The comment deadline on all four petitions is April 24, =
with
reply comments due 15 days later.  (CQ, W2VU)

**

## ENFORCEMENT:  WARNINGS TO TWO TRUCKING FIRMS ABOUT 10 METER OPS

The FCC has warned the owners of a Bristol Pennsylvania trucking company =
to get
their personnel off of the 10 meter Amateur band or face some expensive
consequences.  In a letter to Cassidy's Express the FCC says that it has
information that one of the company=E2=80=99s tractors pulling a "CAI" tr=
ailer on
Interstates 476 N and 76W in Pennsylvania, was the source of unlicensed r=
adio
transmissions on the 10 meters. =20

The incident took place last October 9th  between 8 AM and 8:30 AM local =
time.=20
The Commission has informed Cassidy's Express that operation of radio
transmitting equipment without a license is a violation of Section 301 of=

 the
Communications Act.  That it could and will subject the operator to fine =
or
imprisonment, as well as seizure of any non-certified radio transmitting
equipment. =20

For those not aware, unlicensed operation carries a fine of $7,500 to $10=
,000
for each instance charged.  A similar letter was sent to CLR Transport of
Saluda, North Carolina  warning of unlicensed 10 meter operation from one=
 of
their trucks on Interstate 85 between Gastonia and Kings Mountain, North
Carolina on July 14, 2003.   (FCC)

**

THE CLUB SCENE:  USS HORNET ARC NOT DISBANDED

Contrary to rumors, the Amateur Radio club that supports museum ship U-S-=
S
Hornet has not been disbanded.  This, according to Tom McGlinn, KO6HA who=
 is
the trustee for the NB6GC callsign and the new president of the USS Horne=
t
Amateur Radio Club.=20

Writing on the QRZ.com websire, McGlin says the original story of the clu=
b
being dissolved is untrue.  He says that the group is still active and ab=
oard
the USS Hornet and that all QSL requests will be handled as in the past. =
Please
direct any inquiries concerning the USS Hornet ARC QSL program to=20
ko6ha@earthlink.net  (QRZ.com)

**

ON THE WEB:  BIG UPGRADE AT QRZ.COM

The servers that provide you the QRZ.com website have been relocated to t=
he
company=E2=80=99s hosting facility in Phoenix, Arizona. The new location =
affords
QRZ.com with 24 hour a day, 7 days a week backup power and a very fast 10
Megabit connection directly to the Internet backbone.=20

QRZ.com owner and administrator Fred Lloyd, AA7BQ, gave special thanks to=
 Chris
Radicke, N7TWW and Mark Krotz, N7MK, who assisted him in transporting the
computers, building the cabinet shelves, pulling cables, and in generally
making the transition go as smooth as silk.  Lloyd says that thanks to so=
me
great prepatory work QRZ.com was out for no more than 2 hours during the

location changeover.  (QRZ.com)

**

### ON THE WEB: WWW.SCOTHAM.NET

WWW.SCOTHAM.NET is a new Internet portal concerning ham radio in Scotland=
. The
aim of the site is to further the interests of Scottish hams in all aspec=
ts of
Amateur Radio. The portal also presents an interesting view of life in Sc=
otland
as it pertains to ham radio.  Again that U-R-L is WWW.SCOTHAM.NET and you=
 will
find it on the World-Wide-Web.  (MM0DFV)

**

### WITH THE HANDI-HAMS:  3905 QSL BUREAU

The Board of Directors of the 3905 Century Club has unanimously approved =
the
establishment of a QSL Bureau and Manager.  This, to support any Handi-Ha=
m
members that wish to participate in the club's nets. =20

Handi-Ham members can use the bureau a number of ways.  This includes the
actual completion of cards for the contacts they make on 3905 Century Clu=
b
nets.=20

The 3905 Century Club has nets on four bands and all modes including SSB,=
 CW
and Digital.  More information, including net schedules can be found at
www.3905.com.  (Handi-Hams)

**

### CONVENTIONS AND HAMFESTS:  ARRL AT NAB IN APRIL

Turning to the ham radio social circuit, the ARRL will be visible at the
upcoming National Association of Broadcasters convention.  Amateurs visit=
ing
the exhibits at the Las Vegas Convention Center are invited to stop by Lo=
bby
Booth 9 where the ARRL will be exhibiting its latest  publications and ot=
her
materials related to the hobby.=20

The booth will be staffed by ARRL national officers and volunteers from t=
he Las
Vegas area headed up by Bill and Carolyn Cornelius.  They are K8XC and K9=
XC

respectively.  The booth will also be able to provide information on the =
April
21st  NAB Ham Radio Reception sponsored by Heil Sound.

Bill Cornelius does have a limited number of complimentary VIP Exhibits P=
asses.
Requests for them go by e-mail to k8xc@aol.com.  (K8XC)

**

## HAMFESTS AND CONVENTIONS:  EMCOMMWEST IN MAY

And word that the combined  EMCOMMWEST 2004 conference and the Reno Sprin=
g
Hamswap is slated for the weekend of May 22nd to the 23rd.  This years th=
eme is
Amateur Radio Emergency Communications in the 21st Century and will featu=
re
appearances by knowledgable guests that include  Dan Miller, N-3-U-F-G fr=
om
ARRL Headquarters.  His presentation will include information on the ARRL
Emergency Communications on-line courses as well as an overview of how am=
ateur
radio interfaces with The Office of Homeland Security. =20

For complete up to date information, location and on-line registration fo=
r
EMCOMMWEST and the Reno Spring Hamswap, take your web browser over to=20
www.emcommwest.org.   Planners say that the site will be updated frequent=
ly
with new information as it becomes available.  (Emmcom West)

**

## BREAK 2

This is ham radio news for today=E2=80=99s radio amateur.  From the Unite=
d States of
America, We are the Amateur Radio Newsline with links to the world from o=
ur
only official website at www.arnewsline.org and being relayed by the volu=
nteer
services of the following radio amateur:

(5 sec pause here)

**

## EMERGING TECHNOLOGY:  PROFESSOR SAYS ISP=E2=80=99S SHOULD POLICE CONTENT

A new cyberspace business plan from a legal scholar says that Internet Se=
rvice
Providers should become cyber cops and force  everyone to pay a royalty f=

ee for
every song, movie or book they download to their personal computers.  Bil=
l
Pasternak, WA6ITF, has the details:

--

Lon Sobel is a professor at Loyola Law School and an expert on copyright =
and
entertainment law.  He says that Internet service providers such as Ameri=
ca
Online and Earthlink must become digital police and send customers monthl=
y
bills based on how much copyrighted material they download. =20

Under Sobel=E2=80=99s plan, consumers who download expensive software suc=
h as Adobe
Photoshop could pay as much as $600, while someone who grabs a single son=
g
could be charged as little as 49 or 50 cents.  These charges would be in
addition to the usual dial-up or broadband monthly connection fees.=20

Critics of the plan include computer experts, Internet service providers =
and --
believe it or not -- the entertainment industry.  Bob Blakley, a computer
scientist and security expert at IBM, says that a clever hacker could wri=
te
computer code that would attaches itself to every piece of copyrighted co=
ntent
on the Internet.  Then it could funnel some of the cost of the download t=
o the
hackers personal bank account.=20
  =20
Blakley and others say peoples attitudes is one of the biggest challenges=
 in
digital rights management .  That an entire generation of consumers has b=
ecome
used to free music and other content posted on the Internet.  He says tha=
t they
will do anything it takes to get content for free.  This includes breakin=
g the
law to avoid paying $10 to $20 for a compact disc, DVD or electronic book=
. =20

For the Amateur Radio Newsline, I=E2=80=99m Bill Pasternak, WA6ITF

--

A senior executive at Verizon Communications is quoted as saying  that In=
ternet
service providers will reject the plan noting that few companies could ke=
ep
track of every downloaded item or determine the value of every file passi=

ng
through their system.  (Published news reports)

**

## WORLDBEAT - CANADA:  NEW CONTEST MANAGERS

Radio Amateurs of Canada has announced the appointment of Sam Ferris VE5S=
F,
Bart Ritchie VE5CPU and Bruce Rattray VE5RC as managers for the Canada Wi=
nter
and Canada Day contests. They replace retiring managers David Shipman, VE=
7CFD
and the Moncton Seniors Amateur Radio Club who have performed this duty f=
or the
past several years.  (RAC)

**

## WORLDBEAT -NEW ZEALAND:  NZART COUNCIL APPOINTMENTS

NZART President Peter Norden, ZL2SJ, has announced the appointment of Noe=
l
Rowe, ZL3GR, to society=E2=80=99s Council.  Rove is a second term council=
or having
served previously in the 1990=E2=80=99s.  He replaces Ted Minchin, ZL1MT,=
 who
resigned for personal reasons.

Another Council appointment is that of Joe Reed, ZL2AH who volunteered to=
 take
on the tasks of Reciprocal License Bureau Manger.  He replaces the late R=
uss
Garlick, ZL3AAA.  (NZART)

**

## HAM RADIO IN SPACE:  K6DUE MEMORIAL ARISS EVENT QSL CARD UPDATE

Hams waiting for QSL cards from the K6DUE Memorial operating event, pleas=
e
listen up.  Frank Bauer, KA3HDO, who is ARISS International Chairman says=
 in
order to save postage costs, the process being used for the special event
certificates is this.  The various regions such as Europe, Canada, USA, R=
ussia
and=20
Japan are collecting the QSLs and generating  compiled lists of names and
callsigns.  These lists are then used to print the certificates and retur=
n them
to the regions for direct distribution.  Bauer asks that everyone be pati=
ent,

indicating that it will be well worth the wait.  (KA3HDO)

** =20

DX

In D-X, three German operators will be active as A35DA, A35DH and A35DJ f=
rom
Fafa Island in Tonga through the 29th of March.  Activity is on all bands=
 from
80 to 10 meters on SSB, PSK 31 and RTTY. QSL as directed on the air.

Also, word that KE2SP is active on 10 through 20 meters from the island o=
f
Hydra.  This, as  SV8 stroke KE2SP.  He will be there until the 15th of J=
une.
The island counts as EU-075 for the Islands on the Air awards program.

And the Ohio Penn D-X Newsletter reports that ZL1CT is planning to be act=
ive
fro Chatham as ZL7V.  This, from July 5th to the 15th.  Activity will be =
on 80,
40, 30 and 20 meters using CW and SSB.  QSL this one via N3SL. =20

(Above from various DX news sources)

**

THAT FINAL ITEM: A HAMVENTION 2004 RADIO ROAD INFORMATION SERVICE

And finally this week, if you plan to drive to this years Hamvention, the=
re
will be a special service to make your trip a bit more pleasant.  This as
Information Radio in Dayton, Ohio announces plans to provide Road to Hamv=
ention
announcements on Highway Radio 1610 AM.  As you might expect, 1610 Kilohe=
rrtz
is the frequency and the person behind the idea is Norm Schrein, KA8PGJ.

--

Schrein=E2=80=9D  =E2=80=9CFor Hamvention, we are planning on putting som=
e information in
regard to directions to the Hara and hours  of the hamfest itself.  Peopl=
e
coming into town can obviously get information via the ham repeaters, but=
 we
may be hitting people who aren=E2=80=99t hams at all or who do not have A=
mateur Radio
equipment but who will pick this up in the loop and take in the hamfest.=E2=
=80=9D

--

Information Radio is a service provided by the Emergency Communications C=
enter
Incorporated.  This is a not for profit organization with which Schrein i=
s
associated.  He says that stations like this are a lot more common than m=
any
people realize:

--

Schrein:  =E2=80=9C530 Khz is where to find a lot of the stations like th=
is and then
about 1610 through about 1700 Khz you will find a lot of these travelers
information stations as well.  A lot of them tend to be site specific.  T=
hat
is, if you go through Pennsylvania, you may hear something about one of t=
he
state or national parks or involving the roadways if its run by the Dept.=
 of
Transportation.  Where ours is a little unique is that it is kind of all
encompassing.  It covers everything happening in the Dayton area from loc=
al
parks and recreationb to people having a parade to events like the
Hamvention.=E2=80=9D

--

Schrein says that anytime you are headed to the Dayton area be sure to tu=
ne
your car radio to 1610 kilohertz.  Whether its trying to find your way in=
to
town or heading to the HARA Arena for Hamvention 2004, Information Radio =
will
be there to serve you.

More information on information radio stations can be heard on this weeks=
 Rain
Report.  Its at www.rainreport.com or landline at 847-827-7246.  (ARNewsl=
ine
(TM))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magaz=
ine,
the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and
Australia's Q-News, that's all from the Amateur Radio Newsline(tm).  Our =
e-mail
address is newsline @arnewsline.org.  More information is available at Am=
ateur

Radio Newsline's(tm) only official website located at www.arnewsline.org.=

Pure opinion
I like 165 and 166. Especially Dave Ramsey. Also David Lawrence on 152. John and Jeff are tolerable overnight. Phil Hendrie is funny in small doses.

Ever listen to Janet Parshall on 170? Daytime 2-5pm eastern.

also
http://www.kfi640.com/main.html

Phil Hendrie streams can be found on this page, and many of them carry
C2C also. I can only pickup one talk radio station in my house. If a
ball game pre-empts I HAVE to use streaming if I want to hear Hannity,
Hendrie, etc. I'm ready to get XM, though.

Very long feature just finished on "Broadcasting House" on Radio 4 this morning , about right wing and left wing stations in the US and the up and coming liberal station.

Played air checks of various broadcasters.

Are these what used to be called shock jocks? They are more shocking than ours in the UK!

Rush Limbaugh seems to be in a sad state, his catchphrase is "Talent on loan from God"!

G Gordon Liddy seems very opinionated.

I quote from the programme "radio is to the right".

I wonder if the new station, Air America,  will be welcomed to widen the dialogue. Will advertisers aim to the liberal market?

Mike

Among a HUGE batch of major-change and new-station applications recently released by the FCC is the application of WWVA-1170 (Wheeling, WV) to move to Stow, Ohio.

Grant of said application would require that something happen to WCUE-1150 in Cuyahoga Falls.  Power reductions and/or pattern changes wouldn't cut it, as Stow and Cuyahoga Falls *border on each other* - you couldn't obtain a pattern tight enough to provide city-grade throughout Stow without leaking enough into Cuyahoga Falls to interfere.  And vice-versa.

I see no applications from WCUE in the database.  In any case, I thought the FCC summarily dismissed contingent applications?  (applications whose grant is contingent on the grant of some other application)  I.e., WWVA's application would *have* to be dismissed unless WCUE is first granted a frequency change or move to a new city-of-license.

On the other hand, I'm sure the engineering study for WWVA wasn't cheap - and Clear Channel isn't known for wasting money filing impossible technical changes.  Obviously they've found *some* way they expect to get this change through.

I wonder if anyone knows *how*?

What is not widely publicized about this new network is that it's on a
bunch of technically-weak stations.  None of them are competitive, from
a signal standpoint, with the stations that air the right-of-center
programs.

No, "shock jocks" refer to attempts to shock with sexual innuendo.
"Shock" announcers generally don't have any particular political agenda.

IMHO advertisers will buy any program that people who buy their products
listen to.

www.winamp.com

Download the crossfading plugins and leveling plugins for it, too. I'm using SqrSoft Advanced Crossfading and it runs the RockSteady compander plugin so it can override the leveling when crossfading from one song to another.

Just put 500 hours of programming into the playlist and walk away....(c;  Runs smooth as glass and has never crashed Win98SE on an old slow 533 Mhz HP 8495.

Did anyone mention it's free?

I think "Wiseguy's" error is in failing to close the deal before he made the flight.
If Ms Banks said "I'd love to talk with you", then why didn't Wiseguy ask for an appointment right then and there?  At that point, since the opportunity was "one in a lifetime" it may have been in his favor to be willing to make the trip on his dime....but making the trip in the absence of an allotted time to "talk", calling only once he was in town, demonstrated that he's both impulsive and immature, and unable to formulate and execute a successful plan to achieve his goal.  And what if she were out of town when he arrived?  That would scare me as much as any stalker would.

Under the circumstances, if I were in a similar position to hire, and even if "Wiseguy" was my favorite candidate, he'd go to the bottom of my list, if not fall off entirely.  I don't need loose cannons on my staff.  Eager, sure, but not so wild that you'd never know what rabbit he'd go chasing the next time one was presented.
Bottom line when looking for a job...don't do anything weird.  It's a guaranteed deselector.

I have the feeling that I'm not getting the whole story here.
Why didn't you make an appointment before you got on the plane?
Did Ms. Banks ask you to fly to Baltimore without one and just show up
at your own convenience?

Most hiring managers, especially in large corporations in major
markets, will pay transportation to the interview for an out-of-town
applicant who interests them. That's certainly been my experience as
an applicant in the past. And yes, managers are "too busy" to just
drop everything for somebody who shows up unexpectedly from out of
town without the courtesy of making an appointment first.

I don't know Christie Banks, and I have no intention of trying to get
a job at her station or anywhere else in that market, but I bet her
side of this story would read a lot differently.

Mark Howell >>

------------------
So Mr. Know It all...
how about the GM from a NYC station WHO CALLED ME some years back. Come on
in..fast get on a plane...we'll reimburse you when you get here. Come see me
first thing in the morning.
Flew in from Chicago...for my "first thing in the morning appointment" and they
guy wouldn't see me...and didn't even have the courtesy to let me see someone
else. I was left hanging at the locked office door.
Didn't get my money back either.
So...what did I do wrong here...huh?
That's this business...I don't think you know it all.
Either that or you're another PBS dude working at my expense and spending most
of your time posting here against real broadcasting folks.

I have to agree. Every job offer I've gotten or job I've applied for has paid my transportation and hotel for the interview. In each case they requested the interview and set the time. They also made all arrangements for plane tickets (I'd pick them up at the airport or they'd mail them to me) and the hotel. My credit card was needed only for the mini-bar, since many companies won't pay for alcohol unless it's part of a business meal.

As a hiring manager in New York I would never have time to interview

someone who just dropped by. I would also not interview someone who
arrived late without calling. I'd simply go on to my next project.

I would never in a million years get on a plane using my own money to
go to a non-scheduled interview. That would be stupid.

Rich

Mark is a many-time award winning journalist at the #1 commercial station in
a very competitive California market. His credentials are unquestionable.

And he posts with his real name, unlike you. No name, moans and ducks.

Er, in case you have not noticed, the show is a parody of everything.

Bleeping "mouth" actually makes the imagination think of something even
worse, pointing out one of the problems of censorship.

You post proves the validity of the idea of requiring a license to be able to listen to the radio.

It sounds like your situation was different than the one detailed earlier in this thread...again, assuming you had an actual appointment.

In the case of the original poster and WARW, it appears - by his own account - the program director told him she'd "love to talk to him" but without any specific time or date.  He took it upon HIMSELF to fly to BWI and basically just dropped in.  No wonder he wasn't given the red carpet!

"I'd love to talk to you."  Fine.  Give me a time and a date, and I'll be there!  Coming out there without a firm appointment was his problem, not the problem of WARW's PD or the station itself.

>That's this business...I don't think you know it all.
>Either that or you're another PBS dude working at my expense and spending most

Mr. Howell is the well-awarded news director of a dominant commercial station in Central California. Do a Google search on his name with the acronym APTRA and you'll pick up a few of 'em.

Hey, there are whackjobs in this business, and some of them have hiring responsibility. But the *usual* experience at reputable broadcast outlets is far from what either of you describe.

Mike

First of all, I've been in commercial broadcasting for 39 years, (never worked for PBS or NPR for that matter) and currently occupy a middle-management position in a top-rated, independently-owned, medium market station.  So much for my bona fides.  Your story seems different from that told by the original poster, who got on the damn plane WITHOUT BEING ASKED!   I never said that nobody gets screwed in this business. I just said the account as posted didn't seem, shall we say, fair and balanced?  There are two sides to every story, probably even yours, but I really don't want to go there.

Mark Howell

Hi group, a quick question. Does the foul language ruling apply to after 9

PM broadcasts on TV? I swear (ar ar) the other night on FOX, they were running "The Shield" and I KNOW I heard one of the detectives on stakeout mutter "shit". For sure they were using gutter language, how can this get by the censors, much less the FCC? Or am I just being naive?
regards,
Tom

[ Moderator's Note: Fox? Are you sure? I thought The Shield was only on F/X, on cable. ]

CLEVELAND, Ohio -- Custom written and recorded newscasts for local radio markets are now available from "The Newscast Network". Presently on the air in Texas, New Mexico, Utah and Idaho, the service gives small stations without news departments the ability to provide a base level of coverage to their local audiences.

The news programming can be customized to match any format and is currently heard on AC, News Talk, Sports Talk, Classic Rock and Country formats.

Network Director Kevin Coan says it gives stations depth, and adds to listener loyalty, which equals sales.

The "virtual" newscasts are uploaded to station FTP servers as mp3 sound files for broadcast, minutes before air.

Monthly "anchoring packages" range from under 500 dollars per month in small markets and up based on market size.

The company also plans to add a National News service during the 3rd quarter of this year. It will allow local stations to maintain their network inventory. The national service will also be available to Low Power FM (LPFM) broadcasters at no charge.

For more information call Coan at 216-410-1954 or visit the website for demo material.

Amateur Radio Newsline(tm) Report 1387 � March 12,  2004

Amateur Radio Newsline report number 1387 with a release date of Friday, March 12th, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.  The FCC says that automatic stations have to avoid willful interference to other hams.  Also, a magazine editor speaks out on restructuring.  Hear the details on Amateur Radio Newsline report number 1387 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW:  AUTOMATIC RESPONSIBILITY FOR ALL HAMS

The FCC says no Amateur Radio stations are exempt from the requirement to avoid unnecessarily interference with ongoing communications.   This includes automated operations.  Amateur Radio Newsline's Rick Johnson, KA9VZD, is in Antioch Illinois with rest of the story:

--

According to the ARRL Letter, FCC rules enforcer Riley Hollingsworth says that it is important for all stations, including automated ones, to realize that they are responsible for any interference caused when they come on top of existing communications  Hollingswoth told the ARRL Letter that an amateur had written to him alleging that what appeared to be automated PACTOR stations that were routinely starting to transmit atop PSK31 QSO's on 40 and 30 meters.

In response, Hollingsworth noted that there are no exemptions for automated stations.  Rather that the Amateur Service rules address interference with other communications.  The rules say that no amateur operator shall willfully or maliciously interfere with or cause interference to any other radio communication or signal.

The amateur who filed the complaint reportedly also contacted one of the PACTOR stations in an effort to develop a dialogue to solve the problem.   Hollingsworth expressed the hope that all involved in the PACTOR versus P-S-K 31 problem can work things out.  He also points out that stations responding to automated interrogations are equally responsible for not causing interference to existing communications.

For the Amateur Radio Newsline, I'm Rick Johnson, KA9VZD, near Chicago.

--

Hollingsworth also issued advisory letters to three hams who operate automated stations to remind them of the rules.  (FCC, ARRL Letter)

**

ENFORCEMENT:  HAM WHO ALLEGEDLY HARASSED POLICE ASKED TO EXPLAIN OR TURN IN HIS LICENSE

The FCC Enforcement Bureau is once again naming names and it has asked one ham to explain why he allegedly transmitted on a public service frequency to harass law enforcement.  Henry Feinberg, K2SSQ, has the rest of the story:

--

In a February 18th letter to Russel A. Brown, N1KHV, of Palmer, Massachusetts the FCC says that it is considering action based on a February 3rd Incident Report from the Monson Police Department and a February 15th Investigatory Report and a Statement.  The latter reportedly was signed by Brown and documents his deliberate operation on Police frequencies without a license.  This, the FCC alleges was an attempt by Brown to interfere with police communications and harass police personnel.

The FCC inquiry makes it clear that the information he submits will be used by the Commission in determining Brown's qualifications to remain a Commission licensee.  The FCC also has given Brown the option of voluntarily submitting his license for cancellation in order to avoid a hearing on the issue. Brown was told to indicate his preference in his response which was due within 20 days of the FCC letter of inquiry being issued.

For the Amateur Radio Newsline, I'm Henry Feinberg, K2SSQ, in New Jersey.

--

The FCC also warned Brown that providing a willfully false or misleading reply would be the subject of a separate enforcement action and could subject him to additional sanctions.  (FCC)

**

## ENFORCEMENT:  CHANGING CALL SIGNS BRINGS FCC INQUIRY

The FCC wants to know why a Tennessee radio amateur keeps changing his call sign.  And, in a February 18th letter it is asking Donald H. Binkley the regulatory agency is asking the Nashville ham to explain why he has been jumping between two calls for the past six years.

According to its letter of inquiry, Binkley currently holds the call K4WX.  The FCC says that license grant was originally made on September 23, 1998.  On June 19, 2000 the FCC says that Binkley filed an application to change his call sign from K4WX to N4ZZ.  That application was granted on July 7, 2000.  Then, on May 15, 2002 Binkley applied to change your his sign from N4ZZ back to K4WX.  That application was granted on June 4, 2002.  Now, Binkley has applied for the N4ZZ call once again and this time his request appears to have raised a proverbial red flag with the FCC.  As a result, the Wireless Telecommunications Bureau has forwarded the latest application to the enforcement folks for follow-up and review.

In his letter to Binkley,  FCC rules enforcer Riley Hollingsworth says that these ongoing applications raise questions about apparent abuse of the licensing system.   He notes that the Communications Act gives the Commission the authority to request information from licensees and applicants regarding their applications and operation of their radio stations.   And that's just what he is doing with Binkley,

He has told K4WX to respond stating his intentions regarding the filing of these applications.  He also told Binkley to let his office know which of the two call signs he wants to keep.  Binkley was given the usual 20 days from the date of the FCC's letter to respond.  (FCC)

**

## RESTRUCTURING:  AN EDITOR SPEAKS OUT

The editor of a popular ham radio magazine says that his readers have strong opinions on restructuring, and he wants them shared.  In an interview with Amateur Radio Newsline's Mark Abramowicz, NT3V, CQ's Rich Moseson, W2VU, talked on a general level about the various restructuring proposals and about his upcoming C-Q reader survey:

--

CQ's Rich Moseson says there's been an active dialogue going among readers of the magazine since the latest round of amateur radio licensing restructuring proposals landed at the FCC's door:

--

"We have a whole raft of petitions that have been filed with the FCC over the past several months all proposing various things from radical changes to little tweaks from eliminating the code requirements completely to adding new ones," Moseson says. "It's a great opportunity for discussion and for a forum on what the ham community thinks our hobby should look like going into the future."

--

Moseson says despite the diversity of those proposals, he says there seemed to be some consensus emerging among those who submitted comments to the FCC and other forums:

--

"It looked like the majority of those people would agree on a restructuring where the code requirement was kept in place at 5 wpm for Extra," he says.

--

And now that the American Radio Relay League has weighed in with its own proposal - a no-code entry license called the Novice - complete with HF privileges, Moseson says CQ wants to know what readers think.

--

"W5YI's 'Washington Readout' colum is all about the League's proposal in detail and our reader survey for April is also about the League's proposal," Moseson explains. "It's going to be asking our readers what they think of each of the major points of the proposal, whether they agree or disagree or have no opinion. And we'll, of course, be reporting the results of that survey in probably the June issue."

--

Even if you're not a CQ subscriber, you can find a copy at a newstand or bookstore.

Moseson says amateur radio must and has kept in step with the times:

--

"I'm not sure what we're going to come out of this with or what direction it's going to go to, " Moseson says. "But one of the points that I've always made is that if we are going to keep ham radio as a healthy, vital hobby and service then it has to adapt to changing times and the licensing structure has been doing that over the course of many, many years."

--

As to how soon, we might expect action from Washington. Moseson says it's difficult to predict:

--

"My guess would be the earliest that you'd see any kind of a decision from the FCC would be the end of this year, probably more likely about a year from now in the spring of 2005," Moseson says.
--

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Moseson also offered his opinion that even if Morse testing was not included as a requirement for any of the license classes that it wouldn't go away.  He says CW contest entries have grown in recent years.  Thats good news for those advocating long term preservation of the historic mode.  (ARNewsline(tm))

CONVENTIONS:  THE NAB HAM RADIO RECEPTION IN LAS VEGAS NV.

Its only a few weeks until the National Association of Broadcasters holds its 2004 gathering.  One of the major social events that occurs at the NAB convention each year is the `Amateur Radio Reception'. This year will be no exception but for the first time ever this years `Ham Radio Reception' will be hosted by Heil Sound, Limited and its well known owners Bob, K9EID, and Sarah Heil.  They would like to invite any and all amateur radio operators who will be in attendance at the NAB show to join them for this annual fun event.

---
Audio Only:  Hear it at http://www.arnewsline.org
--

Bob and Sarah are promising a fun time.  They are also planning appearances by some of their special friends as well as dozens of attendance prizes that will be given during the two hour reception. This includes several of the new Heil Poline performance microphones autographed by legendary Eagles guitarist Joe Walsh, WB6ACU.

This years NAB Ham Radio Reception takes place Wednesday April 21st, from 6 to 9 P.M. local time.  The venue is the Las Vegas Hilton Hotel, Ballrom B.  Of coarse, thats in Las Vegas, Nevada.  Bob says all that is required to join in the festivities is to bring a smile and your NAB attendance badge for complimentary food and drink.

For more information please feel to contact Bob or Sarah at 618-257-3000 or by e-mail to bob@heilsound.com.  The Heil's say that they hope to see you there.  (ARNewsline(tm))

**

# CONVENTIONS AND HAMFEST TRAVEL TIPS:  TRY FLYING OR TAKE THE BUS

Talking of ham radio social events, its no secret that gasoline prices here in the United States at historically high levels, and the Department of Energy saying to expect prices to go a lot higher.  As a result, many hams are asking the rhetorical question:  Can I afford to go to a major hamfest or convention this year?  Especially one of the big ones like Dayton or NAB.  The answer for the most part is yes, but a lot depends on where you live and how far you have to travel to that show.  Amateur Radio Newsline's Bruce Tennant, K6PZW, explores some alternatives to driving your own car:

--

If your QTH is several hundred miles away from your favorite hamfest and you drive a gas guzzling vehicle like an S-U-V then you may think twice about going this year.  That is, unless you can find an alternative to $3 or more for each gallon of gasoline.  Well, there are currently two very good transportation buys available if you are willing to give up the luxury of a personal vehicle.

Lets take a centrally located city like Dallas, Texas.  There's a big convention every year in the suburb of Arlington that draws exhibitors and attendees from all across the country.  If you live in Houston and plan to attend, its about a 275 mile drive each way.  In an S-U-V that gets 10 to 12 miles to a gallon at the projected $3 a gallon the drive one way will cost about $81 each way or $162 round trip.  Compare that to the $89 round trip currently being offered between the two cities on Delta and Continental airlines.   Want cheaper?  Go greyhound, buy your ticket 7 days in advance and it will only cost you $58 round trip.

And what about Hamvention in Dayton Ohio?  That's coming up in May. Well, its the same thing here.  Using Chicago as your home, the trip is also about 275 miles each way.  To drive will cost about the same but make your reservations now and fly out of Chicago's Midway airport and ATA will take you full circle for about $120.  Go Greyhound and you can go full circle for only $82

Live further way.  Say Los Angeles or San Francisco?  Well, you can really get a bargain.  Fly United Airlines out of Santa Ana California early in the morning with a connection in Chicago and you can go round trip for $255.  By way of comparison, that same ticket a year ago went for about $100 more.  And for you Northern California folks, you can do the trip for $283 out of San Jose on American Trans Air.

And the usual disclaimer here,. The prices we quoted we those showing on Sunday March 8th on several travel websites including greyhound.com and orbitz.com. Since the airlines are notorious for changing prices at a moments notice, these could be gone by the time this newscast goes to air.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

Two final tips that most frequent flyers already know. First, book early. The best prices for flights are usually sold on-line months in advance. Also, keep an eye on all of the Internet based travel discounters and check their prices daily. You never know when a flight or a bus ride to your favorite hamfest may be a lot less expensive than what it costs to drive your vehicle. And you won't have to hunt for a place to park, either. (ARNewsline(tm))

**

## INTERNET SCAMS: ARRL AND RAC E-MAIL BEING SPOOFED

The ARRL and Radio Amateurs of Canada are warning their members and others about bogus or spoofed messages carrying ARRL.net or rac.ca suffixes. Both organizations say that they have been notifoed by people who have received e-mail messages alleging to be from the ARRL E-Mail Forwarding Service or directly from Radio Amateurs of Canada.

The senders of the e-mail encourage you to open the file or an attachment to the e-mail. Don't do it. These messages are false and are the result of one of the variants on a number of viruses now permeating the Internet. The attached file contains variations of worm viruses, MyDoom, Bagle and Netsky. Opening the file could result in your computer being infected. The bottom line: Delete the message and forget you ever got it. Your computer will be a lot safer that way. (ARRL, RAC)

**

## HAM RADIO ADVENTURE: COMMUNICATORS NEEDED FOR CAVEING EXPEDITION

Gulf Coast United States, along with Caribbean, or South America base station operators are needed for communication on the ham bands with a scientific expedition. This, in July through August time frame.

The 60 day expedition will explore deep caves in the high Andes mountains and jungle in the western Amazon area of South America. Expedition access to the remote areas is via trekking on foot and pack animal. The expedition will use a solar and battery powered 20 Watt backpack transceiver. Antennas will be a wire dipole or vertical. A miniature notebook computer will be along for digital operations.

Communications will consist of position reports, some short messages with families of expedition members, and any possible emergency or medical messages. All operation will be non-commercial.

Operators with good base stations, efficient antennas and low noise locations are needed on the 40 through 15 meter amateur bands. The operations will use SSB, CW and a variety of digital modes. If you are interested, e-mail Bonnie Crystal, KQ6XA, at radioadventure@aol.com. (KC5FM, KQ6XA)

**

PUBLIC SERVICE: BAKER TO VEGAS FOOTRACE NEEDS YOUR HELP

Also in need of ham radio communicators is the famed Baker to Vegas Challenge Cup Relay race. Baker is Baker California and of coarse Vegas refers to Las Vegas, Nevada.

This year's foot race for teams from Law Enforcement Agencies takes place on April 24 th and 25, starting near Baker, traveling along State Route 127. The race then continues through radio show host Art Bell, W6OBB's hometown of Pahrump, Nevada and finishes up in Las Vegas.

For years, Amateur Radio has played an important role in the annual event. If you or your group is interested in helping with communications, please visit www.bakertovegas.com on the world-wide-web, to sign up. (Via e-mail)

RADIO LAW: CONGRESS ON ITS WAY TO INCVREASING INDECENCY PENALTIES AGAINST BROADCASTERS

Federal legislators are inching closer to increasing the penalties against broadcasters who permit indecent or obscene material to hit the public airwaves. This, as the House and Senate Commerce committees pass bills that would sharply boost fines of television and radio broadcasters who violate indecency regulations.

The U.S. House of Representatives measure increases fines to as much as $500,000 per violation from the current $27,500 per violation level. That version also contains a so-called three strikes provision that would require the FCC to hold a hearing to determine whether a broadcast license should be revoked after three violations take place. It also permits the FCC to weigh heftier penalties against the person who actually utters indecent material on the air as well as the ability to go after the network that broadcast the material in addition to the individual stations. Right now, the FCC can only fine the licensed station that aired the material and has limited ability to penalize the person who said it.

Current FCC rules limit indecent material presented in a patently offensive manner to late night hours, when children are less likely to be a part of the listening or viewing audience. In some past instances the broadcast standard has been applied to obsenity and indecency issues in private radio including the Amateur service. Newsline attempted to find out if new and higher penalties directed by Congress might be applied to ham radio. We were told that at this point, the FCC's and Congressional actions are directed at the "broadcasters" and not at Amateur Radio. (Published news reports)

**

## HAM RADIO BUSINESS:  QRZ.COM HAS T1 TROUBLE

If you tried to access the QRZ.com website late on Thursday March 4th you probably found it down.  The sites owner, Fred Lloyd, AA7BQ, reports that around 1800 UTC both of the dual T1 lines that supply the sites 3 Megabit feed to the Internet went down.

According to Lloyd, the sites network is supplier is Cable & Wireless and his location is served by two leased high-speed lines by the local phone company, Qwest. The Qwest lines connect the Arizona based QRZ.com servers to the Cable & Wireless location in downtown Phoenix.

About 2 hours after the outage was reported on Thursday, one of the lines was repaired and brought back up.  For reasons unknown to Lloyd, the second T1 line has not been brought back up.  Now, however, instead of a Qwest problem, it appears that the second line was intentionally disconnected by Cable & Wireless.  Lloyd says that Cable & Wireless is currently pulling out of some of the less profitable market areas.  Apparently, QRZ was mistakenly disconnected from the grid even though Lloyd had previously been assured that Cable & Wireless is not pulling out of his market.  This put Q-R-Zeds back at 1.5 Megabits.  That's the same speed that they were for years before the upgrade last December.  (QRZ.com)

**

## WORLDBEAT:  MOTOROLA DONATES RADIOS TO VK EMERGENCY CORPS

Communication is set to improve for one of Australia's most remote indigenous Army Cadet Units following the donation of 24 state-of-the-art two way radio's by Motorola Australia. The company presented the radios destined for the Bamaga Cadet Unit in Far North Queensland to the Australian  Parliamentary Secretary for the  Minister of Defence , Fran Bailey , at a recent ceremony in Melbourne.  Bailey said that she was delighted with the generous support shown by Motorola and acknowledged the contribution the company has made to the nations Indigenous Participation Project.  The Bamaga Cadet Unit comprises Two Adult Officers and about 15  cadets.  Bamaga is located the tip of Northern Queensland and is one of the most remote parts of Australia.  (Q-News)

**

## WORLDBEAT:  TOWARD RESOLVING THE MEXICO - US 560, 780 & 920 KHZ

## BORDER SITUATIONS

An update on the radio border war developing between Mexico and the United States as we reported a few weeks ago. According to Joseph Berring in a letter to the CGC Communicator, the alleged problems caused by the Mexican broadcasters on 560, 780 and 920 kHz has become a top priority for both the U.S. FCC and the State Dept. as well as for the Mexican Administration.

According to Berring, top U.S. officials recently met with their Mexican counterparts in Mexico City. Berring observes that despite the controversy and problems that have arisen, Mexico's position has been very clear and unwavering. That being existing bilateral agreements are valid and they have not been violated. Additionally, Mexico seems to have some complaints of its own regarding U.S. stations.

The United States position is obviously a bit different. Not only does the US administration feel that there are clear violations, but that there are specific sidebar agreements dating as far back as 1996 that address the issues at hand.

Berring, who is a consultant on United States and Mexico border issues says to stay tuned. It should prove interesting. (CGC)

**

## WORLDBEAT: AN ECUADOR DIPLOMA FOR YOU

A new Republic of Ecuador "Equatorial Line Diploma" for contacting stations at a latitude of zero degrees is being issued by the DX-TA-SEA DX CLUB, This multicolored certificate is awarded to Amateur Radio Operators and Short Wave Listeners for confirming contacts with the 20 different Ecuadorean HC and HD prefix areas. This award was developed to recognize past Amateur Radio activities from Ecuador. More information is available from Dr. Rick Dorsch, NE8Z, P.O. BOX 616, Hamburg Michigan. The zipcode is 48139. (NE8Z)

**

## WORLDBEAT: SOTA EXPANDS TO GERMANY

According to the RSGB, the 'Summits on the Air' - or 'SOTA' - awards program has announced that the Alpine region of Germany is the latest geographic area embrace this awards project.

The Alpine SOTA program began operation on March 1st and is already being heralded as a success. The parent 'Summits on the Air' program began in 2002 . Since then there have been over 2000 hilltop activations and 15,000 contacts made. (GB2RS)

**

DX

In D-X, word that GM4YXI, is active portable 9M2 from Kuala Lumpur through the 29th of March. He also plans to operate from one or two Islands On The Air island groups. Look for him on 20, 17 and 15 metres and maybe 12 and 10 metres CW and SSB. (GB2RS)

And PA3GIO will be active slash HI9 from the Dominican Republic through March 18th. Look for his signal on 80 through 10 meter SSB. (GB2RS)

**

THAT FINAL ITEM: TRANSMITTING DATA FROM MARS - AND CONSERVING ENERGY

And finally this week, were you aware that the pair of Mars Rovers now exploring the red planet actually have two ways to send data back to Earth? They can send it direct or indirect. Bill Pasternak, WA6ITF, has more:

--

As you might expect, direct entails using the rovers own high-powered microwave systems and using up a lot of very precious power reserves. Kind of like making a long distance contact on 2 meter FM simplex. You can do it but you need high power and a very directional antenna.

The indirect method uses low-powered UHF links to relay the data to orbiting satellites. These satellites then use their high-powered transmitters to beam the data back to scientists. Thats not much diferent than working a long distance on 2 meters, but doing it with an H-T through your favorite repeater.

To save energy on the solar powered rovers, the UHF relay method is preferred. As of February 18th, the two rovers had sent 10 billion bits of data from Mars to Earth. Of this, only 18% of that data was transmitted directly. The rest was relayed through the Mars Odyssey and Mars Global Surveyor satellites.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

The rest of the story can be found on the web at www.wired.com/news/print/0,1294,62409,00.html (CGC)

Huh?  WWVH in Lihue used to come in five and nine everywhere in Hawaii.
On AM car radios, tape recorders, sometimes even rice cookers.

"The Shield" runs on the cable channel FX, NOT the OTA network Fox...and yes, the rules are less stringent for cable, since the customer directly pays for the service.

Ms Banks was aware of my intention to come to DC to speak with her, the timeframe was narrowed down to within a couple of days.

I'd love to hear Ms Banks side as well.

This was not one communication, but several, both email and phone, up to the day I left Oklahoma bound for Maryland when the last correspondance was "call me when you get to town"  there were no communications problems until I got to Maryland.

There was nothing "impulsive" about my actions as I expressed emphiaticly before flying to Maryland, I have wanted to return to the DC area for many years, it is where I grew up. For whatever reason the carrot was explicitly dangled, I took the bait and jumped through the hoop. Based on my experience it sure looks to me like I was down the list as far as candidates, but usefull as a bargaining chip to haggle a lower salary for candidate number one.

On a more positive note I found out yesterday that Micheal Hughes is now OM for the Infinity DC area cluster. I worked with him at KLOL in Houston, and tried to contact him when he was in Atlanta before I left for Maryland last year. I would routinely ask him about WWDC when he was programming it.

Are there any companies out there which basically do the same thing Arbitron does? Does Arbitron have any competitors?

That was one of the possibilities I'm willing to explore.

We shall see whether Phil reads any listener mails tonight complaining
about this latest level of censorship.

As I wrote:

> is Hendrie forcing the issue himself?

Obviously, I didn't make my meaning plain enough for you to understand it.

As the moderator correctly notes, "The Shield" is on F/X, not Fox.  As a cable channel, it is not covered by the FCC's indecency rules.  Those rules apply to broadcast channels only, and designate a "safe harbor" when indecent material can be ran -- after 10 PM and before 6 AM.

What audio processing gives the ``classical announcer boom'' to classical music stations?  Columbus Ohio has the same ``Radio Station of the New York Times'' sound on their announcer.  It can't be that people actually sound that way in real life, that work in classical stations.

I mean you won't be behind somebody at Kroger and discover that he announces classical music by listening to him talk to the cashier.

Hoffnung had a cartoon of an opera basso with an electronic ``wobble'' adjustment on his chest; perhaps there is a similar attachment for classical announcers?  ``bass boom'' box.

If there is such an attachment, why don't DJs use it too?

I agree with whoever said WWVH in Hawii is l/c and on same status
as wwv in Colorado, so these "skyscan" clocks should perform as
specified.  I found though that my latest one will keep time
right to the second for a period of time, the I have to move it upstairs
where reception is better and leave it there for 24 hours.  Once
reset to exact time tick I again put downstairs in the shack and its
good for another momth or so.  I fail to see how the clock reader
can discriminate between WWVH (on Kauai) and WWV  in Colorado.

                Joe (aka kilroy)

That may be the case Scott, but the 'atomic clocks' they are speaking of use
the WWVB signal from Ft. Collins, Colorado on 60 KHz to set their time
automatically.

That signal may indeed not be propagating well enough to be of use in Hawaii.

In small markets, there is one alternative.

> Does Arbitron have any competitors?

Not now. In the past, since they started the current radio diary survey in about 1965, we have had The Pulse, C.E. Hooper, Mediastat, Mediatrend, Burke, Audits & Surveys, Birch. None won advertiser acceptance, or, in the case of the first two, lost it due to mythology concerns.

In major markets, and among major advertisers, Arbitron has nearly universal acceptance.

But most atomic clocks use WWVB on 60 khz out of Fort Collins. WWVH, to
my knowledge, only uses HF freqs (5, 10, 15 Mhz). But yeah, I'm sure the
rice keeps better time than the people who eat it. :)

I heard the LuaLuaLei transmitter a lot, but not WWVH, when I lived there.
500kW or 1MW IIRC, somewhere around 24kHz.

The topic is WWVB, the binary signal.  WWVH is the voice signal, which an
autosetting clock will not understand.

Here's notice of an upcoming DX test...

PLEASE NOTE: Even if you don't hear a test, be sure and drop a card, letter, or e-mail to the station personnel, thanking them for going to the trouble to run a test!

Thursday, April 1, 2004 - WTBQ-1110, Warwick, NY will conduct a DX test from 5:15 - 6:00 am EST. The test will feature novelty music and Morse code IDs.

Reception reports may be sent to:

Mr. Rob McLean - Program Director
WTBQ-AM
62 N. Main St.
Florida, NY 10921

WWW: http://www.wtbq.com

(Arranged by Rob McLean of WTBQ.)

Also, if you hear a test, PLEASE, PLEASE let me know, via either e-mail or in rec.radio.shortwave! And if you send a reception report to a station, please remember to include return postage with your report...

Lynn.

There used to be a company, _ Pulse Incorporated _  back in the sixties and seventies that produced a book here in Louisville. I don't know whether they are around anymore. I do know that their ratings and Arbitron's were always being compared by the two local r&r stations, WAKY and WKLO. Oh God, what ratings games they played! It was FUN top 40 radio back then. Louisville was a break out market and with two stations vying for those teen and YA bucks, we heard new music weeks before they were playing it on other stations.

/regards,
Tom

They don't use WWV or WWVH. They use WWVB 60 kHz out of Fort Collins.

I thought WWVH also had BCD data a couple times an hour?  Or has that been
stopped along with the Omega navigation beacons?

Is there no VLF facility in Hawaii comparable to WWVB?

WWVH is the 2.5, 5, 10, 15, and 20 MHz voice and data transmitter, it's on
exactly the same freq as WWV in Ft Collins.  If you listen, there's a
silence before the guy on WWV speaks, that's for the lady from WWVH to talk
first. (very polite :)

The clocks use WWVB which is a 60 khz signal.
Interference from LuaLuaLei may make that impossible to pick up.
There also used to be a Loran transmitter around 100kHz IIRC, on the north
shore of Oahu, but they may have taken that down now.

They do.

I heard Gary Owens live once, without any amplification.  And he sounded just like Gary Owens.

Hey all,

I apologize for being slow to push Airwaves articles through over the past couple days. I caught a nasty cold that had me laid up for a few days.

I am now back on track and posting articles in a reasonable amount of time.

In other news, you should expect some temporary difficulty getting stuff posted this weekend because I am moving the server that handles the moderator's mailbox. It's not a major move; all we have to do is move the computer to another colo facility and change IP addresses. However, if your post does not go through within 24 hours this weekend, I would strongly suggest resubmitting it.

Also, I will be off the net for a day or two when my baby is born (sometime in the next three weeks). The baby hasn't been cooperating with us when we ask it for information (like when we try to do an ultrasound and it flips over on its tummy :) so I'm not about to ask it when it's coming out. The due date is April 9th.

The data sent on 60 kHz by WWVB isn't transmitted by WWVH.  Here's a
chart of the coverage areas of WWVB and it looks like it has a decent
chance of being received in KH6-land at certain hours, like 0800 UTC.
http://www.boulder.nist.gov/timefreq/stations/wwvbcoverage.htm

They do.

No.

Hi Mike:

Gave it a quick listen and liked your music selection. The good old WABC jimgles reminded me of many, many hours spent listening to 770 at night in Southwestern Ontario during the 60's when WABC's signal was always exceptionally strong. Those nights spent listening to Bruce Morrow and Scott Muni really gave me "The Radio Disease."

Unfortunately, despite having DSL, there were numerous "loss of signal" periods due to buffering.

Best wishes on your project.

Lee Smith

How in the hell can the CLOCK detector tell any difference between
the time signal from WWV or WWVH.   They are both on exact same
frequecies, the time tick is identical on both !!!!
              Kokomo Joe
WWVH on Kauai has a consistantly strong signal.  Albeit at times
is totally off the air several times in any given month.

  Yup, that's it. WELW ran (and may still be running) spots for a
while--in fact, what I am about to mention also appears on their web
site, welw.com--in which they made a point of the fact that WMJI plays
only "300 'safe' tracks", while WELW plays every (?) song which used
to be "top 40" on radio from the '50s through the '80s.

I don't know if WMJI has a better signal now or not. I moved to Fairport Harbor over four years ago from Wickliffe; I had to get a special amplified FM antenna for my stereo just to hear some of the Cleveland stations noise-free, and even at that I cannot hear certain stations, such as Mix 106.5, very well. (TV reception here in my apartment is so bad I must have cable to get decent signals. I do not get channel 3 at all on an antenna, and the other two VHF stations are fair to downright poor. Ironically, however, the UHF stations, all but WVIZ [PBS] channel 25, are watchable with good to excellent color pictures. I like having cable, however, because it gives me better reception, more stations to watch, and the fact that I have two PBS stations on the cable here (WVIZ, of course, in Cleveland, plus WEAO 49 in Akron) which allow me to watch certain shows an hour apart (like the NewsHour, Charlie Rose, et al.)

Are Cleveland's FM stations' signal patterns meant to cover the area east of Mentor, including Painesville, Fairport and environs? I would think, noting that none of the Cleveland stations mention Perry, Painesville, etc. very often in their commercials, they probably think this area is a never-never land, shut off from greater Cleveland by 35 miles. I grant you, the distance is a factor, but I still wonder why central and eastern Lake County aren't mentioned often in the commercials broadcast by Cleveland stations.

> So Jeff, how's Fairport? I used to be your neighbor - lived in Mentor on
> the Lake until last July. (Lived in Painesville for a while, too.)

Aside from the radio/TV reception problems (I am also a ham radio operator and have problems getting my radios to work, as I must use indoor antennas), I like Fairport Harbor a lot. When I was a kid growing up in Wickliffe, I used to dream of the day when I'd live in a small town like this; now that I'm grown up(I'm almost 48 years old), I am here, and I like it. Took me my entire first year here just to get settled in my apartment, and another year or two to get used to living in a small town. However, it was all worth it. As I said, I like living here now and plan to stay here quite a while.

Good luck and very kind regards,

Jeff Strieble, WB8NHV (mailto: jeffhs@ameritech.net)

We don't use mic processing at any of our classical stations; the only processing is on the program feed as a whole, just before it goes to the transmitter.

BTW, I really love the Inovonics Omega FM.

I finally got to hear HD Radio (a.k.a. IBOC) on several Boston FM's Saturday night (but not any AM's since it was night). My observations:

1. HD Radio does not sound appreciably better than FM.

2. On some of the stations there was a "gritty" quality to the sound reminiscent of an MP3 Internet stream. To be fair, this could have been the result of cascading HD Radio with an STL or digital audio storage system employing something like MPEG or apt-X compression, and not something inherent in HD Radio itself.

3. HD Radio does not appear to extend a station's coverage. On the fringe of one station's coverage, where it could be heard in analog FM imperfectly, the HD Radio was generally not audible at all. We estimated that the effective range of the HD Radio signal is 90 to 95 percent of that of the analog FM.

4. The Kenwood receiver seems to mute in digital mode if there is another signal on an adjacent channel.

5. It also mutes in the presence of nearby FM transmitter sites.

6. In analog mode, the digital sidebands of a station running HD Radio can be heard as white noise. It is not yet possible to guess how much interference they may cause because only a few stations are running HD Radio yet.

7. The scrolling text display some stations were running may be a considerable distraction to drivers.

After hearing some glowing reviews, I was prepared to hear something approaching the sound of a CD and to want to push to put it on our stations. Instead, my friends and I were asking ourselves why anyone would want to pay $75,000 for it.

However, I am still reserving judgment. One night of listening on one radio isn't enough; I want to hear it on several different radios on a wider variety of stations, under different reception scenarios. I'm particularly interested in the effect of adjacent-channel interference.

Possibly some of it can be attributed to the choice of mics, the Shure SM7 has great 'presence' when used up close. Not boomy, just in your face presence. Nice mic, wish I could justify owning one.
regards,
Tom

If the signal format is *exactly* identical to WWV it has a continuous
time signal being sent as a 100 Hz tone at 1 bps.  If you can't hear
it on your radio (because of "comm grade" headphone or speaker or
ears), you can use skysweeper in free demo mode and see the bits clear
as day in the waterfall display.

I just put an Aphex 2020 MKIII on-line with our classical/jazz format
(it replaced a Orban 2200).  I can't say enough good about it. Analog
processing is good...very good.

> reception, more stations to watch, and the fact that I have two PBS stations on the cable here (WVIZ, of course, in Cleveland, plus WEAO 49 in Akron) which allow me to watch certain shows an hour apart (like the NewsHour, Charlie Rose, et al.)

MMMMM.... Charlie Rose. :)

Well, first, as Mike Ward correctly pointed out, most TV and radio transmitters are in Parma. The big exception was WKNR 1220 which was next to the studio in Broadview Heights and pointed *directly* into downtown Cleveland so you would have had problems receiving it in Fairport anyhow. (I'm not sure what they're doing now under Salem's ownership, but I'm guessing that they are still using the same, extremely directional, pattern.)

Oh yeah, and Z107.9 which can be heard at Allegheny College in Meadville, PA. :) Their transmitter is in Geauga County (at the intersection of Sperry Road and Kinsman Road).

I think the *other* issue is the terrain in Fairport. It's extremely hilly there. Do you live off Second Street or High Street? Or do you live further out?

> Are Cleveland's FM stations' signal patterns meant to cover the area east of Mentor, including Painesville, Fairport and environs? I would think, noting that none of the Cleveland stations mention Perry, Painesville, etc. very often in their commercials, they probably think this area is a never-never land, shut off from greater Cleveland by 35 miles. I grant you, the distance is a factor, but I still wonder why central and eastern Lake County aren't mentioned often in the commercials broadcast by Cleveland stations.

Because Parma is the best place to put transmitters, and therefore anything east of Mentor is a rimshot for the typical Cleveland station.

Fear not, young trooper! You do have a choice. Clear Channel operates a bunch of stations in Ashtabula; you have Country 104.7 in Geneva and WATJ in Chardon and WBKC in Painesville, all locally owned... between those stations you actually have a decent selection of Stuff (adult contemporary, country, talk, classic rock, whatever weird hybrid format Star 97.1 runs...)

I used to listen to 102 Zoo a lot, primarily because I enjoy listening to their morning team. They seem to focus more on Lake County than any of the Cleveland stations do.

I hope at least some of this information is useful to you.

PS. If it makes you feel any better, I live 90 miles northeast of the closest media market (Los Angeles). The High Desert has exactly one TV station, KHIZ TV 64. All of the LA stations have repeaters up here, but given how hilly the terrain is (we're in a hilly area and surrounded on two sides by mountains), I wouldn't try to do without cable either. The area is, however, big enough to sustain a decent choice of radio stations, some from "down the hill" and some here. I was actually quite shocked to find out that Infinity owns stations in this rural area. Clear Channel I can understand, but Infinity....? (no need to respond to that last comment, it's been responded to previously :)

Once again, the clock the individual wants plans for uses the signal from WWVB in Ft. Collins, Colorado on 60 kHz.

Hi,
How does HD radio work? I'm an equipment designer (remote control equipment) from Italy, we don't have it here. Never even heard about it! Is it Digital? Modulation CODFM? what is the bandwith? Here in Italy we have DAB... do you have that in the US?
thanks,
Mario.

Yes. I recall saying that in my original message. I like both the

Sirius and XM Jazz channels. The rock stuff has been so heavily processed on the CD that it's hard to say where the low quality is introduced. I can't blame either satellite service for that.

Personally, I've given up hope for improved audio quality from any source. The market doesn't demand it.

Rich

Topposting works for me, and no doubt the fairly significant number of readers who use the google interface, with that fairly annoying habit of putting the end of any excessively-long message behind the preview when viewing the thread.  I know, I know...that's not what newsgroup ettiquette demands, but times change, eh?

But anyway, my point....I'll defer to you on your familiarity with Dalet....I've only ever seen one work (within the confines of the CBC) and as theirs is (was?) one of the first implementations, it may use .wav files, maybe even now.  The thing sits on an Oracle database, I'm told, so frankly

there's no requirement that it be one codecs or another. Seems to me that MPEG2 would be more economical, certainly. Next time I'm there, I'll ask a bit more about it. Bottom line, though, is that there's a balance between the size of the data and the quality of the encode. But you know that. --
For direct replies, take out the contents between the hyphens. -Really!-

[Moderator's Note: I'm going to leave the top-posting debate alone, but please do try to limit your posts to 80 columns in width where possible.
Thanks, SJ "Old Geezer who insists on reading and moderating from a shell account" S]

There are several antennas that couple inductively (without a wired connection) to receivers like the GE (my choice on price:value ratio) or Crane and which allow nulling locals or semi-locals to get distant stations. A visit to rec.radio.shortwave (where AM distant reception is also discussed) will produce a number of helpful responses... and a hungry troll or two, as well.

Depending how badly one wants to hear shows, there is also the chance of moving into a communications receiver like the ICOM R-75 ($500 range) and its ilk; an antenna like the Kiwa (discontinued, but available on e-bay) or others is advisable.

The advantage is that such a receiver adds shortwave, an entertaining albeit
anachronistic, feature.

Subj: Good News About George Putnam!
Date: 3/8/04 8:12:50 AM Pacific Standard Time
From: newsmax@newsmax.sparklist.com (NewsMax.com)

March 8, 2004

Dear friends of George Putnam:

We are pleased to report that George Putnam will be back on
the air on Ontario's "radio of the stars."

Here are the details:

Show kicks off Monday, March 29.

George will air Monday thru Friday Noon-2PM on KSPA
1510 AM Ontario, Calif.

He can also be heard via the Web on the CRN Radio Network
at www.crni.net.

Sincerely,

NewsMax.com

***********************************************************
The legendary George Putnam is 89 years young and a veteran
of 69 years as a reporter, broadcaster and commentator...
and is still going strong.  Click here for George's complete bio:
http://www.newsmax.com/pundits/Putnam.shtml

I remain respectful and a little bit hongry,
    X
Guv Bob

A better antenna will help.  A receiver with better automatic gain control
will help a little bit.  But you're basically hearing stuff due to problems
in the ionosphere, which is something you don't have too much control over.

Most of the digitally controlled radios have rotten AM performance, unless
you're willing to invest some serious money.  The original GE Superradio is
worth checking out if you can find a used one; it is a much better performer
than the Superradio III.

>as WABC, so I assume it's a stronger channel. KW's is stronger that W's?

It's probably too close for you to pick up by skip, but too far away for you
to pick up by groundwave.

HI,

Does anybody have a circuit that will
decode the WWVB signal,and output to a clock
led circuit?

TIA,

Dennis

You might want to consider using a newsreading system that actually works,
rather than the google interface.  Honestly, once you try a conventional
newsreader, you won't go back.

Hi,
I live in NW USA (oregon).
At home I listen a lot to some Romanian radio stations over the internet...
how bad is if I make a pirate radio station to listen on my car radio those internet stations?
and if is not *that bad*, then what is the best solution? I don't have to broadcast in stereo because the signal I get is mono.
any suggestions?

You might want to search at http://www.google.com using the terms wwvb decoder clock.  There's plenty to select from and a number of kits available.

Go to Google and search for "atomic clock". In the first 20 or 30
listings you should find hobbyist sites that have diagrams and maybe
even kits.

Hi,
Unless you want to have fun building a clock, there are many such clocks
or watches out there. I wear a watch. Very accurate in time keeping.

I don't use the google interface (which I'd think would have been pretty obvious).
I'm just saying that there are undoubtedly many who do, and the limitations that
the
interface presents should be considered (or are these features for the convenience
of
these users?  It's a judgement call).

Besides, hanging on to one method in changing times could be a real impediment to
advancing your own future.  Topposting puts the new material where most readers,
albeit not the best ones, will be presented to the user, and what's wrong with

that?
It's much more inconvenient to have to scroll down, or in the case of the google
interface, click to the entire document, to find the added comments, especially if
another bane to an active newsgroup, the unedited content of the thread before it,
remains.

I'm not going to get into a "my newsreader is better than yours is" debate.  If
the
means existed to impose standards on the various clients out there, then there'd
be
incentive to make non-compliant clients tow the line.  In the meantime, I think
it's
a losing battle, much like the Beta/VHS wars in the 80s.  I have enough stress in
my
life without having to worry if I'll be banished for not using what could be
considered obsolete ettiquette.

And that's all I have to say about that.
--
For direct replies, take out the contents between the hyphens.  -Really!-

Yes.  I use Total Recorder to rip BBC programmes to MP3s on-the-fly
all the time.  BBC's players are java-downloaded media players in
webpages.....but, alas, to hear them they MUST send wav data to the
soundcard, through the Total Recorder proxy engine, which acts like a

T in a pipe.....(c;

A 700MB CDR will play 10-12 hours of BBC Radio (insert number here) if you just let it run. Why do you think the copyright moguls are so intent on making it illegal to broadcast over any internet radio station?.....(c;

Great buy at so cheap a price.....with lifetime free upgrades, too! Every time Total Recorder comes out with a new version, I get an email to go get it on my license.

Yes, I have one of these clocks also. The thing is, these clocks
are set 6 times in a 24hr perod by the WWVB signal. The rest of the
time the time base is an ordinary crystal. I want my clock to be
set on a more continous basis. This could only happen with the
continous decoding of the signal. This is how the "professional"
clocks, such as those made by Spectracom work.

Shortwave is still kind of fun. I have an advantage in being a Ham
Radio operator and use a Kenwood TS-690 that has a wide coverage
receiver. The antenna is a long wire dipole with a 1:1 balun and an
automaitc antenna tuner in the radio. It'll easily receive adjacent
stations as it sits next to my noise-generating computer. I can also
transmit legally.

I like Art Bell as a person but I wouldn't have spent nearly $2,000
just to receive a radio show. I believe it's carried in my market, so
a regular $5 radio will do for me.

If you only want to go a few feet so that a signal from a CD player or a laptop in your car is picked up by the car radio, that is perfectly legal, and in fact several companies including Sparkomatic make devices intended for this purpose.

If you want it to be picked up all over the city, there is no legal way to do this yet.  BUT, it may well be possible to get good internet access in your car soon with some of the broadband wireless services.

Hey, does anyone have a Bitboard username/password that I might borrow?
  I like reading about the bits people do on the radio and the other show prep stuff, but the one I was using expired(the guy I got it from got out of the business).

I got a great story for that, too.  A new audiofool neighbor moved in
under the main lobe of my 1500W HF ham radio station.  He installed
his $20K stereo system with the train engine starting cables to the
speakers, big enough to crank the train with no loss in voltage up to
800 yards.  I could hear a terrible buzz right through the walls of my
house from way over there when my packet radio modem keyed up the
beast for a beacon.  Man, those are SOME audio power amps!  Are they
240VAC?  480?  3 phase?

Well, my ham antennas are pretty easy to spot.  Looks like a little
VOA installation.  I'm responsible for any toaster that won't toast
within 20 miles.  "It's that damned ham radio of his!", they curse.  I

guess he didn't notice them before he moved in. Of course, I got a threatening phone call, referred him to FCC so he could get the free RFI booklets, all very friendly and helpful.

"Listen, I'd be happy to come over and solve YOUR interference problem. I'll even pay for the new cables and any connectors YOU need.", I offered. After he cooled down a few days and his BP dropped below 200/170, he asked what I wanted to do.

I wanted to replace the starter cables with #14 foil-shielded mic cable, because I had a 500' roll in my service truck. Oh, ballistic we went again. That would make his stereo sound like a Radio Shack Flavoradio! Oh, God, NO! Ok, let's compromise. I'll come install the new cable and we'll compare it to the battery cables off the train. Should be easy to hear the difference, eh?

Wrong......There wasn't any difference in the sound. There also wasn't any RF feedback from the speaker-leads-acting-like-big-antennas back into the input balancing act of the big DC-coupled power amps, either. 1500W on 20 meter SSB never made so much as a click. The cable is made for XLR mic cords I make up for churches whos PA systems I fix. The speaker was hooked to the two #14 conductors and the foil shield drain wire was connected to the stereo chassis ground lug and left open on the speaker end, creating a Faraday Shield (the late Michael Faraday (1791-1867):
http://scienceworld.wolfram.com/biography/Faraday.html
would have been proud of me using his invention.

Happy neighbor, now good friend. Several audio myths blown all to hell. Better informed consumer...(c;

I'm an ASCAP and BMI-licensed DJ and do a lot of outdoor audio work for parties, car lots, etc. Thousands of hours of MP3 music on 360GB of hard drives pumping a nice DJ board from Winamp (before AOHell) with compander and cross-fader plugins. It runs itself until some cutie has a request to look up at the party.

Time and Time again I have been asked what kind of source I use for all this wonderful music that sounds SO good being played through APPROPRIATE speakers, those that require TWO people to lift and load, not something 6" across in a pasteboard box labeled "woofer" by Tweeters at $800. The just can't believe it's ALL MP3 music being played. (No, I can't hear the 128Kbps sampling rate, either...(c;)
>
>IBOC will be perfect for those who are content with 64kbps MP3s and

>quality is going to come from.

I'm still wondering why we're buying IBOC, now that "music" is no
longer played on AM, AT ALL, outside of Nashville's WSM.  Who needs to
hear Rush or Bill or Gripe Radio Locals in digital?  A little white
noise makes the program more interesting!
>
>The best test is with a very high quality pair of headsets where
>you'll hear every artifact up close. I can't even listen to C-Quam

>standing still.

I'm very protective of my Sennheisers, here.  Have you played with
those $150 little plastic Bose phones?  HOW CHEAP they're built!  Best
Buy can't keep them out for a demo because the plastic headbands keep
snapping off.

Most all headphones over $20 have about the same sound.  BUT, I rate
them with NO INPUT.  I put them on and move around, listening for the
headphone-induced, plastic creaking noises most all of them make.  The
better Sennheisers are like HEAVEN in comparison to most other
brands......they just don't CLICK OR CREAK...which drives me crazy.

I seldom listen to "broadcasting" any more because I used to be in the
business back when you HAD to actually put program material on the air
that didn't include an 800 number and playing 40 minutes of Di-Teck
Dot CON per hour would result in license revocation and heavy
fines.....you remember....when the FCC was run by SANE ENGINEERS, not
political hacks and lawyers trying to sell off the publics property on
Clear Channel's payroll.

Any suggestions on using telephone while wearing headphones/earphones?
Is there some kind of device available where one can input telephone?
I am considering getting some high-end Shure in-the-ear monitors and
don't want to be pulling them out everytime I have to use the
telephone.

You might consider the old Heathkit clock, which still turns up cheaply
at hamfests now and then.

If you build your own, make sure you use nixie tubes.  That's important.

Observatories often use a GPS to feed their computers accurate time.  That may be
a solution worth looking into.

Any recorder will work.  Just set the record source to Stereo Mixer
(whatever is set up on playback volume control) and record with
whatever tool you wish.  I use CoolEdit, and save as mp3.

You'll find that most of the schematics on the net for atomic clocks are of the crystal variety-they set once or twice a day with WWVB and the rest of the time use a crystal. You'll have to do some digging to come up with something that does continuous decoding, but I'm sure it's out there.

What I did is use a GPS-disciplined receiver to give me a highly
accurate 10 MHz standard.  The receiver costs $250 from
www.buylegacy.com but you'll end up paying (way too much) for a power
supply/line lump and the antenna.  I also spent money on software to
use with it on my win2k box.

Every 10 minutes that software updates a web page with the sky view
and how the high-grade crystal oven is functioning, including
estimated error over 24 hours if it loses contact with the GPS
satellites.

TK,

For a normal 'ordinary' Consumer Time Standard that is Accurate to
within a Tenth of Second:  Every Minute; Every Hour; Every Day . . .
The above Time Synchronization Process is more than adequate.

~ RHF

Fortunately or unfortunately I don't fall into that catagory,
when it comes to time and frequency. I've been fascinated by
time & frequency for quite a while now.

Hi,
An RDS (or RBDS as you have there in the US) generator is a very simple machine. What you need is an RDS generator (a complete one may cost around $1000). You simply connet it after your stereo generator, on the MPX signal before the FM exciter. If you want perfection you should feed the pilot 19kHz from your FM generator (not all stereo coders have this signal as an output to use) so that the internal 57kHz generator can lock onto it without having to extract it from the stereo feed. It isn't absolutely necessary anyway. I know many manufacturers here in Italy, not any in the US where prices are higher. If you need any names let me know.

Mario

Mine is set only once per day, sometime between midnight and 4 am.

I was under the impression that the reason this was done is that the signal is too weak to be decoded during other times of the day. In fact, I have some (admittedly very inexpensive) atomic clocks that have *never* decoded the signal here in Florida.

Further, having owned one of these clocks for a brief period before the holidays, WWVB doesn't have reliable coverage during the day (since it's affected by the same propagation issues as AM radio, if not more so). The clock I had (available at Sam's Club for about $25) set itself only once a day, assuming it got a signal in one of six hours from midnight to 6am. Maybe this is what was meant by "sets six times a day", but for what it's worth, my clock's manual said it only set once, if successful, but tried up to six times until it did.

I honestly don't see the advantage in running so close to the time standard....if you want an accurate timebase, use the color burst signal from a local TV station....their timebase is every bit as accurate as what you'll get from WWVB, and most are available 24 hours a day. -- For direct replies, take out the contents between the hyphens. -Really!-

programming.

Greetings: My name is Norberto and I am a Radio DJ.

I created a Music Rotation System for my own benefit
and my audience. I thought the following information
might be of interest to you or to your co-workers in
specific Radio Disc Jockeys (DJ's).

Music Rotation System (MRS) version 2.5b is an software
application developed using MS Access 2000 and Visual
Basic. It was developed with Radio DJ's in mind.
Specially, those who originates their own programming
as Radio DJ's in Community or Public Radio Stations.

Click below to obtain more information and/or download
this great application.

http://www.geocities.com/norberto95aolcom/MRS.html

Dennis,

I don't know what you mean by ordinary crystal, but even.001% is not very good. You may want to look at high accuracy temperature compensated oscillators. Depending on where you live, you may actually be able to phase lock your oscillator to the WWB carrier. You would have to use a phase detector that does not pull you off to one side if you lose the signal. Also, the ~3.58MHz color subcarrier on some TV stations is locked to a cesium standard.

For anyone interested, here's a reminder of upcoming DX tests; if anyone has any additions or corrections, please contact me. (BE SURE TO NOTE THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Daily, from 2:55am-3:05am EST - WRIB-1220, Providence, RI - This test is scheduled to run "through at least March (2004)".

Sunday, March 14, 2004 - KEVA-1240, Evanston, WY 1:00-2:00 am MST (3:00-4:00 am EST).

Sunday, March 14, 2004 - WNNR-970, Jacksonville, FL
WVOJ-1570, Fernandina Beach, FL 12:00-1:00 am EST.
E-mail:wgsr1570@nrcdxas.org

Sunday, March 14, 2004 - WTOP-1500, Washington, DC 12:00-1:00 am EST.
WWW: http://www.wtopnews.com/

Monday, March 29, 2004 - WXHL-1550, Elkton, MD 12:01-1:00 am EST.
E-mail:d_oetting@hotmail.com
Phone:410-398-3883

Please remember, what's listed as being on, say, Monday *may* be what you think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message letting me know, and please, drop the station personnel a note, via e-mail or snail mail, thanking them for running the test! Also, for brevity's sake, I didn't post the QSL addresses; if you need these, let me know!

Lynn.

For sale:

(The "Radio Crazy" is baaaaaakkk!!)

Partial interest in AM/FM station in beautiful small
Virgian college town.

Joint venture. Active or inactive investors with
$20,000 min. each are welcome. No individual may own
more than 49 percent of the stock. This rule applies
to me too!

AM is 1 KW fulltime, non-directional, class "C" which
was once called class IV or "local" or "graveyard".

FM is class "A" with superhigh tower.

They are asking $400,000 for the pair and this

includes the main building, about 3.25 acres of land
and the AM tower. The FM transmiter site is leased at
$400.00/month.

Station grossed about $170,000 in 2003 includigj
trades and showed a slight profit. In 1999 it did a
lot better billing about $270,000 so there is
obviously room for improvement.

I am NOT an agent, broker, shill, owner or part owner.
More important, I am NOT a crook!

Tel: (478)741-1710 in Macon, GA.

73,

Meyer Gottesman, W6GIV
aka "Radio Crazy"
aka Moron Gottesman

Some IMPORTANT last minute info on some 3/14/04 DX tests:

1) The WNNR-970/WVOJ-1570 test for 3/14 has been CANCELLED; the 1570 station changed hands earlier than expected and the new folks need to start their testing, and the engineer for 970 reports some recording problems with the audio file that was to be used. The WNNR-970 kHz test has been TENTATIVELY rescheduled for 3/21/04, same time - more updates to follow.

2) Concerning the KEVA-1240 DX test, also on 3/14/04, the engineer passes this along:
---
All DXers --- last minute change!!

As I was programming in the DX test Morse/Voice ID's this morning I decided to just take the 10 minute loop and program it back to back to back so it will just about fill the entire hour.  ABC News will run at 1am, then a weather forecast at 1:05, then into the test.  And will continue for the next 57 minutes.  So I want to hear from EVERYBODY!   You can sit there and PARK on 1240.  It is bound to pop through at some point!  That gives all of you almost an hour!

Good luck!!  QSL cards will be sent

Michael
KEVA Evanston Wyoming
---

Further, this test will run next weekend (same time, same day) as well, and possibly after that - again, more updates to follow!

Lynn.

Gerry and others,
Yes I have went thru 2 of those dam things already.  A big white one with normal minute and hour hands which I threw away after a few weeks of trying to make it behafe.  Then got the more or less square shaped one with wooden panels on eachside of the clock face.   Shows day date weekday (seconds or indoor temp) Outdoor temp.   Has an ICON top center thats supposed to show up black if WWV is being heard. Mine rarely does unless take it upstairs and point it north/south. Then the icon (wwv) shows very dimly.   Mine is supposed to access the WWV sig during hours from midnight to 6am only.  But still the ICON rarely shows up. I hear the people who sell them are very helpful and will even replace your clock if you cant resolve the problems.  Their ph nr is   1 (800) 972-0292 and ask for Shelly.

Are you sure your not talking about wwvb, and not wwv. Or in
your case it would be wwvh.

Forget about getting an atomic clock to set in Hawaii. The signal is
simply too weak. Atomic Time (who I bought my dual time clock from) says
that it helps if you point the antenna (apparently they just use ferrite
rod antennas-just like in a cheap transistor radio-to recieve) towards
Fort Collins, which is due east of my QTH.

Yes, that's the impression I got too. Somewhere on the net I saw a
diagram of WWVB's coverage area-it covers all of North America at night
and just a little area of the Rockies during the day.

For those of you who may be considering responding to the ad in FMQB for the mid-day position at WARW please read about my experience when I answered the same ad 1 year ago.

Being from the DC/VA/MD area I have been looking for a gig in my hometown area for a long time. The WARW position sounded like the "opportunity of a lifetime" that they claim in the headline. I responded to the ad and got an email from Christie, that in turn lead to a few phone calls in which Christie said she would "love to talk" to me. So, I flew to Baltimore at my own expense, (about $350) and upon my arrival in Baltimore called to make an appointment. Well, Ms Banks did not take my calls, or return my voicemails, when I did finally get through on the phone she told me she was "too busy" to talk, and to try in the next few days.

Well over the next few days Ms Banks did not take nor return my calls. Now, a year later the same "opportunity of a lifetime" is open again. Maybe this is the "opportunity of a lifetime" if your doctor gave you a year to live, or you have lots of money to burn playing hide and seek with someone with no sense of professional ethics.
I really expected a certain level of professionalism in from management in market number 8, but Ms. Banks thoroughly dispelled that fantasy.

Here is the ad, currently running on FMQB.com:
The opportunity of a lifetime! Middays at Classic Rock 94-7 The Arrow, WARW, Washington, DC! Looking for the absolute best! Someone who can relate to the lifestyle and engage the listener with an entertaining at work presentation! Minimum 3 years medium to major market EXERIENCE a must. Air check, resume, references ASAP to Christie Banks, Program Director, WARW, 5912 Hubbard Drive, Classic Rockville, MD 20852. No phone calls, please. Infinity Broadcasting is an EOE. (Posted 01/07/04)

WCBN WILL DESTROY YOUR FEEBLE FORMATS
=20
WCBN - 30 Years of Freeing Your Mind - Listen to us online!
=20
WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown.  We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

For sale:

Partial ownership of AM/FM in small Virginia college town. Beautiful area.

(The "Radio Crazy" is baaaaaakkkk!!)

Joint venture (you venture out, you go to the JOINT! LOL!)

Active or inactive investors with at least $20,000 each are welcome. No individual can own over 49 percent. This goes for me too! We don't want any bullies!

They are asking $400,000 for the stations and this includes the main building, 3.25 acres and the AM tower. The FM transmitter site is leased at $400.00 a month and is a "dynamite" site being about 3500 ft. above sea level.

AM is 1 KW, fulltime, non-DA, class "C". (Formerly called class IV).

FM is class "A", 150 watts, 2911 ft. above avg. terrain. Why else do you think the ERP is so low, silly!

I am NOT a broker, agent, shill, owner or part owner. Even more important, I am NOT a crook! I am a semi-retired radio engineer living in Macon, GA.

Tel: (478)741-1710.

I have the feeling that I'm not getting the whole story here.
Why didn't you make an appointment before you got on the plane?
Did Ms. Banks ask you to fly to Baltimore without one and just show up
at your own convenience?

Most hiring managers, especially in large corporations in major
markets, will pay transportation to the interview for an out-of-town
applicant who interests them. That's certainly been my experience as
an applicant in the past. And yes, managers are "too busy" to just
drop everything for somebody who shows up unexpectedly from out of
town without the courtesy of making an appointment first.

I don't know Christie Banks, and I have no intention of trying to get
a job at her station or anywhere else in that market, but I bet her
side of this story would read a lot differently.

Mark Howell

This is just too stupid.

During the Friday, 3/12 Ted Bell segment during Hendrie's first KFI hour, I
noticed that the last word ("mouth") of the long-running Ted's of Beverly
Hill's jingle was bleeped, each time it occurred.

Is Clear Channel that reactionary these days, or is Hendrie forcing the issue
himself?  Is the word "mouth" being bleeped on the non-CC stations that carry
his show?

Because none of the stations come in clear. I guess they don't mind having
snow on the TV as well as on the front lawn...

Actually, the preemphasis on FM nowadays with all the high end processing can be done away with...to try to process (compress, limit, clip) the 0-15 kHz spectrum and especially the high end, means you will overshoot and overmodulate the xmtr unless you clip/limit the hell out of it..but when you clip, you cause even more problems....
MOST engineers today agree that the PRE AND DE emphasis curves could be done away with entirely...because the field has changed a lot since Armstrong's days and the FCC's early development of the FM rules.
With today's processing and EQing, you really donot need PRE emphasis...and if you donot need it, why have DE-emph in the rcvr???

The RIAA curve for records was done because of the material used & the freq response in early days...technology has left that behind and that's a moot point today...CD's donot have such a requirement...and I always record my cassettes with Dolby C ON and then play them back with Dolby C OFF so the high end sounds cleaner and brighter :)

If the rcvr makes had wanted to, they COULD have had flat response to 10-15 kHz in an analog rcvr and put a filter switch on it (like my Sony XRA-33 AM STEREO car rcvr has)...but they didn't want to listen to car buyers bitching about the noise and whine while listening to AM adj channel...so they made the rcvrs narrow....same reason why 50% of the time your radio FM stereo light is ON, you are actually listening in blended mono!!!

A turnstile is two dipoles (not folded) at 90 degrees...
The Wineguard/RS version is just a folded dipole to make it 300
ohms..but they can be standard dipoles...

For sale:

(The "Radio Crazy" is baaaaaaak!!!!) Hi!

Partial ownership in nice little AM daytimer in small West Virginia town. Non-directional, 1 KW days, 500 watts PSA and 26 watts at night. Night power more than sufficient to cover city of license.

Total asking price is $150,000 and that includes the HUGE 331 ft. self-supporting tower, land and combo studio/office/xmtr building.

Station is on the air since 1949. It is in the county seat. City of license population under 1,000 but almost 29,000 in county. This is the only AM in that county.

Joint venture: Active or inactive investors with at least $10,000 each are welcome. No individual can hold over 49 percent. That means me too! We want no "bullies" here!

You must be US citizen with no felony convictions or history of license revocation(s) with the FCC.

Tel: (478)741-1710 in Macon, GA.

I am NOT a broker, agent, shill, owner or part owner. More importantly, I am NOT a crook.

References:
a-My parole officer. Mr. Larson E. Rapp. c/o Zing-Zing prison, Osstink, NY.

b-Trade reference. Purchased one way ticket from Brazilian Bandit Airways for Rio. Paid all cash, using small unmarked bills. They are based in Oshkosh, WI. Those of you really "on the ball" know what goes on in Oshkosh!

Please! No "AM bashers" or other negative nabobs. If you want to "flame" someone, go to ICQ or whatever!

73,

Meyer Gottesman, W6GIV
aka "Radio Crazy".

> Does anyone know the latest info about what is going to happen to the FM band when the FCC forces all of the VHF television stations to give up their broadcast band and switch to the new freqency allocations for digital TV?  As you may or may not know, the FM band is located in between channels 6 and 7, I believe, and I would be surprised if the FCC would leave the FM band alone when the TV stations get out.  They want to auction these soon-to-be-obsolete TV channel frequencies off to the highest bidder.

Who would be interested in this spectrum if its not used for Broadcast?
Not real practical for a mobile communications use since most systems now use hand held radios and antennas at this band are not user friendly.
Maybe Rural high-speed Internet services?

>getting bent out of shape if WBKO puts too much RF down into Tennessee?
I'm surprised 4 allowed 40 to go NBC.  Most of 13's coverage area is
in KY of course and they used to claim they covered more counties of
KY than any other VHF. I kinda think WAVE may have taken that honor
now.

>I don't watch often enough to know...  They've got five transmitters at
>the same site now (all three digitals and the analogs for 30 and 58) so
>I suppose STL bandwidth is at a premium...

58 has really come up in analog power and 58's digital is strong now
where it was pretty much flea power before. 30's analog went down here
when they went to the new tower.

Oh well, I'll keep watching for your posts.

Ben

The reason for pre-emphasis has as much to do with the modualtion technique and the inherent limitations with the method.

If you're familiar with the sideband model for frequency modulation (the one represented on a spectrum analyzer), you may remember that 100% modulation (+/- 75kHz) will produce many more sidebands at 60Hz than it will at 6kHz.  Because the amount of power in the sidebands for lower-frequency modulation is so much greater, the low frequencies are inherently quieter (because the limiter stages in FM demodulators have more to work with to strip out AM noise).  Pre-emphasis was added to provide a modicum of noise improvement (by increasing the amount of power in the sidebands) for modulation frequencies which have a relative deficiency in modulation sidebands.

It's arguable whether the North American standard of 75uS is too much, and as I've never heard European-standard FM radio, I don't know if their 25uS preemp is too little or still too much, but the adoption of preemphasis compensation has nothing to do with the technology of the time - it's simply trying to circumvent the laws of physics, and those haven't changed since the beginnings of frequency modulation techniques.

Frankly, Chris, if you're having trouble dealing with high-frequency clipping with your processing set up, you've got it set up wrong, anyway.  There's no way that the high end should be slamming against the pre-emp limit.  No wonder you think Texars are trash, since it's so easy to use too much high end.  Finesse is the key.

So am I.  I suspect some money changed hands. (given that they were - maybe still are - simulcasting some of our newscasts)  It would make a certain amount of sense to operate 40 as a satellite of 4.

> 58 has really come up in analog power and 58's digital is strong now
> where it was pretty much flea power before. 30's analog went down here
> when they went to the new tower.

Interesting.  58's analog hasn't improved much since the move.  Their digital is the best of the bunch.  To the best of my knowledge they never operated their digital from the old tower south of town - in fact, I don't recall their digital ever being authorized to operate from that tower.

Interesting also that 30's analog dropped.  The towers are within a few dozen feet of each other, and the antenna height actually *increased* (by an entire 2 meters...) on the new tower.  They were already running the max 5000kw, and still are, at least according to the FCC DB.

>>>TV stations. They're 40 miles from Cleveland, about the same distance from Erie, PA, and maybe 50 from Youngstown, Ohio, and they could get stations from all three cities, but the signals weren't very strong. In spite of the fact that they could pay Dish $5 per month to get Cleveland local TV, I believe they still use their antenna. I have no clue why. **SJS]
>
> Because none of the stations come in clear. I guess they don't mind having snow on the TV as well as on the front lawn...

Cable isn't cheap - last I looked, the basic "lifeline" service (just the local OTA stations and a couple of shopping channels) is $300/year here.  I know people who spend over $1,200/year for cable.  Personally, I'm willing to live with a fair amount of snow to save $300!

One year's "lifeline" cable charges here would buy a digital tuner.  It can be connected to their existing analog TV and antenna and will deliver a fantastic picture & sound.

Wonder what side of the tower 30's antenna is? I know it was all alone
at the top of the old tower since they came on the air. A whole 2
meters! HA     Just looking it looks shorter than the old one...

58 was almost unwatchable up here when they were at the old site. When
they turned on digital it was very weak. I spoke to someone that
worked on the 58 site one day on 444.775. He told me at that time he
couldn't see it across town.

Boy I bet this is a fun thread for everyone but us...

Ben
BTW, is David VanHooser still working there? Sure I didn't spell his
name right...

An update to my earlier message about the WXHL test...

DXer Les Rayburn has volunteered to help with responding to QSL reports for the test (MANY, MANY THANKS!!) *AND* he got a .wav file of WXHL's Morse ID to the engineer, so there will be code used in the test!

So, to repeat:

Monday, March 29, 2004 - WXHL-1550, Elkton, MD will conduct a DX test from 12:01 - 1am EST.

The test will consist of numerous voice IDs, code IDs, and forgotten/rare 70's and 80's Top 40 music and a few test tones. Currently, the engineer is uncertain of just what power the test will be run at; the station is normally 1000/1 w U3.

The station prefers that reception reports be e-mailed; send them to:

d_oetting@hotmail.com

The engineer (Dan Oetting) says he will respond to reception reports via e-mail but not via snail mail. However, in your e-mail, please CC: Les Rayburn at les@highnoonfilm.com. Les will respond to snail-mail reception reports with a special QSL card, printed just for the test. You can send your reports to Les at:

Les Rayburn
High Noon Film
100 Centerview Drive
Suite 111
Birmingham, AL 35216

Also, if you include your postal mailing address with your e-mail to Les, he will send you a card as well. PLEASE don't forget to include return postage!!

And remember, whether you hear the test or not, if you try for the test, please drop the station a note thanking them for running the test - and let me know about your results, too!

Thanks!

Lynn.

Dear IRCAMEMBER,
Thanks for your post. Pass on my appreciation of their efforts to get their station on the air. It does seem to be a lot of work. Let us know how the test went, and what response you got. Maximus.

Cable isn't cheap, but 1200/year is 100 per month. I don't pay that much to Charter, and I not only have digital cable, I also have the $40/month Internet service (it's the middle-of-the-line residential package, 768x128 Kbps, similar in bandwidth to many residential DSL packages).

Hmmm.  Maybe they started at even lower power than they're using now?

I did note WNPT's DTV on the air this afternoon.  It was off again by
primetime though.  Obviously still testing.

> BTW, is David VanHooser still working there? Sure I didn't spell his

(Via BDXC News at 16.40 this afternoon ..... great news at last!!!!)

This just in from manxradio.com news:

Long Wave broadcaster gets the go ahead

A long-wave radio station is to be set up in the North of the Island, and could be on air by the end of the year.

A short time ago at Douglas Courthouse, Isle of Man International Broadcasting PLC was told it could proceed with its plans.

Bride resident, Nick Cussons, had attempted to block them by lodging a petition of doleance challenging the Communications Commission's decision to award a substantive long wave broadcasting licence to IMIB.

However, Acting Deemster, Roger Kaye, threw out the petition and said he saw no reason why the licence should be revoked.

IMIB chief executive Paul Rusling is delighted with the verdict.

After his petition was dismissed, Mr Cussons said he was disappointed with the findings and is considering his options.

He now has six weeks to consider whether or not to file an appeal.

He does not intend to make a further statement at this time.

```

Here in the Boston area, the top tier package for Digital Cable
costs $94.20, HDTV is another $7.25, and if you want the Internet
that's another $42.95.   Not counting the rental of the set-top box,
and all the taxes and extra fees.

What does it take hardware wise and relative cost wise to add RDS to an existing FM station.  I am puzzled as to why the #1 FM station here in columbus oh still does not have the RDS channel working.

It doesn't take more than a few hundred dollars to buy a box that just generates a subcarrier with the station call sign.

But if you want to put actual useful information out from RDS, that can be
substantially more expensive.

Nationally Syndicated Radio Sales- Sports Radio

My client, a nationally syndicated radio sports talk show, is seeking an experienced sales executive to sell air-time. The successful individual will be an energetic salesperson who is capable of bringing on new business and maintaining current accounts from day one.

Job Responsibilities:
-Development of new accounts and maintenance of inherited existing accounts that include Nationally recognized Fortune 500 organizations.
-Marketing, collections and occasional writing of copy.
-Travel as required.

Qualifications:
-Minimum of 5 years experience with a proven sales track record.
-Must have sold syndicated radio and be familiar with its workings.
-Knowledge of sports is a major plus.

Compensation
-40% commission on sales.

Please forward your resume to jhand@djvassociates.com as a MS Word attachment. Thank you.

The next episode of Futility Writ Big is on on the 3rd March.

Whilst the ratings have increased since we advertised on these bulletin boards, we have still not had much feedback.

Please can you listen to the show and let us know what you think, either on here or through the contact details on the station page on Live 365.

Many thanks,

Andrew

Here's notice of an upcoming DX test...

PLEASE NOTE: Even if you don't hear a test, be sure and drop a card, letter, or e-mail to the station personnel, thanking them for going to the trouble to run a test!

Sunday, March 14, 2004 - KEVA-1240, Evanston, WY will conduct a DX test from 12:00 - 1am MST. The test will consist of numerous Morse code IDs (many thanks to Doug Smith (W9WI) for creating the CD!). More details will follow.

Reception reports(with return postage) may be sent to:

Michael Richard
KEVA-AM
P.O. Box 190
Evanston, WY 82931

Also, if you hear a test, PLEASE, PLEASE let me know, via either e-mail or in rec.radio.shortwave! And if you send a reception report to
a station, please remember to include return postage with your report...

Lynn.

For anyone interested, here's a reminder of upcoming DX tests; if anyone has any additions or corrections, please contact me. (BE SURE TO NOTE THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Daily, from 2:55am-3:05am EST - WRIB-1220, Providence, RI - This test is scheduled to run "through at least March (2004)".

Sunday, March 14, 2004 - KEVA-1240, Evanston, WY 12:00-1:00 am MST (2:00-3:00 am EST).

Sunday, March 14, 2004 - WTOP-1500, Washington, DC 12:00-1:00 am EST.
WWW: http://www.wtopnews.com/

Monday, March 29, 2004 - WXHL-1550, Elkton, MD 12:01-1:00 am EST.

Please remember, what's listed as being on, say, Monday *may* be what you think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message letting me know, and please, drop the station personnel a note, via e-mail or snail mail, thanking them for running the test! Also, for brevity's sake, I didn't post the QSL addresses; if you need these, let me know!

Lynn.

http://www.msnbc.msn.com/id/4375426/

cites Howard Stern as being fired by Clear Channel.

WXRK/92.3, his flagship station, is owned by Infinitiy.

I believe the other two original affiliates, WYSP in Philadelphia and WJFK in DC, are also owned by Infinity. The Cleveland station where I used to listen to him is also owned by Infinity...

And the show is owned by Infinity.

How does Clear Channel figure in? Distribution, perhaps?

Amateur Radio Newsline™ Report 1384  February 20,  2004

Amateur Radio Newsline report number 1384 with a release date of Friday, February 20, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Reaction begins to the FCC on B-P-L, Hamvention will probably remain in Dayton and restructuring continues around the world.  These stories and more coming your way on Amateur Radio Newsline report number 1384, right now.

(Billboard Cart Here)

**

THE BPL FIGHT:  ARRL REACTS TO FCC NPRM

The ARRL and many others in ham radio are not happy with last weeks FCC decision to proceed with further implementation of Broadband Over Powerline, and they are making their position known.  Amateur Radio Newsline’s Mark Abramovich, NT3V, has been following developments and has more in this report:

--

To say American Radio Relay League President Jim Haynie W5JBP was disappointed with the FCC's decision to issue a Notice of Proposed Rulemaking on Broadband Over Powerlines might be an understatement.

Haynie sat in on the FCC's Feb. 12 meeting in Washington, D.C. and admits he was dumbfounded when many of the commissioners expressed excitement about the possibilities of BPL, ignoring interference concerns expressed by their technical staff.

"To have Commissioner (Kathleen) Abernathy come out in her initial speech that blew us away and her unbounded enthusiasm and then turn around at the hearing I attended and listen to Commissioner (Jonathan) Adelstein allude to unsubstantiated reports of interference and I was livid," Haynie says.

Haynie says the commissioners look more like cheerleaders for, than regulators of, the communications industry.

"It just seems to me though that the commission has gone from a regulatory agency to a Chamber of Commerce," Haynie says.  "Their eagerness to implement this prior to the NTIA study rollout, which they actually have a letter from a congressman asking them to wait, seemed to me it was put on the fast track and try to beat the NTIA results."

Haynie says lots of what he heard about what's supposed to be in the NPRM does not bode well for amateur radio. But he says there are some burdens on the electric utilities.

"They put a lot of constraints on the BPL industry," Haynie explains. "They have to react in real time, they have to be frequency agile. They have to have public web sites, they've got to have somebody on duty 24-7 to mitigate complaints of interference."

Ah, yes, interference. BPL proponents claim hams don't know what they're talking about.

"I've heard reports of some of the BPL industry spokesman who flat deny that there's a problem," Haynie says. "There never has been a problem, there can't be a problem. "In several interviews I've done with the regular press it was: 'Okay, go down a buy you a short-wave receiver at Radio Shack. Go down there and listen to it for yourself. I don't have to give you all these engineering data, you can hear it for yourself.'

"The utilities, they are being hand-held very carefully by the BPL industry and being told: "There's not a problem, there's not a problem.' "

Haynie says profit for the equipment manufacturers and the utilities is clearly the motive for BPL.

"Any CEO worth his salt who's running a power company is going to try to figure out more ways to get investment return for his investors," Haynie says. "He's got a grid there and if these salesmen come in and tell him: 'Well look, you know, we can bring you in an extra million dollars a day or million dollars a week for your power grid and it's not going to cost you anything other than just put these little devices on every quarter mile.' Why not?"

But Haynie says a recent Carnegie Mellon University study of the BPL business model identifies pitfalls.

"It would take 17 years for the recovery of the initial investment," Haynie says. "And that puzzled me until I read the article and it said because broadband is dropping, DSL dial-up is getting cheaper every month.

"Deals are coming out, Verizon's fixin' to come out with some more stuff. The old thing $30 a month is going to be high. And that's what BPL wants right now, $30 for a residential, $50 for a business."

Haynie accuses proponents of deception proponents in "selling" the concept. He says the claim it will finally connect rural areas of the country to high-speed internet access is, well, hogwash!

"We know that what the BPL industry wants to do is pick the low-hanging fruit, the high-density population areas," Haynie says. "But that's the selling point they're using on the (Capitol) Hill. And that's the selling point they use with the commission. I heard Chairman (Michael) Powell say that himself along with several of the other commissioners.

"They have been sold this bill of goods. And if anybody would stop and think about it, if it was such a good deal to serve five customers in a four-square-mile area, the DSL and the cable people would be doing it now."

Haynie says he's seen and heard criticism of ARRL, much of it declaring the League hasn't done enough to address the BPL threat.

"Let me assure you, we have done a lot, and we have talked to a lot of our potential allies," Haynie says."We've had one, in-face meeting in Washington. We do constant e-mails back and forth.

"But I am not going to, and the League is not going to, reveal all the things we're working on because that would be ridiculous to show the hand to the industry. Let them figure out what we're up to."

What can you do and where do Haynie and the League see this going? Tune in next week for part two of our interview with Jim Haynie W5JBP.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia

--

Can radio services including ham radio survive with the level of interference that many experts say BPL will create?  We will look into this in future reports.  (ARNewsline (tm))

**

## WITH THE ARRL:  THREE LONGTIME AWARDS DISCONTINUED

Meantime, the ARRL Awards Branch has discontinued three longtime awards programs.  Gone are the Rag Chewer's Club, the Old Timer's Club and the Friendship Awards.

According to the ARRL Letter, the society’s  Membership Services Manager Wayne Mills, N7NG, says that the number of amateurs applying for awards in general has declined significantly over the years, and interest in these three awards had slowed to a trickle.

Mills says that the awards programs eliminated had outlived their interest level.  He adds that the cessation of the three awards is effective immediately.  (ARRL)

**

## RESTRUCTURING:  NEW RULES FOR DANISH HAMS

More restructuring of ham radio is taking place around the world.  This, as a set of new Amateur Radio regulations have been introduced in Denmark that make the nation code-free.  Jeramy Boot, G4NJH, reports:

--

The Danish Information Technology and Telecom Agency has announced new regulations for radio amateurs in Denmark. The main feature of the new regulations is the elimination of the Morse code examination for access to the HF bands. Danish radio amateurs are also now allowed to use parts of the 4-meter band without a special permit. These are: 70.0125 to 70.0625, 70.0875 to 70.1125, 70.3125 to 70.3875 and 70.4125 to 70.4875MHz. Beacons are allowed in the 70.0125 to 70.0500MHz portion of the band. Detailed Danish 70MHz band plans can be found on the Internet.

I’m G4NJH in Nottingham.
--

The new regulations came into effect on the 1st of February.  (GB2RS)

**

## RESTRUCTURING:  CROATIAN HAMS GET  NEW PRIVILEGES ON 40 METERS

Croatia has become the first country in Region 1 to benefit from the expansion of the 40-meter band agreed at the World Radio Conference in Switzerland last summer.  9 A prefix amateurs have also been given privileges at 70 and 3400MHz and now no longer have to pass a Morse code test for access to the HF bands.

New amateur radio regulations came into effect in Croatia on the 26th of December but have only recently been announced to the world.  Since that date Croatian amateurs have been permitted to  operate between 7100 and 7200 kilohertz on a Secondary basis, with a maximum power of 1000 watts P-E-P.  This is in addition to the normal Region 1 allocation of 7000 to 7100 kilohertz.

On 4 meters, Croatian amateurs now have 70.000 to 70.450 MHz, with a power limit of 10 watts. They also gain a new band between 3400 and 3410 MHz, with a maximum permitted power of 150 watts.

And like so many other nations, the Morse code requirement for an H-F band access license has been dropped. Under the new regulations and there are now only two classes in Croatia. They are the full license and a beginners' ticket. (GB2RS)

CONVENTIONS: HAMVENTION HOPES TO STAY IN DAYTON

Hamvention will probably stay in the Dayton Ohio area. This, according to the event’s General Chairman Gary Des Combes, N8EMO. In an interview with the Rain Report, Des Combes says that Dayton is the Hamvention’s home:

--

Des Combes: “My personal goal, and the goal of all of the volunteers is to maintain the show in Dayton Ohio. This is where it started and we would love to have it stay here. The plan we have no is to continue to go in that direction.”

--

How do planners intend to do this?

--

Des Combes: “What we need to do as a volunteer team is to work smarter, harder and more efficiently. Make the dollar ‘squeal’ so that the cost to the attendee and the flea-marketer and the exhibitors stay reasonable.”

--

What about the rumors of a move away from Dayton?

--

Des Combes: “There have been questions, quite frankly, from the exhibitors and others about wanting to move to newer and nicer facilities, but there are significant costs associated with that, and its our goal to keep this show a volunteer show because -- quite frankly -- we can do it better and more economically than if we went to a larger venue.”

--

Keeping the show in Dayton is only a small part of what Gary De Combes has to say about Hamvention 2004. Part one of the Rain interview with De Combes is on-line right now at www.rainreport.com and on the phone at 847-827-7246. Part 2 will be available on Friday, February 27th.

Hamvention 2004 takes place May 14, 15 and 16th at its traditional home at the Hara Arena in Dayton Ohio. (ARNewsline (tm), RAIN)

**

## ENFORCEMENT: EX-KG6IRO DUE BACK TO COURT

I’m Bill Pasternak, WA6ITF, with a late breaking story. Dateline Los Angeles California where former ham Jack Gerritsen, the ex-KG6IRO is headed back to court. This time for a probation hearing and sentenceing on charges that he tresspassed on a federal instalation. Bur local hams haqve gotten themselves involved in the sentencing proceedure and are trying to convince Judge Carolyn Turchin of United States District Court to ban Gerritsen from owening or operarating any transmitting equipment -- of any sort -- during his probation period.

This action appears to be a grass-roots effort by repeater owner operators all across Southern California who believe that Gerritsen is responsible for interference to their systems. They are asking all of their users and other hams in the area to send a letter to Judge Turchin explaining the importance of quashing any source of interference that could cause problems during emergencies. They also want to let the judge know all about Gerritsen’s past record and have her order him to stay away from ham radio or any other two-way service as a restriction of his probation.

Judge Turchin has set Monday, February 23rd for the hearing. Will let you know the outcome in next weeks Amateur Radio Newsline report. (ARNewsline(tm))

**

## RADIO EDUCATION: TEXAS HAM DONATES STATION TO SCHOOL

The San Angelo Texas Planning Commission has approved a 40 foot Amateur Radio tower for Santa Rita Elementary School. San Angelo businessman, Kenneth Gunther, W5ZJ, plans to donate the tower, a rotor, antenna's and radio equipment to the educational institution. The radio gear and antenna system will allow students to learn about telecommunications technology and earn their ham radio licenses.

W5ZJ, is the owner of Gunter Wholesale Electric Company. His donated tower will be erected inside the courtyard of the elementary school's main building. Plans for the 40 foot tower passed 6-1 after a motion to allow a 50 foot tower failed 4-3. (San Angelo Standard Times, WB5T)

**

## RADIO GOOD-GUYS: COLORADO YOUTH RADIOS IN REPORT OF FOUND POLICE TWO-WAY

A Highlands Ranch, Colorado, teen appears to have done the right thing when he found a Denver police radio on Monday the 16th. Not sure what the unit was, he used it to let the police force know he had it.

The 13-year-old boy found the radio in the yard of a nearby home. This, after he saw it thrown from a sport utility vehicle. The unidentified youngster retrieved it, figured out how to turn it on and used the radio to tell a police dispatcher that he had it.

Denver police and Douglas County sheriff's officials were working to retrieve the radio. Officials say that they hadn't been notified that a radio was missing, and investigators were trying to determine who it belonged to. They are also looking into how this radio got out of the City and County of Denver.

The complete story is on-line at rockymountainnews.com/drmn/local/article/0,1299,DRMN_15_2660662,00.html (Rocky Mountain News, CGC)

**

## ROAD RADIO SAFETY: STUDY FINDS LOTS OF IN-CAR DISTRACTIONS

Drivers are distracted 16.1 percent of the time their vehicles were moving and cellphones nor two-way radio is not the main culprit. This, according to a study conducted by the auto club and researchers at the University of North Carolina.

The investigation tracked 70 drivers from North Carolina and Pennsylvania. It found that Cellular telephones were not the major distraction. In fact only 30 percent of the subjects used a cell phone while their vehicle was moving compared with 97 percent who leaned over to reach for something and 91 percent who fiddled with the controls on their car’s entertainment system.

The study found all drivers fiddle with their radios or engage in other distracting behavior. This, even when they're being watched as part of a study on distracted drivers. (Science OnLine)

**

## HAM RADIO BUSINESS: NEW FROM CREATIVE SERVICES SOFTWARE

Turning to ham radio business, Creative Services Software has announced that version 3.0 of Pacterm for Windows and P K term for Windows will be released later this year. Version 3.0 not only includes new sound card modes, but also an integrated logging program to keep track of QSO's, DXCC and even do light contesting. It will also support exporting to ADIF for use with the ARRL Logbook of the World and to other logging programs, provide radio and rotor control, and be able to sync with Packet Clusters that are connected by the Packet window. More information on Creative Services Software products can be found at www.cssincorp.com (CSS via VHF Reflector)

**

THE ELECTRONICS INDUSTRY: CES PREDICTS GOOD SALES IN 2004

The Consumer Electronics Association -- better known by the initials CES -- says that the wholesale electronics market in 2004 is likely to grow to 100 point 99 billion dollars in sales. That's up 5 percent over 2003 and a major improvement over three years of negative or minimal growth.

CES is a trade group representing audio, video and mobile electronics makers. It says that the U.S. consumer electronics market is seeing a sharp growth in video products, which has helped to offset the decline in stand-alone audio products and in-car consumer electronics. Sales of new technologies such as plasma television screens were expected to generate nearly $1.5 billion in revenues for 2003, nearly tripling from $515 million just one year earlier. Growth in consumer electronics last peaked in 2000, when sales rose 12.7 percent to $96.37 billion over 1999. (Adapted from CES release)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: LELAND SMITH, W5KL OF QCWA - S.K.

Some sad news to report QCWA President Emeritus Leland Smith, W5KL, has become a Silent Key. According to QCWA webmaster Bob Roske, N0UF, Smith passed away in his sleep the evening of February 15th.

In addition to being President Emeritus of QCWA, Smith served as Chairman of the organizations Scholarship Committee, was President of The Old-Old Timers Club and a member of The Society Of Wireless Pioneers. (QCWA)

**

CHANGING OF THE GUARD: RSGB PAST PRES. GEOFF STONE, G3FZL - S.K.

And word that Radio Society of Great Britain past president Geoff Stone, G3FZL, has also become a Silent Key. This following a long illness.

Stone served as the Society's President in 1964. The RSGB described him as a loyal servant of the Society, serving on Council and numerous boards including the VHF Committee. His funeral took place at on Wednesday, February 11th in South London. (RSGB)

**

HAM RADIO IN SPACE: AMSAT SAYS IT NEEDS $110,000 TO LAUNCH ECHO

AMSAT says that it urgently needs to raise $110,000 to help defray the launch of the Echo ham radio satellite. The bird is scheduled to ride into orbit thus coming June 29th, and the money has to be raided well before that date.

AMSAT like Amateur Radio Newsline is a federally recognized tax exempt 501(c)(3) organization, and your donation should be tax deductible in the United States. Information on how to support the Echo launch and other ham radio in space projects is on the web at www.amsat.org (AMSAT-NA)

**

HAM RADIO IN SPACE: U-O-SAT AT AGE 20

Meantime, there’s a big anniversary coming up for ham radio space operations. March 1st marks the 20th anniversary of the UO11 ham radio satellite on-orbit. We have more in this report:

--

On the 1st March the UO-11 ham radio satellite, which is also known as UOSAT 2 will have been in space for two decades. To mark the event, AMSAT-UK will be issuing a commemorative QSL card in exchange for listener reports from stations hearing the signals during the month of March. The reports must be made by way of the reporting page on the web site and the QSL card will be in the form of a downloadable "E-QSL".

By way of background, UO-11 was the second satellite to be launched by Martin Sweeting, G3YJO's, group at the University of Surrey in here in England. Its telemetry beacon can still be heard on 145.825 MHz FM using nothing more than a handheld 2 meter rig. There is also a 2401.5 MHz beacon but signal is not very strong and represents quite a challenge.

Depending on the status of the satellite, it sometimes goes into 'safe' mode, and the beacon transmitters are not activate for days at a time. Because of this, University of Surrey ground station controllers will attempt to maximise the number of days the transmitters are active during the month of March.

For the Amateur Radio Newsline, Rick Johnson, KA9VZD reporting.

--

An article and pictures about U O11 and the rules for filing reports are available on the AMSAT-UK website. Its in cyberspace at www.uk.amsat.org (AMSAT-UK)

**

RADIO IN SPACE: RADIO TELESCOPES DISCOVER NEW GALAXY

Using radio telescopes on Earth and another optical scope in space, a team of astrophysicists says it's detected a tiny galaxy that is the farthest known object from Earth. California Institute of Technology astronomer Richard Ellis says the galaxy is roughly 13 billion light-years from Earth. According to Science On Line, an expert at the Harvard-Smithsonian Center for Astrophysics in Massachusetts says the discovery gives a rare glimpse of the time when the first stars and galaxies began to emerge. (Science OnLine)

**

INTERNATIONAL - ISRAEL: A REPEATER FOR ALBANIA

Hagal International reports that the Israel Amateur Radio Club has donated a 2 meter repeater to Albania’s amateur radio society. Hopefully, by the time you read this it will be up and running in Tirana, which is Albania’s capital city. (Hagal International)

**

CONTEST CALENDAR: THE DIGITAL SKIRMISH

Turning to the contest calendar, "The Skirmish" - that’s the Troy Amateur Radio Association’s digital prefix contest, will be held on April 17. Categories include PSK31, PSK63, MFSK, RTTY, Packet, ASCII, SSTV and others with activity on 160 through 6 meters excluding the Warc bands. You can find additional information at www.n2ty.org/seasons/tara_seasons.html (Via E-Mail)

**

CONTEST CALENDAR: N3FTI FROM TURKS & CAICOS FOR ARRL DX CONTEST

Steve Kerns, N3FTI, says he will be on the island of Providenciales, Grid Square FL31 in the Turks & Caicos chain for this years ARRL World Wide DX Contest. During the contest, his group consisting of WE3C, KQ3V and himself will be active as VQ5A. This is the first time to Steve’s knowledge this prefix has been activated from the Turks and Caicos and the first time this prefix has been used by any station. During non-contest times listen for Steve operating as VP5 stroke N3FTI.

This contest runs for 48 hours from zero hours UTC on Saturday the 21st of February on all the contest bands between 160 and 10 meters. For more information the VQ5A operation, check www.qsl.net/n3fti on the world-wide-web (VHF Reflector)

**

## DX

In D-X, word that LZ1ZF is celebrating his 35th anniversary of being on the amateur radio bands with the special callsign L35ZF.  He is active on all bands and modes. until the 31st of December.

Also, SM0CCM will be active as J73CCM from Dominica through the 4th of March.  He will operate on 160 to 6 meters mostly CW, with some RTTY and PSK 31.  QSL as directed on the air.

And word that JA2EZD will be traveling in Vietnam and Cambodia through the end of the month.  He plans to operate using the calls 3W2B and XU7AAA.  Again, QSL as directed on the air.

And QSL Manager Jos� of Jesus Moura Costa, PS8ET tells Amateur Radio Newsline that he has relocated.  His new address is Q-25 C-17 Parque Piau�   Teresina, PI. 64.025-100 Brazil South Am�rica

Lastly, 4X4SIX is an Israeli 6 meter beacon operating on 50.080 MHz.  The team of 4X6ON and 4Z5AY built the 5 watt station which announces its call sign around the clock in Morse using a J-Pole antenna.

(Above from various DX sources)

**

## THAT FINAL ITEM:  THE LONG HAM RADIO WALK

And finally this week, the story of a long walk that's taking ham radio with it.  Jim Meachen, ZL2BHF reports:

--

Tony Whitaker, G3RKL, from Sheffield, in the United Kingdom is off to New Zealand for a short walk.  Well not exactly a short walk.  More like 750 miles as Whitaker treks from Invercargill to Blenheim, along State Highway 6 up the West Coast of the South Island.  And he will operate an Amateur Radio station along the way.

Whitaker will be on the air using the special callsign ZL6SHS on H-F, V-H-F and U-H-F while actually walking.  He also plans to use F-M simplex, Echolink and I-R-L-P Internet-linked repeaters in places where they are available.  He will use them to keep in touch with his ham radio friends back home in the U-K.

Whitaker's marathon walk starts in Invercargill on the 21st of February.  If all goes to plan he is scheduled to arrive in Blenheim on the 8th of April -- probably a bit tired -- but very satisfied.  We will keep you posted on his progress.

For the Amateur Radio Newsline down-under, I'm Jim Meachen, ZL2BHF.

--

This is not Whitaker’s fist long ham radio walk. He has already made seven others including one in Australia. (GB2RS)

It figures, in that the media covering this story screwed up. :)

Clear Channel suspended Howard's show on the 6 stations in their chain that carried him.  That includes:  Miami, San Diego, Orlando, Pittsburgh, Rochester NY and Louisville KY.  The CC stations in those markets were just affiliates in the syndication deal.  Some of the print/wire stories the night it happened gave the wrong impression that "Clear Channel was firing Howard", when, as you correctly note, his home base and syndication deal are under Infinity.  (He owns his show, but the show's deal is with Infinity/WW1.)

The Stern show continues on his other affiliates, including all the aforementioned Infinity-owned stations and other big market Infinity O&O's like KLSX/Los Angeles.  I read an article in the Washington Post which would indicate that Infinity - at least for now - has no plans to dump Howard either locally in NYC or otherwise.

I also haven't heard of any other non-Infinity-owned Howard affiliates who are planning on dropping him (a handful of other affiliates are owned by companies like Beasley, etc.).

Mike

Six Clear Channel stations carried Howard and they dumped him on those stations due to content.

Stern's show was carried in syndication on a half-dozen or so CCU
stations, in much the same sort of arrangement by which Premier
(CCU-owned) shows are carried on non-CCU stations.

Clear Channel's 6 stations are simply affiliates. They're under attack and had to do something symbolic so Hogan could report to Congress that they've taken action in a witchhunt environment. Once the election is over Congress will return to screwing the country, Osama will be caught just before the election (some say he's in a Pakistani prison ready for a perp walk) and John Ashcroft will borrow Janet Jackson's malfunctioning breast covering for use on the Scales of Justice stature to purify it by covering its one bare breast.

Back to normal in November.

Rich

(read the exhibits, down at the bottom)

In a nutshell...

87.9MHz is a valid FM channel, but only for Class D stations and only under VERY limited circumstances.  So far, a 10-watt high-school station in California is the only one to qualify for this frequency.

Until last week.

K201DR, a translator on 88.1 in Sun Valley, Nevada, got displaced by a new full-power station on 88.3.  The full-power station and another translator precluded moving to any other frequency with a minor change.  Major changes are under freeze, and if the freeze isn't lifted within 12 months the K201DR license will be revoked.

K201DR argues that 87.9 is the only frequency available to them -- that they're a Class D station (they're so listed in the FCC Database) -- and that they won't interfere with any other station.  (terrain shielding from KVIE-TV channel 6)

FCC buys it, grants a CP, and assigns new call letters K200AA.

No, they suspended him.

And that was 6 out of a grand total of 41 stations.

I know I have seen a site that list songs played by stations where you can search by day.  The only one I have been able to find with google: http://www.androidtechnologies.com/html/radio-station-song-check.php has listings only for the current day.  Anyone know of any that include previous days?

Fred

school FM is still in operation?

There is no KLME in the FCC DB (just a KLME-LP which is in New Mexico)
and the only stations licensed to Battle Mountain, Nevada are translators.

www.bdsradio.com,

You can get it for one 6A-7P spot a day, M-Sun. You can go back a year if
you want.

What is the max power (dBm) a AM receiver can get in the real world?
Let us say the receiver is sitting very close to a station antenna,
the station has the max power FCC permits.

Thanks

It would depend a lot on the efficiency of the receiving antenna the
receiver was connected to.

>>

The "blackout" zone is 1 volt/meter.

Any station, regardless of its power, has such a zone.

Good city service is 25 mV/m.

The area covered by the 25 mV/m signal is a function of frequency, power and ground conductivity.

That question is a non-starter.  A poorly-designed reciever will probably freeze
up
within a mile of a 50kW antenna, while a superb one could likely take several
volts-per-Meter and not even squeal, even when within the tuning house or at the
base
of the tower..

I've stood about a fourth of a block away from the tower array of a
50,000 watt station (WQEW-AM 1560 New York).  With a satisfactory
quality pocket transistor radio.

The signal was extremely distorted. Overload.

Couldn't get any closer becasue of the damned fence around the
property.

Don't know offhand, but you can have fluorescent bulbs light up near a
transmitter, and you can have a crystal set drive a speaker.

> and the only stations licensed to Battle Mountain, Nevada are translators.

Thanks for reply

A bit of ancient history - In 1974, KLME-FM, 88.1 went on air as the first high school owned and operated FM stereo
station in the state of Nevada from Battle Mountain High School - 10 watt studio and transmitter in High School.

>From about 12 noon till 4 PM - reel tape easy listening was played
from about 4 - 9 PM students programed in 1 hour shifts
from about 9 - 12 - reel tape rock

Student DJ's went to San Francisco to take 3rd class FCC license test

Wonder what happened to all of those LP's and 45's not to mention reel tapes.

The only stations on 88.1 anywhere near there are translators as well.
K201DE, K201FF and K255AP (apparently moving to 98.9)

The Raytheon manual on things to do with your CK-722 has a receiver
that uses a crystal set to develop enough DC to run a CK-722 receiver
tuned to the same station.

The obvious improvement is use a crystal set to listen to another
station entirely with the transistor radio.

It sucks a little of the energy out of the local broadcaster, reducing
his antenna pattern, so you can hear a more distant station.

For sale:

Partial ownership in AM daytimer in Souther West Virginia. 1 KW days, 500 watts PSA and 26 watts nights. Community is the county seat. This is the only AM in that county. On the air since 1949.

Joint venture: (You venture out, you go to the joint! grin!)

The "Radio Crazy" is baaaaaaaaaaaaaaakkkk!!!!

Active or inactive investors with at least $10,000 each are welcome. All investors would be on the board with full voting rights. No individual can own more than 49 percent. This applies to me too!

Total asking price is $150,000. This includes the HUGE 331 ft. self-supporting tower, land and the combo studio/office/transmitter building. Station has a Harris SX-1 solid state xmtr.

FAZAMY wrote:
> Please explain what is meant by a station transmitting a sub-signal.

I presume you mean a "subcarrier"?  (also known as "SCA" in the States and "SCMO" in Canada)

A very high-pitched signal (usually either 67 or 92KHz) is added to the audio before transmission.  This high-pitched signal is modulated with additional information.  In the early days of subcarriers, this "additional information" was a second audio program, usually background music.  ("Muzak")  More recently, it's been used for "talking books" for the visually impaired, and for various types of data transmission.

These subcarrier transmissions are not intended for reception by the general public - indeed, I believe the Electronic Communications Privacy Act makes it *illegal* for non-subscribers to monitor subcarriers.

Another data subcarrier at 57KHz is used for "RDS", a data transmission system that *is* intended for the general public.  It transmits a continuous station ID, and can provide other information like format, frequencies of other transmitters carrying the same program, and a text string commonly used to show the name of the song being played.

Actually, FM stereo depends on yet another subcarrier, at 38KHz.  This subcarrier contains a mix of the right and left channels, with the right channel 180 degrees out of phase.  Mix the 38KHz subcarrier with the monophonic signal transmitted the normal way, and the right channel cancels out and you get only the left.  Flip the subcarrier 180 degrees out of phase, mix it with the monophonic signal, and the *left* channel cancels out and you get only the *right*.  Feed each to a separate speaker and voila: stereo.

I think his question is how many dBm would be received at the front end
when sitting at the base of the tower.  Not how many dBm can be received
and still use the radio.

Actually there is no sub carrier at 38 kHz, just the sidebands as it is
transmitted DSSC (Double sideband suppressed carrier).  The 19 KHz pilot
is locked to the original 38 kHz and is used in the receiver to reinsert
the 38 kHz so to demodulate the sidebands.

I presume you mean a "subcarrier"?  (also known as "SCA" in the States
and "SCMO" in Canada)

A very high-pitched signal (usually either 67 or 92KHz) is added to the
audio before transmission.  This high-pitched signal is modulated with
additional information.  In the early days of subcarriers, this
"additional information" was a second audio program, usually background
music.  ("Muzak")  More recently, it's been used for "talking books" for
the visually impaired, and for various types of data transmission.

These subcarrier transmissions are not intended for reception by the
general public - indeed, I believe the Electronic Communications Privacy
Act makes it *illegal* for non-subscribers to monitor subcarriers.

Another data subcarrier at 57KHz is used for "RDS", a data transmission
system that *is* intended for the general public.  It transmits a
continuous station ID, and can provide other information like format,
frequencies of other transmitters carrying the same program, and a text
string commonly used to show the name of the song being played.

Actually, FM stereo depends on yet another subcarrier, at 38KHz.  This
subcarrier contains a mix of the right and left channels, with the right
channel 180 degrees out of phase.  Mix the 38KHz subcarrier with the
```

monophonic signal transmitted the normal way, and the right channel
cancels out and you get only the left.  Flip the sub carrier 180 degrees
out of phase, mix it with the monophonic signal, and the *left* channel
cancels out and you get only the *right*.  Feed each to a separate
speaker and voila: stereo.
  </pre>
</blockquote>
Actually there is no sub carrier at 38 kHz, just the sidebands as it is
transmitted
DSSC (Double sideband suppressed carrier).  The 19 KHz pilot is locked to
the original 38 kHz and is used in the receiver to reinsert the 38 kHz so
to demodulate the sidebands.<br>

```

You see, though, it's not dBm for AM radio....it's V/m, since there's no "typical"
impedance associated with the receiving antenna.

```
And in the end it's still a question of receiver design, anyway.  And, worth
noting,
is that different antenna designs will have different close-range propagation
characteristics, so that it can't be specifically stated without knowing the
antenna.
This is, after all, why the FCC specifies inverse km measurements, and those
measurements are done in far-field conditions.

Here's notice of an upcoming DX test...

PLEASE NOTE: Even if you don't hear a test, be sure and drop a card, letter, or e-mail to the station personnel, thanking them for going to the trouble to run a test!

Sunday, March 14, 2004 - WNNR-970, Jacksonville, FL and WVOJ-1570, Fernandina Beach, FL will conduct a DX test simultaneously from 12:00 midnight - 1am EST (the test may run longer). The test will consist of canned programming including Morse code IDs, tones, jingles, suprise guest announcements, and sound effects. Call in line is 1-877-900-WNNR. The stations will be on their maximum day powers of 1kW and 10 kW (ND-A), respectively.

Reception reports (with return postage) may be sent to:

Ron Gitschier, Engineering Dept.
WNNR 970/WVOJ 1570
8384 Baymeadows Road, Suite 1
Jacksonville, FL, 32256

PLEASE NOTE: a SASE is required!

E-mail: wgsr1570@nrcdxas.org

All correspondence will be answered; all correct reception reports will get veriletters on station letterhead, at the minimum.

Also, if you hear a test, PLEASE, PLEASE let me know, via either e-mail or in rec.radio.shortwave! And if you send a reception report to a station, please remember to include return postage with your report...

Lynn.

Thinking about updating a high end home audio system.

Should I wait for IBOC to be brought out for consumers or will I be waiting a real long time
for this to happen ??

I like quality gear but don't want to waste big bucks on traditional receiver if it will be
obsolete in 6 months to a one year.

Steve

Music Rotation System with DJs on Mind!

Greetings: My name is Norberto and I am a Radio DJ
at WIPR San Juan, Puerto Rico.

I created a Music Rotation System for my own benefit and my audience. I thought the following information might be of interest to your staff in specific to Radio Disc Jockeys.

Music Rotation System (MRS) version 2.5b is a program developed using Visual Basic, MS Access 2000 and with Radio Disk Jockeys (DJs) in mind. But now, this small application has evolved in to something more.  Now it could be used for the listening plasure at home.  My intent was, and still is, to assist on the preparation of radio shows taking into consideration factors such length of show, tracking of the played music (avoiding unnecessary repetitions) and assisting the DJ in the organization of the musical material. We have accomplished all this and still giving the DJs great flexibility to mold their taste and personal choices into a rotation system using artificial intelligence. In other words, facilitating all the functions of today's Radio DJs.

If you think this might interest you or your staff, click below to obtain more information and/or download a copy of this application.
http://www.geocities.com/norberto95aolcom/MRS.html

PD - Could you please, print this email and post it into your bulleting board for the benefit of other DJ's.

Thanks.

What do you mean? IBOC receivers are on the shelf right now. Kenwood
is probably the big vendor currently. Expect prices to drop, though.
Not that this is high end stuff by any stretch, but it's out there.

>I like quality gear but don't want to waste big bucks on traditional receiver if it will be
>obsolete in 6 months to a one year.

If you have a high end system, why do you even bother with a tuner anyway?
I will say that high end tuners like the McKay-Dymek are probably not ever
going to get digital back ends... and if anything, they are probably going
to have to be equipped with tighter and tighter IF filters to deal with the
noise issues.

For sale:

THIS IS A NEW LISTING!!

Partial ownership of nice AM/FM in small Virginia college town.

Asking price for the pair is only $400,000 including the studio building, AM tower site and land. FM tower site is on a mountain and leased for $400.00/month.

Joint venture: Active or inactive investors with $20,000 min. are welcome. No individual can own more than 49 percent of the stock. This rule applies to me in addition to everyone else!

AM is 1 KW fulltime, non-directional, Class "C".

Formerly called class IV or local or graveyard! FM is
class "A".

There is a Jr. college in the community with about
1200 students.

This is the only commercial radio station in the
community. No other competing AMs or FMs in this town.
There are some feeble translators, just to set the
record straight.

I am NOT an agent, broker, shill, owner or part-owner.
I am more importantly NOT a crook!

References:

1-(My parole officer)Mr. Larson E. Rapp, c/o Zing-Zing
prison, Ossinstink, New York 12345.

2-(Trade reference)Brazilian Bandit Airways. Purchased
a one-way ticket to Rio using all cash. All small
unmarked bills. Do not worry, I will not be leaving
until all investors have invested!!! (grin!)

Tel: (478)741-1710 in Macon, GA.

Only those properly and fully identifying themselves
will be told call letters and city of license.

The "Radio Crazy" is baaaaaaaaaakk!!!!!

73,

Meyer Gottesman, W6GIV

hello-
i desparately need a service manual, PN DN-961FAS/M, for the Denon CD player, DN-961FA.  these manuals were discontinued in June 2003 and we need a manual to support our 3 961FA machines.  any help in locating a copy or an original would be greatly appreciated.  i've tried all the Denon parts centers and they don't carry it.

An update to my earlier message about the KEVA test...

This test is on Sunday, March 14 from 1:00am-2:00am MST - that's
3:00-4:00am EST.

Reception reports(with return postage) may be sent to:

Michael J. Richard
KEVA-AM
P.O. Box 190
Evanston, WY 82930

E-mail: michaelj@1240keva.com or michaelj@vcn.com

The format of the test will be voice and Morse code IDs mixed in with
the station's regular classic country programming. The exact timing of
the voice/Morse IDs depends largely upon when the satellite service
takes their breaks (normally at :20, :30, :40)

And if you send a reception report to the station, please remember to
include return postage with your report...

Lynn.

```

Thank your guys for all your answers. As scott mentioned, I want to
the possible max power (dBm) a receiver can get no matter it works or
not. I know it depends on a lot of things, like receiver antenna
efficiency. But could you give me a empirical number assuming that
reciever's antenna is most efficience in the thoery.

Thanks

Why?

And then, as I said, each antenna system is different at close range.  It could be
only a volt or two per meter, it could be several tens of volts...close enough,
you
might even be able to draw an arc off of the metal pieces.

It's too undefined a question to give you a definitive answer.

I have a Creative Nomad Jukebox 3 that
holds 20 GB.  I downloaded and installed
its newest firmware (version 1.40.06p)
which solved two shortcomings and allows
me to use the player as a quasi-Tivo for
radio.  The NJB3 costs about $270, but less
on eBay.

The first former shortcoming: on long walks,
the player would often freeze (apparently
due to the motion) and require rebooting.

This no longer happens.

The second former shortcoming: the player would record for a maximum of only 10 hours. The new firmware allows "continuous" recording, which means that at the 10-hour point, it finishes its file and starts a new one, and will do so repeatedly every 10 hours until I stop it or until the battery dies (although I always record with the NJB3's AC adapter attached) or until it runs out of disk space (the player holds about 300 hours of MP3s at 128 kbps).

Here's how I do "Tivo": I put a radio on KQED-FM and patch its earphone output to the NJB3's line-in jack, and set the NJB3 on continuous recording. A day or even a few days later, I stop the NJB3 and can then easily locate the programs that I want to hear, because each file recorded by the NJB is automatically tagged with its duration and its ending time. And as with Tivo, I can fast forward through portions that don't interest me.

The reason that this can work for radio is because audio files take up so much less disk space than video files. Tivo would need an enourmous hard drive or array of hard drives to afford you the luxury of taping TV continuously; this luxury does exist with radio on the NJB3.

The NJB3 records in MP3 stereo at bit rates of between 64 kbps and 320 kbps.

The drawbacks:

(A) The NJB3 can't be programmed to switch stations, of course, so for this radio scheme to work, you'd need to have one station that airs enough programs that you want to hear to make it worthwhile; KQED-FM is such a station for me. Alternatively, you could switch stations on the radio manually once in a while, but most people would find that tedious to do or difficult to remember to do. Or maybe you'd only make shorter recordings -- say, of KALW's overnight programming.

(B) The NJB3's internal clock gains about 1 minute per week, which is atrocious accuracy (my $20 Casio watch gains only 1 second per week).

(C) Each time the NJB3 reaches the 10-hour mark, it takes about 2� seconds to get a new file going.

Serendipitously, items (B) and (C) partly cancel one another out.  For example, on a 100-hour recording stretch (~4 days), (B) would result in the time advancing by about 36 seconds, while (C) would retard the time by about 23 seconds. The net effect is that the time in the recordings would advance by about 13 seconds during the 100 hours: a minor annoyance.

Overall, I find the NJB3 used in this way to be superior to Pogo's Radio YourWay, which records only in mono at a maximum of 32 kbps.  David Pogue wrote this review of Radio YourWay in the Feb. 26 N.Y. Times:

********************************************
********************************************
********************************************

YOU'VE heard of occupational hazards like tennis elbow, runner's knee, footballer's ankle. But those ailments pale next to the agony of the TiVo twitch.

This recently diagnosed condition is exhibited by owners of digital video recorders like TiVo and ReplayTV. Having become addicted to the seven-second replay button - an essential movie-watching tool in this era of special effects and mumbled dialogue - TiVo twitch sufferers are often seen reflexively pressing a nonexistent seven-second replay button, even when they're not in front of the television. Their brains helplessly fire the deeply ingrained "Let me catch that again" command when they're listening to the car radio, enduring a flaky cellphone connection or savoring a hard-won apology from a spouse.

Truth is, you can't blame the brain for misfiring. It's bizarre that five years into the digital video-recorder era, you still can't buy a digital VCR for radio. Why has the electronics industry developed so many machines that let us time-shift Dr. Phil and "Saturday Night Live," but so few that do so for Dr. Joy Browne and "Science Friday"?

Actually, there is one such device. Radio YourWay (pogoproducts.com) looks at first glance like a pocket-size (2.2 by 3.9 by 0.7 inches) AM-FM transistor radio, which, in part, it is. But it also contains a built-in timer, so that you can set up a schedule for recording radio broadcasts. Programming it is exactly as easy - or as difficult - as programming a VCR, except that it uses a military-style 24-hour clock instead of AM and PM designations.

At the specified time, the radio turns itself on. It tunes in the station, records for the requested interval and then turns off.

Once you've captured a show, you can play it back at a more convenient time (or in an area with no reception), pause it while you take a shower or a meeting, fast-forward through the ads, or even archive it to a Windows PC using a U.S.B. cable.

As if all this weren't enticing enough, the Radio YourWay (RYW) has a built-in microphone that captures voice notes with a single button press. It, too, can record according to a schedule, a feature sure to be a hit with private investigators and spies.

There's also a line input that can record from CD players and other gear, and even a small but crisp-sounding speaker so that you don't have to wedge earbuds into your ear canals every time you want a playback. (Take that, iPod!)

But wait, there's more. The RYW can also play MP3 music files from your computer and even act as an external PC hard drive for transporting data files from place to place. All of this comes in a package about the size of a deck of cards for $150 (for the 32-megabyte model, which holds 4.5 hours of recordings) or $200 (128 megabytes, 18 hours). Both models accept Secure Digital memory cards that can hold even more recordings.

The bad news is that, well, that's all the good news. Despite the overwhelming brilliance of the concept, the rest of the story is all downhill.

The first devastating discovery is the recording quality. Now, MP3 music fans measure quality in kilobits per second (Kbps), a gauge of how much computer data is used to represent the music. They record music at 192 Kbps for great quality; 128 Kbps to save space on their music players, at some cost to sonic quality; and 96 Kpbs when they just want a beat to jog to.

By contrast, the RYW records in mono, and at - get this - 32 Kbps. Recorded music sounds like muffled party tunes coming through your wall from the apartment next door.

Talk radio doesn't suffer nearly as much. It still sounds much duller than the original broadcast, but it's tolerable. As Captain Kirk might say, "Set expectations to Low."

Reception is another problem. In a neighborhood where my Toyota Corolla receives nine AM stations clearly, the RYW pulls in only three. You get no FM reception at all unless you plug in either the earbuds (whose cord is an antenna) or the included FM antenna (also a cord) - and even then, the stations and their signal strength are limited. At Yahoo's helpful Radio YourWay bulletin board (groups.yahoo.com/group/radioyourway), the surprisingly polarized fans and foes describe delicate window-sill positioning, buying stronger antennas, and other workarounds.

Another delicate subject is battery life. The manufacturer estimates that a pair of AAA's will drive the device for 9 to 11 hours; in the real world, that's optimistic by a couple of hours. Sooner or later, you'll realize that a set of rechargeable AAA-size NiMH's is an essential accessory.

It's too bad that there's no backlighting; you can see the screen and buttons only in good light. In general, though, the hardware design is rewarding and logical. How many other music players, for example, offer the luxury of separate previous-track and next-track buttons (|<< and >>>|) and rewind and fast-forward buttons (<< and >>)?

But the software needs work. The crisp liquid crystal display provides no information about when a recording was made or from what radio station. And while you can load MP3 files onto the player from a PC, using the included Windows software, the player can't show you song or album names.

If you turn the player off, it remembers where you were in a recording. (Pogo added this feature in a late-2003 "firmware upgrade." New players come with it; older players must be upgraded at the factory, which will cost you $10.)

But here's another gripe that's loudly expressed online: In all other circumstances, the player doesn't "bookmark" your spot. If you listen to the first half of a recording (say, "Car Talk"), switch to live radio or another recording, and then return to "Car Talk," you have to start from the beginning or manually fast-forward to the spot where you stopped.

Finally, the RYW records in a proprietary audio format called RVF. Pogo's transfer software can convert your recordings into standard WAV files on your PC. But what most people want, of course, isn't space-hogging WAV files, but the more compact MP3 format - and getting to MP3 requires two separate conversions. (Or one smart download of RVFMP3, a free RVF-to-MP3 converter available from www.eonet.ne.jp/~y-katow.) Even the manual seems to be excellence-phobic. It's filled with punctuation gems: "It will seem like you are changing the start time when setting the ending time but trust us you are setting the ending time."

In short, almost every aspect of Radio YourWay needs improvement. But what's the alternative? Music players like the Samsung YP-910 GS can record from the radio, but only FM and not on a schedule; software like Replay Radio can record on a schedule, but only from Web-based stations or from external radio tuners, and only with a PC.

And when you're the only game in town, you may not be in any particular hurry to fix the glitches. (Insert your own Microsoft joke here.)

You'll wish that Pogo had polished the thing up, improved the recording quality and added a backlight. But if you can find a spot where the reception is good, and if the broadcasts you want to time-shift are primarily talk shows, you'll have to admit that the compact, rugged, extremely versatile Radio YourWay does what it's supposed to. It may not be radio your way, but it's at least radio a better way.

While NBC did sell WKYC-AM about 1970, the FM station, which was sold at the same time, IIRC, did not become WMJI until 1981. Between WKYC-FM and WMJI was WWWM-FM "M105" in the early '70s. WWWM was operated by the same sports promoter who purchased WKYC-AM from NBC. The M in the station's new callsign was the first letter of the new owner's last name. WWWM-FM ran automated easy-listening music from 1972 until 1975 or so (during which they used an identification announcement "We've changed our name, but not our tune; we're WWWM, Cleveland"), then it went to live DJs and rock in '75. When the station was sold the second time, the callsign was changed to WMJI, and the format, under yet another new owner, was changed to oldies, as it is today (although the station has been accused by another AM oldies station here in Lake County, where I live, of not being a true "oldies" station by virtue of playing only music from the 1960s and '70s and having a so-called "oldies" library of only 300 recordings; this goes against WMJI's on-air announcement that it has "Cleveland's largest record library". The other station says it plays "every song you grew up with" as well.

I listen to WMJI quite a bit--I have and did for years, even when they were WKYC-FM and WWWM--and know for a fact they do have an extensive oldies library going back to the '50s. The AM station also does not cover the entire Greater Cleveland listening area by virtue of a 500-watt signal which is knocked down to 42 watts, directional, at night, whereas WMJI can be heard loud and clear, in stereo, from Ashtabula to the east to possibly beyond Cleveland's west side to the west, and to Akron to the south). I live about 35 miles northeast of

Cleveland and can hear WMJI extremely well on every FM radio in my apartment, so the new owners may have improved the station's signal somewhat since its NBC days.

Would that have been Leonard Maltz of Malrite Communications? :) He also owned several other properties in Cleveland including WMMS and (later) WOIO-TV, and some radio stations in other cities (including, notably, Z-100 in New York).

Was a real shame when Malrite got out of the business. In particular, WMMS was sold to Nationwide, which later sold out to Jacor, which later sold out to Clear Channel, and has never been the same since. :(

> WWWM-FM ran automated easy-listening music from 1972 until 1975 or so (during which they used an identification announcement "We've changed our name, but not our tune; we're WWWM, Cleveland"), then it went to live DJs and rock in '75. WELW in Eastlake?

> where I live, of not being a true "oldies" station by virtue of playing only music from the 1960s and '70s

Well, yeah, that's because a lot of what WMJI otherwise would be playing was on Mix 106.5 when they were playing "the best mix of the 80's, 90's and 70's". 'course, I can't see why some of the stuff on Mix couldn't also be played on Majic. But that's just me.

> I listen to WMJI quite a bit--I have and did for years, even when they were WKYC-FM and WWWM--and know for a fact they do have an extensive oldies library going back to the '50s.

yeahbut... when you're only playing the thirty or forty most popular songs in your library, doesn't really matter, does it?

> west, and to Akron to the south). I live about 35 miles northeast of Cleveland and can hear WMJI extremely well on every FM radio in my apartment, so the new owners may have improved the station's signal somewhat since its NBC days.

May have? Probably did. Jacor and Clear Channel probably didn't have much trouble justifying investing in WMJI, which has been #1 in the ratings in Northeast Ohio for most of the last 15-20 years.

So Jeff, how's Fairport? I used to be your neighbor - lived in Mentor on the Lake until last July. (Lived in Painesville for a while, too.)

Take a look at this map:

http://www.radio-locator.com/cgi-bin/pat?call=WMJI&service=FM&status=L&hours=U

Again, as usual, Radio-Locator maps are for "entertainment purposes only", but this is a reasonable approximation of WMJI's coverage area. To the south...I'm in Akron, and WMJI is a local signal.  Last time I drove down 77, I think I started losing them a few miles south of Canton, and they were shaky/non-listenable by the time I hit Dover/New Philadelphia.

WMJI's tower, like most Cleveland FMs, is in Parma.  It's a class B.

I've heard IBOC. The last thing you want to connect it to is a high
end audio system. It's sort of like buying a Rolls Royce and using it
to haul manure.

# Amateur Radio Newslin(tm) Report 1385 – February 27,  2004

Amateur Radio Newsline report number 1385 with a release date of Friday, February 27, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.  Another proposal on restructuring and more on the fight against B-P-L highlight Amateur Radio Newsline report number 1385 coming your way right now.

(Billboard Cart Here)

**

## RESTRUCTURING:  A COUNTER PROPOSAL TO THE ARRL

Just as we all thought it was quieting down, restructuring of the United States Amateur Radio Service is front and center once again.  This, as a small group that opposes the quantity over quality approach takes a massive counter proposal to the FCC.  The group is headquarted in Florence, Alabama and Amateur Radio Newsline's David Black, KB4KCH, is at our South-East Bureau in near-by Birmingham, with more:

--

Robin Gist, K4VU, listened to the ARRL's plan to restructure amateur radio and didn't like it.

--

Audio only:  Hear it at www.arnewsline.org on the MP3 audio file of this newscast.

--

Gist and five other hams who make up a group called the Radio Amateur Foundation, drew up their own plans for restructuring ham radio.  Their 59-pages of suggestions are now in the hands of the FCC.  Gist calls the Foundation's petition a comprehensive plan for progressive and thoughtful restructuring.  The group suggests taking the Technician class license, making a few changes, and turning it into amateur radio's entry level license.  Gist is not pleased with the League's plans for the Technician license:

--

Audio only:  Hear it at www.arnewsline.org on the MP3 audio file of this newscast.

--

The group suggests giving Technician class hams restricted HF privileges.  And it strongly advocates keeping the code--5-word-per-minute Morse code proficiency would be maintained for General and Extra class licenses. Keeping Code, Gist says, is important to help amateurs provide emergency communications.

Under the foundation's proposal, the Novice and Advanced licenses would no longer exist.  Current Novice and Advanced license holders would automatically be upgraded to the next category--a novice would become a Technician and an Advanced class ham would become an Extra.

Another big change comes in amateur radio testing under the Foundation's plans.

--

Audio only:  Hear it at www.arnewsline.org on the MP3 audio file of this newscast.

--

The Foundation suggests not releasing question pool questions to the public.

--

Audio only:  Hear it at www.arnewsline.org on the MP3 audio file of this newscast.

--

Gist believes hams should have to wait at least 10 days before taking a failed amateur radio license test again.

--

Audio only:  Hear it at www.arnewsline.org on the MP3 audio file of this newscast.

--

Gist says amateur radio should be quality over quantity.  A service of radio operators who have a sense of value and appreciation for amateur radio.  That is what Gist says the Foundation's goals are really all about.

>From the Southeastern Bureau in Birmingham , Alabama, I'm David Black, KB4KCH, for The Amateur Radio Newsline.

--

While there are well over a dozen restructuring proposals already before the FCC only one has really gotten any major attention of the ham radio community. That’s the plan offered up by the A-R-R-L and referred to by Gist. As we go to air, no Rule Making designation has been assigned by the FCC to the Foundations regulatory change request. (QRZ.COM, ARNewsline(tm))

**

THE BPL FIGHT: WHAT HAMS CAN DO

Meantime, the story that refuses to go away has yet some new twists. Of coarse we are referring to the imminent introduction of Broadband Over Powerline Internet access, and the massive interference that ham radio operators believe it will create. Amateur Radio Newsline’s Mark Abramovicz, NT3V, is here with the latest:

--

Now that the FCC has released the Notice of Proposed Rulemaking in the Broadband Over Powerlines issue, it's time for amateurs to look it over, digest it and begin composing a well-reasoned letter or e-mail.

So says Jim Haynie W5JBP the American Radio League's president. Here are some things in the filing you might consider.

"Noise levels, potential interference both ingress and egress. Those are things that need to be addressed, " Haynie says. "Public relations: What's going to happen when you get on the air on 20 meters and you knock 10 of your neighbors off line all of sudden? They call the local power company, it's a public relations nightmare."

Haynie says once you decide to write that letter, keep in mind it has to be supported with facts.

"I don't see much water being drawn if somebody writes a letter and says, 'Well, this is good for this and it's good for that and it's going to interfere with my ham radio hobby and stuff.' I never, ever use the word hobby to anybody in the Washington. It's the Amateur Radio Service," Haynie says.

"And what you've got to do is use a little bit more fact, a little bit more of concrete-type evidence that you can conclude on your own. And that's pretty simple to do. It's got to be well-reasoned arguments. It can't be emotional argument."

And, once you've finished the letter or e-mail, Haynie says make a copy or print a copy of what you've prepared.

"Put it in an envelope with your QSL card and send it into your local representative at his district office, not in Washington but his district office," Haynie advises. "I'm just amazed how much power that letter has to your local congressman and your local senator when you mail it to one of his local district offices."

Haynie continues to express disappointment the FCC failed to wait for a report from the National Telecommunications Information Agency. The agency oversees radio spectrum use by government agencies and services, including the military. He says its technicians have been busy at BPL trial sites across the country.

"We know that they've done over 18,000 measurements over the last four months in the various (BPL) test areas," Haynie says. "We have gotten actually photographs of their trucks, we've seen them working hard at it. And that's what surprised me that the commission rolled this out before the information was made available.

"We were told by NTIA that it would be available the first part of this year. Now in government-speak, I don't know what that means. I know we got, the League's got petitions sitting up in the commission now since I took office as president in 2000. It is 2004 and they're still sittting on somebody's desk.

"So, FCC and NTIA, I'm sure, have their own timetables and they're not going to worry about what the ARRL or what some ham radio operators think about it. They're going to do their own work in the own way in their own time."

Haynie hopes the NTIA finishes its work soon and gets its report to the FCC pronto. He says it's clear BPL is targeted for special FCC attention.

"I think they'll put this on the fastest of fast tracks and get something going," Haynie says. "Typically, the window, the comment window will be 45-60 days. I'd be really surprised if they gave it 90 days.

"And, once that's done they start the wheels in motion and they'll (FCC) be under tremendous pressure from industry to get this thing out the door."

Haynie says the amateur radio service has allies in this fight and he's confident they will submit comments or speak to their congressmen or senators. Haynie says he's both cautious and optimistic about the outcome.

"I'm very concerned because I've seen the speed at which this thing has happened," Haynie says. "And I've seen the comments that the commission has made and I've seen the denials that the industry has made.

"And it just doesn't make sense. There's something more behind this. And I know people are going to say it's the almighty dollar. And that's true, it probably is. You're looking at millions and millions and millions of dollars of investment here.

"But there's something that just doesn't smell right, I guess, is what I'm trying to say. So, until I get a better handle and the League - our staff people get a better handle on where this is going and trust me we're on top of it every day - I'm just going to be to on the little plus side of a little cautious."

And finally, Haynie says to those who think the ARRL and other hams are overreacting like Chicken Little who cried out: The sky is falling! The sky is falling! He has these sobering thoughts.

"Just because we want, doesn't mean that we get our way. And I'm concerned about that," Haynie says. "And I'm concerned about another possibility that's probably the horror of all horrors.

"And that is if the (BPL) rollout is so big and you get tens of hundreds of thousands of people on, suddenly amateur radio relegates down to the same level as Part 15. That would be the most horrible thing that could happen to amateur radio."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia

--

To read or download the Notice of Proposed Rulemaking from the FCC on Broadband over Powerlines, you can find it on the FCC's website: www-dot-fcc-dot gov. And, to learn more more about the ARRL's position, go to www.arrl.org. (ARNewsline(tm))

## THE BPL FIGHT:  A WIN IN 4X4-LAND

Even though the BPL outlook looks a bit grim here in the United States, there has been a big win over in Israel.  Hagal International says that equipment for the networking of computers over the A C power mains being sold in the country was found to be causing interference to High Frequency spectrum users.  As a result, Israel’s Ministry of Communications requested an explanation from the distributor of this equipment on how to remedy the problem.  The distributor did one better.  The company replied that it had  discontinued the sales of the interfering devices.  (Hagal International)

**

## RADIO HONORS:  W. VA GOVERNORS FATHER WA8AYP REMEMBERED

Here in West Virginia, Governor Bob Wise strolled into his reception hall last week to present a check to Kanawha County officials.  Little did he know that those officials – and some amateur radio operators – had a very special surprise for him.

The money, fifty thousand dollars, was awarded to the county for the purchase of amateur radio equipment for the metro area's new emergency operations center, and a new mobile command post.

As he usually does when speaking about amateur radio, Governor Wise began to reminisce about his father. He recalled hearing the sounds of CW from his father's Hallicrafters receiver wafting into his bedroom at night. He even remembered his father's amateur callsign, WA8AYP. At that moment, his attention was directed to a nearby FT-847 to receive a message.

--

Audio only: Hear it at www.arnewsline.org on the MP3 audio file of this newscast.

--

That's control operator Bill Hunter, K8BS, telling the governor via amateur radio that his father's callsign is now the club callsign of the Kanawha County ARES/RACES group. The announcement was not only a complete surprise, the governor appeared clearly touched. After a moment, he quipped, "Hey, do I get a QSL card for this?" He was quickly presented with a specially designed QSL card. After the ceremony, the governor signed copies of those cards, and posed for pictures with the estimated 75 ham operators in attendance.

The surprise was the brainchild of Kanawha County Commission President Kent Carper, W8CHS, who appears to be one politician who can keep a secret.

Robert Wise, Senior became a silent key in 1986. He was active in emergency communications during the 1960's and 70's. (ARNewsline(tm))

**

RADIO HONORS: FCC NAMED TO RECEIVE NCAI LEADERSHIP AWARD

The FCC has been named by the National Congress of American Indians to be the 2004 recipient of it's prestigious NCAI Leadership Award. The regulatory agency was selected based on its outstanding leadership and ongoing commitment and support to American Indians and Alaska Natives.

The National Congress of American Indians gives only three of these awards annually. One goes to Congress, one goes to the Administration, and one goes to another deserving entity. This year's recipients are House Natural Resources Committee Chairman Richard Pombo of California, the US Commission on Civil Rights, and the FCC. (FCC)

**

HAM RADIO TESTING: QPC WITHDRAWS A GENERAL TEST QUESTION

The Question Pool Committee of the National Conference of Volunteer Examination Coordinators has announced the withdrawal Question G5B11 from the Element 3 General class question pool. The QPC says that the question deleted asked what would be the RMS voltage if you combined two or more sine wave voltages?

According to QPC Chairman Scotty Newstadter, W4WW, the withdrawal refers to question G5B11 in the new, December 1, 2003, released General pool.  It is not referring to the same numbered question in the pool that expires at midnight, June 30, 2004.  (QPC, W4WW)

**

ENFORCEMENT:  JACK GERRITSEN, EX-KG6IRO IN JAIL

Californian Jack Gerritsen, the ex-KG6IRO, will be spending time in jail, but not for his alleged interference to ham radio repeaters in the Los Angeles area.

On Monday, February 23rd, Federal Court Judge Carolyn Turchin sentenced Gerritsen to 30 days in jail and ordered him to pay a $2500 fine on a tresspassing charge.  In passing sentence, judge Turchin explained that she could not place Gerritsen on formal probation as the U-S Attorney asked, because he was going to spend his entire sentence in jail with no time left for probation. The Judge told Gerritsen that he has until May 15th to pay the fine or a lien will be placed on his home in the city of Bell.

Gerritsen’s alleged harassment of area repeaters had brought numerous letters to the court asking that it bar him from operating any sort of radio transmitter.  In a statement to the court Judge Turchin noted that she had read many of the notes sent to her by the amateur community but that she would not be able to take them into consideration for this case.  This was because the charges were brought because Gerritsen failed to obey a sign in the Courthouse and entered a door to the roof of the building.

Judge Turchin did say that she she would forward all the letters to the Federal Probation Department to be put in Gerritsen’s file.  The ex-KG6IRO was then taken into custody by U.S. Marshals and escorted away.  (ARNewsline(tm))

**

WITH THE ARRL:  LEAGUE LOOKING FOR COMMENTS ON VHF+ CONTESTING

The ARRL is looking for input from VHF and UHF contesters to help improve the radiosporting events they take part in.  According to a posting top the VHF Reflector by New England Division Director Tom Frenaye, K1KI, for the last year or so the League has been studying ways to increase interest and participation in VHF and above contests and awards.  Now its ready to go further and it is inviting the ham community to take part.  We have more in this report:

--

Tom Frenaye, K1KI, heads up the ARRL's VHF-UHF Contest and Awards Subcommittee.  He says that changes to the contest rules and awards programs should be designed to do three things.  First, to encourage more people to work more other people.  Second, to bolster the number of QSO’s made over longer distances.  And lastly, to encourage more people to just join in and participate.

Because of this, there are now some recommendations coming from those in the ARRL who have studied the situation.  These incclude making changes in the QSO points and rover rules.  Also under consideration is limiting the June VHF QSO Party to the bands from 50 to 1296 MHz only, expanding the Microwave contest based on 10 GHz Cumulative and dropping the current UHF contest.  Added would be new contest categories in January, June and September.

Frenaye notes that these major recommendations, and a number of minor ones, are still just that -- recommendations.  He says that the ARRL feels it is now very important to have further input from the VHF and above contest community before proceeding.  He asks all contesters  interested in these bands to take an in-depth look at the preoposed changes and then to respond.  He hopes that a lot of you will.

For the Amateur Radio Newsline, I’m Norm Seeley, KI7UP, reporting.

CW SAVVY:  A MORSE CODE SYMBOL FOR THE "AT SIGN"

Computer fanatics who also like operating C-W listen up.  Radio Currents Online for February 16th says that the International Morse Code is being updated to include a new character for the "at sign".   In December, the International Telecommunications Union voted to create the character which will be known as a commat.  The commat is made up of dot-dash for the letter A and dash-dot-dash-dot which we all know is the letter C.  The two characters are combined with no space between them giving Morse code web surfers an easy way to send an e-mail address or the location of a webpage.  (CGC)

ARRL SM ELECTIONS:  THE RESULTS ARE IN

Turning to names in the news, word that Patrick Bunsold, WA6MHZ, has elected as the ARRL San Diego Section Manager in the only contested election this winter.  Bunsold received 378 votes and his opponent, Stephen Early, AD6VI, garnered only 258 votes.

Election ballots were counted February 24 at ARRL Headquarters. Bunsold's two-year term of office begins on April 1st. All other Section Managers standing for re-election ran unopposed. (ARRL)

**

NAMES IN THE NEWS: THE OTHER SIDE OF THE CONTROL ROOM GLASS

And Amateur Radio Newsline President and Producer, Bill Pasternak, WA6ITF, is now the author of a new column dealing with ham radio operators working in the broadcasting profession appearing on the famed HalEisner.Com website.

Bill’s calls his commentary “The Other Side of the Control Room Glass.”
It tells the stories of famous and no-so-famous people in the broadcast profession who share a common interest in Amateur Radio and the way in which being a ham has affected their careers.

The column began on Sunday, February 22nd with the first of a 4-part tribute to the late Roy Neal, K6DUE. This series will include a retrospective on Neal’s successful effort to put a manned Amateur Radio station into space.

“The Other Side of the Control Room Glass” becomes a monthly feature of the website in April. You can read it on-line at www.haleisner.com
(ARNewsline(tm))

HAMS HELPING HAMS: THE MIKE NEWBOLD, K0YO FUND

A fund to help 6 meter rover operator Mike Newbold, K0YO. It was set up by a group of hams who value Newbold’s contributions by putting his life on-the-line to get rare grid squares on the air. And late last year it almost cost him his life. Bruce Tennant, K6PZW, has the rest of the story:

--

According to a posting on QRZ.com made for Phil Krichbaum, N0KE , Mike Newbold, K0YO, was vacationing in Baja Mexico just before Christmas 2003. He was savagely beaten with a pipe, robbed and left for dead. The same thugs also killed two Canadian surfers who were camping about 100 yards away from Newbold and threw their bodies and those of their dogs over a cliff.

Kirchbaum says that Newbold crawled 3 kilometers on his hands and knees through cactus and over rocks to a road where he had a better chance of being located. Some surfers from Los Angeles found him the next day. They took him to a medical facility and contacted the police. They then transported Newbold back to California for further medical treatment. Newbold then went back to Steamboat Springs, Colorado, where his son took him for additional medical care and then home for a Christmas eve dinner. Kirchbaum says he has since visited Newbold brought him a 2 meter F-M radio donated by Bob Ludtke, K9MWM. Thats where he learned that the value of items lost and stolen in Baja easily exceeds $10,000.

To help defray the cost of replacing Newbold's pick-up truck, camper and ham radio gear that he and Gary Yantis, W0TM have established he Mike Newbold Fund. If anyone would care to make a donation to help get Newbold back on the road to rare grids, please contact W0TM or N0KE. Their respective e-mail addresses are gyantis@midtec.com and pfkski@vail.net.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

You can read more about Mike Newbold, K0YO, and what happened to him on-line on line on the newspages at www.qrz.com (QRZ.COM)

**

## HAM RADIO IN SPACE: SUCCESSFUL OHIO ISS CONTACT

Friday, February 20th was a great day for youngsters at Ohio's Glenwood Elementary School. That's when International Space Station Commander Mike Foale, KB5UAC successfully answered questions from a number of students. Better yet, Bill Chalkin, KA8VIT, in nearby South Euclid was listening and recording. Take a listen to a ham radio from space:

--

Audio only: Hear it at www.arnewsline.org on the MP3 audio file of this newscast.

--

In all, sixteen students got to question KB5UAC about life on-orbit. According to the AMSAT News Service preliminary reports indicate the space station side of the conversation was heard as far East as Boston and Baltimore. (AMSAT, ARNewsline(tm) with audio from KA8VIT)

**

## INTERNATIONAL - WORLDWIDE: NO RECIPROCAL 5 MHZ OPERATIONS

Turning to international news, a reminder that holders of United Kingdom 5 MHz operating permits are reminded that CEPT international operating rules does not apply to 5 Mhz. The only countries currently allowing 5 MHz operation by individual stations are the United Kingdom and the United States. Only club stations are presently being allowed to use 5 MHz in Finland and operations by stations in Norway and New Zealand are for internal emergency communications purposes only. Stations in Canada may use 5 MHz frequencies at agreed specified times but activity from Germany is not currently permitted. (GB2RS)

**

ON THE AIR: FIELD DAY 2004 - JUNE 26-27

Turning to operating events, the ARRL Letter says that rules and entry packets for the 2004 running of ARRL Field Day now are available on the League’s Website. The ARRL Letter notes that Field Day is always the fourth full weekend of June. This year it’s June 26th and 27th with activity beginning at 1800 UTC Saturday and ends at 2100 UTC Sunday.

There are no rules changes from 2003. Participation in Field Day now is open to all amateurs within IARU Region 2. Field Day stations may contact stations in other regions for point credit, but stations outside Region 2 are not eligible to submit entries for this event.

More information is on-line at www.arrl.org (ARRL)

**

DX

In D-X, I2YSB, I2MOV, IK1AOD and IK2DIA, have been on the air from Tokelau signing slash ZK3. They now say that they plan to be active portable 5 W from Samoa on all bands and modes between the 29th of February and 8th of March. Look for them on the usual D-X frequencies. (GB2RS)

Also, K4ISV and K4CN will be active slash VP5 from North Caicos Islands through the 17th of March. They will also participate in the CQ 160-Metre SSB contest as VP5B. QSL as directed on the air. (GB2RS)

And a Galapagos Islands "HC8/HD8 DX Diploma" is now being issued by the DX-TA-SEA DX Club. This multicolored certificate is awarded to Amateur Radio operators and short wave Listeners for confirming a minimum of 3 different HC8 or HD8 stations in the Galapagos Islands. All contacts or SWL reports made after November 20, 1945 are eligable. Submissions and information requests go to Dr. Rick Dorsch, NE8Z, P.O. BOX 616, Hamburg, Michigan 48139 -0616 (NE8Z)

RADIOSPORTS: HES OFF AND WALKING

He’s on the road again. We are talking about Tony Whitaker, G3RKL, who is off on his latest trek. Amateur Radio Newslie’s Jim Meachen, ZL2BHF, has the details:

--

His short walk has begun!:

--

Audio only: Hear it at www.arnewsline.org on the MP3 audio file of this newscast.

--

That’s the voice of Tony Whitaker, G3RKL, as he begins his pre-announced trek from Invercargill to Blenheim. What’s amazing is that recording comes to you from the other side of the world. From the United Kingdom, where it was recorded by Ian Abel, G3ZHI, in Yorkshire England. How? Through the magic of Internet linked repeaters that will allow the world of Amateur Radio to follow Tony’s almost every step of the way:

--

Audio only: Hear it at www.arnewsline.org on the MP3 audio file of this newscast.

--

During his stroll Whitaker will be on the air using the special callsign ZL6SHS. And -- you will literally find him operating everywhere including HF, VHF and UHF. And when access to an IRLP or Echolink equipped repeater is available, he just might pop up in your back yard, eager to say hello.

So, keep an ear open for Tony Whitaker, G3RKL, as ZL6SHS as he jauntily saunters the length of New Zealands South Island. He might be coming to an Internet linked repeater in your hometown and right to your H T.

--

Audio only: Hear it at www.arnewsline.org on the MP3 audio file of this newscast.

--

With thanks to Ian Abel, G3ZHI, for the audio of Tony’s first few minutes on the road, I’m Jim Meachen, ZL2BHF, reporting from Auckland, New Zealand for the Amateur Radio Newsline.

--

With access to Echolink and IRLP now quite common you can expect to hear more from G3RKL here on Newsline in the coming weeks. (ARNewsline(tm) with audio supplied by G3ZHI)

**

## NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the newly created Roy Neal, K6DUE, Amateur Radio Mentoring Project is up and operating. We already have signed up over two dozen hams who are willing to assist others. If you can help, or if you need assistance please drop a note with your name, address, hone number and area of expertise to mentor@arnewsline.org and we will get back to you as fast as we can.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I’m Jim Damron, N8TMW, and I’m Jeff Clark, K8JAC, saying 73 and we thank you for listening."

Get Total Recorder from www.highcriteria.com for the princely sum of $12. It'll even create your MP3 for you on-the-fly, ready for playing on any MP3 player in any speed you can think of.

Total Recorder is like a proxy server for your sound card. Any software that sends data to the soundcard can be easily ripped to a file. It also works the other way. Audio sources plugged into your soundcard, converted by the soundcard to wav are also ripped.

Because the soundcard must have unencrypted wav audio, there's no hacking around it. I listen to my favorite BBC programmes in my car on my Archos hard drive MP3 player, here. Works great!

UPgrades for life are free with your princely $12 subscription. They'll email you when there's an upgrade. It does a lot of more things since I first bought it....(c;

I heard IBOC on the almost de facto Kenwood car radio today in Chicago on all-music WIND. It sounded marvelous, with no noticeable artifacts and very nice resolution, clarity and feel on music. It is not FM, which I would expect as the FM preemphasis curve really colors the high-frequency content; in some senses the IBOC AM is nicer than processed FM.

For anyone interested, here's a reminder of upcoming DX tests; if
anyone
has any additions or corrections, please contact me. (BE SURE TO NOTE
THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Daily, from 2:55am-3:05am EST - WRIB-1220, Providence, RI - This test
is scheduled to run "through at least March (2004)".

Sunday, March 14, 2004 - KEVA-1240, Evanston, WY 1:00-2:00 am MST
(3:00-4:00 am EST).

Sunday, March 14, 2004 - WNNR-970, Jacksonville, FL
WVOJ-1570,
Fernandina Beach, FL 12:00-1:00 am EST.
E-mail:wgsr1570@nrcdxas.org

Sunday, March 14, 2004 - WTOP-1500, Washington, DC 12:00-1:00 am EST.
WWW: http://www.wtopnews.com/

Monday, March 29, 2004 - WXHL-1550, Elkton, MD 12:01-1:00 am EST.
E-mail:d_oetting@hotmail.com
Phone:410-398-3883

Please remember, what's listed as being on, say, Monday *may* be what
you
think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message
letting
me know, and please, drop the station personnel a note, via e-mail or
snail
mail, thanking them for running the test! Also, for brevity's sake, I
didn't post the QSL addresses; if you need these, let me know!

Lynn.

IBOC may sound fine on a car radio in a high ambient noise environment, but the question was about high end audio.

When you have audiophiles refusing to play CDs because they don't sound as good as vinyl you're not going to find them pleased with IBOC on either AM or FM.

I know audiophiles who have no audio source other than a turntable on systems costing $20,000 or more.

The Emperor is a nudist.

Rich

For sale:

(The "Radio Crazy" is baaaaaakkk!!)

Partial interest in AM/FM radio station in small Virginia college town.

Total asking price is $400,000 (We are bidding $375,000)including building, land and AM tower site. FM tower site is leased at $400.00 per month.

Joint venture: Active or inactive investors with at least $20,000 each are welcome. No individual can own more than 49 percent of the stock. This rule also applies to me!

AM is 1 KW, nondirectional, class "C" (local)fulltime. FM is class "A". They are the only commercial stations in that community.

There is only one other station in the county, another AM/FM.

Tel: (478)741-1710 in Macon, GA.

I am NOT a broker, agent, shill, owner or part owner.

I am also NOT a crook!

I'd like to get back to Nettransport, hope you guys can help me.
Has anyone tried to use it with a proxy?
I tried to download through a
proxy . I added the proxy, but when
I tried to validate it with HTTP <Connect> it could not
connect to the www.microsoft.com. If I chose HTTP<Get>
it works ok. If I configure this proxy in the IE6.0 it
works perfectly ok. Also, if I try to download a file
configuring this proxy in Other Settings>Proxy>Single
Proxy it can not connect. If I use direct Connection,
everything works ok.
What am I doing wrong? How can I make it download
through a proxy?

Thanks in advance.

Hi List;
I'm trying to locate my cousin Kathy Cunningham who was a radio dj on Long Island in the 80's/90's.  If anyone knows of her whereabouts or email, please email me off list at eileenblas@aol.com
Thanks much,
Eileen

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!
=20
WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown.  We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.
=20

Well, exactly...sortof.  I don't think the question is what was the maximum that any "receiver" would take, as I also considered the various off-the-transmitter modulation monitors as the top end of that range.  What he's clearly asking is how much RF any given receiver would be exposed to at close range.  But how close?  And with what antenna (what wavelength)? Series or parallel fed?  Etc., etc.

The question needs many more parameters to get a hard answer, and that hard answer is of no significance since the scenario isn't a real-world question. And the final indication that this is a non-question is the reference to dBm...for dB, one needs an impedance of the load.  AM receiving antennas do not conform to an impedance, unlike FM and other VHF and up sets that usually use either 300 or 75-ohm feeds.  With those one can take field strengths and convert them to power....without a corresponding impedance, the AM question is undefined.  And in the interest of the truth (even for a purposeless question) I wouldn't presume to assume to specify an answer which has no basis in reality. -- For direct replies, take out the contents between the hyphens.  -Really!-

Is this to say, Rich, that IBOC sounds worse than what Sirius has?  (Yeah, I installed one in the car a while ago, although I haven't had a lot of time to listen because not soon after I've had a series of long-term mechanics needs.) I've noticed that Sirius uses different codecs rates for their streams...the voice-based streams are particularly low-fi, with artifacts that I can hear pretty easily.  The music-based streams obviously use a higher-quality codecs, although even then I can still hear artifacts similar to what Windows Media Player will exhibit on even high-rate streams.

Yes, I'm a "golden-eared bastard", as I can still hear the difference between vinyl and CD recordings.  For the same reasons, I won't use an iPod or similar MP3 device because I can't stand the fidelity loss (and needless to say, that means that downloading music is not an option...free or otherwise, it's not worth the price)...but seeing as you've said you have a Sirius receiver yourself, where would you put IBOC (AM and FM versions) with the Sirius streams?  In any event, I suspect that I'd be similarly underwhelmed with either IBOC service (I'm just barely satisfied with the Canadian DRB solution, although in fairness, it does sound better than the associated analog services, at least). -- For direct replies, take out the contents between the hyphens.  -Really!-

I can hear the difference between CDs and vinyl. In a perfect world I'd chose vinyl. However, the surface noice and scratches drive me nuts. Maybe it's because I spent time depopping music tapes for syndication and It brings back nightmares.

The IBOC I've heard annoys me. I can listen for a short time, then have to turn it off. It's fatiguing. MP3. Forget it. If I listen to it it's usually with headsets and I hear artifacts that take the pleasure out of the music for me, even at high sample rates.

I have both Sirius and XM. I agree that the quality depends on the streams. Classical and Jazz seem to be the highest quality. For analog I listen to WFCR, Amherst, MA. It's NPR, Classical and Jazz. Very lightly processed.

My preference is CD, then Satellite, Analog FM when done right, good analog AM, MP3 (high rates), FM IBOC and AM IBOC. In fairness, IBOC is still a work in progress and may sound acceptable a few years from now. Then there's the interference issue that might wipe out broadcasting entirely.

We're not spending much time caring about quality. Digital audio systems should have improved things. It makes broadcasting easier but with the compression used in almost all systems to save disk space we won't be hearing improvements that will satisfy audiophiles. When it's well recorded DVD-Audio pleases me the most.

Can this "Total Recorder" truly Rip?  That is, does it intercept the digital data going to the sound card?

Actually, it was a car radio in an office. Since there are no availble
tuners, one makes do..

> When you have audiophiles refusing to play CDs because they don't
> sound as good as vinyl you're not going to find them pleased with IBOC

That I agree with. I refused to use CDs for my M�sica en Flor service in the 80's, even when many things were reissued in Japan on that medium; the cuts did not sound right mixed with mostly-vinyl origin material. So I could definitely understand a purist.

I don't find most conusmers to fall in that definition. Most will see the "digital" label and _know_ it must be better.

>analysis on their hearing.....(c;

It had better be a quiet psych ward. An analysis would be futile when you're dealing with people who believe they need power cables that are $400 a foot because they make the system sound better.

If you want real proof, look at the back advertising section of Stereophile magazine and see what's being sold, how much it costs and what it claims to do. I have an audiophile friend who falls for all of it. 20 watt mono tube power amps at $20,000 each. I'll bet his system cost him $100,000 or more and it only has an incredibly expensive turntable as a source. There isn't a CD within eyeshot.

IBOC will be perfect for those who are content with 64kbps MP3s and have no live music frame of reference. Look at what the manufacturers did to AM sections of their radios. I don't think that's where good quality is going to come from.

The best test is with a very high quality pair of headsets where you'll hear every artifact up close. I can't even listen to C-Quam because of the gyrating stereo image. It causes motion sickness standing still.

StationPlaylist.com is pleased to announce new releases of our low cost radio software
designed for the small to medium sized broadcaster. It is very popular for community, LPFM and internet streaming stations. Two products are available.

StationPlaylist Creator is a music/spot scheduler for generating playlists (logs). A user-definable playlist format provides compatibility with most audio players, from Winamp through to professional broadcast playout systems, including our own StationPlaylist Studio.

Additional software is included to integrate with the Winamp audio player for a very low-budget automation solution.

Playlists are based on hourly rotations of music categories and spots which may be scheduled for any hour of any day.

Other features include:
* Song & artist repeat protection. Prevents the same song, or songs by the same artist from repeating within a specified interval.
* Generate a personalized interactive HTML playlist for staff or listeners to view upcoming playlists.
* No maintenance of song details required. This is a big time saver when adding new tracks.
* A sophisticated Playlist Editor to view, edit & print the generated playlist, including search, replace, insert and delete features. Drag & drop supported.
* Voice tracking. Record and insert voice tracks in the playlist. This helps your station sound live during automation.
* Automatic song intros/outros. Pre-recorded song introductions can be included along with selected songs. This can help your station sound live without voice tracking.
* Generate Track Summaries for royalty payments, and Spot Summaries for advertisement billing.
* Standard edition US$79, Pro edition US$169

StationPlaylist Studio is our digital audio on-air broadcast playback software for the Studio/DJ. Features include:
* Automation and Live Assist mode.
* Continuous 24/7 play in automation mode.
* Microphone control with music fade.
* Manual & automatic Line-In control for external feeds (satellite etc).
* Supports playing MP3 & OGG Internet streams for news feeds etc.
* Play spots or events at specific times.
* Generate a "Playing Now" HTML web page or text file and optionally upload to a FTP server.
* 48 cart slots for instant jingles/sound effects etc.
* 12 personalised carts per user/announcer login.
* Password protection for changing options.
* Insert, delete & move tracks in the live playlist.
* Drag & drop tracks from Windows Explorer.
* Insert tracks by searching a portion of the artist and/or title.

* Automatic time-of-day announcement support (audio files not provided).
* Auto-start in automated mode after power failure.
* Detailed logging for royalty payments & advertisement billing.
* Single keystrokes for Start, Stop, Mic and more.
* Uses the powerful & robust Winamp audio engine.
* Advanced automatic crossfading using 1 soundcard.
* Track Preview available on a second soundcard.
* Internet stream encoding via free DSP plugins.
* Free sound processing/audio compressors/limiters available.
* Supports MP3,MP2,OGG Vorbis,WMA,WAV,AIFF & CDA audio file formats.
* No song database to maintain.
* Works best with StationPlaylist Creator music scheduler.
* Schedule new playlists to be created automatically (with Creator).
* May run unattended in automation mode indefinitely (with Creator).
* Only US$89

Amateur Radio Newsline(tm) Report 1386 � March 5,  2004

The following is an advisory.  Ladies and gentlemen, with a list of thank-you's for supporting us, heres our Treasurer and Support Fund Administrator Andy Jarema, N6TCQ:

--

Still playing "catch-up" for our supporters, in the month of June last year we heard from:

Monthly contributor Benton Bonney, W4PE of Orlando; Joseph Bartzi, Jr., KC8DKF of Columbus, OH; mnthly contributor Frank Hemko of Harrods Creek KY; te Hualapai (Walla-pie) ARC of Kingman, AZ; monthly contributor William Walters, WA2IBM, of San Jose; monthly contributor Scott Hensley of the Area Communications Team, also in San Jose and an "Aloha" from Corky Kirk, Jr., W6ORS of Hilo, HI.

Thank you to everyone, and we promise to do our best to continue to earn your care and support. A reminder that Newsline is a 501c 3 California non-profit corporation.  FCC regulations prohibit us from telling you exactly how to support us, but that information is on our website at www.arnewsline.org.  That address will be repeated at the end of the newscast.  I'm Andy Jarema, N6TCQ.

--

Thank you Andy.  And now, Amateur Radio Newsline report number 1386 with a release date of Friday, March 5th, 2004 follows in 5-4-3-2-1.

The following is a Q-S-T.

Help from down-under in the fight to save Amsat Oscar 40 and lots more on the fight to stop B-P-L. Find out the details on Amateur Radio Newsline report number 1386 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE:  HELP FROM DOWN-UNDER IN REVIVING AO-40

The AMSAT Oscar 40 ham radio satellite is still missing in action, but more international help in bringing it back to life is coming almost every day. The latest is from down-under as Brett Dawson, VK2CBD and the team of Australia's Parkes Observatory lend their support to AMSAT Germany in the recovery effort. Q-News Trevor Teague, VK4BAT, reports:

---

A 4 MHz wide spectrum with centre frequency of 1097 MHz was scanned with high level technique in order to find the LO frequency of the AO-40 L1 receiver. The fact that nothing was heard of the L1 receiver's LO does not lead to the conclusion that AO-40 is completely dead. The receivers of Parkes are not really fitted for frequencies below 1.25 GHz, and naturally one does not know how good the L1 receiver's LO is shielded or how much of the signal would go through the antenna to the outside world.

---

As previously reported, the main battery pack that powers AO 40 is believed to have short circuited keeping the auxiliary battery from powering the bird. As this newscast goes to air the rescue effort continuing. (Q-News)

ENFORCEMENT: FCC SEEKING INFORMATION ON ALLEGED FELON HAMS

Back here in the United States, our FCC wants to know if several people on a list it has are felons convicted of an array of very serious crimes. The agency's Daryl Duckworth, N-N-Zero-W, explains:

--

Duckworth: Seven inquiry letters were sent to individuals thought to be licensees who are incarcerated on felony convictions listed on sex offender registration lists or (who) recently served prison sentences for felony convictions. In these cases, the names match our license records and preliminary information is that the subject is the same person listed in our database.

These inquiries seek first to establish whether that is the case, and, second, to determine what affect the offense has on the qualifications to retain a Commission license.

This has been Daryl Duckworth, NN0W, reporting.

--

The FCC did not provide names but it did give conviction information and the locations and offenses. The list includes hams believed to have been convicted of offenses ranging from sexual abuse to child molestation and even murder. (FCC, RAIN)

**

RADIO LAW: JUDGE ORDERS TECHNICAL TESTIMONY IN ALLEGED JAMMING CASE

A Wisconsin federal judge has refused to close the courtroom for testimony by employees of Motorola during the trial of a defendant who allegedly tried to jam police and fire communications. on several occasions last year. In denying Motorola's motion, Judge John Shabaz said on February 27th that the right of Rajib Mitra to a fair trial outweighs Motorola's right to protect its trade secrets.

According to the Madison Capital Times, attorneys for Motorola had argued national and local security concerns as reasons that it did not want public disclosure on how its radio equipment was allegedly jammed by Mitra. The government planed to call five Motorola employees to explain how its Smartnet II radio equipment can be disrupted. Motorola claimed this not only exposed its trade secrets but also placed at risk the lives of law enforcement officers that depend on the proper functioning of their radio communications systems.

But assistant U.S. Attorney Tim O'Shea opposed Motorola's motion, as did Mitra's attorney. Christopher Van Wagner argued that removing the public during his client's testimony would prejudice the defendant. Judge Shabaz agreed with the prosecution and defense. He overruled the Motorola request and ordered the employees to testify noting that no one in the public is coming to his court to find the formula to jam radio frequencies. He noted that this kind of technical testimony can be removed from trial transcripts when they are produced.

Mitra's trial was to began on Monday, March 1st. He faces two charges of using a computer to interfere with police communications. If convicted on both counts he faces up to 20 years in prison. (Capital Times)

**

RESCUE RADIO: EMERGENCY COMM GENERATOR STOLEN

I'm Bill Pasternak, WA6ITF, with a late breaking story. Dateline San Antonio, Texas where, last Saturday night, February 29th, the San Antonio Radio Club had one of its trailer and generator systems stolen.

Paul Guido, N5IUT, reports over the Public Relations remailer that it was a 12.5 Kilowatt Onan unit. The club's biggest and best generator.

A police report has been filed that includes some very good pictures of the trailer with the generator on it. If you have any information on its where-abouts, please contact Paul by e-mail to Pguido2003a@broadwaybank.com or call the San Antonio police.

The San Antonio Radio Club has been a Bexar County, Texas, emergency communication resource since way back in 1919. (N5IUT)

THE BPL FIGHT: THE 11 METER CB ANGLE

Over the past several months we have been hearing about the potential interference to Amateur Radio that's expected if the FCC proceeds with the rollout of Broadband over Powerline Internet access.  But ham radio is not the only service in the 2 through 80 MHz spectrum where B-P-L will operate.  Shortwave broadcasters are concerned that their audiences will disappear if they cannot be heard over B-P-L generated noise.  Also, a number of emergency communications networks have told the FCC that their vital communications will negatively impacted as well.

The one service that nobody has talked about is 11 meter Class D CB radio.  An unlicensed service at 27 MHz with millions of radios crammed into 40 overcrowded channels with many operators running far more power than legally allowed.  This week, Amateur Radio Newsline's Mark Abramowicz, NT3V, looks at CB, B-P-L and the collision between the two that may not be to far away.

--

If those who want to bring us Broadband Over Powerline thought amateur radio operators were going to be a nuisance to their plans, they may have an even bigger headache on the horizon.  Citizens Band radio operators could prove to be the biggest threat to B-P-L.

The FCC defines CB as a private radio service that doesn't require users to have a license. It hasn't for years. The FCC pretty much gave up regulating the spectrum. It asks users to enjoy their radios but to stay within the five-watt power limit of most of the radios.

But since the FCC gave up trying to keep track of those operating on 27 Mhz, problems have mushroomed.  A class of CB operator has emerged who likes to use high-power amplifiers to talk with people several states away.

How powerful? If you check out some of the CB websites, you'll find amplifiers being sold that push the envelope well beyond the legal limit - say 500 watts, 1,000 watts, even 5,000 watts and higher.

Many contemporary electronic appliances, because of poor RF shielding, are susceptible to interference caused by overmodulated CB signals.

The FCC could find itself in a real quandry if the B-P-L industry demands help in going after those who push the limit and disrupt their systems. Imagine the complaints.

Because the FCC can't go to a database to help it find abusers or offenders, it's going to be a difficult if not impossible - task to track these illegal operators.

Will the industry end up funding the FCC's enforcement effort? That would be unprecedented.

Let's be clear: Not all CB operators are outlaws.

Many use their 11 meter radios for personal communications on trips, on hikes, on fishing expeditions. And, yes, the truckers are still big users of the spectrum.

But if you search the worldwide web, you will find CB sites with postings from folks who boast of their radio exploits and their amplifiers and contests.

The websites, of course, take no responsibility for the information or material posted in forums or message boards. They describe them as strictly for entertainment or educational purposes.

Some education the B-P-L industry is sure to get; perhaps a crash or will that be clash course in CB radio.

For now, we'll have to watch and wait.

CBers say they're watching, too. And some of them are vowing no one will stop them from operating as they please.

Stay tuned. For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia

--

To get an idea as to the power that some of the highly illegal competition grade C-B stations run, take your web browser to www.bigradios.com and follow the numerous links from there. (ARNewsline(tm))

**

## THE BPL FIGHT:  CINCINNATI WATCH OUT

Meantime, Cincinnati Ohio may be among the first to have Broadband over Powerlines across the entire area.  This, as a division of Cinergy Corporation announces plans to offer high-speed Internet service over its power lines.

According a March 2nd release, Cinergy Broadband is pairing with the Maryland based Current Communications Group to offer the service in parts of Cincinnati this year.  Plans also call for an expansion into Kentucky and Indiana as the regional system grows.

Cinergy says that it hopes to initially market the service to 55,000 of its 1.5 million customers.  A second venture will bring the technology to smaller municipal and cooperatively owned power companies, covering 24 million customers across the United States. The companies are committing more than $70 million to the effort.
(ZD Net via Media Network)

**

## ENFORCEMENT:  CONGRESSIONAL SUBCOMMITTEE RECOMMENDS HIGHER FINES FOR INDECENCY

A congressional subcommittee has acted to substantially increase the fines assessed broadcasters who break indecency rules.  Some legislators also say that repeat offenders should lose their licenses.

FCC officials have maintained for years that the current maximum fine of $27,500 is too small to serve as a deterrent for large broadcasters who view the fines as a cost of doing business.  Now, under a bill recently passed by the House Internet and Telecommunications subcommittee, monetary forfeitures issued by the FCC would be increased by a factor of ten to $275,000 per violation. The cap on the fines would go to a maximum of $3 million.

There is yet another possibility being floated among legislators and one that could come up when and if the bill hits the House floor. That would be to hold performers and others appearing in the electronic media directly responsible for their own words, much the same way as is done in other radio services including ham radio.

But one law maker has cautioned to enlarge the scope of the proposed legislation to far. Representative Fred Upton cautioned that lawmakers should be careful not to expand the bill to the point where it might run afoul of free-speech rights guaranteed by the Constitution. If that happens, Upton says that it could very well buckle under its own weight. (Published news reports)

**

RADIO LAW: FCC SAYS IT TIME FOR LOW POWER BROADCAST RADIO

The FCC says that Congress should lift the restrictions it has placed on the introduction of low power FM broadcast stations. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with the rest of the story:

--

In a February 20th statement, the FCC said that its inquiry shows that low power FM stations serving highly specific audiences in small areas do not interfere with the operations of large broadcasters. Also, that they will not keep audiences from hearing the higher power commercial stations as the industry claims.

When the FCC first suggested creating the low power or community radio option. commercial broadcasters and public radio stations complained. The argued that low power stations would interfere with reception of their signals Congress responded by setting what amounted to an R-F no-man's land between the low power stations and existing broadcasters. This severely limited the number of tiny stations that the Commission could license.

Lawmakers also told the FCC to study the potential for interference. The agency spent several years doing just that. It has now concluded that stations running between 10 and 100 watts pose little risk to commercial stations whose power levels can be upward of 100,000 watts effective radiated.

Currently, there are about 300 low powered F-M stations on the air. Most are licensed to churches, school districts, youth organizations, highway departments, environmentalists and the like. By comparison, the nation's largest commercial broadcast radio chain, Clear Channel

Communications owns 1,200 stations so far.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

A spokesman for the National Association of Broadcasters termed the FCC report as flawed. (FCC)

**

ON THE AIR: WYOMING STATION DX TEST MARCH 14

Meantime, a full power radio station is in the news and its a good news for hams and S-W-L's who like listening for rare ones on the A-M band. On Sunday, March 14th, radio station KEVA, 1240 kilohertz in Evanston, Wyoming will conduct a D-X test to find out how far its signal can be heard.

According to Lynn Holman reporting over the Broadcast Employees remailer, the test will take place from 12:00 - 1 a.m. Mountain Standard Time and will consist of numerous Morse code I-D's emanating from a C-D created by Doug Smith, W9WI.

For a conformation card please send your reception reports with return postage to Michael Richard, KEVA-AM, P.O. Box 190, Evanston, Wyoming. The zipcode is 82931. (B.E.A.N.)

**

CONFERENCES: EASTERN VHF-UHF IN CT. IN APRIL

Turning to ham radio meetings of note, the 30th annual Eastern VHF UHF Conference will take place next month, April 16th through the 18th at the Radisson Hotel in Enfield Connecticut. Among the program to be presented will be a special update on the "Status of VHF UHF Contesting & Awards Programs" will be Dan Henderson, N1ND of the ARRL. Also on hand will be Gerry Rodski, K3MKZ of SSB Electronic USA to manage the Preamp Noise Figure Measurement workshop and Chris Fagas, WB2VVV to oversee the antenna gain measurement range.

The conference is sponsored by the Eastern VHF UHF Society and the North East Weak Signal Groups. More information is available from Conference Chairman and Proceedings Editor Bruce Wood, N2LIV. E-mail him bdwood@erols.com or visit http://newsvhf.com on the World-Wide-Web. (VHF Reflector)

**

CONFRENCES: SVHFS IN GEORGIA IN APRIL

And the 8th Annual Southeastern VHF Society Conference takes place in Marietta, Georgia on April 23 and 24th. Marietta is not far from, Atlanta and this years program highlights include sessions on pre-amp noise figure and gain measurement, antenna gain measurements, a back scratcher antenna competition and judging for the Mini-Circuits Annual Award for Design Achievement. Also expect a flea market, manufacturer exhibits, the annual auction, and card checking for VUCC. For more information on this one please take your web browser to www.svhfs.org (VHF Reflector)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: BAND LEADER ALVINO REY, W6UK - S.K.

Ham radio's changing of the guard continues. This with the sad news that Alvino Rey, W-6-U-K, has passed away.

Ray was 95 when he became a Silent Key from pneumonia in Sandy, Utah on Tuesday, February 24th. Best known as a swing-band leader of the '30s and '40s he was also an inventor and tinkerer who pioneered development of the pedal steel guitar. This instrument, and his ability to make it sound like it was talking became his musical trademark.

Born Alvin McBurney, in California he grew up in Cleveland Ohio. After beginning his music career in New York he changed his name to Rey in 1929 to capitalize on the then popular Latin music craze. Rey and his orchestra gained national fame with the 1942 hit, "Deep in the Heart of Texas." Nearly 25 years later, Rey was again in the national spotlight when he was featured for several seasons on ABC Television's "The King Family Show."

Ham radio wise, Ray loved to operate all modes, and, according to posts on the V-H-F reflector, was particularly fond of 6 meters. He was also active on all of the the high frequency bands over his many years in the hobby. (K6LAE, published news reports)

**

WORLDBEAT - USA: BIG ANTI-PIRACY WIN

A federal judge in San Francisco has ruled that a software program that copies Digital Video Discs infringes on the copyrights of Hollywood studios. Judge Susan Illston ruled that software made by 321 Studios of Chesterfield, Missouri violates the 1998 Digital Millennium Copyright Act. This law prohibits the circumvention of anti-piracy measures such as the Content Scramble System protecting movies on DVDs. Judge Illston ordered the company to stop making or distributing such software within seven days of her February 20th order. (News reports)

**

WORLDBEAT - BELGIUM: HACKER GAL ARRESTED

Meantime, a Belgian computer hacker who has made an international name for herself as a woman in a male-dominated activity is facing criminal charges. Belgian police have arrested the 19-year-old technology student, confiscated her five computers and shut down her Web site.

A Belgian newspaper says that the woman, identified only by her nickname, Gigabyte was charged with computer data sabotage. Police tell the paper she was preparing to publish new viruses on her Website when she was taken into custody. If convicted, Gigabyte faces up to three years in prison and 127-thousand dollars in fines. (Computing)

**

## WORLDBEAT - UK: IOTA IN OCTOBER

And while its a long ways off, the dates of the Radio Society of Great Britain's International High Frequency and Islands on the Air Convention has just been announced. This year, the gathering will take place the weekend of Friday October 22nd to Sunday the 24th. Further announcements as to venue and the program will follow later on www.rsgb.org and the GB2RS news service from the U-K. (RSGB)

**

## NEW HAM PRODUCTS: THE JWM 1152 PHASE LOCKED OSCILLATOR

Looking at products of interest to ham radio experimenters, word that JWM Engineering Group has announced availability of a new phase locked oscillator. One designed to improve frequency control to microwave receivers and transmitters using crystal oscillator local oscillator chains.

According to Jerry Mulchin, N7EME, President of the JWM Engineering Group, the Model 1152 eliminates the frequency uncertainty of most microwave transverter systems. Mulchin adds that Precise frequency control and stability eliminates at least one variable in establishing successful and enjoyable microwave communications. More information is on the web at http://jwmeng.com. (JWM Engineering Group)

**

## CONTESTS: WB6ACU AND K9EID ON FROM W1AW

On the radiosport page, the ARRL phone contest on March 6th and 7th will have had some well known hams operating from the League's W1AW flagship station this year. According to a note from Bob Heil, K9EID, he and famed rock guitarist Joe Walsh, WB6ACU of the Eagles will be on the air from League headquarters during contest. A special picture QSL will be sent to those who work Joe or Bob. QSL to their respective call directory addresses. (K9EID)

**

DX

In DX, PA5M has been active as 9U5M from Burundi since the 17th of February and will stay in the country until the 17th of March.  He operates in his spare time, typically after 1600 UTC, on 10 to 40 meters CW and SSB.

And W7EJ is in Morocco until the end of March.  He plans to be active as CN2R in the CQ 160-Meter SSB, ARRL DX SSB and CQ WPX SSB contests.

Also, DJ4SO is active portable V-51 from Namibia through the 15th. He plans to operate on 160 to 6 meters mainly CW, RTTY and PSK 31 with some SSB.

Lastly, ZS6Y reports he is active with the special callsign ZS10RSA until mid-May.  This, to celebrate 10 years of democracy in that nation.  For all of these operations, QSL as directed on the air.

(This weeks DX news courtesy of GB2RS)

**

THAT FINAL ITEM: THE ORIGIN OF ELECTRONIC SPAM

And finally this week, a brief lesson on something we dread every time we check our e-mail.  You know what it is.  Unwanted junk e-mail that people have come to call Spam.  Ever wonder why?  Here's Bill Pasternak, WA6ITF, with some details that probably very few people know:

--

We all know that Spam is the trade name of a canned meat product.  At least I suspect that most of you do.  But have you ever wondered where the phrase "spam" in relation to unsolicited junk e-mail came from.  Well, blame it on the computer nerds who were fans of one of the worlds greatest comedy ensembles.

It seems that the term began being applied to junk electronic mail in the early 1990's by computer geeks. It was based on a 1970 Monty Python skit in which an exasperated restaurant customer is urged to order the meat until she screams: ''Stop it already. I don't want any Spam!''

And that was it. And now you do know the rest of the story.

For the Amateur Radio Newsline. I'm Bill Pasternak, WA6ITF, in the City of Angels.

--

To which Ill add the rhetorical question: How many of us open our e-mail boxes each day and want yell the same thing? (Tnx to Q-News, CGC, others who sent this item along.)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening. Amateur Radio Newsline(tm) is Copyright 2004. All rights reserved.

I love the Coast To Coast show with Art Bell, but I get a lot of signal drifting at night listening in Brooklyn. It's fine on the weekends where it comes in on WABC, but during the week the signal is very weak on 1110 AM. Would a longer range radio like the GE 7-2887 Superadio III help, which has station selectivity and sensitivity, or is a digital radio better where I can preset the channel. Would that help lock it in, and adjust for drift?

Looking on their website I see it also comes in on WGY on 810 from Albany, but I haven't been able to access that station. It's listed at 50KW which is the same
as WABC, so I assume it's a stronger channel. KW's is stronger that W's?

Can anyone in the NYC area help with this? What channel do you pick it up on during the week? Please also e-mail if kind enough to respond. Thanks!

And how does NPR get to them?   Isn't there a little bird up there chirping digits to all the NPR affiliates?

I presume they do their music locally from CDs - but haven't the CDs been compressed onto some automation system's hard disk...?

There are two kinds of codecs....destructive and (you might figure) non-destructive.

..WAV files are encoded with a non-destructive codecs...basically a 1-for-1 ratio of
bits to the waveform's voltage at the instant of sampling.  The digital encoding for
NPR is, at most, companded, but this, like Dolby, can be undone....thus,
non-destructive encoding.

MP3s and methods like IBOC or, from what I've heard, Canadian DAB radio, have
encoding artifacts due to the effort used to eliminate redundant (and I guess the
use
of that word is a judgement call, considering what IBOC concludes is redundant)
leave
out too much, and thus when the encoded audio is reconstituted, it's missing
stuff.
Sortof like freeze-dried ice cream.

And from what I know about the one production audio system, Dalet, this
implementation uses .wav files for storage.  So it's about as good as the source,
and
thus quite suitable for air.  Even these jukeboxes you speak of use a codecs which
result in larger files than MP3s at the same sample rate, but the audio's quite
unaffected by the process.  MP3s and other internet and broadcast streaming
methods
need to cut down the data rate to levels that can't possibly allow true high
fidelity
or even a facsimile of it.

I'll continue the spirit of topposting...

When NPR went on the birds I think they were using EBU compression.  That is essentially a floating-point encoding of the waveform with 10 or 11 bits of precision sent in one millisecond blocks with a scale factor [exponent] for each block. There were 31 kilosamples per second???  Didn't NPR change to a method - unknown to me - which claimed a much lower the bit rate?  I'd think that EBU, with its low sampling rate and only 10-bit encoding, would have real artifacts.  This is certainly destructive encoding since you can only approximately recreate the input, more nearly so than MP3, I'll grant.

One Dalet system I know of uses MPEG 2 encoding with a 256 (?) kilobit per second rate.

Either the GE Superradio of the CC Crane CCRadio Plus with the Crane
Active AM antenna might help. WGY is going to be a problem (WABC and
WGY are the same power) because you have WNYC-AM at 820. Your radio
would to be very selective to pick up WGY without splatter from WNYC
even though it's only 1KW at that time of the night.

I don't live in the NYC area, but I have been there enough times to know what I can get on the radio there. Yes, WGY (810 KHz AM) is 50 KW, but you will have trouble from adjacent channel interference from WNYC-AM (820 KHz). A GE Superadio may help because you can rotate the radio and, maybe, null out the signal from WNYC. The station on 1110 KHz is in Charlotte, NC. That signal is subject from interference from Canadian stations on that same frequency. Here again, a GE Superadio may help in the same manner. Drift used to be a big problem with tube type radios. It is still present on solid state radios, but minimal. What you may be experiencing is signal fade. This is an unfortunate part of nighttime long distance reception.

Early CDs were terrible. The masters were equalized with vinyl in mind
and would shatter coffee mugs.

>Most will see the "digital" label and _know_ it must be better.

That's why much of this discussion is really irrelevant. IBOC doesn't
have to be good. The majority of the market will be satisfied with
quality not much higher than MP3 at 64 kbps.

I was asked about the quality difference between XM's talk channels
vs. the music channels. I tuned in to the new traffic and weather
channels. The quality was awful, both technically and programatically.
It sounded (on every traffic channel) like the studio was a tiled
bathroom with awesomely bad artifacts. The announcers were among the
worst I've ever heard. This is clearly being done on the cheap with
kids who can barely read. Hide the expensive glassware until their
voices change.

I was extremely disappointed with what I heard. I think I'll keep my
AM/FM radio for when I travel between Boston, New York and Washington.
WINS, WCBS, WBZ and WTOP have nothing to fear. It's strange that
they're starting in major markets with small market talent.

How much do you want to spend?

I'd go digital with synch detection and selectable sideband, a Sony 7600GR, about $150 at J&R; and a MW loop antenna next to it (Terk MW loop $40 or Select-a-tenna $60). The latter loops work wonders on any AM radio so are worth getting in any case for daytime reception. Perhaps at night they're superfluous though, because the problem at night is too many strong signals, not fishing out weak ones.

The audio from the speaker isn't anything to rejoice in, but you can get used to it easily; however the elimination of adjacent channel splatter and fading distortion can't be replaced.

And it has shortwave as a bonus.

If you spend more you can get better synch detection, but this gets you what you probably need. I don't know of a cheaper way to get synch detection.

I have two audio boards that I would like to trade for one smaller board. I have a Ward-Beck M1200 series board with all original paperwork. In working condition, recently removed from a dark radio station production room. This is a twelve channel board that uses Penny&Giles slide faders. More info or pictures upon request.

I also have a BE 10S350 10 channel board. Recently removed from the same dark radio station. This board also comes with the original manual. This is a ten channel stereo slide pot board. More info or pictures upon request.

I would like to trade these boards as a pair for a Mackie 1642-VLZ or a 1604-VLZ mixer, or a comparable mixer with at least 8 mic and 2 line inputs in good working condition. Also must have tape send and receive.

Shipping of these boards would not be practical, so I would be willing to meet someone up to 150 miles away from home to complete the deal in person.

Please remove NOSPAM to reply. Thanks for your time,

Kevin

I get a nice signal from WSMV-DT on my Channel Master UHF antenna here
in Bowling Green. Of course 56 booms in but 10's pic is much better.
Of course maybe I'm just  prejudiced. HA

Funny thing I'm just like 2 or 3 miles from the local ABC and can't
receive it with the antenna pointing right at the tower but I can get
Channel 2's signal I'm guessing almost 65 or more miles away full
copy. Must be multipath...

Ben

That's an interesting question: could two TV channels worth of spectrum (12MHz) provide enough room to give each analog FM BC station a digital counterpart without using IBOC?

Since IBOC-AM seems to (more-or-less?!) work within 15KHz or so of bandwidth, it would seem a functional system with adequate quality to replace FM could be made to work with 120KHz available to each station.

But the FCC had a hard enough time fitting the DTV assignments into the channels they have.  Even dropping one or two might prove a serious problem...

Well, the problem is that an inside source at this 3rd party, through whom we purchased the air time, told us that our spots might never have even run at all. So, even though this 3rd party gave us very detailed log times, obviously we're very interested in verifying these log times with another source. Unfortunately, it seems like radio stations don't keep sponsor information or even log times for 3rd party spots. (Sort of like a Paul Harvey kind of thing, but it's NOT Paul harvey that I'm talking about.) So, there doesn't seem to be a way to make sure that the 3rd party is telling the truth.

There would be enough bandwidth in a couple of 6-MHz TV channels to make Eureka 147 work for every station in most markets....

On a more politically-correct note, there are interference constraints between 8VSB transmissions on channel 6 and NCE-FM assignments which resulted in very few TV stations being allocated DTV 6.  (I think I only found two when I looked.  One of the original assignments was for WCTX New Haven (moving from 59); they found that the constraints on their power as a channel 6 were so confining that they arranged an allocation swap with very-low-power WEDY New Haven, which didn't need the coverage.)  So it's conceivable that, after the transitional period is through, channel 6 could still be cleared for other purposes.

This sounds like a nightmare.

Perhaps the station keeps Production files--a cover page identifying the name of the advertiser and scripts and the rotation of commercials.  If you entered this agreement in 4th quarter, lets say, you might be able to get this production information.  I know we box up scripts, traffic sent from agencies for a year or so after its run.

Hope this helps

There are nine stations whose analog assignment is channel 6 and whose digital is above 51.  Those stations would have to be accomodated elsewhere to clear channel 6 after transition.  (I suppose that might be possible by using one of the channels freed by other stations in the same market.)

FWIW those nine stations are:

| | |
|---|---|
| KVIE Sacramento | (DTV-53) |
| WABG Greenwood, Miss. | (DTV-54) |
| KOTV Tulsa | (DTV-55) |
| WIPR San Juan | (DTV-55) |
| KWQC Davenport, Ia. | (DTV-56) |
| WCML Alpena, Mich. | (DTV-57) |
| WKMG Orlando | (DTV-58) |
| WLNS Lansing | (DTV-59) |
| WPVI Philadelphia | (DTV-64) |

Also FWIW, there are eight stations whose analog assignment is channel 5 and whose digitals are outside core.

You're supposed to either listen to the broadcast for the ads yourself,
or hire another company to listen for you.  Otherwise it's going to be
difficult to come up with any evidence for your case.

I've been impressed with our DTV. It does a pretty good job. WKRN's does a darned good job too. I think something's broken with WTVF-DT, they don't do anywhere near as well as their analog. (nor anywhere near as well as WKRN-DT)

Probably, WBKO'd do a lot better if they'd splurge for a bigger tower...
(do it cooperatively with channel 40, they both could use the help...
of course, WSMV is better off with channel 40 having a wimpy signal<grin>)

I've seen WBKO-DT here, but only once and during a big tropo opening.
The KETs (which aren't all that powerful) are far more frequently seen.

I stand corrected.

However, the original question was about commercials..and my answer was
about programming logs.

This is an absurd notion, based on a lack of understanding.

There is a big chunk of spectrum between channels 6 and 7.

FM broadcast band 88-108MHz

The aero band, 108 to 136MHz or so.

Whatever is between 136 and 144MHz

2 meter amateur band, 144 to 148MHz

"Public service band" 148 to 174MHz
(I've lumped a lot here; paging, fire and police (at least in the old days, MURS, the VHF marine band, the weather service broadcasts, business use, etc).

Then comes channel 7.

So if they took the FM band away, there would still be a large chunk there.

Take note that there is a 6MHz gap, a whole channel, between channels 4 and 5, which actually would be "in the way" more than the FM band clustered with those other services that will not move.

What you also miss is the amount of spectrum that would be released if TV vacated from the VHF frequencies (which the other posters have indicated will not happen).  72MHz would be free, which is in fact a massive amount of spectrum.  TV is the widest bandwidth signal commonly used, and you can fit an awful lot of stations in the 6MHz bandwidth used by one channel, the moreso now as schemes have come into play to make better use of the spectrum for two way communication.

So if the tv channels were released for other uses, a measly 20MHz for the FM band is nothing.

Even if none of this was true, except for TV there is very little need for continuous spectrum.  So six MHz here, and six MHz there will result in 12MHz available, and they do not have to be adjacent.
What we have seen is TV getting in the way.  They were allocated over fifty years ago, when radio was still relatively unused.  They took up large chunks of the VHF spectrum, no other service has so much allocation in the 30 to 300MHz range, and so whatever came later had to be fitted into whatever segments remained.  Once the spectrum was full, there was no more space to put anything, even though in any given location there was always space lying empty, since no area has all tv channels in use.  The other services don't need so big chunks, but TV is using any available space.

In other words, even if the tv channels were vacated for other uses, there is no reason to lump the FM broadcast band with them.

Michael

No, but at least you can go to the traffic supervisor at one of the stations
and ask if they have even _heard_ of your spot.

The Genius of Frank Zappa

As ROCKLINE approaches its 23rd anniversary, we at the show become more and more aware of the incredible library of programs we have. With approximately one thousand, four hundred shows we have had a front row seat to Rock and Roll history. ROCKLINE provides a unique vantage point for watching American culture unfold before our very eyes and ears and to hear directly from the innovators about their perspective on Rock, their own contributions and the world in general. Throughout it all we have provided you the chance to speak with some of the most remarkable humans on the planet.

Without a doubt, one of the most amazing persons to enrich our world was Frank Zappa. With over 60 albums (60, that's not a typo) Frank continually pushed the boundaries, challenged us and helped change the way we perceive ourselves and those around us. Beyond The Beatles and a very short list of others, no one else can lay claim to such impact. To celebrate the release of the DVD "Baby Snakes" we are proud to present a reprise of the third ROCKLINE ever broadcast with the original host of the show B. Mitchell Reed and Frank Zappa. Taken from May 18, 1981, we will add new perspective to the Zappa story with fresh, brand new interviews from his son Dweezil, long time guitarist Steve Vai, and Frank's commander in chief on drums, Terry Bozzio. We will play some of Frank's most famous songs and portions of the Baby Snakes DVD as well. Plus, it is absolutely fantastic just to hear Frank's voice again in possibly the only national radio interview he did.

This is something we began only last year. Re-broadcasting truly special shows and moments and bringing them up to date with new, relevant interviews. We call them new, old shows. Call it what you like, but remember not to call at all on this night, as we present The Genius of Frank Zappa only on ROCKLINE!

Looks like Dr. Bruce is ready to retire from his FMedia! and FMAtlas. His personal gain of time and energy will be our loss, unless someone continues the publications. Granted, times have changed with so much data available online and for free, but much of what Bruce does in FMAtlas is not collected and disseminated in a form such as his.

> The Nineteenth edition FM Atlas is ready. Most of you know me as publisher of the FM Atlas and FMedia! newsletter. You probably know that the 19th edition of our book is ready, but not all of you have availed yourself of this acclaimed publication. It is $23 postpaid worldwide, and we take VISA, American Express and Mastercard, as well as checks or money orders to "FM Atlas," PO Box 336, Esko MN 55733-0336. Look at our website, http://members.aol.com/fmatlas/ for more information on the book and the newsletter.

Isn't that a 4 mHz gap, not 6 mHz, between channels 4 and 5 that whatever
takes up?

HI--Wow that sounds cool, actually seeing a station as a stand-alone,
serving a major metro, and doing local live 24/7!  I wish that was
more commonly the case.  I live in a radio desert of either
predictable playlists, or jukeboxes, or music for the college set.
I'd be listening to stuff in say NJ, Bulgaria, CA, Denver, Peru, etc.
if I had a computer at home...but, as far as "when did radio stations
start playing 78s?" question, I am actually more trying to figure out
when did stations start compiling "top ten" hit charts, which I am
very avidly seeking.  Not knowing the history, I don't know what to
tell dealers in old newspapers, etc., what to look for.  I AM PROBABLY
LOOKING FOR "TOP TENS" PRINTED IN NEWSPAPERS before 1957 or so, most
of all.  I think they're more likely to turn up than the hand-out
flyers.  I would be grateful for any information on the existence of
these (so that, if nothing else, I can know which newspapers to seek
in which cities), or to find anybody who clipped any of these out of
the paper.  If you email me <fmerrilljr@DIESPAMDIEyahoo.com>

you'll get a message to me faster, probably.  Thank you all...

No such proposal has been made.  Digital FM has already been introduced on
the
existing 88-108 Mhz band.

Here's notice of an upcoming DX test...

PLEASE NOTE: Even if you don't hear a test, be sure and drop a card, letter, or e-mail to the station personnel, thanking them for going to the trouble to run a test!

Monday, March 29, 2004 - WXHL-1550, Elkton, MD will conduct a DX test from 12:01 - 1am EST. The test will consist of numerous voice IDs and forgotten 70's and 80's Top 40 music and a few test tones. Currently, the engineer is uncertain of just what power the test will be run at; the station is normally 1000/1 w U3.

Currently, the engineer reports he is unable to respond to QSL requests or reception reports. Please contact me if you might be able to help.

Thanks!!

Lynn.

>No, but at least you can go to the traffic supervisor at one of the stations
>and ask if they have even _heard_ of your spot.

Additionally, a copy of the invoices sent to the 3rd party might be acquired if the situation were explained to the station's traffic director.

If the production continuity was handled properly at the radio station, individual spots -- even from a 3rd party agency's roster of clients -- would be identified by ISCI code or some other ID so that the station know when to properly play which spot.

E.g. Agency XYZ is buying time for a roster of an insurance company's local agents. Each of those agents is to get a tag mention at the end of a generic :60 spot. The radio station might invoice Agency XYZ with the playback times of the :60 is this manner:

My Insurance Co + Tag TP 12:45 p.m.
My Insurance Co + Tag ES 2:38 p.m.
My Insurance Co + Tag GT 6:06 p.m.

The initials would stand for the individual insurance agent being tagged.

AHH FYI, There is only 4 MHz between TV 4 and 5....
72-76 MHz....not 6 MHz! Used for radio links (only is areas where TV 4
and 5 are not allocated/used) and model remote controls.

136-144 is government use....satellites (wx, etc) MARS, CAP, etc...even
Russia's MIR used 143.625 MHz as a comm channel....

What point is there in sending a card to a station test you didn't hear?
That's like asking for a QSL from Radio Netherlands because you didn't hear
it.

Keith,
I take it the STL is composite? If it was L/R discrete I would suggest running the Optimod out to the xmtr and do the processing there....
BUT in your case, it sounds like you need the XT chassis which is a 5 band compressor that works with the 8100 and was an option....may not be easy to find, though...Personally, I like the audio quality of the 8100...rich and full....but you have no EQ control....you might want to look at updating the Optimod internal cards and also adding the XT chassis...that can make a noticable difference in air sound....
DO NOT put anything after the OPTIMOD though...also you do not want any major COMPRESSION ahead of the 8100....it will fight the AGC in the 8100 and make the audio sound trashy....I HAVE used another processor ahead of an 8100 but with the 8100 in BYPASS mode and only acting as a limiter and Stereo Generator.....I had a 8200 at the studio and that fed a T1 and AES STL.....at the xmtr site, the L/R audio was picked out of both paths and fed to the 8100 thru a relay switch.....thus the audio was already processed...but as L/R I had to feed a Continental 802A exciter which is composite only...so the 8100 was used in a limited mode...but it worked! You probably need a audio EQ more than anything else ahead of the 8100 if it is set up right.....that will get you tha' thump!! ;)

If you need more info or if I can help more, sub wb5itt for nospam in the return address of my email!

chartquest1954 <fmerrilljr@yahoo.com> wrote:

> HI--Wow that sounds cool, actually seeing a station as a stand-alone, serving a major metro, and doing local live 24/7!  I wish that was more commonly the case.  I live in a radio desert of either predictable playlists, or jukeboxes, or music for the college set. I'd be listening to stuff in say NJ, Bulgaria, CA, Denver, Peru, etc. if I had a computer at home...but, as far as "when did radio stations start playing 78s?" question, I am actually more trying to figure out when did stations start compiling "top ten" hit charts, which I am very avidly seeking.  Not knowing the history, I don't know what to tell dealers in old newspapers, etc., what to look for.  I AM PROBABLY LOOKING FOR "TOP TENS" PRINTED IN NEWSPAPERS before 1957 or so, most of all.  I think they're more likely to turn up than the hand-out flyers.  I would be grateful for any information on the existence of these (so that, if nothing else, I can know which newspapers to seek in which cities), or to find anybody who clipped any of these out of the paper.  If you email me <fmerrilljr@DIESPAMDIEyahoo.com> you'll get a message to me faster, probably.  Thank you all...
>

I think what you want are old Billboard magazines, not newspapers. A trip to your local library will get you a pointer to Billboard on fiche going way back.

You're right, I was looking at the chart wrong.

Are there still 75 MHz fan markers of airport instrument approaches?

You obviously do not know how to finesse Prisms.  I've had Texars blow the doors
off
the competition, without overmod, and do so in such a manner that, when compared
to
the original source, it was virtually indistinguishable from it.

Well, it at least lets the engineer know where his signal _isn't_ getting
out.

>That's like asking for a QSL from Radio Netherlands because you didn't hear
>it.

For a long time, I was getting Radio Nederland in the 26 MHz remote IFB
link.  I'd have been delighted to send them anything they wanted for me to
not hear it.

Nah. They won't be asking for a QSL, they'll just be telling the station that they tried for them (but didn't hear them), and then thanking the station for running the test.

Just gives some feedback to the station that there were indeed those who were 'trying' to hear the test.

For no reason in particular, would like to throw our station out into
the spotlight.

98.1 KVET, in Austin, Texas.. We play tunes from Nashville that don't
suck, And classic country, and Texas favorites.... a somewhat eclectic
variety.

Our morning show is #1 12-plus.  Hosted by Bob Cole and Sammy Allred
(Yea.. THE Sam Gezzinslaw, of Geezinslaw Brothers fame.)  And, to
boot, we have Ray Benson as our "Station Voice." Whatta voice.

Jay;

| >their broadcast band
|
| The FCC is not so doing, thus the consequences of such an action are
| moot. (Just ask your friends at KOTA-DT channel 2.)

Evidently a few TVs are doing so already. KCSM San Mateo, CA (secondary PBS for the San Francisco Bay Area) announced in its March program guide that it will give up its analog allocation on channel 60 and will broadcast exclusively as DT on channel 43, multicasting at least two channels. The second channel will be a jazz channel complementing KCSM-FM. The primary reason, though, seems to be economic: "We made the decision that our resources needed to go toward serving more students by creating a whole new telecourse 'stream', rather than paying what amounts to double rent and electricity to continue our analog broadcast."

KCSM estimated that about 8% of its viewing audience will be affected. Cable and satellite feeds are to continue.

Here's the results of the most recent DX test that have been received here:

Sunday, February 15, 2004 - WQMA-1520, Marks, MS tested 12:00-2:00am CST:

This test was heard throughout a large part of the US and Canada - many times, it was the code that got thru. Many DXers reported hearing the test; the station had said they were giving an award for the longest distance reception, but I have been unable to find that information on their log page. From the information I have received here, it appears that the farthest reception reported was in Seaside, OR, by DXer Pat Martin on a Drake R8 with terminated 1500' Eastern beverage, followed by Saul Chernos in Burnt River, ON, and Jeff Falconer in Clinton, ON. Also reporting hearing this test were:

Ken Wilson, Central, KY
John Hunter, Rossvile GA (near Chattanooga)
Dave Hochfelder, Highland Park, NJ
Mike Hardester, Jacksonville, NC
Patrick Griffith, Westminster, CO
Jim Myrick, Meridian, MS
Earl Higgins, St. Louis, MO
Steve Francis, Alcoa, TN
Michael Procop, Bedford, OH (near Cleveland)
Gerry Bishop, Niceville, FL
Bruce Winkelman, Tulsa, OK
Bill Dvorak, Madison, WI
Les Rayburn, Helena, AL (near Birmingham)
Curtis Sadowski, Paxton, IL
James Niven, Moody, TX
Mike Oswald, Houston, TX
Ward Jones, Dallas, TX

Most reported hearing code with QRM from KOMA-OK, KRHW-MO, WSAI-OH, and WLAC-TN; some recounted the music and/or announcements played.

However, there were some, mainly in the West, that tried for the test but weren't able to recive it; these included Vaugn Martin in Helena, MT, Nick Hall-Patch in Victoria, BC, Don Kaskey in San Francisco, CA, Art Peterson in Richmond, CA, Frank Aden in Boise, ID and Gordon Bell in Troy, NY - he is not far from WWKB, a 50 kW station.

Many reported how much they enjoyed the test; many thanks to WQMA!

That's all for now...

Lynn.

Amazing.

Is all that spectrum bandwidth occupied by over-the-air TV really serving only a small percentage of the population?  Rural areas surely must still rely on over-the-air TV.

As an aside, in the news report that Cox Cable and ESPN had made peace it was reported that Cox will pay ESPN $2.61 per month for each of their cable subscribers!

[Moderator's Note: Yes, rural areas do, to a certain extent, rely on over-the-air TV, but in many cases, people probably have DSS or cable, like my parents who live 40 miles east of Cleveland in Geauga County, Ohio, and get most of their programming from Dish Network.

Here in Apple Valley, CA, and throughout the (mostly rural) High Desert, there are probably more people who have to rely on over-the-air signals, but the Los Angeles stations, which are 90 miles southwest of here, all have translators sitting on a tower down in Hesperia. The tower isn't well maintained, though, and I don't know whether Victorville's lone local TV station, KHIZ-TV 64, has its transmitter in that area or not... my wife says they don't, actually, and that their transmitter is up in Victorville near their studio.

But in Apple Valley/Victorville/Hesperia, unless you live outside city limits, you can get cable from Charter, and up in Barstow, you can get cable from... mmm... I think it's Time Warner. And in spite of the mountainous terrain, most homes in this area are properly situated to use DSS also.

Interesting note: Until the recent mandates allowing DSS providers to carry local stations, my parents had to use an antenna to get Cleveland's TV stations. They're 40 miles from Cleveland, about the same distance from Erie, PA, and maybe 50 from Youngstown, Ohio, and they could get stations from all three cities, but the signals weren't very strong. In spite of the fact that they could pay Dish $5 per month to get Cleveland local TV, I believe they still use their antenna. I have no clue why. **SJS]

What's wrong with being polite and just saying "Thanks for running the test, but I couldn't get your signal at XXX"? Who knows, your response might point out a previously unknown problem to the CE! I try to always mention it in DX test announcements because I think a "thank you" reflects well on the DXing community.

Lynn.

For anyone interested, here's a reminder of upcoming DX tests; if
anyone
has any additions or corrections, please contact me. (BE SURE TO NOTE
THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Daily, from 2:55am-3:05am EST - WRIB-1220, Providence, RI - This test is scheduled to run "through at least March (2004)".

Sunday, March 14, 2004 - WTOP-1500, Washington, DC 12:00-1:00 am EST.
WWW: http://www.wtopnews.com/

Monday, March 29, 2004 - WXHL-1500, Elkton, MD 12:01-1:00 am EST.

Please remember, what's listed as being on, say, Monday *may* be what
you
think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message
letting
me know, and please, drop the station personnel a note, via e-mail or
snail
mail, thanking them for running the test! Also, for brevity's sake, I
didn't post the QSL addresses; if you need these, let me know!

Lynn.

WKRN really does have a nice signal. So much better than the analog with all it's co-channel.

I don't think BKO will ever go for a bigger stick. They never have been on the cutting edge and they seem to be happy with covering the surrounding counties. They have 4 antennas on the tower now with 13 and 24 both on it.

I spoke with 40's GM a little while back and he talked of a new tower and an actual studio but it hasn't happened. I did turn the antenna around and see the DT signal but it didn't impress me so it was back to WSMV...I'm just glad the signal on 10 is so good up here.

KET is running 4 channels. Too bad we can't see the PBS HD stuff. Wonder when 8 will turn on a transmitter?

What's the deal with the Sinclair stations? They looked bad enough before DT but now they look like pixalated mush.

Ben

Some years ago, my employer's TV station (since sold) was hit by a devastating arson fire that wiped out its transmitter.  The station was off the air for weeks, but kept feeding cable headends.  Ratings were unchanged.   Hardly any viewers noticed the on-air signal was gone.

I'm sure the cable penetration is even higher now, although it's been several years since I checked.

In the San Francisco Bay Area, it is quite likely. Yet NBC did suffer a hit when it got into a snit with KRON (from losing the bidding to buy the station) and flipped the affiliation to KNTV in San Jose. An estimated 25% of the geographic area lost NBC service over-the-air, but KNTV quickly arranged with Comcast's predecessor to ensure cable carriage on area systems. In any event, KNTV has filed to move to Mt. San Bruno (the site that KCSM-TV is leaving). But the hit in ratings may have come more from KNTV's image (or lack of image) in the market and having to compete with the San Francisco incumbent stations in news. KNTV doesn't seem to be really committing the resources or the brains to do it consistently right. It's passable but feels like about Kansas City in quality.

Anyhow, due to the terrain of the Bay Area, as well as its geographic expanse, there is no site that will serve all areas well. There will be significant dead spots no matter

where the transmitter is located -- obviously, that's true
for FM as well. The best combination for FM stations seems to be a
Sutro (SF) or Beacon site with on-channel repeaters in the I-680 corridor
in the East Bay. TVs haven't tried that combination, possibly due to
the relatively heavy reliance on cable. KDTV does have a translator
in Santa Rosa (far North Bay), and KRON did have one there until KQED-DT
came on and wiped out channel 30.

## Hunter Hancock R&B DJ - Online Broadcast

For those that grew up in Los Angeles in the 1950's you will immediately recognize the name of Old H.H. -- Hunter Hancock -- who has the esteemed honor of being the First DJ in history to have the first show dedicated entirely to Rhythm and Blues then known as 'Race Records' in 1948.

Hunter Hancock finally retired in 1968 from KGFJ in Los Angeles.  And had not broadcasted except for a LP for the 50's and 60's Cruisin' Series.  Except Hunter Hancock did do one exclusive show for Rock-it Radio in Ventura, California in the Fall of 2001 -- And at the age of 84 -- he proved he could still "Hunt with the best of them"  on the Lane Quigley Memory Lane Show.

This show will be able to be heard as a rebroadcast online at Rock-it Radio Online from our archives page at:  http://www.palmsradio.com/rockittext.htm
And click to show #880  -- The show will be available to be heard for approximately 2 weeks from the initial airing beginning on 21 February, 2004.

Today Hunter is 87 years old and though in fraile health remains in High Spirits!

This show is also available as an Unscoped Aircheck in the Rock-it Radio Music Store, where all proceeds help to keep and pay the copyright fees it takes to keep these shows broadcasting over the internet.

The Rock-it Store is at:  http://www.palmsradio.com/store.html

We invite all of you to tune into this DJ Icon of the 50's exclusively on Rock-it Radio Online

All the best,

Bennie Dingo

This varies dramatically from market to market -- national "penetration" numbers for cable and satellite are averages, with some areas much lower, and others much higher. In the Dallas-Fort Worth area, off-air viewing of the local stations is still common, since we have one of the lowest cable penetration rates in the country, and not all satellite subscribers opt to pay the satellite company to provide what they can receive off-air for free.

Why pay $5/month to get what they're currently getting for free? It seems a very rational decision to me...especially since the antenna apparently provides signals from mulitple markets, something that Dish can't legally offer to them.

> with all it's co-channel.

IMHO that's only half the problem.  Even without the CCI here, the computer noise/leaky insulators are pretty bad - and when they aren't present, the signal can be just plain snowy.

But when the sporadic-E kicks in, well, you'd better have a DTV if you want to watch ABC...  There have been days when I've had a snow-free signal from XEFB with some weak WKRN CCI in the background!

(then again, if you'd seen a picture of the XEFB transmitter site (I have), you'd know why they get out so well!)

> I don't think BKO will ever go for a bigger stick. They never have

> and 24 both on it.

I wonder if there might be some concern over WKRN (and as a result, ABC) getting bent out of shape if WBKO puts too much RF down into Tennessee?

> Wonder when 8 will turn on a transmitter?

8 just took out a STA for roughly 45kW ERP.  Strange, as I thought I
read their full-power transmitter was already ready to go & they were
just waiting on the STL and encoder.

> What's the deal with the Sinclair stations? They looked bad enough
> before DT but now they look like pixalated mush.

I don't watch often enough to know...  They've got five transmitters at
the same site now (all three digitals and the analogs for 30 and 58) so
I suppose STL bandwidth is at a premium...

You are invited to join a discussion group all about radio programming!

This list is not only for Program Directors to exchange ideas and thoughts
and views...but for anyone in the industry who simply wants to talk about

radio programming, current trends, ideas, past programming, contesting, research, jocks, etc.

This list won't be format specific, so even if your specialty is "AC Radio"...we can discuss how to program news/talk, oldies, formats of the past and future!

So, join us!

Send a blank email to:

When many stations were "mom and pop's" or were part of much smaller companys (back in the 7-7-7 days of how many of what service one owner could have) it probably made stations more responsive to local people and community standards.

They were more dependent on income from the few stations they owned (compared to today), and had more time to listen to what was actually going on in those communities.

With the relaxing of ownership limits, and the ability to trade stations like baseball cards, and little requirement for the stations to be other than talk boxes or juke boxes, we have now what we have.

The situation is partly caused by the fact that most listeners don't realize they have some stake in the outcome of what happens at the federal level as it affects broadcasting, or realize that they have some mechanisms to have an effect there.

You snooze, you lose.

That's about to happen in Yuba City, CA (40+ miles north of Sacramento.)

The allotment for the only FM licensed to the city is more than likely going to be moved to a town closer to the Sacramento suburbs that would get its first aural service.

There are some reasons for the folks in Yuba City to fight the move, but the FCC's first priority in considering allotment petitions is first aural service for a community.

The station involved was just sold, and is already targeting Sacramento with a new 80's format from a new transmitter site that's closer to Sacramento.

The idea that a station allotted to Lincoln will actually SERVE Lincoln, (population 11,000) in the sense that many folks remember radio doing is absurd, given the current owner's quite visible (on Sacramento TV) aim for Sacramento.

There ought to be some mechanism available (more than just the community issues list and programming in response) that requires stations to serve, REALLY serve their communities of license.

That's not an issue for many stations that are either licensed to major markets and serve them, or are so far away that there's no temptation to do so because there's no economic benefit.

But for (primarily FM) stations that are 10, 20, and now 40-50 miles away... we see more and more trying to obtain the grass on the other side of the fence, instead of helping to improve the grass in their own communities.

It's even happend in the Yuba City MSA, where two stations in other counties call Yuba City "home," at the expense of their smaller Communities of License.

Unfortunately, the people in Colusa or Gridley never knew enough to say "boo" when the licensees did what they did.

Now, it's Yuba City's turn.

Ted.

I bet if they go to daytime pattern in the evening, the folks in London
and San Francisco will also know when 495 is blocked at the 355 exit.
It'll be really interesting to see.
--scott

I actually like listening to WTOP on my way up the coast.  I tune to WINS
next, and then to WBZ, so I get the traffic reports all the way up.

One site I've frequently visited is www.tvandradiojobs.com

There's also a list of state and regional radio job sites. Go to
www.newradiostar.com and click on the "100 Best Places To Look For Jobs" link
on the right side of the page.

The Yagi was invented by two Japanese engineers, Hidetsu Yagi and
Shintaro Uda back in the 1930's.  I do not know if either is still
alive, but they called it a Yagi-Uda.

I do, however, know that there is no Mr. Crest.

Did WTOP have to get a special temporary authority to use daytime
power/pattern for this?

If not, what portion of the rules grants the authority to do so in the
middle of the night.  "Experimental time?"

I'm in UK. You cannot buy the turnstile direct from FUNKE. Cost of "R.1100-
FM OMNI" to me is appx. $33.00. Google: R.1100- FM OMNI to see the item.

Another DXer asked me that same question; I asked the person that said they'd run the test if that were the case, and I have yet to have heard back. But if they're simucast, I'd imagine it will - but I know nothing about the pattern on the 820 station.

Lynn.

Probably Metro.

However, I fail to see how that is any different than the days when every radio station got its news straight off the AP teletype (which, ironically, is where Metro gets some of their news, too). There were, in any given market, only one or two radio stations able to afford to fully-staff a news department with news-seeking reporters; all the other stations had rip'n'read "newscasters."

WCBN WILL DESTROY YOUR FEEBLE FORMATS
=20
WCBN - 30 Years of Freeing Your Mind - Listen to us online!
=20
WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown.  We have been
broadcasting a genre-less overview of music, news, and public affairs
for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform
involves all different kinds of music, including jazz, reggae, blues,
hip-hop, country, rock, and just about everything else under the sun.
Instead of telling our DJs what to play, we allow them to select their
own recordings from our vast and unique library. It is their
responsibility to mix together many different kinds of music in an
intelligent fashion, and show links between musical genres.

This is a very complicated issue, going back to the ASCAP monopoly, which ended withthe forming of BMI. Then the musicians' union required of many stations payment, or even the maintenance of an in house band to be able to play records.

I'm not an expert; you might seek out info on Barry Mishkind's site or do some web searches.

Recordings were played as a regular staple by the mid 1930s. As an example, Arthur Godfrey was the wake-up (morning) man on WJSV (now WTOP) during those years. He signed the transmitter on, took the readings, signed the log, etc.

In many cases these were 16-inch vinyl transcriptions from libraries rented to stations. They didn't have the surface noise problems on shellac disks. They were often of higher audio quality, especially the "World Broadcasting Corp" ones. They were sort of jumbo LPs. with 4 or 5 cuts on a side.

There was the day that Benny Goodman's band cut 50 tunes for World (IIRC). The members got $50 each for their efforts. Translated into today's dollars that would be like $800 or $1000 - a respectable sum.

Remember that there were only about 750 US radio stations in 1940, and a large percentage were on the networks. Networks didn't play records.

Stations playing the latest hit 78-rpm records appeared by 1940 or earlier.

In 1940 a major city like Washington,DC, had the four network stations and two independents. The independents were record-based. WWDC was very much a latest pop hit station.

Richmond, VA, had only 3 radio stations during WW2. They were on the 3 major networks. There would be a morning DJ, and also one during part of the afternoon. The (NBC) station I know most about never played records - only transcriptions.

And Johnny Mercer was a latecomer. Wasn't he a co-founder of Capitol Records, and thus would benefit from their products getting broadcast exposure. Capitol had their own transcription service/library, which probably included everything from their 78-rpm releases.

For anyone interested, here's a reminder of upcoming DX tests; if anyone has any additions or corrections, please contact me. (BE SURE TO NOTE THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Daily, from 2:55am-3:05am EST - WRIB-1220, Providence, RI - This test is scheduled to run "through at least March (2004)".

Sunday, February 15, 2004 - WQMA-1520, Marks, MS 12:00-2:00 am CST.
WWW: http://www.q1520radio.com/

Sunday, March 14, 2004 - WTOP-1500, Washington, DC 12:00-1:00 am EST.
WWW: http://www.wtopnews.com/

Please remember, what's listed as being on, say, Monday *may* be what you think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message letting me know, and please, drop the station personnel a note, via e-mail or snail mail, thanking them for running the test! Also, for brevity's sake, I didn't post the QSL addresses; if you need these, let me know!

Lynn.

For sale:

Partial interest in AM radio station in West Virginia. Small market. Non-directional daytimer with some night power. On the air since 1949.

Total asking price is $150,000 and that includes the HUGE 330 ft. plus self-supporting tower, land and the combo studio/office/xmtr building.

It is the only AM in that county. Population of county exceeds 25,000.

Joint venture. Active or inactive investors with at least $10,000 (Ten grand, baby!)each are welcome. All investors would be on the board with full voting rights if desired.

I am NOT an agent, broker, shill, owner or part owner. Even more important, I am NOT a crook!

Don't want to make this a for sale group but maybe someone here will have a need for these. Gotta make some money to buy into one of Meyer's stations!

I have both 5 watt and 25 watt versions of LPB's older tube type AM transmitters for sale. On my Motorola service monitor the 5 watt is doing about 4 watts out and the 25 is showing about 18. They are both on 580KHz.

I have some of the AC line interface units too. They are all missing one coil but everything else is there.

5watt: $100
25watt: $200
plus shipping from Bowling Green, KY 42101

Thanks,
Ben

Very often the musician's union required one of their members to be present when records were played. When I first came to WOR in 1991 I was told their last sound effects person had only been let go a few years before. It took a long time to get the union rules changed to face a new world of recorded music. Many stations who are still in the buildings they used 20 years ago probably have one large studio big enough for an orchestra or 4 studios carved out of the big one.

Before 1440 Broadway was refurbished I saw the old studios. It was clear lots of live stuff originated there for both WOR and Mutual. They were studios you couldn't economically duplicate today. Air locks. Spring suspensions (WOR is just above the crossrails of nearly every subway line in the city in Times Square). If you were to try and record music without those isolated studios with today's ultra sensitive mics you'd have every car sounding like a low rider. The WOR Radio Network uses 20kHz satellite channels. I can picture every subway train that passes sending a 25Hz component that would trigger automation systems that use it.

Rich

Hi,

I reviewed the Digi 002 for radio World recently. To get the point across about what sorts of effects the Pro Tools LE software could do, I produced a promo and stuck it up on my website. Some folks have commented;

(A) It's pretty funny.

(B) You can do ALL of that with one mic, a laptop and PTLE?

Does this mean I'm falling back into the gravitational forces of my "production rat" radio roots?

Please help.

Regards,

Ty Ford

Does anyone have any information on FCC rules and regulations regarding retention of log times for advertisements? My company ran ads on several stations last year and we now need to verify the log times (what were the exact times and dates that they aired?) for those ads. Are radio stations required to keep such records? If so, how long are they required to keep them? Any help would be GREATLY appreciated!!

Radio stations usually keep commercial logs for at least a year.

I have to admit that your search will be costly in terms of hours, though.  Did you receive invoices with the times on them?

What is wrong with Chris Thomas WDAE 620 mornings?
He is sick and has not been on the air in weeks.

The station I work for keeps program logs for three years and
transmitter logs for five years.

However, it's very common practice these days for invoices to include
spot play dates and times. Doublecheck to make sure your invoice
doesn't already give you that information.

Broadcast operations, despite relaxation of the requirement to do so, would do well
to keep their logs for at least the term of license, plus 3 years.
With license terms up around, what, 7 years now, this is certainly an onerous
undertaking, but the stations which do certainly have an advantage
over those like this one who are having an awful time of it trying to find the
support necessary.

Seeing as so many continuity logs are kept electronically, now, I don't see what the
trouble is. And if the station in question hasn't invested the
expense to store them electronically, this is when a lot of learning occurs. Good
records are everything in a broadcast operation....having them usually
satisfies all sort of questions posed by a visiting Field Officer, even if what's
been alleged is true.

But now I see that the inquiry relates to a client-station relationship....good luck,
because as I recall, there are no explicit log requirements now, seeing as there are
no limits for commercial time, no minimums for news, no nothing. If you have a
station which actually keeps and stores logs, then you've been lucky.

-- For direct replies, take out the contents between the hyphens. -Really!-

Here in Haverhill, Mass. - an interesting story =

http://www.wxrv.com/rivermusichall.shtml

WXRV-FM restored the live music studio that was built for WHAV(AM) in the late 1940s.

WHAV started as an AM station, also went on FM, and used the music studio space for other things (offices? storage? I don't know). In 1995, the AM license was sold off and the AM station moved their studio operation to Methuen. Since the FM station (WHAV-FM became WLYT, which became WXRV) is almost strictly 24-7 music, and now were all alone in the building at 30 How Street, they reclaimed the live music studio and they now use it for in-station performances by visiting guest artists.

Kinda bucks the industry trend. So does the station, by its mere existence as a standalone independent commercial FM outlet.

I don't believe they ARE required to keep that information anymore.  From
what I understand, the FCC doesn't even require a station to have logs at
all.  However, most DO...for their own purposes.

>  My company ran
> >ads on several stations last year and we now need to verify the log

You, as rthe advertiser could have asked for affadvits for the
broadcasts...OR even airchecks.
(Something you could've stipulated before the spot buy.)

pls excuse a bit of self-promotion but I'm proud of a show we're doing on
President's Day...Monday and maybe you'd like to catch it.
Dr. Bill Leavell, Editor and Publisher of the Washington Report newsletter and
I will be going through the President's...one by one starting with George
Washington.  We'll look at them not as politicians or historical figures but
more in the "human" sense with odd bits and pieces about each.
It might be fun for you.  In doing the research I've learned a lot
webpage:

Ask the question on the "mailbag" section of DCRTV.com . WTOP people read
and post regularly.

I visited their transmitter a few years ago.  The modulation monitor needle
```

just stuck in the region near 100% - yet I agree they sound good. Shows what you can do if you only have voice to deal with - and a good engineering staff.

```

>Does anyone have any information on FCC rules and regulations regarding retention of log times for advertisements?<

Logs of commercials are not required to be kept.

>From what I understand, the FCC doesn't even require a station to have logs at all.<

Incorrect. Logs must be kept for:

1) Tower light outages, and
2) All EAS alerts and tests.

"falling back into the gravitational forces..." or just getting sucked back in?

Yeah, it sounds like production, all right, though I thought I heard accult for occult and perduction for production, but maybe that's just the result of MP3 on a cheap sound card (I've been mostly away from audio for almost a decade so I don't know how good or not mP3s are supposed to be).

I fully intend to steal the phrase "rusty ribbons", by the way, although you can make magnetic recording sound a lot more impressive and modern by referring to it as "molecular re-alignment" and you left out an important component of "Blue Star editing", a good splicing block.

You've reminded me just how much I miss doing production. I've been working the board for church services lately and it's really unnatural feeling to have all those sliders and knobs at my fingertips but never to get to go "on mic".

WCBN WILL DESTROY YOUR FEEBLE FORMATS
=20
WCBN - 30 Years of Freeing Your Mind - Listen to us online!
=20
WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown.  We have been
broadcasting a genre-less overview of music, news, and public affairs
for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform
involves all different kinds of music, including jazz, reggae, blues,
hip-hop, country, rock, and just about everything else under the sun.
Instead of telling our DJs what to play, we allow them to select their
own recordings from our vast and unique library. It is their
responsibility to mix together many different kinds of music in an
intelligent fashion, and show links between musical genres.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!
=20
WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown. We have been
broadcasting a genre-less overview of music, news, and public affairs
for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform
involves all different kinds of music, including jazz, reggae, blues,
hip-hop, country, rock, and just about everything else under the sun.
Instead of telling our DJs what to play, we allow them to select their
own recordings from our vast and unique library. It is their
responsibility to mix together many different kinds of music in an
intelligent fashion, and show links between musical genres.
=20
Click here to listen to our live WCBN-FM Ann Arbor broadcast!

For sale:

(The "Radio Crazy" is baaaaaaak!!!)

Partial interest in AM radio station in small West Virginia community. On the air since 1949. 1 KW daytimer with 500 watts PSA and some night power sufficent to cover city of license.

Full asking price is only $150,000 and that includes the huge self-supporting tower, land and combo studio/office/xmtr building.

This is the only AM station in that county. Community is the county seat.

Joint venture: Active or inactive investors with at least $10,000 each are welcome. All investors would be on the board with full voting rights if desired.

I am NOT an agent, broker, shill, owner or part-owner. More importantly, I am NOT a crook.

My probation period with Mr. Larson E. Rapp (parole officer) is over and I have cancelled my one-way flight to Rio! Hi!

Tel: (478)741-1710 in Macon, GA. You will get an honest description of the situation.

73,

Meyer Gottesman, W6GIV
aka "The Radio Crazy"

Hi!

I've been developing software broadcast processors as a hobby for the past 4 years. My latest processor is called Energize II and is a plugin for software supporting VST plugins. It can also be used as a DirectX plugin using a DirectX-VST wrapper.

A light version can be downloaded from:

http://chrisbustad.tripod.com/

It would be great to hear some opinions about it, as it is still under developement!

Thanks!
Christofer Bustad

Dear Newsgroup,

Does anyone know the latest info about what is going to happen to the FM band when the FCC forces all of the VHF television stations to give up their broadcast band and switch to the new freqency allocations for digital TV?  As you may or may not know, the FM band is located in between channels 6 and 7, I believe, and I would be surprised if the FCC would leave the FM band alone when the TV stations get out.  They want to auction these soon-to-be-obsolete TV channel frequencies off to the highest bidder.

The consequences I think of when I consider the moving of the FM band are monstrous: what about all of the car radios, portable FM radios and walkmen, and collector hifi FM tuners that will suddenly become unusable without maybe some kind of adaptor which may or may not work very well?

To me, it just doesn't seem right that we need to have change for the sake of "progress", unless the progress is real and necessary.  Many times it seems that these huge changes in the basic infrastructure of our communications industry are done for the sake of the economic enrichment of those companies who stand to profit richly from such a change, without giving much, or any, consideration to the consequences.

When a land developer decides to make major changes to a piece of undeveloped land, an environmental impact report has to be made before the developer can go ahead with their plans.  Where is the impact report for this huge planned change in the FM band?

I would like to get comments from others who know more about this proposed change and when it is to occur.

Why should Mikey Powell give a rat's ass?

Really... we're going to all have to replace our TV sets when analog television signals are phased out, aren't we? (At least that's what I've been led to understand)

I personally have no desire to do so. I have digital cable. There is no additional attraction to having HDTV.

The people south of here in the Marianas - the hills that separate Apple Valley, California from San Bernardino - might benefit. But only the people south or east of the Apple Valley town line, in unincorporated San Bernardino County, because they can't get cable (Charter's franchises are in Hesperia and Apple Valley and Victorville, but they don't have an agreement for the unincorporated areas where not many people live)... and especially in the Marianas, with the big hills right to the south, satellite might not be an option either. (Going east of AV towards Lucerne and Big Bear, satellite should be doable as the hills aren't over there.)

I've *always* considered HDTV to be a solution looking for a problem...

> communications industry are done for the sake of the economic enrichment
> of those companies who stand to profit richly from such a change, without

That's fine. Mikey P. can buy me a new television set. :-P

> this huge planned change in the FM band?

There is none. I doubt that anyone at the FCC cares (although I'm sure people will pipe up and tell me I'm wrong :)

The FCC is not so doing, thus the consequences of such an action are
moot.  (Just ask your friends at KOTA-DT channel 2.)

Robert Hovland wrote:

> Does anyone know the latest info about what is going to happen to the FM band when the FCC forces all of the VHF television stations to give up their broadcast band and switch to the new freqency allocations for digital TV?

Best bet right now is that that's not going to happen. "Core spectrum", into which all DTV will be placed, is channels 2-51.

The FCC changed their minds twice about which spectrum to allocate. First, they said all DTV would be UHF. Then, they amended "core" to read channels 7-51. Finally, they seemed to conclude not all stations could be accomodated in 7-51, and added 2-6 to the list.

My employer, whose analog signal is on channel 4, drew digital channel 10. Our biggest competitor has an analog signal on channel 5 and a digital on channel 56. They'll be forced to move their digital signal to channel 5 after the analog signs off. Channel 6 in Philadelphia drew digital channel 64, and will also be forced to move back to VHF after analog closes. There are many other examples.

My guess is that the VHF stations didn't want to surrender the coverage (and power efficiency) advantages of the lower channels; and the land-mobile interests didn't want the large antennas and susceptibility to sporadic-E interference inherent in VHF.

> channels 6 and 7, I believe, and I would be surprised if the FCC would leave the FM band alone when the TV stations get out. They want to auction these soon-to-be-obsolete TV channel frequencies off to the highest bidder.

FM indeed lies between channels 6 and 7 - just above channel 6. (you can receive channel 6 audio on most FM radios)

The FCC has recently authorized "in band on channel" digital radio broadcasts in the current 88-108 band.

No, they don't have to switch to new channels.  They have a choice of using
the DTV on either of their channels. I'd imagine that many would choose
their VHF channel if DTV turns out to work well there.

> As you may or may not know, the FM band is located in between
> channels 6 and 7,

As are hundreds of other services.

> I would be surprised if the FCC would
> leave the FM band alone when the TV stations get out.

I see no connection what-so-ever between the TV switch to digital and any
effect on the FM band or any other services between 88 and 174 MHz.  It
isn't as though FM stations were given a second frequency and have to choose
between it and their current one.

> They want to
> auction these soon-to-be-obsolete TV channel frequencies off to the
> highest bidder.

Right.

> The consequences I think of when I consider the moving of the FM band are
> monstrous: what about all of the car radios, portable FM radios and
> walkmen, and collector hifi FM tuners that will suddenly become unusable
> without maybe some kind of adaptor which may or may not work very well?

I'd say that there is 0.00000000000001 % chance that the FM band would be moved. Where would it be moved to?  TV was already allocated the UHF channels where much of DTV is located.  Anyhow, some DTV stations are already on VHF, including channel 2.  There is no other FM band for the stations to move to.

> I would like to get comments from others who know more about this proposed
> change and when it is to occur.

Who said there was a proposed change for FM?  I think you are making this up from whole cloth.

TV is allocated a HUGE bandwidth.  Modern receivers allow much closer spacing on UHF.  The FCC is chosing to reclaim and sell some of this wasted bandwidth as part of the DTV situation. There is no parallel in FM.

It sure is a shame they didn't go through with their original plan. I would have liked to have seen channels 2-6, or at least channels 5 and 6, given over to the FM broadcast band. Just think of how IBOC and LPFM might have worked out if the FM band had a little room to expand!

Does anyone know the latest info about what is going to happen to the FM band
when the FCC forces all of the VHF television stations to give up their
broadcast band and switch to the new freqency allocations for digital TV?
>>

Nothing.

As soon as the conversion to D-TV is complete, the TV stations which were
temporarily relocated to other channels, some to VHF, but most to UHF, can
return to their original channel, but on digital.

A Japanese friend of mine says that "yagi" means "goat" in Japanese. So the antenna was invented by "Mr. Goat" and the antenna itself is the "goat antenna."

Well, I researched the FCC web site and discovered that logs are required to be kept for 2 years, but only for tower outages, when the call letters are announced and the time and sponsor of each "program", whatever that means. It seems like the stations do keep logs of advertisement log times, but my problem is that we bought the ads through a 3rd party and we're trying to verify the log times that the 3rd party gave us, because we don't believe them. Unfortunately, if the ads weren't bought directly from the station, they don't keep log times or sponsor names. Sucks to be me.

Hi.  Does Radioshack still manufacture Part No. 150-1639 or 15-1639, which
is an FM turnstile antenna?  Looks unlikely to me.

For sale:

Partial interest in AM daytimer in tiny West Virginia. Town of less than 800 (2000 census) but about 28,000 in the county. Below 1000 KHz dial spot. Self-supporting tower. 1 KW days, 26 watts nights.

Only $150,000 including studio/office/xmtr building, land and tower. Only AM in county. On air since 1949.

Joint venture. Active/inactive investors with at least ten thousand dollars ($10,000)each are welcome. No individual can own more than 49 percent. That goes for me!

City of license is the county seat. Amazingly it has 4 motels, 8 restaurants, 4 grocers and even 1 Sears store.

References:
a-Mr. Larson E. Rapp. Parole officer. Zing-Zing prison, Ossinstink, NY.

b-Trade reference...Brazilian Bandit Airways. (purchased one-way ticket to Rio using all unmarked small bills).

c-Trade reference: Radio Shack, Dopetown, IA. (Purchased 1/4 watt, 27K ohm carbon resistor in 1957 and later in the day paid the 12 cents owed!!!).

Tel: (478)741-1710. eally!!! Macon, GA

Radio Shack no longer sells the crossed dipole. I spent some time last month trying to find one, ended up getting the last FM Yagi I could find in stock in the Minneapolis_St. Paul area...looks like they are discontinuing that too.

keep in mind that the RAM file is just a reference to the URL of the real RA file (it is a text file with one link in it). The RA file is the one with audio data in it. That's the one you want.

Right click the link and select download. Save the RAM file to your hd. Now open the ram file in a text editor like notepad.

The contents of the ram file is the actual URL to the real ra file.

Make a dummy html page with a HREF to the URL that you found in the RAM file. Something like:

```
<HTML><BODY>
<A HREF="link you got from the ram file">click</A>
</BODY></HTML>
```

Open this html page in your web browser.
Right click on the link and select download.

Wait a bit.

You now have the RA file on your HD for offline listening/archiving.  Done.

My name is Onno de Vries and i'm living in the Netherland and building big amps is my hobby.
I just bought a 4CX 5000A on a radio market here for a good price (180 Euro) including socket.
Becourse the price was so good i took the challenge to build a 88-108 Mhz final from it.
I allready build many with all diferent kind of tube's but after some experimenting with this tube i found out that the anode resonator a a bit of a problem course of the high cappacity of the tube.
I try to do it with a double output coil (together Almost a half wave) wich you see in manny designs for 144 Mhz amateur amps using for example the russian tube GU84.
This works but it has a terrible efficiency,about 30%.
I hope that someone have experiance with big transmitters with 4CX5000A or simular in the final wich has about the same anode cappacity and inpedance.
I hope that somebody can give me some Info about making a good and

high efficiend tank with these kind of tubes.

nospam,

Thanks for the input. I actually have figured that out after a while of 'playing' with these files. After extracting the correct URL the download with the freeware software I found seems to work. I got two overlapping shows but I guess that is because I downloaded two shows at once. That's easy to fix. The only problem I have right now is that 1. I have to write a program to automate all this as I plan to download lots of shows and 2. my car stereo does not accept CD-RW and does not have a line-input. I could burn it to CD-R which work ok. I have CD-Rs that I got pretty much for free but I don't want to tose them away stupidly due to evironment concerns....

Thanks,

Rob

Hi Onno,

RCA used the 4CX5000A as the final in their model BTF-10D 10kW FM transmitter.  The manual doesn't include any photos that show the complete anode cavity, or even photos that show all the details.  It's been nearly forty years since I have had hands on one of these, but basically there are two adjustable lines used as inductors in a pi network connected between the tube anode and the transmission line to the antenna.  The first inductor is in parallel with the anode capacity.  I will review the manual and see if I can figure out any of the details.

Regards,

John Byrns

They are called Airchecks and we are selling and expanding for sale our Rock-it Radio collection of recordings of Top 40 Radio of the 50's and 60's. These recordings have been digitally remastered at our studios and are unscoped which means they are uncut -- music, newscast and commercials are all included. We are continuing to remaster new releases as they become available. Here is the list we are offering at the moment.

1955 Alan Freed from March 5th, 1955 on WINS Radio New York.
1958 Mad Daddy Pete Myers November ?, 1958 on WJW in Cleveland
1959 Bill Balance from August 18,1959 on KFWB Los Angeles

1959  Alan Freed from November 5th, 1959 on WABC in New York -          Note: this was one of his last broadcast before Payola scandal ruined his career.
1961  Elliot Field from January 6,1961 on KFWB Los Angeles
1963  B. Mitchel Reed from February 7, 1963 on KFWB Los Angeles
1964  The Real Don Steele (As the Emperor of North America) from July 23, 1964 on KISN Portland, Oregon (probably our most whimsical!)
1965  Casey Kasem on May 27th, 1965 on KRLA Radio Los Angeles
1979  4BC - Brisbane Australia Top 40 Weekly countdown with Bennie Dingo of November 4, 1979.  First station we ever worked for.
1998  Rock-it Radio Christmas Special w/ Bennie Dingo (syndicated)
2003  Rock-it Radio Tribute to Johnny Cash - Featuring his SUN years recordings of the 50's.  (Syndicated: Recorded Sept. 12, 2003)
2003  Rock-it Radio Christmas Special for 2003 (Syndicated)

------------------------------------------------------------

All Airchecks are $9.50 each plus $1.50 shipping and handling.  Each Recording is digitally remastered and placed on CD and average about 1 hour in length.  Further descriptions and playlist of each show is available at our Ebay Store, where these are available at:
http://www.palmsradio.com/store.html

Satisfaction is guaranteed and 100% of all proceeds go to supporting Rock-it Radio Online and paying for internet and copyright costs to the entities that be.

Thank you for your time,

Bennie Dingo

I want to run a portable setup for like 6hrs at mardigras in Galveston Tx on the 14th of feb.  I would run the setup out of my mini van with maybe 40watts I need ideas on a portable antenna and what mast I should use and how to setup it up. Looking for ifno on how to seup a protable setup that could fit in a mini van and could be setup and taken down with in 30min.

For anyone interested, here's a reminder of upcoming DX tests; if
anyone
has any additions or corrections, please contact me. (BE SURE TO NOTE
THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Daily, from 2:55am-3:05am EST - WRIB-1220, Providence, RI - This test is scheduled to run "through at least March (2004)".

Sunday, February 15, 2004 - WQMA-1520, Marks, MS 12:00-2:00 am CST.
WWW: http://www.q1520radio.com/

Please remember, what's listed as being on, say, Monday *may* be what
you
think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message
letting
me know, and please, drop the station personnel a note, via e-mail or
snail
mail, thanking them for running the test! Also, for brevity's sake, I
didn't post the QSL addresses; if you need these, let me know!

Lynn.

Hey How do I get started with distributing music I made for broadcast such
as jingles etc. I made a bunch of demos but how do I send them to ?

Are there any agencies for stuff like that ?

Best regards
Henning Vincent

>I hope that somebody can give me some Info about making a good and
>high efficiend tank with these kind of tubes.

The Collins 830F transmitter used this tube -- there's one still in service as a backup here in the Boston area -- and the tube socket sits on the deck of a 1/4-wave-length cavity that can be tuned roughly by raising and lowering a sliding plate that forms the "ceiling" of the cavity. Fine-tuning is accomplished by moving a vertical plate inside the cavity connected to the cavity wall; it acts as a shunt capacitor. Another capacitor in series with the output RF sample loop acts as a loading control.

The Harris FM-25K power amplifier is similar but is built around a larger tube (8990/4CX20,000A).

I don't think "special event" licenses are available in the US, the way they are in Europe.  And if you are looking to set up next week, you're about two years too early to get an expermental license through the FCC.  That's probably the only way to do it.

As far as actual equipment goes, you can get a complete outfit from Klay Anderson Audio for under $100k, I think.  They outfit a lot of vans for special event broadcast facilities and for the US military.

Amateur Radio Newsline™ Report 1382 – February 6,  2004

Amateur Radio Newsline report number 1382 with a release date of Friday, February 6, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. A major problem for Amsat Oscar 40, a surprise BPL rollout in Pennsylvania, UPS says that illegal 10 meter radios will be ordered out of company trucks and another view of the ARRL’s restructuring proposal. Find out the details on Amateur Radio Newsline report number 1382  coming your way right now.

(Billboard Cart Here)

**

## HAM RADIO IN SPACE:  AO-40 SUFFERS CATASTROPHIC POWER FAILURE

The main battery pack on board the AMSAT Oscar 40 satellite has failed and controllers are unsure if the bird can be brought back to life on the reserve power system.  Amateur Radio Newsline's Norm Seeley, KI7UP, tells us what happened on-orbit:

--

According to AMSAT Executive Vice President Rick Hambly, W2GPS, AO-40 began its tumble to obscurity on Sunday, January 25th.  That's when the satellites battery voltage momentarily dropped to 24 point 5 volts.  This triggered a fail-safe that shut down the satellites passbands. Then, at the beginning of the eclipse on orbit 1486 the battery voltage rapidly dropped just below the cutoff voltage of 24.0 volts and this shut down the transmitters to protect the battery and other on board equipment.

AMSAT controllers kept a close eye on the bird and on Tuesday the 27th the battery voltage suddenly dropped from to 14V.  Mission commanders currently believe that more battery cells short circuited.  Control stations immediately began transmitting blind commands to the spacecraft in an attempt to switch over to the auxiliary battery.  Eventually, the auxiliary battery pack came on line, but in parallel with the main pack. This means that the shorted main Ni-Cad battery is loading down the back-up Nickel Metal Hydride cells are clamping the voltage low and keeping the auxiliary battery from fully powering the spacecraft.

AMSAT is hopeful that one of the cells in the main battery will eventually fail open circuit.  This would effectively remove the damaged battery from service and permit the back up battery to assume the full load of AO-40.  In the meantime its a waiting game with fingers crossed that no other catastrophic failures to other parts of the satellite take place.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale Arizona.

--

A set of spare A0-40 back-up batteries were found at the AMSAT lab in Orlando Florida.  Using them Stan Wood, WA4NFY and Lou Mc Fadin, W5DID performed a series of tests that showed the auxiliary battery pack on board the satellite should work well if they are otherwise undamaged.  Unfortunately, than will only happen if the main battery pack can be pulled off line.

**

## HAM RADIO IN SPACE:  MIKE FOALE TALKS HOME

Still with ham radio in space, Wednesday, January 28th was a very special day on board the International Space Station for Astronaut Mike Foale.  That's because the space traveler got the chance to speak to students at the school he used to attend and he did so using Amateur Radio. Take a listen:

--
Contact Audio no print transcript
--

The contact between Foale on board the I-S-S and the kids at The King’s School, Canterbury, England began at 17:42 UTC when the I-S-S answered the call of G-B-4-F-U-N. That station was operated by G-Zero-A-K-I and the audience kept its breath as Foale answered 12 questions.

--
Contact Audio - No print transcript
--

Media coverage of this contact was impressive. Meridian TV, BBC TV, BBC Radio Kent, Invicta Radio and the Kent Gazette interviewed the students and put reports in the main newscasts. The BBC World Service and the Press Association asked for information and contact transcripts. (ARISS, ON4WF)

**

THE BPL FIGHT: PA HAMS ORGANIZE TO FIGHT ALLENTOWN ROLLOUT

Hams in Northampton County in eastern Pennsylvania, just outside of Allentown, are organizing a campaign to protest announced plans by PP&L to offer Broadband Internet Service over power lines in a development in Hanover Township. The Allentown-based utility has been doing field tests of the technology in nearby Emmaus, Pa.

The ARRL's Eastern Pennsylvania Section Manager Eric Olena, WB3FPL says PP&L sent out 2,000 letters to residents in a section of Hanover Township and already has received replies from 200 people interested in subscribing to the service.

Olena says an ARRL District Emergency Coordinator and other hams met with township officials to warn them about the massive inteference Broadband over Power Lines brings to the radio spectrum, including fire and emergency frequencies. But, he says, the officials apparently were swayed by the utility's assurances no such interference exists.

An interview with Olena and others involved in the battle, coming in next week's Newsline. (ARNewsline(tm), NT3V)

**

ENFORCEMENT: EVEN MORE COOPERATION COMBATTING 10 METER PIRATES FROM UPS

A follow-up to our recent story concerning the use of unlicensed 10 meter radio gear on-board United Parcel Service Trucks. As reported, back on January 7th the FCC notified the U-P-S offices in Elkhart Indinana and Middleburg Heights Ohio of its findings. The company offered its full cooperation to end the problem.

Now comes word from the FCC that they have been contacted by UPS national corporate headquarters has contacted the regulatory agency and the company did not mince any words.  It told the FCC that the agency has its full cooperation in removing any unlicensed radio gear and any non-certified two-way gear from their delivery fleet, nation wide.

According to UPS, the only personally owned radio gear permitted in their trucks under a collective bargaining agreement with their union drivers are commercially built unmodified C-B sets, and that only on a regional as-needed basis.  No other radios are allowed.  (FCC, UPS, others)

**

ENFORCEMENT:  THE FCC ACTIVE IN A NUMBER OF CASES

Meantime, the FCC has been active in a number of other enforcement issues involving ham radio operators.  The agency's Daryl Duckworth, NN0W, has more:

--

Duckworth:  "An Extra class license was downgraded to Technician class due to a failure to appear for a retest in Solidad California.  Also, cancellation of an Extra class license in Medera California for the same reason.

A notice for retesting was sent to a General class licensee in Hialeah Florida.  The deadline for that one is March 1st.

A letter requesting additional information pursuant to Section 308(b) of the Communications Act -- in order to make a decision on a General class renewal went out to Newton Square PA..

A letter settling enforcement action with a General class licensee in Bart VT. has resulted in voice operation prohibited for three years on 20 meters.

Daryl Duckworth, NN0W, reporting.

--

Even though its still not naming names of alleged violators the FCC is making sure that those thinking about breaking its rules know its still around.  (FCC, RAIN)

**

RESTRUCTURING:  ANOTHER LOOK AT THE ARRL PROPOSAL

Even though there are more than a dozen restructuring proposals before the FCC, its the American Radio Relay Leagues recent filing  that really has the world of Amateur Radio talking.  The obvious question is why, and thats what we asked correspondant Mark Abramovich, NT3V, to find out:

--

As more amateurs find out what the ARRL has to say, they're starting to pay attention.

When the ARRL speaks, the FCC generally listens.  In the past, the FCC has used the organization's proposals as a foundation for decisions.

To understand where the ARRL is coming from, you might want to get some perspective from the past.  Who better to offer it than Harry Dannals W2HD - elected ARRL president in 1972 and re-elected to five consecutive terms. Now retired and living in Charlottesville, Va., Dannals is on top of the debate.

"It's a long cry from the days of incentive licensing when we did have people who resigned their membership, withdrew their membership, or did not renew their membership, just to show their disappointment and utter dissatisfaction with the incentive licensing proposal as it was named," Dannals recalls. "Because that was indeed (what it was), in the minds of the ARRL board headed at that time by President Herb Hoover.

He believed that in order for us to show that we were improving ourselves and becoming better at what we do that we should upgrade our license structure."

Dannals says the claim the ARRL proposal for a "no code" HF license "dumbs down" the hobby is off the mark.

"I think the new proposal, despite the criticism by those who say: 'I had to do it and therfore, you have to do it,' I think the new proposal will bring more people into amateur radio than the 'no code' proposal ever did," Dannals says.

Dannals says the Novice concept will go a long way in revitalizing interest.

"The introductory grade of license will give them some of the things that will make amateur radio mean more, the long-distance communication, the long friendships that develop over the many thousands of miles," Dannals says. "And I do believe we need this."

Dannals laughs at the fears that we'll need hundreds of FCC types to police the new hams.

"I think if the amateurs themselves who have experience, the older timers - and they don't have to be white-haired and grizzly old-timers - they can be relatively newcomers, maybe 5-10 years," Dannals says. "They can take care of tutoring the newcomers more than adequately."

Dannals says local radio clubs are the key to success for any license restructuring.

"Put out a handshake and say: 'Come on board. We'll help you, we'll teach the courses that you can use to get your license and we'll help you once you've got your license.' The old Elmering still is working."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Keep an ear open for more on this from both Harry Dannals and Mark Abramovich as all of the restructuring petitions wind their way through the FCC rules making process over the next several months. ARNewsline(tm))

**

ON RAIN:  JIM HASYNIE W5JBP

Meantime an in-depth conversation about this issue with ARRL President Jim Haynie, W5JBP, is available from RAIN -- the Radio Amateur Information Network. Its in cyberspace at www.rainreport.com or on the phone at area code 847-827-7246.  (RAIN)

**

REGULATORY:  CROSS BORDER RADIO DISPUTE BETWEEN US AND MEXICO BROADCASTERS

A cross border radio war may be brewing between the United States and Mexico. This as complaints of massive interference to United States broadcast operations from a new station on 560 kHz in Tecate Tijuana Mexico lead to a high level telephone call between the FCC and the Mexico’s SCT on Thursday, January 29th.  A call that many hoped will defuse the situation before it escalates any further.

According to the CGC Communicator, the SCT which is Mexico's telecommunications regulator is said to have promised swift action in eliminating the interference that XEKTT is currently causing to U.S. stations. But the story does not end here.  Concern for Mexico's planned operations as XESS on 780 kHz and XEDD 920 kHz, also in the vicinity of Tijuana continues to mount.  A printed copy the authorization for 780 kHz has surfaced.  It confirms that operation with 20 kilowatts dayside and 10 kilowatts night with non-directional facilities both times and a quarter-wave tall broadcast tower is in fact sanctioned by the SCT.

The CGC Communicator says that this confirms the power figures it published a few weeks ago and establishes what it terms as more blow torch situations. Meanwhile, additional broadcasters are joining the list of companies concerned with the current 560 kHz interference.  (CGC)

**

ENFORCEMENT:  THE FCC VS. THE SUPERBOWL HALFTIME SHOW

FCC Chairman Michael Powell has ordered an investigation of the telecast of last weeks Superbowl half-time show in which rock performer Justin Timberlake ripped part Janet Jackson costume on-camera. The stunt brought a massive number of complaints to the regulatory agency from viewers of the game.

In a press release obtained by the Amateur Radio Newsline, Powell states: “I am outraged at what I saw during the halftime show of the Super Bowl. Like millions of Americans, my family and I gathered around the television for a celebration. Instead, that celebration was tainted by a classless, crass and deplorable stunt. Our nation’s children, parents and citizens deserve better.”

CBS which aired the game denied that the incident was preplanned. None-the-less, Powell instructed the Commission to open an investigation into the broadcast. He also stated that the inquiry will be thorough and swift.

At least in theory, each station that permitted the video to be aired could be fined or have its license designated for as hearing if the investigation finds that the material was either indecent or obscene. (FCC release)

**

RESCUE RADIO: AGENCY WARNS OF BIG FIRE SEASON IN THE SOUTHWEST

Hams involved in emergency communications in the Western United States should get ready for a rather busy fire season. At least that’s what a recently released preliminary outlook for 2004 seems to imply. Bill Pasternak, WA6ITF, has the retails:

--

According to Jay Miller, W-A-5-W-H-N and Raleigh Stout A-C-5-J-W, the Southwest Area Coordination Center in Albuquerque, issued the report. The center is a multiagency hub for the region's wildfire operations and it says that persistent drought and millions of dead or dying trees have set the stage for a fire season as bad or worse than 2002. That’s when millions of acres burned across the region.

In southeastern Arizona and southern New Mexico, field surveys reveal that the snow pack holds less than 20% of the average moisture of a normal mid-winter. Coupled with the 2003 monsoon season being one of the driest in a century, the center says that tinderbox conditions are manifest.

And its going to get worse. With little relief in sight, the fire season, which usually begins in April, could start a month or more earlier. Public land managers are being urged to complete training and preparations sooner than usual and to put more firefighters on duty. It also means that hams involved in support of firefighting efforts will need to hone their skills a lot earlier this year in order to be prepared.

For the Amateur Radio Nerwsline, I’m Bill Passternak, WA6ITF

--

Its beginning to look as if firefighters and the ham radio operators who support them may have a tough fire season ahead. (ARNewslin(tm), WA5WHN)

**

RESCUE RADIO: TEXAS CELLPHONE HERO

A 40-year-old flight attendant in El Paso, Texas is being hailed as a hero. This, for her fast and efficient handling of 15 to 20 9-1-1 calls which were sent to her home phone due to a routing error at S-B-C Communications.

News reports say that Maria Chaidez Karam processed the calls for help - including several emergencies - during the 41-minute glitch. In fact, she relayed details via her own cellular telephone to the police dispatch center's seven-digit non-emergency number.

Complete details about this story are on the web at http://www.borderlandnews.com/stories/borderland/20040119-70359.shtml (CGC)

**

RADIO LAW: ABRAMS VS. RPV - ANOTHER WIN

An update on the case of radio site owner Mark Abrams WA6DPB versus the city of Rancho Palos Verdes California. Abrams has been embroiled in litigation against the city for several years and has won every round, This is no different. The 9th Circuit Court of Appeals ruled on Thursday, January 15th, that Abrams is entitled to damages, attorneys fees and court costs from the city, but there is a catch. Abrams says that the decision only entitles him to a trial to determine the amount of money involved. It does not set an award amount. (WA6DPB)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE WAR ON TERROR: SECURITY ALERT FOR CELL PHONE GUNS

Don't be surprised if you're asked to make a call on your cellphone the next time you go through airport security. Time Magazine quotes sources as saying handguns disguised as regular cellular telephones have been seized in several drug raids across Europe.

The potentially deadly devices look exactly like a normal cellular handset but are capable of rapidly firing four .22-caliber rounds of ammunition. They are manufactured in Croatia and are fired by punching buttons on the keypad

So far, none of the phony cellphones are known to have surfaced in the United States. Aviation security experts say screening equipment now in use can detect these cellphone guns as well as all other improvised explosive devices.. The rest is on-line at
http://www.time.com/time/magazine/article/0,9171,1101040202-581402,00.html
(CGC, Time Magazine )

**

POSTAL PROBLEMS: CQ INVESTIGATES DAMAGED MAGAZINES

If you are wondering why your ham radio and other magazines have been showing up with torn covers or their insides missing, you are not alone. So were the folks at CQ who were receiving complaints from their readers. So they launched their own probe and what they found that its likely a problem at the United States Postal Service.

According to CQ Publisher Dick Ross, K2MGA, the postal system has installed new equipment that’s designed to speed up the processing of mail through automated sorting. Ross says that it usually works quite well but unofficial information coming to him says that the units can cause problems if they are even slightly out of adjustment. As Ross says, it sounds as if the new technology demands maintenance far beyond having a service crew fix it when it breaks.

Ross says that his magazines have already taken steps to get around the problem until the postal service finds a permanent fix. This includes new imported paper for the magazine covers.

What Dick Ross found out about the foibles of the postal services automated sorting system makes good reading. You can find it on page 4 of the February issue of CQ Magazine. (CQ)

**

NAMES IN THE NEWS: FCC ENGINEER MICHAEL J. MARCUS HONORED BY IEEE

A word of congratulations to Dr. Michael J. Marcus, N3JMM, of the FCC’s Office of Engineering and Technology. This, after recently being conferred as a Fellow by the Institute of Electrical and Electronic Engineers based on his extraordinary record of accomplishment.

The IEEE chosen to honor Marcus’ contributions in the field of radio technologies with specific recognition to his creative technological vision that significantly advanced policies. This helped to lead to the deployment of spread spectrum and Wi- Fi technologies.

Dr. Marcus joined Office of Engineering and Technology in 1979 and currently serves as its Associate Chief for Technology.  He received his bachelor's and doctorate degrees in electrical engineering from Massachusetts Institute of Technology.  Before joining the FCC, Dr. Marcus worked for Bell Laboratories, the U. S. Air Force, and the Institute for Defense Analyses.  (FCC release)

**

HAMFESTS:  AM EXPO 2004 IN NEW JERSEY IN APRIL

Turning to the ham radio social calander, AmExpo, an event within an event will take place on Friday April 30 through Sunday May 2nd 2004 at the Millville Airport located in Millville, New Jersey.  In addition to the hamfest, the 2004 "Wheels & Wings" air show is occurring at the Millville Airport at the same.  This event features many extraordinary aerobatic exhibitions including the Air Force Thunderbirds.   (

Meantime, Hugh McElroy, W2AVN says that AmExpo itself is a celebration of the evolution of communications.  Included will be  demonstrations of ham radio satellites, Echolink, along with HF, VHF and UHF radio communication in every mode.   More information is on-line at www.p49millville.org.  (W2AVN)

**

SEMINARS:  COMM ACADEMY IN WASHINGTON IN MARCH

The sixth annual Communications Academy set for March 20th and 21st at the Shoreline Conference Center, in Shoreline, Washington just north of Seattle. This years theme is  Interoperability and the Expanding Role of Amateur Radio Communications.  The keynote speaker is retired Police Chief Gerald W. Boyd, KW7J.  Boyd is the author of five books including three on amateur radio emergency communications.  You can find out more in cyberspace at www.commacademy.org  (Press release)

**

CONFERENCES: EASTERN VHF CONFERENCE IN CT. IN APRIL

And the 30th  Annual Eastern VHF/UHF Conference will be held on April 16th to the 18th at the Radisson Hotel in Enfield, Connecticut.  Guest speakers to date include Dan Henderson, N1ND, on the status of ARRL VHF/UHF Contesting & Awards, Del Schier, K1UHF, with a talk called What's New at West Mountain Radio and many others.  And, as a special thank-you to all those who have supported the conference the planners are providing a free dinner to all who register for the event.  More, including registration forms can be found on-line at www.newsvhf.com (VHF REflector)

**

INTERNATIONAL - UK:  WORKED ALL BRITAIN AGM ON FEB 15

In international news, the Worked All Britain Awards Group Annual General Meeting will take place on the 15th of February. The venue is the Radiosport Communications and Computer Show at Stevenage in the United Kingdom. Nominations for the committee to consider should be sent to G0NLX at her call book address no later than February 13th. (RSGB)

**

CONTEST OPERATIONS: K7BV TO TURKS AND CAICOS FOR ARRL DX CW

>From the contest calendar word that Dennis Motschenbacher K7BV will be in the Turks and Caicos Islands from Feb 19th to the 26th. This, to operate in the ARRL DX CW contest using the probable call sign of VP5M. He will use VP5 stroke K7BV outside the contest with operating emphasis placed on the WARC, 6 and 2 meter bands. VHF WSJT meteor scatter scheduled contacts can be arranged. QSL via KU9C. (VHF Reflector)

**

DX

In DX, word that five German operators are from Tobago active as 9Y4 slash their home calls through the 14th of February. Look for them around 14.277, 21.377 and 28.377 Mhz. (GB2RS)

And F6AIG is currently on the air from Mayotte. Look for him around 17.00 UTC on about 14.130 Mhz. (GB2RS)

Lastly, DL2GAC is again active as H44MS from Honiara in the Solomon Islands. He plans to stay there a while and is active on 80 through 10 meters on SSB. For all of these operations, please QSL as directed on the air. (GB2RS)

**

THAT FINAL ITEM: BROADBAND OVER POWERLINES - AUSTRALIA SHOULD WAIT AND SEE

And finally this week, the pitfalls of broadband over powerlines technology have been highlighted down-under by a group calling itself The Spectrum Issues Group Australia or S-I-G-A. This, in a letter published in the Sydney Morning Herald and The Age news papers. Q-News Graham Kemp, VK4BB has the details.

--

While BPL holds out the promise of always-on internet availability from every household power point, overseas experience with this new technology shows Australia should not rush into adopting it.

BPL/PLC systems installed here would cause significant interference to high frequency communications users across Australia which include emergency services, aircraft, police, rural and remote services, maritime, government agencies and private users such as we Radio Amateurs.

Roger Harrison, VK2ZRH, speaking for the group says they are an informal alliance of organisations and individuals across Australia with interests in RF communications and technologies. Alliance members come from broadcasting, community service bodies, consultancies, emergency services, equipment manufacturers and suppliers, government, industry bodies, the radio amateur community and other radiocommunications users.

Graham Kemp, VK4BB.

--

The S-I-G-A letter makes fascinating reading no matter where you are in the world.  It can be viewed on line at the Fairfax f2 website.  That U-R-L is in this weeks printed Amateur Radio Nerwsline report.

Hallo Umar.

Thank's for responding.  Atleast i have some transmitter type's wich
uses the 4CX type of tube's.
I did some searching on the net and found the Collins and the Harris
transmitters but no photo's, manuals or schematics wich i realy need
to bild this thing.
When i read Your story i understand a bit how they do it.....but a bit
is not enough.

Umar......thank's again for helping,if You know where i can find some
```

more info please let me know.

Regards.     Onno.

For sale: (The "Radio Crazy" is baaaaaaak!!!)

Partial interest in AM radio station in West Virgina. Tiny town but about 29,000 in county. It is the county seat. Only AM in that county. On the air since the 1940s.

Joint venture. Total asking price is $150,000 including studio/office/transmitter building, land and HUGE 331 foot self-supporting tower. Low dial spot below 1 MHz. Daytimer. 1 KW days, 500 watts PSA and some night power sufficient to cover city of license.

Active or inactive investors with $10,000 each or more are welcome. All investors would be on the board with full voting rights if desired. No individual can own over 49 percent. That includes me! Zero-tolerance for bullies!

I am a semi-retired broadcast engineer.

Typical.  No station legally licensed for 87.9 would be reading commercials,
I'll tell you that.

I'm working producing a music CD, and we've done some work with WAVs
of the songs, and burning the spots off .wav files onto a CD is very
easy to do these days.  And a lot cheaper than the otherwise very good
Sony being discussed.

You also can't tell the difference quality-wise either between the
Sony and a good PC burner.

Found some discarded long-form programs on CD recently, and the CD had
two 30-minute programs, plus four spots for each program as well.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!
=20
WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Well i just wright a big reply........use the backspace button and my
mail was gone.  Great....
O.k .  Just start over all again.  GRRRRRR.

Hallo Philip....first i have to excuse myself for not reply�ng Your
mail.
Sombody was and is still so friedly to sent me mail with a virus.
I had to install(ghost)my pc again and thatswy i lost mail and
adresses.

I just take a look at the site's You put on this page.  Some i
allready saw bur the www.somis.org/ is verry interesting.  I copy'd
much and printed it out.
They other site's has more to do with six meter transmitting.

But....Umar was talking about a Harris FM-25K.  Well on the Harris
page(after much digging)i found much.  I found two different kind of
schematics and a drawing of a cavity.   Verry good.....i'm happy.....
The onely thing i have to do now is measure the socket or tube on the
drawing , compare it to the real size and than i can calculate the
size of the cavity.

THAN BILD THE THING.

If it's finish'd the AMP i will let You know all.

Philip and Umar.......thanks for helping me out.

Greetings from Elburg....the Netherlands.      Onno.

P.S.  This engine dynamo thing.........is it normal to build those
things?....Crazy?.......awsome.

It all happens in the USA!

I flew over to some of these mobile amplifier "shootouts" and took a
bunch of pictures.

That van owner above lives in Florida.

He has another rack of high output alternators on the main engine in the
front.

He has full throttle control of both engines in the front.

I'm afraid your tube amp  would not get much of a lookin as the champion
that day ran a pair of 4CX20,000's in the output of his amp:-)

By the way, one of your radio ships just came to the UK for a refit:

http://www.mvcommunicator.com/39400.html

Take care and good luck with your project.

Since a yagi and turnstile are by definition not the same, no.

Hello
I have changed out some tracks on my station at live365.com. It is at
http://www.live365.com/stations/304701

I have on the list:
KISN Portlan 1964 Don Steele
Larry Lujack 1970 WLS
Dave Rabbit intro for a bootleg station run by US military personnel in 1971
WABC July 4 1968 Dan Ingram
some PAMS jingles.

And more. I am scouring the fruited plain for more cuts.  Stay tuned.

Also I want to start a Jive Five where you rate the top five tracks played

that month  (I am job searching; may not be able to update the tracks monthly).  Email me your favorite track being played and I will tabulate the results and post them on the station's page.
Ken

Here's notice of an upcoming DX test...

PLEASE NOTE: Even if you don't hear a test, be sure and drop a card, letter, or e-mail to the station personnel, thanking them for going to the trouble to run a test!

Sunday, March 14, 2004 - WTOP-1500, Washington, DC will conduct a DX test from midnight - 1am EST. The test will consist of WTOP's regular all-news format; the station identifies frequently. The test will be run at WTOP's full power of 50000 watts, and will switch to a daytime-directional antenna pattern for the duration of the test.

Reception reports may be sent to:

WTOP Radio
3400 Idaho Avenue, NW
Washington, DC 20016

WWW: http://www.wtopnews.com/

(Arranged by Lynn Hollerman for the IRCA CPC.)

Also, if you hear a test, PLEASE, PLEASE let me know, via either e-mail or in rec.radio.shortwave! And if you send a reception report to
a station, please remember to include return postage with your report...

Lynn.

My recollection of a turnstile antenna is two folded dipoles at 90 degrees to each other.
See URL:
http://www.qsl.net/wb8erj/turnstile_antenna.htm

A search of radio shack catalog does not show one nor is it in the manual lookup section

However there is a Lindsay turnstile at URL:
http://www.lindsayelec.com/fm88-108.html

Easily found by using Google -- the searchers friend

Will the test also take place on the other WTOP frequency of 820 kHz?

Well, since WTOP will be running its regular all-news format, which is
simulcasted 24/7 on 820 and 107.7/Warrenton, VA, I guess so :)

But I don't think they're going to do anything special with the 820 or
107.7 transmitter power/direction/etc.

Mike

Yes.  Although not exactly clear, that is what the Winguard is, although I would have expected a little better radiation pattern.  Note the data sheet gives "2 active elements" and the drawing sort of shows the othagonality.   The 90 deg of twin lead is visible too.

> See URL:
> http://www.qsl.net/wb8erj/turnstile_antenna.htm

There is a part number (150-1639):

http://support.radioshack.com/support_video/32581.htm
(linked from http://support.radioshack.com/support_video/15785.htm)

> However there is a Lindsay turnstile at URL:
> http://www.lindsayelec.com/fm88-108.html

Probably very nice quality, but look at the price!  Most consumers won't dream
of spending that much.

Antennacraft makes one too.

http://www.antennacraft-tdp.com/pdfs/FMSS.pdf

http://www.starkelectronic.com/fm.htm

I'd say $19.20 is a little more like it for the consumer.  I'd spray a few coats
of Krylon Crystal Clear on it before I put it up.

Yagi is the name of the man who invented the antenna design which bears his name, yes.  I believe he was (or possibly still is) Japanese.

Actually, the correct name for the antenna is a "Yagi-Uda", named after the two
Japanese engineers who developed it.

It was invented in the 1930s by Mr. Yagi and Mr. Uda, whom I think were at
the University in Kyoto.  Their book is still in print, I believe.

Did you try looking at the FCC website?

http://www.fcc.gov/eb/bccomplaints/

The Enforcement Bureau has two divisions responsible for handling broadcast complaints. The Investigations and Hearings Division is responsible for resolving complaints of non-technical broadcast violations such as complaints alleging broadcast of obscene and/or indecent material, violations of the FCC's rules regarding broadcast of hoaxes, licensee-conducted contests, broadcast of telephone conversation, and public inspection file requirements.

The Spectrum Enforcement Division resolves complaints of technical violations such as unauthorized operation of a broadcast station, violation of the Emergency Alert System (EAS) rules, antenna structure registration, marking and lighting rules, and operation with excessive power or at an unauthorized location.

Types of Complaints (each is a link)

* Broadcast of Obscene and/or Indecent Material Complaints
* Broadcast of Hoaxes
* Licensee-Conducted Contests
* Broadcast of Telephone Conversations
* Public File Requirements
* Payola and Sponsorship Identification
* Unlicensed Operation of Broadcast Stations
* Emergency Alert System
* Antenna Structure Information
* Broadcast Interference
* The FCC Enforcement Bureau: A Broadcaster's Guide

Ted.

Scott Dorsey <kludge@panix.com> had written:
|
| Yes, but NPR is fairly conservative these days.  You want to hear liberals,
| you have to tune into Pacifica.  And even they aren't HALF as radical as
| they were even a decade back.

The mother ship kind of comes and goes into radical mode these
days. What keeps KPFA anchored is a core of reporters who, although
they have definite viewpoints, are *very* informed about the topics
they cover. But "radio" and "information" seem to be increasingly
disjoint sets. "Infotainment" isn't just for teevee any more.

If you want to hear truly radical left-wing programming in the Bay Area,
probably the best choices are Poor People's Radio (KPOO) at 89.5,
or the North Oakland pirate at 104.1. The San Francisco pirate at
93.7 was raided; the East Oakland "Soul Beat" pirate at 104.1 kept
going for a while after Comcast yanked the lease for its cable channel
just before Thanksgiving. But that disappeared earlier this month and
the old Soul Beat studio line has been disconnected.

Mike Ward <mward@iname.remove-this-part.com> had written:
|
| On a purely non-ideological level, re: the new "liberal talk
| venture"...
|
| Their biggest problems will be signal-related.  All the decent AM
| signals in most markets are gone, and many of them are running the
| right-leaning talk the new venture will be going up against.
|
| If their Chicago affiliate is any indication...well, WNTD/950's signal
| isn't exactly a Windy City powerhouse.  It's 1000 watts day,
| non-directional, and 5000 watts night, directional.

>From my experience, the 1 kW daytime was actually OK. The
transmitter was (still is?) relatively centrally located in
Chicago. The nighttime signal, though, was on a very tight pattern
from a site on the far South Side. It was very difficult to hear at
my North Side location (approx. 5600 North).

| Two site operation, here?

See above.

| In the San Francisco Bay Area, this would mean KIQI/1010, a 10KW
| day/500w nighttimer that's probably one of Unica's better signals:
|
| http://www.radio-locator.com/cgi-bin/pat?call=KIQI&service=AM&status=L&hours=D
|
| But overall...the "signal advantage" in most of the markets already
| belongs to whichever station runs Rush or conservative talk in
| general.  Chicago's Rush affiliate, WLS/890, blows 950 out of the
| signal water with its 50KW stick.  San Francisco's KSFO/560 is not the
| strongest signal in the market, but had much higher visibility as a
| long-time market leader in its past days, and is run by current market
| leader KGO.  1010 would have to come out of nowhere.

For a "coming out of nowhere comparison", KNEW is probably the more
valid choice than KSFO. It has nighttime signal problems in many Bay Area
locations as well. As for KSFO...well, as long as it can penetrate
Civil Defense-era bomb shelters in Daly City, it will probably do OK.

KIQI's transmitter is right at the east end of the Bay Bridge, so
it will put a good signal day and night into San Francisco,
Oakland, and Berkeley, and probably much of southern Marin County.

More problematical would be southern San Mateo County and all of Santa
Clara County -- but it's not the only station that would be facing
that problem. (In terms of geography, San Jose really ought to be
more of a separate market than it is -- the Dionne Warwick Syndrome
hits again.)

| Someone oughta tell the Progress Media folks
| about market growth patterns outpacing once centrally-located AM
| stations.

Many, many AM station owners have felt the sting of that
phenomenon.

According to my accountant the richest pay the least in taxes because
they can afford all the loopholes in the tax law. The middle class pay
the most as a percentage of their income. Some corporations pay no
taxes at all.

I take it you haven't listened to right wing radio recently. Class
warfare, race baiting, etc. have been their staples for at least a
decade now. Of course, if you're among the right wing this is gospel
truth and not race baiting at all.

The favored targets are often gays (Laura Schlessinger, Michael
Savage, Howie Carr, Sean Hannity, etc) have been particularly vicious.
Savage even threatened a lawsuit when gay groups threatened to go to
advertisers. It cost Schlessinger $30 million in billing. It's
particularly funny when they claim they didn't mean what they said
once they saw their income threatened.

I guess they didn't expect a targeted group would fight back.

It's hard to listen to the left because the right dominates radio.
Many of us would love the chance to hear both sides of bigotry.

Rich

I haven't really heard KPFA much.  I listen a lot to WPFW for the great jazz
programming, but in the last few years they have become really toned down.
They used to ID as "Peace, Freedom and Wisdom" and they have long stopped
doing that.  Twenty years ago you could tune in late at night and hear long
rants advocating "killing all the white people."  Today they are mildly
liberal and in favor of unionization.

That's something that both liberal and conservative politicians have been
doing recently.  It's a bad idea, but it doesn't seem to be particular to
either side of the aisle.

Class warfare is a fact of life. Classic Republicans know this, and for
generations have voted for the party that helps them. In other words, they
vote their class interests. Only dumb Limburgers are poor
 or lower middle class, and yet Republican.

Leonard

Maybe someone in here can help me.I was wondering if anyone knows the whereabouts of a former radio station,disc jockey in Ft. Lauderdale,Florida,by the name of Kathy "Wild" West? She was on this FM station back in the early to mid 80's.I was just wondering if she was still djing,and if so where? And if she isn't waht she is doing for a living today? She was a very nice person.I used to call her up quite frequently,and she was really cool,and she would play alot of my requests too.

I miss hearing her voice coming in over the airwaves,when she would answer the phone and say,hello I-95.

A long time ago, this was about the use of obscenities on radio and TV, brought on by the current bills in Congress trying to make profanity illegal and Powell's comments that perhaps the FCC should be harder on obscenity cases.

Of course, it degenerated into a political battle--as often happens
these days.

> qualifications" and had nothing to do with competition.

David, I think we are seeing the "glass" differently. I felt that the
station had to base their income predictions on what ads they thought they
could sell - if the needed income to show financial ability. You are saying
that justification of such a balance sheet wasn't required. I'll agree that
the FCC never questioned the figures in later years.

Bob C.

For anyone interested, here's a reminder of upcoming DX tests; if
anyone
has any additions or corrections, please contact me. (BE SURE TO NOTE
THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Daily, from 2:55am-3:05am EST - WRIB-1220, Providence, RI - This test
is scheduled to run "through at least March (2004)".

Sunday, February 15, 2004 - WQMA-1520, Marks, MS 12:00-2:00 am CST.
WWW: http://www.q1520radio.com/

Please remember, what's listed as being on, say, Monday *may* be what

you
think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message
letting
me know, and please, drop the station personnel a note, via e-mail or
snail
mail, thanking them for running the test! Also, for brevity's sake, I
didn't post the QSL addresses; if you need these, let me know!

Lynn.

But soon, thanks to AM IBOC and BPL, nobody will be able to make out the
words on AM broadcasts well enough to know if there are obscenities being
used or not.  Thus, the FCC will have solved the problem.

Amateur Radio Newsline=E2=84=A2 Report 1380 =E2=80=93 January 23,  2004

CLOSED CIRCUIT ADVISORY

This is Andy Jarema, N6TCQ, Newsline Support Fund Administrator. We haven=
't
asked for quite some time, but we need contributions TODAY. If you value =
this
service, please help.

We're here to serve you for as long as you want us. Your response over th=
e next
several weeks will provide that answer.

The address for the Amateur Radio Newsline is Post Office Box 660937, Arc=
adia
California, 91066.

Looking forward to hearing from you REALLY soon, I'm Andy Jarema, N6TCQ.

**

Amateur Radio Newsline report number 1380 with a release date of Friday,
January 23, 2004 to follow in 5-4-3-2-1.  =20
=20
The following is a Q-S-T.  The ARRL says that it will petition the FCC fo=
r a
code free entry level license with high frequency phone privileges and Am=
ateur
Radio Neewsline announces the Roy Neal, K6DUE, Amateur Radio Mentoring Pr=
oject.
These stories and more coming your way on Amateur Radio Newsline report =
number
1380 coming your way right now.

HAM RADIO POLITICS:  A NEW DIRECTION

Topping the news this week -- honoring one of our own.  Enlisting an army=
 of
volunteers to make us all a little bit better -- and doing it in the name=
 of
the late Roy Neal, K6DUE.  But first -- the biggest organization of Amate=
ur
Radio operators in the world finally takes a position on the code versus
no-code issue.  The ARRL is asking the FCC in a petition for rulemaking t=
o
create a no code entry level H-F license for anyone who can successfully =
pass a
written exam of a mere 25 questions.  If the FCC accepts the ARRL idea, i=
t
would keep the more stringent requirements for the Amateur Extra Class li=
cense,
including their ability to send and receive Morse code.  Amateur Radio
Newsline=E2=80=99s David Black, KB4KCH, takes a look at the details of wh=
at the ARRL
is asking the FCC to do:

--
Code free access to ham radio's high frequency bands ... it's part of wha=
t
could change amateur radio's complexion forever.  And it could become rea=
lity.=20
The ARRL says it will ask the FCC to make sweeping changes to the United =
States
amateur radio service.  Perhaps the biggest change of all: Creating a new=
 entry
level ham radio license that grants access to high frequencies without
requiring any Morse code proficiency. =20

But that's not all.  The League also proposes consolidating all amateur r=
adio
licenses into three classes: Novice, as it's being called for now, Genera=
l and
the highest level, Extra.  And only the Extra class license would require=
 Morse
code proficiency--of 5 words per minute.  The new Novice license would re=
quire
a 25-question written test and would offer limited HF, Morse code, data a=
nd
phone and image privileges on 80, 40, 15 and 10 meters.  Novices would al=
so
have VHF and UHF privileges, including access to 6 meters and 2 meters.  =
Their
power levels would be restricted to 100 watts on 80, 40 and 15 meters, an=
d to
50 watts on 10 meters and higher.

The middle amateur radio license would continue to be the General, but it=
 would
include all current Technician, Tech Plus and present General license hol=
ders.=20
This license would not require a Morse code test.  Under this proposal, i=
f you
are a current Technician or Technician Plus, you would automatically obta=
in
General class privileges with no additional testing.  The current General
examination would remain unchanged for new applicants.

The third license class, the Extra, would involve the fewest changes.  Un=
der
the League proposal, hams with Advanced class licenses would essentially
automatically become Extra class because of similarities in the technical
proficiency required for both levels.  New applicants for the Extra class
license would have to pass a 5 word-per-minute code test--the written tes=
t
would stay as is.  If you're currently a Novice, Tech Plus or General lic=
ense
holder, you would receive a lifetime 5 word-per-minute credit.

The proposed changes got the blessing of ARRL's Board of Directors Januar=
y
16th.  The proposals are the creation of a League Executive Committee act=
ing at
the Board's direction.  The new structure suggestions come as a result to
changes in international radio regulations that are part of the World
Radiocommunication Conference 2003.  At the same time, the FCC has been w=
anting
to streamline the amateur radio licensing structure which it began more t=
han
five years ago.

How do radio amateurs feel about the changes?  Reaction is mixed:

```
--
Janice Rock AF4LT - Audio Only Report:  Please listen to audio version of
newscast.
--

Janice Rock, AF4LT, sees benefits and drawbacks:

--
Janice Rock AF4LT - Audio Only Report:  Please listen to audio version of
newscast.
--

Supporters say the new structure offers a true entry level license with H=
F
privileges that should boost growth in the amateur radio service.  While =
some
hams may claim that taking away code for HF access damages amateur radio,=
 other
hams dispute that.  Bill Levey, WA4FAT:

--
Bill Levey, WA4FAT - Audio Only Report:  Please listen to audio version o=
f
newscast.
--

Supporters say the changes will help amateur radio by allowing new Novice=
s to
participate in emergency nets on HF sideband.   The impact of this propos=
al on
amateur radio's long term future has Janice Rock concerned for another re=
ason:

--
Janice Rock AF4LT - Audio Only Report:  Please listen to audio version of
newscast.
--

League Executive Vice President David Sumner K1ZZ says the Novice class l=
icense
could wind up getting a new name, more appropriate for the times -- this,=
 as
amateur radio faces what could be one of the biggest changes in its histo=
ry.

>From Birmingham, Alabama, I=E2=80=99m David Black, KB4KCH for the Amateur=
 Radio
Newsline.

--

More is in cyberspace at the League=E2=80=99s website.  You will find it =
```

at

## RESCUE RADIO:  NYC ARES ACTIVATES FOR COLD WEATHER

The New York City District Amateur Radio Emergency Service was called int=
o
action last Wednesday evening, January 14 th.  This, after the American R=
ed
Cross of Greater New York contacted Mike Lisenco N2YBB.  Lisenco is the
District Emergency Coordinator for ARES and the message was clear:  Call
together the members of ARES to provide emergency communications between =
the
warming centers being established in the five boroughs and Red Cross
headquarters in Manhattan. =20

--

Lisenco:  =E2=80=9COnce I received the phone call from the coordinator of=
 disaster
volunteers at the Red Cross of greater New York, the first thing that I d=
id was
to call the five EC=E2=80=99s we have here in New York City.  Each boroug=
h which
constitutes a county has its own EC.  In turn they called their people lo=
oking
staff the shelters.=E2=80=9D

--

By the next morning, New York City District ARES Emergency Coordinators h=
ad
more than a dozen Amateur Radio operators on standby awaiting the activat=
ion.=20
Friday evening they went into action after Mayor Bloomberg announced the
shelter openings.  The ARES radio operators manned their posts throughout=
 the
operation, which lasted the better part of a day during some of the most =
frigid
weather ever recorded in the Big Apple.  The hams finally stood down on
Saturday afternoon. =20

This is not the first time that New York City District ARES has provided
critical communications for emergencies.  They were active with the oil b=
arge
explosion at Port Mobile on Staten Island, the Northeast Blackout in Augu=
st
2003 and did heroic work following the terrorist attacks of September 11,=
 2001.
 (ARNewsline(tm), NYC ARES)

**

Break 1

Stay tuned for the details on one of amateur radios most ambitious mentor=
ing
projects. It=E2=80=99s coming up later in the newscast, but first From th=
e United
States of America, we are the Amateur Radio Newsline, heard on bulletin
stations around the world including the Peace River Repeater Associations
systems serving Punta Gorda Florida.

(5 sec pause here)

**

ANNOUNCING THE ROY NEAL, K6DUE, AMATEUR RADIO MENTORING PROJECT

Amateur Radio Newsline is paying tribute its late vice president, Roy Nea=
l,
K6DUE, by naming an ongoing mentoring program in his honor.  Roy became a
silent key last August after surgery.  He was 82.

The Roy Neal, K6DUE, Amateur Radio Mentoring Project is designed to pair =
new
hams -- often called =E2=80=9Cnewbies=E2=80=9D -- with veteran amateurs. =
 This, in the hope
that some of the established hams=E2=80=99 operator skills can be passed =
down to new
generations. =20

--

Pasternak:  =E2=80=9Cere is a long tradition of mentoring, often called
=E2=80=9Celmering,=E2=80=9D in Amateur Radio.  No one knows the origin of=
 the term, but the
first teacher might well have been named =E2=80=9CElmer.=E2=80=9D  My men=
tor was a guy
named Charlie Zussman.  Back in the 1950=E2=80=99s he was WA2AKX.  Today =
he=E2=80=99s WE2R.
 And his helping me become a ham has lead to a friendship that has lasted=
 a
lifetime.  What he taught me was that tradition is an important part of t=
he
hobby.

--

That=E2=80=99s Bill Pasternak, WA6ITF, who has produced these newscasts s=
ince 1977.=20

```
He and the Newsline Board of Directors came up with the idea for this pro=
ject.=20
Bill says that ham radio has become a tremendously complex arena and new =
hams
often don=E2=80=99t know where to turn for help:

--

Pasternak: =E2=80=9CWe have licensed hams who are truly experts in numero=
us fields
ranging from bouncing radio signals off the moon, to writing complicated
software which enables new forms of two-way communication.  We want to ta=
ke
advantage of that knowledge base to help newcommers.=E2=80=9D

--
=09
While Amateur Radio includes world-class experts in a number of specialti=
es,
there are literally thousands of hams who have operating skills also wort=
hy of
passing on.  For example, contesting is very popular, yet it is a tough n=
ut to
crack for a beginner. =20

--

Pasternak:  =E2=80=9CContesting is intimidating.  I know.  I=E2=80=99m ju=
st getting
started.  Good contest operators often are able to contact four stations =
per
minute for hours at a time.  The great ones do even better than that.  Ho=
w they
are able to do that is a skill that should be passed on to newcommers.=E2=
=80=9D

--

Two large pools of Amateurs are needed to make this mentoring project wor=
k.=20
First, there must be a group of volunteers who have a skill and are willi=
ng to
share their time.  The second group is made up of the large number of beg=
inners
who want to learn.

One of the nations top mentors, kit building expert Joe Eisenberg, K0NEB,=
 has
agreed to help set up databases and to begin the process of matching ment=
ors
with beginners.  All we need to know is if you need assistance or if you =
are
able to mentor others.  We also need your name, call letters, address wit=
```

h
zipcode, phone number, e-mail and when its best  call.
=09
The special e-mail address to register is mentor@arnewsline.org.

Mentors might be matched by zipcode =E2=80=93 and be in the same town, or=
 they might
be half-way around the world from each other and communicate by e-mail.  =
Either
way I think we can make it work.

--

Pasternak:  =E2=80=9CThe project=E2=80=99s namesake, Roy Neal, K6DUE, was=
 himself a mentor
and not only in ham radio.  I know this first hand because he is the one =
who
taught me to become a better writer and producer.=20

More important:  Those of us who knew Roy, also know that helping others =
was a
very important part of his life.  As such. we feel that the least that we=
 here
at Amateur Radio Newsline can do is keep his memory alive with this proje=
ct.=E2=80=9D

--

Again, that e-mail address to register for the Roy Neal, K6DUE, Amateur R=
adio
Mentoring Project is mentor@arnewsline.org  More information is on our we=
bsite
at www.arnewsline.org

And Roy, old buddy, this one is for you!  (ARNewsline(tm), W6RCL)

**

## THE BPL FIGHT:  NORTH CAROLINA HAMS MEET WITH POWER PROVIDERS

Slow but steady progress in dealing with the imminent release of Broadban=
d over
Poweerlines in North Carolina.  Gary Pearce, KN4AQ, is here with more:

--

Progress Energy fulfilled their promise to North Carolina Amateur Radio
operators and invited several Raleigh area hams to observe their new Phas=
e II
BPL trial in a rural subdivision south of the city on January 15th. =20

BPL =E2=80=93 Broadband over Power Lines =E2=80=93 is a system for delive=
ring high speed

```
Internet through neighborhoods and into homes and businesses via the powe=
r
lines.  The technology places radio frequency signals on the power lines =
in
parts of the spectrum between 2 and 80 MHz.  Those signals radiate to som=
e
extent, and can cause interference to a receiver in the vicinity of the p=
ower
lines.  Naturally this has become cause for great concern among hams worl=
dwide.

In Raleigh, three ham radio operators met with engineers for both Progres=
s
Energy and Amperion, the equipment manufacturer.  Two of the Progress Ene=
rgy
engineers were also hams. =20

The BPL trial consisted of a half-mile of overhead feeder along a highway=
, and
a few dozen homes passed by buried power lines.   A =E2=80=9Crepeater=E2=80=
=9D amplified
the signal about every other block. =20

We were particularly interested in the spectrum used.  We learned that ea=
ch run
of BPL, from repeater to repeater, uses two blocks of spectrum, 2.5 and 3=
.5 MHz
wide.  At each repeater, a different block of spectrum is required. =20

The overhead feeder segment in this trial used spectrum blocks around 25 =
and 29
MHz.  We listened with mobile equipment driving on the road adjacent to t=
he
power line, and received S-9 signals in the immediate vicinity of the lin=
e that
sounded like this when tuning across the 10 meter band:

--
[audio clip of BPL signal]
--

The signal fell off quickly when driving away from the line, but a ham at=
 a
home station almost a mile away heard the 10-meter BPL signal about S-6 u=
sing
an 80-meter dipole antenna. =20

Amperion says a Network Operation Center can move any repeater to another=
 block
of spectrum, or notch part of a block by remote control, to eliminate
interference, but they were unable to demonstrate that for our test. =20

Even with that flexibility, fitting 3.5 MHz wide blocks of energy in betw=
```

een
ham bands would be a delicate jigsaw puzzle.  That much =E2=80=9Cempty=E2=
=80=9D spectrum
exists only between the 30, 20 and 17-meter bands, and it=E2=80=99s empty=
 only from
the perspective of Amateur Radio.

Skip could completely upset the equation.  BPL signals, which are similar=
 to
very low power QRP Amateur signals, could reflect off the ionosphere and =
appear
hundreds or thousands of miles away.  The energy of one isolated trial ar=
ea
might not have much impact, but a mature nationwide system with hundreds =
or
even thousands of installations using the same spectrum blocks could be a=
 very
different story.

Yet to come in BPL is a comprehensive report from the NTIA; an FCC Notice=
 of
Proposed Rulemaking for changes in Part 15, based on last year=E2=80=99s =
Notice of
Inquiry; and a decision by your local utility about getting involved in B=
PL.

Reporting for Newsline, this is Gary Pearce KN4AQ in Raleigh, North Carol=
ina

--

The hams at the test included Wake County ARES E-C Tom Brown, N4TAB, Tech=
nical
Specialist Frank Lynch, W4FAL, and reporter Gary Pearce, KN4AQ.=20
(ARNewsline(tm))

**

## NAMES IN THE NEWS:  K1IGD NAMED NEW QCWA GENERAL MANAGER

Chuck Walbridge, K1IGD is the new General Manager of the Quarter Century
Wireless Association.  Walbridge is already at work and has set up a new =
postal
address.  You now write to QCWA at PO Box 3247, Framingham, Massachusette=
s,=20
01705.  He can be reached by e-mail to qcwagm@rcn.com  (E-Mail)

**

## RADIO LAW:  CA COMMERCIAL SITE OWNER LOSES A ROUND IN BATTLE OVER ANTENNA= FARM

Commercial mobile radio service provider James A. Kay has been dealt a se=
tback
by a California state appellate panel.  The court has upheld a superior c=
ourt
finding that the antenna farm Kay maintains at his Rancho Palos Verdes ho=
me is
not exempt from city permit requirements. =20

Late word is that Kay is continuing his fight with the city.  This,  even
though he obtained permits for two of his 20 antennas with the condition =
that
he remove the others.  More is on-line at=20
http://www.dailybreeze.com/content/news/nmpntenna7.html (CGC)

**

## HAMFESTS AND CONVENTIONS:  GAINSVILLE FL. IN APRIL

Looking ahead in the social calendar we find the Gainesville Hamfest slat=
ed for
April 24th and 25th at the Leach County Fair Grounds near GAINSVILLE Flor=
ida.=20
The event will feature fun, food, prizes, tailgate selling , camping, ham=
 radio
testing and lots more.  For more information write to GARS,  PO Box 14038=
3,
Gainesville, Florida 32614, or visit www.gars.net/hamfest on the world wi=
de
web.  (E-Mail)

**

## HAMFESTS AND CONVENTIONS:  THE AES SUPERFEST IN APRIL

Molly Schreiber of Amateur Electronic Supply says that now is the time to
schedule your organization for a display at the 2004 AES Superfest. =20

Molly says that the  new web pages are up and running.  Just go to
www.aesham.com, select MENU from the right-hand side bar and click SUPERF=
EST in
the menu listing on the page that appears.

After that all; you need do is click on RADIO CLUB REGISTRATION.  After
registering your organization, you will receive a conformation E-mail wit=
h the
confirmation and itinerary. =20

Molly adds that the deadline for signing up is March 1st.  Superfest 2004=
 is
slated for April 2nd and 3rd at the A-E-S location at 5710 W. Good Hope R=
oad in
 Milwaukee Wisconsin.   (AES)

**

BREAK 2

This is ham radio news for today=E2=80=99s radio amateur.  From the Unite=
d States of
America, We are the Amateur Radio Newsline with links to the world from o=
ur
only official website at www.arnewsline.org and being relayed by the volu=
nteer
services of the following radio amateur:

HAMVENTION 2004:  THE HAMVENTION =E2=80=9CSHOPPING CART=E2=80=9D

Hamvention 2004 says that it is now accepting VISA, MasterCard, American
Express and Discover Cards for tickets, booth spaces and flea market spac=
es.=20
This, using its brand new on-line =E2=80=9CShopping Cart."  =20

Planners say that this is a simple and secure way to set up your personal
Hamvention experience and assures that you can get what you want.  And yo=
u can
do it all without having to ever leave your home.

The Hamvention "Shopping Cart" is located in cyberspace at=20
www.w8bi.org/hamvention/shop.html.  When the page loads, click on the gre=
en box
with the words: "Enter The Shopping Cart" and take a look at what=E2=80=99=
s being
offered over the world-wide-web. =20

This years Hamvention dates are May 14th, 15th and 16th.  The venue is th=
e HARA
Arena in the Dayton suburb of Trotwood Ohio.  (Hamvention)

**

SYMPOSIUMS:  CSVHFS IN JULY IN CANADA

The 38th annual Central States VHF Society Conference will be held July 2=
2nd to
the 25th and planners are already seeking presenters of technical talks t=
hat
will also be published in the conference proceedings. =20

The deadline for submitting final papers will be May 1st.  This years gat=
hering
will be held at the Delta Meadowvale Resort and Conference Centre in
Mississauga Ontario, Canada not far from Toronto.  More information on th=

```
e
event and the need for speakers is available from Bob Morton, VE3BFM.  Hi=
s
e-mail is VE3BFM@csvhfs.org  (CSVHFS)

HAM RADIO IN SPACE:  ECHO TEAM REPORTS PROGRESS

AMSAT North America reports that work on the Echo satellite is progressin=
g
smoothly.  According to the ham radio space agency, an integration and te=
sting
team lead by Jim White, WD0E, and Mike Kingery, KE4AZN, was 2003 at Space=
Quest
in December.  SpaceQuest is in Virginia and during the initial satellite
integration session, about 90% of Echo's hardware was successfully tested=
. =20
Also, most of the telemetry calibration was accomplished.  Especially enc=
ourage
is word that the new experimental L-band receiver and S-band transmitter
functioned well during their first tests.

For more information on the progress of this new bird take your web brows=
der
over top see www.amsat.org and take the "Echo Project Info" link.  (AMSAT=
--NA)

**

INTERNATIONAL - CANADA:  NEW ONTARIO SM

Radio Amateurs of Canada reports that Robert McKenzie, VE3SJQ, has steppe=
d down
as Ontario Section Manager.  His replacement is Rose Scholtyssek, VE3RIS.
Scholtyssek=E2=80=99s E-mail is rose@igs.net  (RAC)

```

International. (Varios DX sources)

**

THAT FINAL ITEM:  THE LIFE AND TIMES OF K2ORS

And finally this week, a new book is in the works about a broadcast legen=
d who
also happened to be a ham radio operator.  Take a listen:

--
Shep:  =E2=80=9CWell there I am playing that character deep in the jungle=
.  We have
$400,000 of camera equipment that=E2=80=99s being eaten by mosquitoes.  T=
hey eat
Betamax cameras.  You don=E2=80=99t know about the tropics.  Leaches are =
coming up
the tripods, when a runner comes down the beach.  He=E2=80=99s a Chumaro =
Indian. =20

He=E2=80=99s running.  He=E2=80=99s sweating.  He arrives in the clearing=
.  This is exactly
what happened. =20

The Director is standing there. He=E2=80=99s sweating and saying: =E2=80=98=
...damn, we got
to get this.=E2=80=99  We kept trying to clean the lens off.  It was a to=
ugh shoot.

And this Chumaro runner comes up and he=E2=80=99s saying; =E2=80=98Messag=
e.  Message.=E2=80=9D=20
He has a message.  The Director looks at it and he hands it to me and the
message said -- and I quote: =E2=80=98...The Dayton Hamvention called.  T=
hey want you
to speak this spring.=E2=80=99

I said: =E2=80=98For cripes sake, how did they know I was in the jungle=E2=
=80=99=20
(laughter)=E2=80=9D

--

That was the late Gene Shepherd, K2ORS, speaking at the Dayton Hamvention
several years ago.  Shep as he liked to be called, passed away in 1999.  =
Now,
author Eugene Bergmann has set to work writing the definitive book about =
the
ham who invented talk radio.  In a recent interview with Amateur Radio
Newsline, he told us why:

--

Bergmann:  =E2=80=9CWell I first started listening to Jean Shepherd way b=

```
ack in =E2=80=9856
when I was in college and I think what he had to say and the way he said =
it
affected my thinking for the rest of my life.  Soon after he died I reali=
zed
how important he was to my way of thinking.  That he was like an old frie=
nd.  I
got more and more involved in learning more about him and I finally decid=
ed
that I had to write a book about his art.=E2=80=9D

--

In writing his book, Eugene Bergmann wants to make certain that every asp=
ect of
Shep=E2=80=99s life and career is accounted for, including his love of ha=
m radio.=20
And a love it was as in this very rare recording where he accurately pred=
icted
the explosive growth in F-M and repeaters in general and one New York Cit=
y
machine in particular:

--

Shep: =E2=80=9CI don=E2=80=99t think you guys who sit around every night =
like you do
recognize the already legandary status of this repeater outside of this a=
rea.=20
I just came back from a trip from the Canadian border and all the way dow=
n
through New England and way up in the Northern part of Maine I worked guy=
s and
the one thing that they all talked about was SUR (WA2SUR).  And they real=
ly was
a quality of =E2=80=98wow=E2=80=99 in their voice.  I think that in anoth=
er ten years
there=E2=80=99s no telling how immense this repeater will be and what a s=
tructure it
will be.  I am  very serious when I say this.  I think we are in the begi=
nning
of a thing here and I think that ultimately 25 years from now people will=
 look
back on the early two meter guys like us -- we=E2=80=99re considered earl=
y guys now
-- with a legendary awe.  You know, with a quality of awe, like =E2=80=98=
my god --=20
they started it all.=E2=80=9D

--

That was recorded way back the evening of June 21st 1972 over the then  W=
A2SUR
```

repeater in New York City.   K2ORS was right on in his F-M and repeater g=
rowth
forecast.  Bergmann says that=E2=80=99s the kind of he plans to include:

--

Bergmann: =E2=80=9CIn May of 1968 in one of his broadcasts he said: =E2=80=
=98...I became at
the age of ten, totally, maniacally and for life I might point out --
completely skulled out by Amateur Radio.=E2=80=99  So he was quite an ent=
husiast up
to his death in =E2=80=9899=E2=80=9D

-- =20

Sound intriguing?  Well you can find out a lot more about Eugnene Bergann=
=E2=80=99s
book and how you can help to writer it on this weeks RAIN Report.  Just g=
o to
www.rainreport.com or dial into area code 847-827-7246, sit back and enjo=
y a
quarter hour with Eugene Bergmann and his new book on the legendary Jean
Shepherd, K2ORS.  (ARNewsline(tm))

(wa6itf@arnewsline.org)

AMATEUR RADIO NEWSLINE=E2=84=A2 ANNOUNCES CREATION OF THE ROY NEAL, K6DUE=
, AMATEUR
RADIO MENTORING PROJECT

January 15, 2004 (Los Angeles California)  The Amateur Radio Newsline Inc=
., a
Federally chartered 501(c)(3) not-for-profit corporation has today announ=
ced
the creation of the =E2=80=9CRoy Neal, K6DUE, Amateur Radio Mentoring Pro=
ject.=E2=80=9D=20
This is a program designed to take newly licensed radio amateurs and plac=

```
e them
one-on-one with veteran hams so that they may learn the traditions and
operating skills that no classroom or home-study environment can teach.=20

Roy Neal, K6DUE, was a driving force within the structure of Amateur Radi=
o
Newsline.  He passed away on Friday, August 15, 2003 from complications a=
rising
from heart valve replacement surgery a few days earlier.

In addition to serving as Amateur Radio Newsline's Vice President, he was=
 also
our teacher, advisor and friend.  Those of us who had the honor of knowin=
g Roy
were keenly aware of his willingness to help anyone better themselves.  H=
e was
always willing to share his lifetime of knowledge in many areas including
science, space exploration and Amateur Radio.  With this in mind the Amat=
eur
Radio Newsline Board of Directors at its annual meeting on December 13, 2=
003
voted unanimously to honor Roy=E2=80=99s memory by creating a program to =
carry on his
vision. =20

What we have named =E2=80=9CThe Roy Neal, K6DUE, Amateur Radio Mentoring =
Project=E2=80=9D
is loosely based on a similar program created by Broadway performer Ann
Reinking.  Reinking was a student of and performer with the legendary
choreographer/director Bob Fosse.  She is now carrying on the =E2=80=9Cme=
ntoring=E2=80=9D
tradition in the art of dance through her own educational foundation,  th=
e
Broadway Theater Project. This is a Florida based training program connec=
ting
students with seasoned theater professionals.  If we may quote Ms. Reinki=
ng:

=E2=80=9CIts sort of an un-written law or rule in the world of dance that=
 you pass on
what you know.  This particular craft is at its best when its passed from=
 one
person's hands to the next.=E2=80=9D

Now, if  you think about it, what Ann Reinking says about "dance" applies
equally to our world of Amateur Radio.  Maybe more so, because, for decad=
es the
knowledge and tradition of our hobby/service was passed down from seasone=
d
operators to newcomers, one to one.  Unfortunately, in the ham radio of t=
oday,
this art of mentoring that we call "Elmering" seems to be disappearing.  =
It is
```

being replaced by "weekend cram class training" and/or the more tedious w=
orld
of =E2=80=9Chome study.=E2=80=9D  Both provide lots of technologically tr=
ained hams, but
they do not turn out skilled operators or hams who really appreciate the =
art of
amateur radio. Only one-on-one =E2=80=9Cmentoring=E2=80=9D or =E2=80=9CEl=
mering=E2=80=9D can do that.

=E2=80=9CThe Roy Neal, K6DUE, Amateur Radio Mentoring Project=E2=80=9D is=
 to be a similarly
structured program that fosters those one-on-one relationships that go we=
ll
beyond the knowledge necessary to pass a ham radio exam. It will put an
emphasis on our traditional ham radio values by placing new hams into con=
tact
with skilled operators who are willing to teach them such radio art-forms=
 as
how to work DX, or run a contest, build and operate a repeater, talk by
bouncing signals off the moon, kit construction and anything else that ma=
kes a
ham a ham. In essence, to pass along the living traditions that make ham =
radio
what it is to all of us old timers.

To make this work, two groups of hams are needed.  First we need skilled
operators who are willing to donate time to assist those in need of train=
ing.=20
We also need new hams to come forward and say: =E2=80=9CI want to learn m=
ore.=E2=80=9D  We
will do our part by matching the mentors to those in need of Elmering. =20

To get the project underway we have asked Joe Eisenberg, K0NEB, to create=
 the
necessary databases and begin the process of matching volunteer mentors t=
o
those wishing instruction.  We are also asking both groups to send us an =
e-mail
at mentor@arnewsline.org.  In your note please state if you are offering =
to be
a mentor or are in need of training.  Please include your name, call, add=
ress,
e-mail address with zipcode, phone number, best time of day to call and a=
ny
other pertinent information. =20

It is our hope that the nation's Amateur Radio community will join with u=
s to
make "The Roy Neal, K6DUE, Amateur Radio Mentoring Project" a part of the
traditions of the hobby, and that it will become a lasting memorial to th=
e
radio amateur who gave so much of his life to making Amateur Radio the be=
st

hobby and service in the universe.=20
. =20

I am trying to record some Real Media Streams from the KQED archive so
that I can listen to it in my car when driving home. Here is a link to
one such stream:

http://www.kqed.org/.stream/real/radio/forum/2004/01/2004-01-29a-forum.rm.ram

When put this link into my webbrowser it loads up the Real Media
Player and streams the show. Now I tried to capture this show with
NetTransport by setting the URL to that address. Unfortunately, it
downloads not the right thing but only some file with the size of 210

bytes.

How can I capture this stream? What other free software is out there
that can record Real Media Streams?

Thanks a lot,

Rob

Amateur Radio Newsline(tm) Report 1381 – January 30,  2004

Amateur Radio Newsline report number 1381 with a release date of Friday, January 30, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Hams across the nation react to the ARRL restructuring proposal and the first B-P-L law suit involving ham radio is threatened in Austria.  These stories and an interview with ARRL President Jim Haynie, W5JBP, highlight this weeks Amateur Radio Newsline report number 1381 coming your way right now!

(Billboard Cart Here)

**

RESTRUCTURING:  HAMS REACT TO THE ARRL NO-CODE PROPOSAL

Hams are starting to react to the recent ARRL proposal to restructure the United States Amateur Radio service, and not surprising the comments are as diverse as the community itself.  Amateur Radio Newsline’s David Black, KB4KCH, is at our South-East Bureau with this part of the story:

--

If you listen to the ham bands and check out the comments on the qrz.com website, it appears that most amateur radio operators have a somewhat sedate response to the ARRL's restructuring proposal. While some activists make their opposition quite vocal, the majority of comments so far seem to accept the League's initiative, 'though some do express reservations.

"I can live with this" is how some comments go. Others more strongly support the League by saying, "right on, A-double-R-L." The biggest concern most express centers around the ability to monitor the airwaves for rules compliance if explosive growth results.  As one operator on 15 meters says, "If we get a million new hams, will the FCC give us 500 more Riley Hollingsworth's to keep them in line?" Hollingsworth handles amateur radio enforcement matters for the Commission.

Some operators say the League's proposal will wind up dumbing down amateur radio.  Some even claim to have resigned their ARRL membership, 'though so far, no proof of that has surfaced. Vehement opponents of restructuring may in fact terminate their League memberships, but the number is not expected to be significant.

Restructuring is not a done deal. Announcement of the League's proposal is only the start.  The League will formally request that the FCC make a rules change. Once the Commission receives that request, it will be up to the FCC to decide whether or not it will consider the League proposal put it out for public comment. Chances are that it will. Once the proposal is assigned a rule making designation, you will have a chance to make your opinion known.

Comments are likely to come from the general public, the business community and any special interest groups as well as those who hold an FCC assigned call sign.

Stay tuned -- the story's just beginning.

>From the South-East Bureau in Birmingham Alabama, I'm David Black, KB4KCH, reporting for the Amateur Radio Newsline.

--

Unless the FCC decides to place the ARRL request on a separate fast-track, you can expect the agency’s first action to be putting it out for initial comment sometime in the next several weeks.  (ARNewsline(tm))

**

## RESTRUCTURING:  THE ARRL ON THE ARRL RESTRUCTURING PROPOSAL

The ARRL is now explaining why it has decided to ask the FCC to restructure the United States Amateur Radio Service, and the words are coming straight from the top.   Amateur Radio Newsline’s Mark Abramowicz, NT3V, caught up with ARRL President Jim Haynie, W5JBP, by phone and got some insight into why the ARRL Board acted as it did :

--

With the American Radio Relay League's imminent filing with the FCC of its proposal for a new, no-code HF entry level license, the debate is certain to heat up.

ARRL President Jim Haynie W5JBP acknowledges the league's proposal will generate some controversy. But he says months of research, surveys and lots of internal debate went into crafting the revival of a Novice-class license.

Yes, Haynie confides, the ARRL's directors and Haynie himself were pressing the flesh - so to speak - for months gathering input from the amateur community. Directors also were conducting informal surveys among ARRL members. And, he says, a professional research company was hired by the league to survey hams about the state of the hobby.

Haynie says the research company's findings were pretty sobering and bolstered the ARRL board's drive for license reform.

"For example, 53 percent, if my memory serves me correct, today of all amateurs now are 55 years or older," Haynie says. "And this is growing at an exponential rate, it's not linear. And this is a very disturbing thought."

He says the results also revealed something the ARRL suspected for some time.

"There's people getting licenses and they're getting involved in what we call, or what I call '2-meter ghettos' and they have no place else to go so they lose interest after about a year or six months or whatever," Haynie explains. "So you've got 200,000 or 300,000 Technician licenses out there who say 'I've tried' and they did and they didn't like it."

Haynie says it became clear one way to recapture the magic of the hobby lay in the experiences many long-time hams had when they first entered amateur radio.

"We went back and thought about, okay, how did it used to work and what was successful about it? And the old Novice class license was extremely successful, I think. And, we said, 'Well, okay then we have to go back to some form of that.' "

Last year's World Radiocommuncations Conference laid the ground work for countries to decide for themselves what to do about CW and licensing. But Haynie says the WRC '03 decision played a small role in the ARRL's deliberations.

"Morse Code is certainly tradition, I don't deny that," Haynie says. "And I think it's a neat ability. It's a skill. It has nothing to do with intelligence."

Haynie says he and other directors have heard some argue: 'Hey, I had to pass a code test, why shouldn't everyone else.' Haynie says that's like saying I'd like to play golf like Tiger Woods and coming to the realization that's probably not going to happen because you simply don't possess the skills - even with lots of practice. The same logic, he says, applies to CW. For many hams, he says, it's simply not their bag.

Haynie says the ARRL's proposal preserves CW for one license class, yet opens the doors to the world of HF for those who couldn't learn and master Morse Code to pass even a 5-words-per-minute test.

"People, they realize, they've come to grips: We are getting older. And we're not getting the people into Amateur Radio," Haynie says.

"And the amateur community realizes that we've gotta do something. And, I don't say that the league's proposal is perfect. Neither does any of the directors or officers of the league say that. But it was the best that we could come up with that still preserved the Morse Code tradition for the Extra class exam, and yet, gave you the taste of the old Novice that I used to have 30-something years ago."

Haynie says he's confident, based on his experience with the FCC, that the agency will look favorably on the ARRL license proposal.

"I have a gut feeling that they will take a majority of it, at least I think they will. They'll probably fine tune it, they'll tweak it some because that's typical of the federal government," Haynie says.

"But on the other hand, I know, I know that they want to simplify the Amateur Radio Service. They want three classes of licenses. They want to reduce their workload and continue to do what they like to do and amateur radio take care of itself."

And how long does Haynie think it will take the FCC to act and make any changes to the Amateur Radio license structure? He says don't expect a decision anytime soon.

"I don't see anything happening on any of the petitions, including the league's, probably 'til late 2005," Haynie concludes.

Haynie says his e-mail and phone have been busy since the board's vote two weeks ago. He says he's comfortable with the license proposal and is prepared to support and defend it.

Haynie says he had the chance to do so earlier this week before his hometown radio club in Garland, Texas. He says after explaining the league's rationale to the group, those willing to listen asked lots of questions. Haynie says he felt by the time it was over, many appreciated the league's work on behalf of the hobby.

Haynie's next stop: The 44th Tropical Hamboree in Miami on February 7 where he's expecting to get lots of feedback.

For the Amateur Radio Newsline, I'm Mark Abramowicz NT3V in Philadelphia.

--

If all went as expected, the ARRL was to transmit its proposal to the FCC on Wednesday, January 28th.  And less we forget, a word of congratulations to Jim Haynie on his election to a third term leading the United States only recognized Amateur Radio society. The ARRL Letter Board of Directors expressed its confidence in W5JBP’s leadership on January 16 with a unanimous vote for his him to continue as President.  (ARNewsline(tm))

THE BPL FIGHT:  AUSTRIAN BPL PROVIDER SUING HAMS OVER NEWS STORY

In what looks to be a case of “he said -- no -- he said,” a row is brewing over the introduction of Broadband over Powerline telecommunications in the city of Linz,  Austria.   One that has a service provider taking that nations Amateur Radio society to court over statements quoted in the media world-wide.

As reported a few weeks ago, stories were circulating that PLT, or Power Line Telecommunications as the Europeans call their BPL system, had been  halted in Linz.  This, due to interference caused by the system.  Also that the Austrian government had enjoined the service provider and the system would never be permitted.

Not true says the BPL provider and the power company and its now headed to court to try to stop the hams from complaining to them and to the press.  From across the Atlantic, Jeramy Boot, G4NJH, has more:

--

The Austrian national amateur radio society, OeVSV, has objected to the use of PLT in Linz, stating that it causes interference to amateur stations, and issuing a press release which was picked up by the Austrian mass media.  It appears that the OeVSV was misquoted as saying that the Austrian ministry had taken out an injunction against the PLT providers and that the service had been closed down for good in Linz.

The management of Speed-Web Consulting and Linz AG, who are responsible for the PLT transmissions, are disclaiming what they say are "press attacks by Austrian radio amateurs". They say that there has not been any injunction against them and the roll-out of PLT continues.

Speed-Web and Linz AG say that Austrian radio amateurs are doing their best to stop PLT "by filing undue interference complaints". They go on to say that "if there should be any actual, harmful and officially proven interference case caused by Powerline Communications, mitigation measures will solve this very case at that specific location in the concerned frequency".

On the 14th of January, Linz AG stated that it would be suing the OeVSV, as well as its president personally, over this matter.

Jeramy Boot, G4NJH.

--

The decision of Linz A G to sue the ham radio operators over the story of BPL says that in this one, big business is willing to go the whole nine yards. (GB2RS)

**

THE BPL FIGHT: FCC'S ABERNATHY ACKNOWLEDGES AMATEUR RADIO BPL CONCERNS

Here at home, FCC Commissioner Kathleen Q. Abernathy is apparently shifting away from her definition of BPL as a "Broadband Nirvana.” Last week Abernathy specifically cited Amateur Radio concerns about the interference potential of Broadband Over Power Line in remarks she delivered to the Catholic University of America's Columbus School of Law.

According to the ARRL Letter, Abernathy said BPL should not be widely deployed before dealing with ham radio's interference fears. She admitted that she now recognizes that Amateur Radio licensees have raised concerns about the potential for harmful interference. Abernathy described this as something that will have to be addressed before any mass market deployment can occur.

Commissioner Abernathy made her remarks on January 22 at the school's Washington, DC campus. Abernathy said that if engineers can find a way to prevent harmful interference to other radio services, BPL would represent a tremendous advance for consumers, because it could bring broadband to any home that has electric power delivery. (ARRL)

**

RADIO LAW: CONGRESS MAY RAISE INDECENCY AND OBSCENITY FINES

Using obscene and indecent language on the airwaves may soon get very expensive. This as congress considers raising the stakes for those who insist on talking dirty on the radio. Amateur Radio Newsline’s Bill Pasternak, WA6ITF, has the details:

--

United States Representative Fred Upton of Michigan introduced congressional legislation to upthe maximum fine for an indecent broadcast from $27,500 to $275,000. Under the Upton sponsored measure the maximum fine for a continuing violation would be raised from $300,000 to $3 million.

Upton had also scheduled hearings to review the FCC's indecency enforcement policies for January 28th. Ken Johnson, a spokesman for Representative Billy Tauzin of Louisiana is quoted as saying that law makers intend to move the legislation quickly in hopes of sending a signal to broadcasters that enough is enough.

This action comes following recent complaints by FCC Chairman Michael Powell. He says that the existing penalty cap on indecency fines was too low to discourage off-color broadcasts.

For the Amateur Radio Newsline, I’m Bill Pasternak, WA6ITF

--

Commissioner Powell believes that once broadcasters start to feel the pinch where in their wallets they will start to think twice about transmitting indecency on the airwaves. (Published news reports)

**

ENFORCEMENT: UPS TO THE FCC: YOU HAVE OUR FULL COOPERATION

The FCC has received a letter from United Parcel Service offering the company’s full cooperation in removing any unlicensed radio equipment from its nationwide fleet. This follows a January 7th letter to the Middlesburg Ohio office of U-P-S detailing unlicensed 10 meter operations coming from delivery vehicles in that area.

The FCC also has contacted another trucking company, R and L Transfer of Norwalk Ohio regarding the same type of problem. Unlicensed operators coming to the 10 meter band has been a growing problem around the world in recent years. (FCC)

**

ENFORCEMENT: THAT RADAR IS A NO-NO

The FCC has also written to a pair of hams in the Winfield and Haysville Kansas area. This, regarding a reported piece of marine radar equipment mounted in a land based vehicle. According to the FCC the radar unit was being used for storm spotting without being licensed for this use. The identities of those using the radar system were not revealed. (FCC)

**

## HAMFESTS AND CONVENTIONS: OKLAHOMA IN MARCH

Turning to the social scene, the Green Country Hamfest and ARRL Oklahoma Section Convention is slated for Friday and Saturday, March 19th and 20th at the Claremore Exposition Center in Claremore Oklahome. Claremore is not far from Tulsa, and the event will feature free parking, loads of vendors, on-site ham radio exams, numerous forum sessions along with some truly nifty prizes. More information is on the web at www.greencountryhamfest.com (KC5FM)

**

## HAMFESTS AND CONVENTIONS: FIRE CANT STOP THE DIXIFEST IN MEMPHIS

Despite a fire that destroyed its normal venue, Dixiefest 2004 in Memphis Tennessee will happen the weekend of February 14 and 15. Planners were able to find a new home at the Mid-South Fairgrounds’ Pipkin Building. This is only a proverbial stones-throw from the Shelby County Building which was destroyed in the December 2003 blaze. More information about this premiere event can be found on-line. Just take your web browser to www.dixifest.org and take a peek. (Via e-mail)

**

## BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

## OUR GOLDEN PAST: CARL & JERRY “LIVE” AGAIN

Its time for a trip back to the 1950’s. To a kinder and gentler Amateur Radio. Our tour guide for this journey is Bruce Tennant, K6PZW:

--]

Remember the names Carl and Jerry? Well if you were playing with ham radio in the 1950’s and 1960’s you are well aware that these are the first names of the two fictitious teenage electronic whizze’s. Characters created by the late John T. Frye, W9EGV, for his long-running magazine series of the same name.

The Carl and Jerry stories appeared in Popular Electronics from October 1954 through December 1964. They told of the adventures of two perennial teenage boys who shared a special bond because of their shared love of music, electronics and radio. Now, many of these stories are again available to read to enjoy thanks to a new spot on the world-wide-web. Better yet, they are the kind of stuff you may want to read to your grandkids, especially if they have the same wonderment as you when you were their age.

Where are they and how do you these Pop Com classics?  Thats easy.  Just follow to link you will find in this weeks print edition of this Amateur Radio Newsline report.  And good news for our sight impaired listeners.  Word is that the print works well with most devices to help the blind to read as well.

Traveling back in time for the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, enjoying the past.

--

So far there are only 21 of the stories in the seriers on the web, but enough to keep you glued to your computer screen for several hours.  They are there to read at http://home.gwi.net/~jdebell/pe/cj/cnjindex.htm  (ARNewsline(tm))
**

INTERNATIONAL - IARU:  NEW IARU REGION 2 ARDF WEBSITE

Back to the present and word that Region II of the International Amateur Radio Union now has web site to serve as the voice of its Amateur Radio Direction Finding Working Group.  The site provide links to official rules and regional results along with contact information for A-R-D-F groups and individuals throughout the Region.

Plans call for the site to be in four languages that include English, Spanish, French, and Portuguese. If you have any comments or wish to volunteer with the translations, please contact Dale Hunt, WB6BYU or Ken Harker ,WM5R.  Their respective e-mails are wb6byu@arrl.net and wm5r@arrl.net.  The website can be found at www.ardf-r2.org   (Press release)

**

INTERNATIONAL - UNITED KINGDOM:  OFCOM NEW TELECOM REGULATOR

>From the international wire, word that Ofcom is name of the new regulator of Amateur Radio in the United Kingdom.  The agency also holds responsibility for control other services that include broadcast television, radio, and numerous wireless communications services.  More about Ofcom is on-line www.ofcom.org.uk (GB2RS)

**

INTERNATIONAL - VK:  AN AUSTRALIAN LICENSE IS REQUIRED

A note to those of you who intend to operate from Australia on an extended visit.  It appears that many amateurs, including those operating maritime mobile from within Australia's territorial waters, are using their own callsign with the 'stroke VK' suffix.  Under Australian telecommunications law, this is not permitted for any lengthy stay.  Once past the grace period, all radio amateurs operating from Australia, and more importantly,  from Australia's territorial waters must obtain an Australian license and individual VK callsign from the Australian Communications Authority.  If you don’t you will be told to go off the air. (Q-News, RSGB)

**

INTRUDER WATCH: HARMONICS BOTHER 20 METERS

An unidentified broadcaster on 14.280 MHz, has been identified as a harmonic of a Radio Liberty. The transmitter in question operates on 4.760 MHz and it’s the 3rd harmonic that been heard in V-K-Land.

Meantime, another intruder on 14.320 MHz has been found to be Radio Uzbeckistan. This time it’s the 2nd harmonic of a transmitter on 7.160 that’s responsible for what’s being heard. (Q-News)

**

WITH THE ARRL: MAJOR CHANGE IN DXCC POLICY ANNOUNCED

A major change in the criteria for determining what is a new DXCC entity. An ARRL news release says that the organizations Board of Directors has removed the guideline that provides for an entity to be added to the DXCC list if it has a separate International Amateur Radio Union member society. The ARRL says that this provision had the unintended consequence of bringing in applications for IARU membership that do not further the objectives of the organization. In fact, all it has done is to create what ARRL terms as an unfortunate and unnecessary administrative burden for the IARU. (ARRL)

**

DX

In DX, Dwayne Barbee KE4RVT is the latest ham on the air from war-torn Iraq. Q-R-Zed dot com reports that Barbee received his Amateur radio license from the Ministry of Communication on January 25th. He has been assigned YI9RVT and will be operating SSB and CW on all bands for the next 12 to 18 months from the city of Al Kut. (qrz.com)

And word that SM5DIC was scheduled to return to the Democratic Republic of Congo on the 20th of January. He will be there for two months and will operate the club call 9QZ0AR in his spare time. (GB2RS)

Also, AA1M and W1USN will be active as J3 stroke their home calls from Grenada to the 6th of February. They will operate CW, SSB and some PSK on the High Frequency bands. For all of these operations, QSL as directed on the air. (GB2RS)

**

THAT FINAL ITEM: RADIO FROM SPACE - THE SETI INSTITUTE IS MONITORING

Lastly this week, scientists searching the stars for aliens are convinced an E.T. is out there -- it's just that they haven't had the know-how to detect such a being. Amateur Radio Newsline’s Norm Seeley, KI7UP, has the rest of the story:

--

Science Online says that technological advances have opened the way for scientists to check millions of previously unknown star systems, dramatically increasing the chances of finding intelligent life in outer space in the next 25 years.

The article quotes Seth Shostak. Shostak is the senior astronomer at California's non-profit Search for Extraterrestrial Intelligence Institute says that it is like looking for needles in the haystack that is our galaxy, but there could be thousands of needles out there. But on a recent visit to Australia to attend a conference on extraterrestrial research, Shostak said detecting alien life is only the start.

Since it was founded in 1984, the SETI Institute has monitored radio signals, hoping to pick up a transmission from outer space. Its Project Phoenix conducts two annual three-week sessions on a radio telescope at Arecibo, Puerto Rico. Project Phoenix, is the privately funded successor to an original NASA program that searched the heavens for signals from extra-terrestrial beings. That program was canceled in 1993 amid much skepticism in the Congress regarding the possibility of life in outer space.

For the Amateur Radio Newsline. I’m Norm Seeley, KI7UP

--

But Science Online says that the search has been slow. About 500 of 1,000 targeted stars have been examined and no extraterrestrial transmissions have been heard. (ScienceOnLine)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the newly created Roy Neal, K6DUE, Amateur Radio Mentoring Project is up and operating. We already have signed up close to a dozen hams who are willing to assist others. If you can help, or if you need assistance please drop a note with your name, address, hone number and area of expertise to mentor@arnewsline.org

For now, with Bill Pasternak, WA6ITF, at the editors desk, I’m Don Wilbanks, AE5DW, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2004. All rights reserved. Now please stand by for a special mesaage regarding Amateur Radio Newsline’s current financial situation from Andy Jarema, N6TCQ.  It  following this 5 second pause.

--
5 sec pause
--

This is Andy Jarema, N6TCQ, Chief Financial Officer of the not-for-profit organization you know as the Amateur Radio Newsline. And once again, I am using the single word -- HELP! If you value this service, please help. We try to keep these kind of thing as subtle as we can.

You responded so wonderfully to our plea last April, and we haven't really asked for anything since. But, unfortunately, your response dwindled in the waning months. The expenses of bringing you the up-to-date news on Amateur Radio did not.

We'd really like to hear from you. And we'd really like to hear from the repeater clubs out there. These are the wonderful folks who re-transmit our broadcasts, bringing your nets increased value, and giving your members the latest in Amateur Radio news and information to enhance their hobby.

But Amateur Radio Newsline cannot continue without the funding needed to pay the monthly bills. And right now, we can't.

In the quarter century that it has existed, no one at the Amateur Radio Newsline has ever taken a salary. We all volunteer our time and talents. But what we ARE faced with are monthly expenses for gathering and delivering the news to YOU! We are talking telephone, Internet access and the like. This has not changed.

The bottom line is this: I’m asking that you try to find it within your organization or yourself as an amateur to continue this service. As we've said before, whether Amateur Radio Newsline continues to provide this service or if it disappears is totally your decision. We're here to serve you for as long as you want us. Your response over the next several weeks will provide the answer.

The address for the Amateur Radio Newsline is Post Office Box 660937, Arcadia California, 91066.

Looking forward to hearing from you REALLY soon, I'm Andy Jarema, N-6-Tiny California Quake.

Not free, but TotalRecorder will record anything you can play through your sound card.

I wanted to do that at one time, and someone referred me to the program Total Recorder. It isn't free but it's pretty cheap.But I'm cheaper and I didn't buy it. You can download a free trial version that will let you record for a trivially short amout of time so you can't acutally get any use out of it but can see how it works. The advanced edition even lets you schedule a recording of a streaming program unattended. If it will work on your computer (it's Windoze) you might want to check it out.

And ReplayRadio is programmable to schedule such recordings.

<http://www.replay-radio.com>

I have registered and used both, and prefer the latter.

If you have a full duplex sound card with digital in and out, put a patch cord between it's digital out and it's digital in..... Send the Real Audio to digital out... Use any program you like to record the signal from the digital in...

Open your mixer, select Options|Properties|Recording and be sure
stereo mixer is checked.  Click OK and select Stereo mixer.  Any
recorder should now record what ever comes out of the sound card.

The Annis Han-D-Mag is around $60 now, and does a pretty reasonable job of
it.

I'd first, though, find out how it got magnetized in the first place.  Has
the machine been near anything with a strong magnetic field?  Is a head
blocking capacitor bad and throwing DC across the head?

A local studio might be willing to rent you a demagnetizer and a magnetometer so you can track the source of the problem down.

Unfortunately I wish this wasn't so, but for those who watched ABC 10 we saw it for ourselves.

Tony "Magoo, morning man at B95, a country station in Flint, has an aggresive form of throat cancer, it spread to his face, his mouth, his nodes, he lost almost all of his teeth, his immune system is now slim to nothing and he almost died of pneumonia.

During the time while Magoo was having his throat and mouth surgically scraped of cancer, going through radiation and chemo, having his nodes removed, and fighting off opportunistic infections, B95 decided to remove all traces of HIM from their office and website.

He called to ask what was going on, and they have him 3 choices, He could return to work with IV in arm, Broadcast from his sickbed (which management told him would make for compelling radio) or be fired.

Magoo, weak and sick, showed up at the B95 studios as he was told to do, they sat him at a desk where they had him do NOTHING. The program director, Coyote, had taken his morning slot. They then fired Magoo, refusing, because of some tiny loophole, to pay him severance, and saying he doesn't deserve disability.

He now has no job, no ability to get good health care because he has no money, and B95/Citadel in Flint MI has YET to explain why they fired him.

Is this how people treat one another? I would call, write, or even visit B95 and ask why they did this to Magoo? Why did they fire a man for being sick?

I guess they hate cancer patients.

I covered this in alt.radio.broadcasting....but I'll go into detail here.

You want a device which is designed to provide the appropriate amount of magnetic flux to the head without overdriving the amplifier that it's connected to.  Too much and you'll smoke a very low power device, too little and you won't do the job on the head.  Thus, you need to get a head demagnetiser.  They're not expensive.  True, you won't be using as much as you would the tape machine you're maintaining, but it's a good investment, since your recordings (I would assume) are worth far more than the $20-30 a demagnetiser will set you back.  If you're really strapped, perhaps you could borrow one from someone who has more resources, or maybe you could all buy one you could share, since you won't need it but for 10 seconds every

100 hours...surely under those circumstances there's no need to actually own
one solely on your own.

Hmm,

Out of curiosity, does anyone know of a realtime realaudio converter?

If you can hear it, you can record it. Run some program that records
a wav while playing the realaudio stream. If you've set up the right
Record source in your soundcard's mixer (probably found in the system
tray), you'll get a recording.

Windows\ Audio recorder will do. there are many more elegant
programs, from freeware upwards.

Can anyone tell me what outdoor FM  antennas are available that are
either dipoles, or folded dipoles, or end fed halfwave antennas,
,j-poles -  etc?  Not directional parasitic beams!

There seem to be slim pickings, or it's just my searching skills that
are naff! :c) You come across quite a lot of transmitting antennas but
I'm after receiving antennas.

One regular non-broadcast dipole I've found:

>http://www.maplin.co.uk/Products/Module.asp?CartID=040202140438851&Modu
leNo=873&MR=N<

Not bad, cheap.

----------------------------------
Halfwave type:

http://www.ccrane.com/fanfare.asp

Probably good. Expensive!!

----------------------------------
Folded dipole "halo":

>http://www.towerhillaerials.com/viewProd.phtml?ref=52&orderNumber=0<

Cheap, but I'd be tempted to bend this straight!:c)

----------------------------------
Crossed dipoles:

http://www.funke.nl/aerials/fm.htm

---------------------------------

No-one seems to sell receiving straight folded dipole!!

Any other similar products out there that you know about?

TIA.

Rich.

No from live audio, say at a conference, to realAudio soyou can stream live
to the web?

I know there are hardware codecs for some formats that do realtime
conversion (minus latency), but is there a software or harware codec that
ctakes live audio and converts it in realtime to the RealAudio format?

Jerrold makes a couple halo antennae.  I'd go to folks like Jerrold,
Winegard, and the other TV outfits.

You can, of course, use transmitting antennae for receive, although you
will have to deal with it being 50 ohms source rather than 75.

You can make your own without much work.

Actually, this is a pretty good source, sells RX folded dipoles and crossed dipoles (turnstiles).

I think for that you'd have to get the encoding/streaming software from RealAudio.  It's been 4 or 5 years since I looked into it, and at that time they offered a simple basic one for free.  Check their website.

Well, I have the following list:

Dipole: "Radio Rod"

Straight Folded Dipole: "R.1100-FM"

Circular Folded Dipole:  "All-Rounder"; "FM1080" (Several makes)

S shaped Folded Dipole:?

Crossed Dipole (Turnstile) :"R.1100-FM OMNI"; "PR-6010"; "BTY-2-FM";
"FMSS"

End-Fed Halfwave: "FM-2G"; "ST-2"

J-type:? (Seen some broadcast type)

That's my list.  If anyone can add any more models, feel free.

Jetaudio will create the .rm (.ra) files for you. The Plus version contains
Jetcast for internet broadcast. May help ?

Cheers

If you want a nice factory built folded dipole, just take one of the crossed dipoles, like radio shack sells, and remove one of the two dipoles and through it away.  You are left with a single folded dipole with higher gain than the crossed dipole.  That is what I use.

Regards,

John Byrns

Untrue. It's never really been tried. As far as "similar values" are
concerned, remember that a conservative won the Presidency but lost
the vote. More people who actually voted wanted Gore.

If you actually believe that conservative talk listeners represent the
nation, you're smokin' some damned good stuff. Most of the population
does not listen to talk radio. I believe Limbaugh's highest rating
(percentage of the population listening) was a 4. That means 96% of
the population wasn't listening.

I believe most of the country is moderate. Probably fiscally
conservative and socially liberal. Even the most strident
conservatives are at least mildly upset over the deficit.

Just ask Opie & Anthony. I'll bet every horrified listener was glued
to the radio during the "Copulating in the Cathedral" episode. Why
does traffic moving in the opposite direction of an accident slow
down? It's hard to rubberneck at 75mph.

Many Liberals listen to Limbaugh just to hear what he's saying about
them.

Rich

Don't count on it -- much as it may amaze you, not everyone in this
country is a brainless droid waiting for you to tell them what to
believe.

The program will go on the air on some weak signalled stations, and will
succeed or fail based on the merits of the programming quality, content,
and yeah, the views expressed.

But don't count it out based on what you want to hear and believe,
because thankfully you and your friends don't represent everyone.

Liberals don't seem to do as well answering unfiltered questions from
callers.  That's why Hillery's "town meetings" on CNN a few years ago had
only pre-qualified questions.  That's when I stopped watching CNN.

Not to mention, they had gays in the military thousands of years before us.

Anyway, one thing I've noticed that these recent efforts to ban certain words from radio only blacklist curse words in English.  So I guess the Spanish stations are free to be as vulgar as they want?  I haven't listened closely, but I've never heard them bleep anything out.

But hey, I've heard uncensored curses (in English) and seen naked boobies on PBS TV.  So why can't radio be just as vulgar if it wants?

According to the History Channel they even encouraged it because it created a closer bond between soldiers. They didn't fear their weenies the way we do today. You might call it "Ask,Tell and pursue - each other."

```

Some of us believe that the creator (whatever form she takes) wouldn't create something nasty.

When I was at WGBH-TV (I know, Liberal, Commie TV) in the early 70's we did a beautiful nude ballet for TV called "Targets." I was the booth announcer for TV that night.. The green rooms were just across the hall. Imagine my delight/surprise when I walked in to be greeted by a hallway full of beautiful naked dancers, male and female.

I had the piviledge of watching it being taped in the studio and, later, the finshed product. We didn't block out the "nasty" body parts. They were concealed by the brilliant lighting of Chas Norton.

Since I had seen body parts before and consider them inspired designs, I found the produced version with Chas' lighting to be the most compelling. I only wish I had had a VCR. I would treasure that tape. It was profoundly inspiring.

Rich

The radio spectrum is a public resource, and the public doesn't want
vulgarity on its airwaves.

The fact that there are some listeners who do want it is irrelevant.

I am doing some spots for a firm but they want them on cd.
Have a limited budget so can I get a cheap cd recorder at Brandsmart and plug my mixer into it?
thanks

Are you suggesting that Conservatives never require pre-qualified
questions? I've been in this business a long time and have encountered
many, many Conservatives who required not only pre-qualified questions
but wouldn't do it live so they could see or hear the final product
before it aired.

Yours is a stupid generalization. It depends on the talent of the
individual and his or her comfort with the media.

Well, the UAW has been running a liberal talk radio network for a fair number of years.  It started with Chuck Harder's attempt at a network when he was living in the Telford Hotel down in Florida.   They apparently bailed him out when he was running out of money, and they ended up removing Chuck (probably a very good move on their part).. and substituted a lot of other talent.  They moved the operation to Detroit...

They never could get a large number of affiliates, and are shutting the operation down.  I forget the URL, but I stumbled over it a few weeks ago after the demise was announced.  All liberal talk, 24x7.  And very unsuccessful.

Franken -may- be able to do better...but the chances of getting a good station line up are about zilch.  It will be a nice money sink, just like the UAW attempt was.

Then explain to me why Howard Stern's in the top 5 among national
commercial radio programs--despite being on one-fifth as many stations
as Limbaugh (or fewer).

And why pictures of half-naked babes seem to have become a standard
feature on classic rock/active rock/modern rock station web sites,
most of them owned by the same conglomerates who also own--often in
the same markets--"lite rock less talk" stations with "morning shows
the whole family can listen to."

And (from your anti-Bush sig) when did the far left become so prudish
while some of the far right have started embracing taboo-breaking
behavior (like card-carrying Republican Mancow Muller)?

I will also avoid it as much as possible. The software is full of bugs and
installing it is a RealPain!
In one installation it caused multiple corruptions of the registry. It took a
number of tries before it finally took.
At another station they desire to have CoolEdit Pro as their default player on
the studio computers. RealOne always, on its own, modifies the file
associations so *it* is the default player. Does anyone have any solutions for
that one?

How do you know what "the public" wants? Vulgarity seems to work
pretty well on radio morning shows.

>The fact that there are some listeners who do want it is irrelevant.

Tell that to HBO and the other cable providers who are taking viewers
from broadcast TV because their content is more adult.

It's always foolish to claim to speak for "the public." You speak for
yourself and, maybe, a few friends you know well, but you have no idea
what I (a member of the public) will accept.

Rich

Yep - a lot concerning public airwaves too, but wonder what the % is of cable to
public today really is - guess your antenna is it correct?

yep - there are definitely gradations to this subject - tell you what - you do
your
100 mph thing in a school zone and I say fuck on radio. Are they equal offenses?

> >I have absolutely no sense of decency or no "vestige of moral compass" though I

Just wondering is anyone remembers Danny Shewster from Portland, ME's
FM101 and Z101. Any chance someone out there has recordings of his
shows??

Thanks.

uncamark41@hotmail.com (Mark Jeffries) writes:

>Then explain to me why Howard Stern's in the top 5 among national
>commercial radio programs--despite being on one-fifth as many stations
>as Limbaugh (or fewer).

The top rated station in most markets has perhaps a 10% audience share. If 10% listen, then 90% don't listen. Even the most popular show on radio only appeals to a small minority.

I don't care what stations put on their Web sites, but the public owns the radio spectrum and it's right and proper that the public, through its elected representatives, should prescribe how it shall be used.

## Table of contents:

Q01. What is "OTR"?
Q02. You haven't mentioned OTR music, why not?
Q03. Where can I buy recordings of old radio shows?
Q04. Which vendors have (lower prices) (higher quality) (faster response)?
Q05. Are OTR shows rebroadcast? If so, where and when?
Q06. I remember a great show called (x). When was it aired?
Q07. Are there any books about OTR?
Q08. Does anybody trade tapes of OTR shows?
Q09. What's this stuff about Copyright?
Q10. How can I get my local radio or TV station to broadcast OTR programming?
Q11. I have some old transcriptions and tapes, how can I make them

sound better?
Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are different. Why?
Q14. Is there anywhere I can get a complete listing of all the episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the plots or themes of OTR programs?
Q16. Is there a World Wide Web page (URL) I can access for more info?
Q17. Is there an email newsletter on OTR? How do I subscribe to it?
Q18. What ever happened to the person that played [insert character] on [insert name of show]?
Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?
Q22. What is the best radio / antenna to get distant OTR stations?
Q23. Is there a group for modern radio drama ("new-time radio")?
Q24. I have only email access to the Net. Can I still get the files at your site?
Q25. I have never heard "Old Time Radio". Can I get an audio sample via Internet?
Q26. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?
Q27. (deleted)
Q28. I am interested in re-creating some OTR drama. Where can I get scripts?
Q29. I can hear what sounds like another program playing in the background on many of my OTR tapes. Is this due to the tuning on the old radio or to the tape recorder that recorded the program?
Q30. Can I chat with other OTR fans on the internet?
Q31. (Deleted)
Q32. Is there an internet news group for old time radio?
Q33. OTR network shows were usually heard at\ the same local time, no matter what the time zone. How did they do this?
Q34. I'd like all the information there is about [insert name of OTR show]. Is there a FAQ that covers all the shows ever on the radio?
Q35. Is there any information on OTR conventions?
Q36. Are there any WWW Bulletin Boards where I can post OTR questions and read OTR information?
Q37. I would like to find recordings of [fill in rare OTR show name]. I have seen the show mentioned in Jay Hickerson's book, but haven't seen the show in any of the paper or on-line catalogs. How do I get this show?
Q38. I see a lot of OTR MP3s on the WWW. Are these worth collecting? How about the OTR CD-ROMs being offered on the WWW, are they worth the money?
Q39. Were any of the old-time radio personalities interviewed recently? Where can I find these interviews?
Q40. What MP3 player is best for OTR?
Q41. I keep reading/hearing about the LOC hoarding a bunch of unreleased OTR episodes. Is this true? How can I get them?
Q42. Where can I find OTR to download?
Q43. I bought some CDs with OTR MP3s. Some of the programs sound

pretty bad. Why is this, and how can I make them sound better? If I make an audio CD from the MP3s, will it be better?

---

Q01. What is "OTR"?

A01. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the very early 1960s. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures. Some individuals classify the resurgence of this type of radio programming in the '60s and '70s as "Revival Radio", and similar programming since the '70s as "Modern Radio Drama". Purists even discriminate between the "Golden Age" (late '30s and the decade of the '40s) and the "Silver Age" ('50s). In any case, there are plenty of programs of various types that are enjoyable entertainment. Best of all, they don't require a large screen TV to enjoy 'em -- the "visuals" are provided by the listener's imagination.

---

Q02. You haven't mentioned OTR music, why not?

A02. There was a good deal of big band, bluegrass, country and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. You will find much more discussion about this topic in alt.music.big-band or the various news groups specializing in music of various types. Bluegrass fans might enjoy the Old Time Music on the Radio WWW pages. (They happen to use the same acronym, "OTR", but are not affiliated with The Original Old-Time Radio (OTR) pages). In addition, there is a Big Band and Other OTR Music BBS at www.old-time.com/otrbbss.html

---

Q03. Where can I buy recordings of old radio shows?

A03. There are several individuals and companies willing to sell tapes and CDs of OTR programs. A partial list can be obtained from the www.old-time.com site. Many public libraries have a small stock for perusal as well. Some vendors and collectors even have their own WWW pages.

---

Q04. Which vendors have (lower prices) (higher quality) (faster response)?

A04. Prices, quality and service differ somewhat among all vendors. Check with other OTR fans to learn of their experiences, then check with potential vendors.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at the www.old-time.com site

---

Q05. Are OTR shows rebroadcast? If so, where and when?

A05. Yes, several AM and FM radio stations, satellite feeds, a shortwave station, and at least one Public Access TV station rebroadcast OTR. Check the Old-Time WWW page for current info. If you learn of other sources, leave a note!

For AM listening, try the National Radio Club's AM Radio Log, 17th Edition: Complete Listing of U.S. and Canada AM Radio Stations (Mannsville, N.Y.: NRC, 1997). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price is: $22.95 post paid]

For FM listening, try Bruce F. Elving's FM Atlas (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has maps of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx. $1.00 s/h]

The M Street Radio Directory, M Street at +1 615-251-1525 voice, or +1 615-251-8798 FAX. The address is M Street Corp., PO Box 23150 Nashville, TN 37202 The price for the 8th edition is $65.00 plus S&H

---

Q06. I remember a great show called (x). When was it aired?

A06. If the show was heard nationwide, look through the program databases / logs at the Old-Time site or at Jerry Haendiges' site (see answer A14 below). If the show was only on local radio, you will have more difficulty in finding an answer. Checking with your local radio stations is probably the best bet.

---

Q07. Are there any books about OTR?

A07. Yes, there are many books related to OTR. See the www.old-time.com site for a bibliography of several hundred books. There is also a page where you can read or enter critiques or reviews of various books on OTR.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt. 119
Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

There are also several "book finding" services that will help obtain old/out of print books for a fee.

---

Q08. Does anybody trade tapes of OTR shows?

A08. Yes. Check with the various on-line OTR services. Leave a note in the OTR Digest, alt.radio.oldtime, or Ray Plumlee's OTR Traders BBS at http://otr-trader.com/ Remember to observe copyright laws!

---

Q09. What's this stuff about Copyright?

A9. The copyrights on some OTR shows have expired. Several copyrights have been renewed, and some may have fallen under "common law" copyright (even though they were not originally copyrighted). 1970s era Berne Convention agreements further cloud the issue for non-lawyers. See the Old-Time WWW site for the latest "common sense" and legal citations.

A concise answer was given by 'A. Joseph Ross' (lawyer@world.std.com) (used with his permission):

> Just to get a little perspective in this controversy, copyrights do expire. Under the old copyright law, a copyright was good for 28 years from the date of first publication, renewable for another 28 years, for a total of 56. Under the 1976 act, those copyrights were extended to 75 years, provided they were renewed. Copyrights under the new law, which took effect on 1 January 1978, are good for the life of the author plus 50 years. Copyrights on anonymous works, works made for hire, etc. are good for 75 years after first publication.
>
> So, since otr has just barely been around for 75 years, little or none of it is in the public domain yet by reason of having been around for a long time. The question of what constitutes publication, and the fact that sound recordings could not be independently copyrighted until the new law took effect add additional complications.

---

Q10. How can I get my local radio or TV station to broadcast OTR programming?

A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase the number of listeners and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us:

> The days of radio being ruled by the artisans is over, and for some time now it has been in the hands of people who only look at the bottom line, so to reach them you must talk through public radio pledges, or through sponsors on commercial stations.

Don Fisher (dfisher@sover.net) has been successful in getting his local Public Access TV station to rebroadcast OTR. In fact, Don is the MC of the program. Contact him for hints on how to get your Public Access TV station to do something similar.

Elizabeth McLeod (lizmcl@midcoast.com), who has spent more than 15 years working in local radio, gave the following advice:

> I can tell you that one phone call from a listener means absolutely nothing to a program director. PD's are totally under the thumbs of their General Managers -- and GMs, in turn, base their decisions EXCLUSIVELY on sales issues. It doesn't matter how many people want to hear something -- if the GM doesn't think he can sell it, if the GM doesn't think it'll bring hard cash into the station, it won't get on the air. Period.
>
> The only reason a commercial station exists is to make money for its owners. ALL decisions at the station, be they about programming or anything else, are made with this in mind.
>
> Don't bother to approach the station itself, APPROACH THE STATION'S ADVERTISERS!!!
>
> Listen to the station and figure out who its biggest sponsors are. Generally, they'll be local banks, car dealers, insurance agencies, and appliance retailers. Do you know anyone connected with these advertisers? Then approach these people. Tell them you've heard their ads on such and such a station, and that you think a lot of people would be interested in hearing OTR, and that advertising on an OTR series might be a good strategy. And get your friends to do the same. And be persistent! In other words, SELL THEM ON THE IDEA!
>
> You need to keep in mind that some types of stations are more likely to air OTR than others. If your

> local station is has a firmly-defined format, you are probably "S-O-L," as the saying goes. They won't break format, no matter what. On the other hand, if you have a local non-commercial community-type station, way up on the left side of the FM dial, you may have a very good chance of success.

---

Q11. I have some old transcriptions and tapes, how can I make them sound better?

A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

There are several computer programs available to convert analog sounds (as on a tape) to a digital format (e.g. WAV file). Some of these computer programs also have noise reduction, filtering and enhancement capabilities. In many cases, application of digital technology will improve the sound of a noisy or deteriorating analog tape. There is a problem, however, if the digitized rendition is re-recorded to tape, and subsequently re-digitized for further treatment. Since digitization is a sampling technique, sampling a sample can result in extremely degraded sound patterns.

A very nice program that will convert analog material to digital format is Audiotools by Andrew Fish. For more information on this software, visit the Audiotools BBS at www.old-time.com/otrbbss.html or Andrew's site at http://www.unrelatedinventions.com/Audiotools/

From: hhoward@mindspring.com (Henry Howard)

> For cassette machines (and reel to reels for that matter) occasionally take a "Y" cord and connect the output of your cassette player to both "sides" of the "Y". Plug the combined side of the "Y" into your stereo.  If the sound is mush(ier) than what you hear normally, you have a head alignment problem (assuming that the tape you are listening to was properly aligned.)

From: Ron_B._Hare@livewire.com (Ron B. Hare)

> Dolby HX on the recording deck makes an audible difference. Other audio optimization features are of negligible value for OTR. Dolby HX also requires no playback decoder.

[Dolby HX uses or "preserves" the Dolby noise reduction method of the master tape when duplicating - ed.]

---

Q12. Are there any OTR clubs near me?

A12. Check the club listings in the Old-Time WWW page, and leave a note in one of the on-line OTR groups asking about local clubs for your area. If you find a club that is not listed at www.old-time.com, ask a club officer to send a note to the webmaster with particulars about the club.

---

Q13. I have some OTR tapes of the same program, but their dates are different. Why?

A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes on different programs! For instance, a few Suspense shows were re-scripted / re-cast for Escape. You might also find similarities between certain SF shows as done on X Minus 1 and Dimension X.

---

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program series?

A14. Some on-line OTR collectors have contributed Program Logs for several well-known series. The logs are available at www.old-time.com/otrlogs/ . While you are logged in at that site, check the "Humongous OTR Database" (a database of contributed catalogs and libraries), which is searchable with your WWW browser.

The "logs and publications" entry at the Old-Time WWW site gives names and addresses of several vendors of these items (thanks to RadioJoe5@aol.com (Joe Coleman) and others).

Jerry Haendiges maintains a VERY complete set of OTR program logs, at his Vintage Radio Place: (http://www.otrsite.com/radiolog )

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of The Ultimate History of Network Radio Programming and Guide to All Circulating Shows. You can see more info at http://www.old-time.com/sponsors/hickerson.html

Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

---

Q15. Is there any place where I can get a written synopsis of the plots or themes of OTR programs?

A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of OTR plots or themes, send them to the on-line OTR services or to webmaster@old-time.com for inclusion in one of the databases.

Jim Widner and others have contributed some synopses / introductions to various programs. They are on file at http://www.otr.com and http://www.old-time.com.

Also check Frank Passage's logs at the old-time WWW site; most contain a short synopsis of the program.

Many of Jerry Haendiges' logs contain excellent summaries of not only the program series, but of each episode as well.

Many of the local and national OTR clubs maintain informational libraries with this material.

---

Q16. Is there a World Wide Web page (URL) that I can access for more information?

A16. Yes, there are several WWW sites. Each site contains different information, so you might want to visit them all. The major OTR WWW sites all have links or pointers to each other, so you can explore many topical areas within old time radio. Good places to start exploring are:
www.old-time.com
or www.otr.com
or www.otrsite.com

An excellent database of OTR-related WWW sites, with an explanation of the contents of each is at
www.otr.com/cgi-bin/cgiwrap/otr/db.cgi?uid=default

---

Q17. Is there an email newsletter on OTR? How do I subscribe to it?

A17. Several newsletters currently exist. Here his how to get the best:

The Old-Time Radio Digest (AKA "Internet OTR Digest") is a very popular and freely available electronic newsletter, delivered nightly. Its purpose is to foster general discussions about the hobby of collecting, preserving and listening to OTR. To subscribe, send an email

TO: old.time.radio-request@oldradio.net

SUBJECT: subscribe
(The body of the message is ignored)

---

Q18. What ever happened to the person that played [insert character] on [insert name of show]?

A18. Check the "Personality Pages" at www.old-time.com for home pages of several well-known OTR personalities. Also check the Where Are They Now pages at www.440int.com.

---

Q19. What is the best way to archive OTR programs?

A19. The most popular way seemed to be reel-reel tapes, using each of the four tracks to record monophonically. Modern reel machines are in the > $2,000 range, and used open reel machines are becoming harder to find.

Purists claim open reel tapes are best stored "tails out", in which the tape is played (not fast-forwarded) onto the take-up reel. This method of storage makes "print through" of the magnetic sound image a little less noticeable because the "echo" will come before the louder sound that caused it, and be somewhat masked by the louder sound.

Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. These problems include "overwinding" and splitting of the tape at the leader. Because of their thinner track width and slower speed (1 7/8 IPS), the density of the information is greater than with wider and faster (3 3/4 IPS or 7 1/2 IPS) reel tapes. This leads to a greater loss of signal (particularly high frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction. "Hi-Fi" decks need no video signal to synch the systems, and can thus record audio without an accompanying video signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time. There is very little fidelity loss when using this medium to duplicate programs.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

> You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the Harris/Allied number has changed to: 1-800-300-0733.)

From: andy@vintagebroadcasts.com (Andy Blatt)

> I wholeheartedly recommend Play It Again, Sam of Lakewood, Ohio. They also sell used Pioneer reel decks with a warranty and accept major credit cards for repair or used machines. The address is 12611 Madison Avenue in Lakewood, Ohio 44107. The phone number (no answering machine, no fax machine) is 216-228-7330. As far as pitch control cassette decks, Marantz offers several one of which is the three-head portable PMD-430.

[Play It Again Sam has a WWW page at www.playitagainsam.com - ed]

Richard Novak (rnovak@ix.netcom.com) wrote this informative note on using Hi-Fi VHS as an archival medium:

> To clear up any misunderstandings concerning VHS HiFi machines and their ability to record audio, I offer the following..
>
> It should be understood that what distinguishes a HiFi machine from a linear machine is that the audio track is recorded helically (diagonally) on the tape along with the video track. On linear machines the audio is recorded at the upper edge of the tape (and a control track at the lower edge, if anyone wonders what the extra head is for.)
>
> On a HiFi VHS the audio is not recorded as an analog signal as would be the case with linear recording. Instead the analog audio signal frequency-modulates a carrier which is then recorded between the video tracks. A duplicate signal is also recorded linearly to maintain compatibility with linear VCRs. The FM signal recorded on the HiFi track should not be confused with FM radio broadcasts. One of my customers thought the FM switch on his HiFi was for recording FM from the radio. Today's machines no longer use the label "FM", instead use "HiFi". Less confusing.
>
> The sound recorded from FM radio broadcasts (or any other source) onto HiFi VCRs is virtually indistinguishable from the source. The material can be dubbed to cassette with no generation loss.
>
> There is no difference in audio quality using either six hour or two hour mode.
>
> It is true that at slower speeds the diagonal tracks are closer together. This does degrade the video signal as anyone knows who has compared six hour video with two hour video. But does not degrade the FM carrier with the audio track.

> The tape writing speed of the audio track in HiFi mode is the same regardless of linear speed. This is because the head speed remains constant and is independent of the linear tape speed.
>
> Worked it out once and it is around seven meters per second. Whatever it is, it's a whole bunch faster than 7 1/2 inches per second. If anyone really wants to know the writing speed, it is the circumference of the upper cylinder (or video head) multiplied by the rotational speed which is 30 revolutions per second, or 1800 revolutions per minute. (Two heads 180 degrees apart at thirty rps results in 60 frames per second.)
>
> Who cares how it works.. The point is that VHS HiFi is the best and cheapest medium around for recording masters. But not for archiving. Most experts still agree that reel to reel is the best and most reliable method of archiving. (Sticky shed syndrome from the 70s notwithstanding.)

Although Bob Burnham does not like dubbing (two-well) cassette decks for producing highest-quality cassette tapes, he does have a few recommendations:

> One of the BEST dubbing decks (if you must use one) is made by Denon. Both sides can record at the same time and both sides have pitch control, and both sides have separate output jacks for connecting to other equipment.... almost like TWO (click) TWO (click) TWO DECKS in one. Tascam (Teac's pro division) also recently introduced their model 303 double deck. If it's anything like the 202 MKII, it's probably not worth it. You pay a high price for the name, but still basically consumer grade inside and lots of plastic. Denon is better.
>
> I mentioned Kingdom Tapes in Mansfield, PA as a good source for cassette copiers, and equipment servicing. All the duplicators I have in use today came from this company. They have all the major brands (plus their own house brand), also tape decks, blank cassettes, etc. Great service (same day usually available). They'll beat anyone's price on cassette dubbers. 800-788-1122. Fax is 717-662-3875.
>
> Bob Burnham / BRC Productions / P.O. Box 2645 / Livonia, MI 48151 platecap@gatecom.com / platecap@eworld.com

Several hobbyists are now investigating the utility of using CD-ROM or MiniDisks for archival purposes. CD-ROMs can hold hundreds of hours of program material, but at the cost of time-consuming conversion from analog to digital representations. Selection of appropriate encoding and compression technologies is extremely important to prevent digital artifacts. MP3 (MPEG III) compression seems to be more favored than is RealAudio(R) compression.

---

Q20. My old reels squeak. Why does this happen, and can I fix it?

A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

> If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request to: Fred Korb, c/o Oldtime Radio Collectors and Traders Society, 725 Cardigan Court, Naperville, Illinois 60565-1202. I am willing to help you preserve the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a lubricating film can be automatically applied to the tape as it is played. I tried it. Although temporary, it does indeed work! I'd recommend it for those squeaky tapes that you wish to re-record onto newer reels.]

---

Richard Fish (lodeston@bluemarble.net) also left this helpful info about an alternative method:

> HYRDROLYZATION is the culprit. The tape material -- the backing, or the binder compound used to stick the magnetic particles to the plastic backing -- has absorbed water from the air. The water molecules actually make the tape expand a bit, so it doesn't fit the machined tape-guides properly anymore; and they can interfere with the lubrication impregnated into the tape; and it is theorized they can even interfere with the polished smoothness of the tape surface.
>
> WHY SOME TAPES AND NOT OTHERS? It depends on the formulation of the plastic backing and binder. In the mid-70s, both 3M (Scotch) and Ampex, the two major tape manufacturers, started experimenting with their formulas. They thought they were introducing major improvements, but instead created a tape much more prone to hydrolization than anything had ever been. The problem did not show up for years, and the formulas did not get corrected until sometime in the mid-'80s. Theoretically any tape could get hydrolyzed over a long period of time, especially if stored in a high-humidity situation, but in

practice most squeaky tapes were made (roughly speaking) between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and entreprenurially successful producer of radio drama in the US today) gave me his formula and I've done it many times now and it works:

Bake the tapes in a convection oven for 8 hours at 130 degrees Fahrenheit. It is entirely possible to bake a tape twice if the first time doesn't do the trick. You get about a three-week "window", sez Tom, before the tape starts to re-absorb water. So the best deal is to bake the tape and immediately make a copy. But if you forget to do it and it re-hydrolyzes, you can bake it again.

---

Q21. Where can I find more information about antique radios?

A21. An excellent place for discussions about antique radios, phonographs and accessories is the rec.antiques.radio+phono news group, created by Bill Robie. A pointer to his FAQ may also be found at http://www.old-time.com. Basically, r.a.r+p

- Is a *discussion* group, rather than a sales group (see r.a.m) -
Focuses on radios, phonos, and related materials made before the 60s
- Avoids "ham" radio gear (the Boat Anchors group covers that) - Has
a -very- comprehensive FAQ that new folks should read

The University of Maryland has a WWW site entitled "Broadcast Pioneers' Library". This is an excellent resource for the serious / professional researcher. It can be accessed through the old-time WWW site, or directly via the URL: http://www.lib.umd.edu/UMCP/LAB/

Additional sites with pictures of old radios or other hardware resources may also be found at http://www.old-time.com

---

Q22. What is the best radio / antenna to get distant OTR stations?

A22. Several readers have been acclaiming the GE SuperRadio III as an excellent choice for picking up distant AM stations that carry OTR programming. Although the tuning dial has notoriously poor calibration, the sensitivity and selectivity seem superior to other radios.

Some readers have had good success with the Select-A-Tenna antenna advertised in several magazines, and the Grove Catalog. The S-A-T seems to be rather directional, and may eliminate off-axis interference.

Ham Radio magazines sometimes carry information about small loop antennas for AM DX-ing. Some pointers to instructions on how to build them are at http://www.old-time.com. Also, Dan Hughes (dan@soltec.net) left this note:

> Several years ago one of the electronic magazines ran plans with dimensions and number of turns, etc to build one of these antennas. I have built several and I'm no mechanic. If you (or anyone else reading this) would like a copy of the article and plans, visit my website at http://members.soltec.net/~dan

---

If you are interested in AM Broadcast Band reception, and technical articles related thereto, send a SASE to the following address for their product catalog:

National Radio Club
Publications Center
PO Box 164
Mannsville, NY 13667-0164

(The National Radio Club also has a WWW page, at www.nrcdxas.org/)

---

Q23. Is there a group for modern radio drama ("new-time radio")?

A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you.

Here is a list of some of the WWW sites for modern audio drama:

Jim French Productions (Imagination Theatre):
http://jimfrenchproductions.com/
Atlanta Radio Theatre Company:
http://www.artc.org
ZBS Media:
http://www.zbs.org/zbs.html
LodesTone Productions:
http://www.bluemarble.net/lodeston/lode.html
Midwest Radio Theatre Workshop:
http://www.mrtw.org/mrtw

---

Q24. I have only email access to the Net. Can I still get the files at your site?

A24. Maybe. WWW pages can be retrieved by email. Get the following file for more information:

Accessing The Internet By E-Mail
Doctor Bob's Guide to Offline Internet Access

This document is now available from several automated mail servers.

To get the latest edition, send e-mail to one of the addresses below.

```
    To: mail-server@rtfm.mit.edu (for US, Canada & South America)
    Enter only this line in the BODY of the note:
    send usenet/news.answers/internet-services/access-via-email

    To: mailbase@mailbase.ac.uk (for Europe, Asia, etc.)
    Enter only this line in the BODY of the note:
    send lis-iis e-access-inet.txt
```

Since the OTR FAQ is an "official" FAQ, a copy of it is stored at MIT, and is available from the MIT mailserver. For more info on how to get files by email from MIT, send a message

```
     TO: mail-server@rtfm.mit.edu
     SUBJECT: [blank]
     BODY:
          help
          end
```

---

Q25. I have never heard "Old Time Radio". Can I get an audio sample via Internet?

A25. Yes, if you have a suitable WWW browser and sound card. Connect to any of the WWW sites mentioned above, and follow the pointers to their audio clips and / or soundbytes. Many of the soundbytes can be downloaded, and played on your computer's sound card, others will play "realtime" through your multimedia system. There is also a news group, alt.binaries.sounds.radio.oldtime, that tries to transfer OTR shows (news groups are notoriously inefficient at transferring large binary files, however).

You can select from many moderate-length soundbytes at Jerry Haendiges' Preview Listening Lounge at www.otrsite.com/ra/preview.html

---

Q26. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?

A26. Collectors with lots of cassettes seem to use just about everything from "underbed cardboard storage boxes" to old soft drink cases. If you want your collection to have a more "professional" look, here is a note from Ron_B._Hare@livewire.com (Ron B. Hare)

> You almost need to buy cassette albums from specialty suppliers. Radio Shack used to carry a small line of these and charged too much. We are in the recording studio business, and receive catalogs from several sources. The one I like best has

> some of the lowest prices and unhesitatingly deals with individuals and will take your credit card number over the phone for instant shipment (in contrast to some who require account setup, purchase orders, prepayment, cash and other nuisances).
>
> They have two catalogs: one for audio and one for video. Cassette albums are available in a large number of different styles, sizes and capacities. The 8-cassette albums I use are CPCN.4+4M/WHT in white and CPCN.4+4M/RBLU in royal blue. Outside dimensions are 9 7/8 x 7 x 1 1/4 wide, so they fit well on a bookshelf. This model also seems to cost less per cassette than any of the other models, though logic might lead you to the conclusion that the larger capacity ones would cost less.

[Polyline has a website at www.polylinecorp.com, and their new address and phone number are:

Polyline Corporation
1401 Estes Ave.
Elk Grove Village, IL 60007]

---

(Q27. deleted)

---

Q28. I am interested in re-creating some OTR drama. Where can I get scripts?

A28. Check your local or national OTR clubs. Many have a "print library" that includes scripts. You can also point your browser at the University of Maryland's script page, at www.lib.umd.edu/UMCP/LAB/scripts.html

Jack French (OTRpiano@erols.com) said:

> One excellent source is the book. "One Hundred Non-Royalty Radio Plays" compiled by William Kozlenko, Greenberg Publ of NYC 1941. It's certainly out of print now, but many libraries would have a copy. I bought mine at a used book store a few years ago. The 100 radio plays in the book include adventure, mystery, fantasy, comedy and historical. Most were originally produced on educational stations in the 30s.  Authors include Saroyan, Julian, and Liss.

Larry Groebe, of the Generic Radio Workshop, has several pages dedicated to on-line OTR scripts at http://www.genericradio.com

---

Q29. I can hear what sounds like another program playing in the background on many of my OTR tapes. Is this due to the tuning on the old radio or to the tape recorder that recorded the program?

A29. In addition to the old radio being mistuned, similar problems can be caused by one or more of the tape recorders used before you received your copy of the program. Print-through has already been mentioned in Q & A 19. Bob Burnham has a nice explanation of two more problems: crosstalk and channel leakage.

> Crosstalk and Channel Leakage are 2 different things. OTR collectors seem to have the most problem with channel leakage.
>
> When you hear another program faintly playing in the background in normal direction, this is usually Channel Leakage. This is a leftover problem from the 1970s & early '80s when most collectors traded on open reel tapes which were quarter-track mono -- there were different (separate) programs on left & right channels. This allowed 6 hours of shows to be placed on one reel. Unfortunately, many collectors would duplicate L & R shows simultaneously. Depending on the quality of the equipment (and its condition) it was common for one program to bleed into the opposite channel...especially if the collector was careless and allowed over-modulation.
>
> Crosstalk results when a tape is recorded (or played back) on a machine with mis-aligned tape heads. It can also occur when trying to record over a 1/2 track recording with a 1/4 track machine with dirty or mis-aligned erase head. You usually will hear another program playing IN REVERSE in the background.
>
> HOW TO PREVENT CHANNEL LEAKAGE AND CROSSTALK...
>
> If duplicating quarter track reels, copy ONE channel or track at a time. As for crosstalk, make certain your machines are kept in proper alignment. Use a high quality BULK ERASER if you re-use old tapes... this is especially true for those who use reels.
>
> Sorry, there is NOTHING you can do to remove these flaws once they are there.

---

Q30. Can I chat with other OTR fans on the internet?

A30. Yes. Lois Culver (lois@chatlink.com) and other OTR fans meet every Thursday at 8:00 PM Eastern time, on Channel #OldRadio, on the StarLink-IRC. If you are unfamiliar with Internet Relay Chat, please get software and instructions from your favorite Internet Service Provider or shareware/freeware software site, or connect to www.old-time.com/irc.html for basic instructions.

---

(Q31. Deleted)
-----------------------------------------------------------------------

Q32. Is there an internet news group for old time radio?

A32. Yes. alt.radio.oldtime is available via some news servers. Since many news servers ignore alt.groups, you may need to contact your ISP to get that news group listed locally. See www.old-time.com/newsgroups.html for more information. Also try www.groups.google.com to sample some of the messages.
-----------------------------------------------------------------------

Q33. OTR network shows were usually heard at the same local time, no matter what the time zone. How did they do this?

A33. Two ways: Many networks used telephone lines to carry the show from the studio to transmitter sites. The show was done live at least twice - once for the East coast, once for the West. After Bing Crosby spearheaded the introduction of recorded shows (about 1948), the East coast show was recorded for later telephone transmission to the West coast.
-----------------------------------------------------------------------

Q34. I'd like all the information there is about [insert name of OTR show]. Is there a FAQ that covers all the shows ever on the radio?

A34. No. There are many books (Remember them? They have words printed on pieces of processed dead tree) written about what we now call "OTR". See answers A7 and A37. If you would like to contribute an original article about one or more facets of OTR, many of the webmasters of on-line OTR sites would be happy to consider archiving it.
-----------------------------------------------------------------------

Q35. Is there any information on OTR conventions?

A35. Yes. There are several. Here are some of the larger ones:
  * Annual OTR and Nostalgia Convention in Cincinnati, OH (April)
  * Radio Classics Live, Brockton MA (May)
  * Annual Lum and Abner Society Convention (June)
  * REPS Radio Showcase (June)
  * Friends of Old-Time Radio (October)
  * SPERDVAC (November)

See the convention page at www.old-time.com for specific dates and contact person info.
-----------------------------------------------------------------------

Q36. Are there any WWW Bulletin Boards where I can post OTR questions and read OTR information?

A36. Yes. Try Old Time Radio Bulletin Boards at www.old-time.com/otrbbss.html. That page contains a list of several old-time radio oriented WWW bulletin boards. You can also access OTR message boards at http://www.lofcom.com/nostalgia/phorums/

---

Q37. I would like to find recordings of [fill in rare OTR show name]. I have seen the show mentioned in Jay Hickerson's book, but haven't seen the show in any of the paper or on-line catalogs. How do I get this show?

A37. Jack French, an expert on old-time radio and editor of Radio Recall, gives us this information:

> There's good news and bad news....the good news is if Jay's compendium says they are in circulation, somebody has them. The bad news is there is no guarantee you'll find them. Let's start at the beginning. If they're in Jay's book, and there is either the initials of a dealer, log preparer, or collector with that entry, the assumption is that person has some or maybe most. If the entry is devoid of such, we push on. Few dealers list rare shows in catalogs since so few people want to buy them. Generally the catalog represents a small part of a dealer's or collector's total holdings. There are at least forty OTR dealers in the country so you can contact each one with a specific inquiry. Most collectors belong to at least one OTR club. There are about 20 clubs. Most will publish your request in their newsletter for little or no cost. Most of the members of OTR clubs are not on-line so this is the only way to reach them. There are over 25 state and college archives that may have the shows. Most have no catalog but will answer any reasonable inquiry. Contact them all. All of the contact addresses for OTR clubs, pubs, dealers, and archives are contained in NARA OTR Source List. Contact me separately if you're interested in this low-cost research aid.

---

Q38. I see a lot of OTR MP3s on the WWW. Are these worth collecting? How about the OTR CD-ROMs being offered on the WWW, are they worth the money?

A38. Just as with home made recordings of any type, the quality of OTR MP3s varies considerably. Some of the online MP3s may have been converted from low sample rate RealAudio(tm) files, others might have been "ripped" from low-generation masters. Most CD-ROMs for sale on the WWW were recorded using these varying-quality MP3s. In other words, the MP3s in themselves are "collectable" only for the enjoyment one might get from listening or further trading. They have little intrinsic value, and are of unknown quality. It might help to associate your estimate of quality with the provider's name, to attempt to predict quality and avoid long downloads of poorly prepared material.

Another point to remember - some OTR is still under copyright protection. Please observe applicable copyright laws.

----------------------------------------------------------------------

Q39. Were any of the old-time radio personalities interviewed recently? Where can I find these interviews?

A39. A large number of OTR personalities were interviewed by the author John Dunning. Stewart Wright, Editor of the RHAC Newsletter gave us the following information. (You can learn more about RHAC by checking their page at http://www.old-time.com/sponsors/rhac.html)

> The Radio Historical Association of Colorado (RHAC) has tapes of many OTR personalities interviews that were conducted by John Dunning in the 1980's. Several Radio personalities such as Elliot Lewis were interviewed more than once. The following is a fairly complete list of the Dunning interviews in the RHAC library.
>
> Steve Allen, Elvia Allman, Eve Arden, Hy Averback, Parley Baer, Parley Baer and Georgia Ellis, Parley Baer and Sam Edwards, Parley Baer and Whitfield Conner, Bill Baldwin, George Balzer, Harry Bartell, Andre Baruch and Bea Wain, Court Benson & Grace Matthews, Bernice Berwin, Mel Blanc, Ray Bradbury, Curley Bradley, Frank Bresee, Candy Candido, Hal Cantor, Charles Collingwood, Whitfield Conner & Haila Stodd, Whitfield Conner and Parley Baer, Whitfield Conner and Virginia Greeg, Norman Corwin, Mary Jane Croft, D Day Program J Macvane & Lar, Dennis Day, Rosemary De Camp, John Dehner, Kenny Delmar, Jerry Devine, Howard Duff and Dick Joy, Richard Durham, Ruth Duskin Feldman, Sam Edwards, Sam Edwards and Janet Waldo, Alice Faye, George Fenneman, Morton Fine, Al Flanagan and Dick Mcdaniel, Paul Frees, Fred Friendly, Alice Frost, Art Gilmore, Roberta Goodwin (Bob Bailey's Daughter), Gale Gordon, Virginia Gregg, Virginia Gregg and Whitfield Conner, Phil Harris, Clarence Hartzell, Dennis Horseford, John Houseman, Bill Idelson, Raymond Johnson, Jack Johnstone, Jim Jordan, Dick Joy, Roland Kibbee, Sheldon Leonard, Phil Leslie, Larry Lesueur, Elliot Lewis, John Macvane, Fletcher Markle, Fletcher Markle, Grace Matthews & Court Benson, Dick McDaniel and Al Flanagan, Dick McDaniels and Pete Smythe, Marvin Miller, Shirley Mitchell, Carlton E Morris, Morris Kaplan, Frank Nelson, E Jack Neuman, Nelson Olmstead, Vic Perrin, Michael Raffetto, William N Robson, Eric Sevareid, Anne Seymour, William L. Shirer, Penny Singleton, Pete Smythe Collegiate Band, Olan Soule, Berne Surrey, Glenhall Taylor, Irene Tedrow, Cliff Thorsness, Les Tremayne, Lurene Tuttle, Veola Vonn, Janet Waldo, Gertrude Warner, Peggy Webber, Anne Whitfield, and Dr. Paul Winchell.

The Radio Enthusiasts of Puget Sound (REPS) also has interview tapes of many Old-Time Radio personalities. Most of these interviews have been conducted in the 1990's. Personalities include:

> John Archer, Harry Bartell, Frank Buxton, Chris Conrad (Son of William Conrad), William Conrad, William Conrad & George Walsh, Stewart Conway, Norman Corwin, Sam Edwards, Herb Ellis, Charlie Flynn, Jim French, Sandra Gould, Burl Ives, Peggy Jordan (Granddaughter of Jim & Marian Jordan), Merrill Mael, Jo Anna March, Les Tremayne, Janet Waldo, Anne Whitfield Phillips, Rhoda Williams, and Douglas Young.

The REPS web site is located at:
http://www.homestead.com/repsonline/index.html

Yesterday USA on the Internet is doing a series of live interviews with OTR personalities about one every two weeks. They start at approximately 8 PM (ET) on alternate Sundays and are about 1 hour in length. The interviews are conducted by John or Larry Gassman. So far they have done Harry Bartell, Herb Ellis, and Conrad Binyon. Listeners can call in questions.

You can find out more information on upcoming interviews by going to the YUSA Home page at http://www.yesterdayusa.com/

---

Q40. What MP3 player is best for OTR?

A40. MP3s can be played on most computers, memory (RAM)-based players, hard-drive players, and CD-ROM based players. Each player has advantages and disadvantages. A chart comparing various CD-ROM players for OTR playback suitability is at www.old-time.com

---

Q41. I keep reading/hearing about the LOC hoarding a bunch of unreleased OTR episodes. Is this true? How can I get them?

A41. The Library of Congress (LOC) does indeed store copies of many old-time radio shows. Any qualified person can access this material, or even get copies. There are, however, some restrictions on its use. Elizabeth McLeod (lizmcl@midcoast.com), who has done much research in the area, gives us this information:

> LOC material may be listened to at no charge at the Library's Recorded Sound Reference Center by "qualified researchers" working on a project intended for public distribution -- from a full length book to an article for your local OTR newsletter. You cannot, however, make copies of the material due to the contractural and copyright restrictions which the Library is required by law to observe. (While the LOC preserves and houses the material, it doesn't own it.)
>
> It is possible, though, to obtain copies of the material from the LOC by going thru a process which is neither fast nor inexpensive. But if you have the patience and are willing to spend the money for material you can't get any other way, here is what you do:

1. Locate the specific item in the LOC's SONIC database, accessible from the Recorded Sound Reference Center Homepage, http://lcweb.loc.gov/rr/record/

2. Make note of the LOC Call Number and description of the item you need.

3. Phone, fax, or email the Recorded Sound Reference Center with the items you are requesting -- contact information is available on site. The Reference Librarian who handles these things is Brian Cornell.

4. The Library staff will determine what legal permissions will be required in order to copy the items you want, and will contact you with the names and addresses of the people who must be approached in order to get these clearances. If the item is from the NBC Collection, you will need to clear rights with their Intellectual Property Department in New York. Additional clearances may be required if the program is under a separate copyright.

5. You must write to the people specified and ask permission to have a copy made. It's a good idea to specify why you need the copy -- and don't just say "because Joe Blow is my favorite radio comedian." If you don't have a professional-sounding reason, make one up.

6. Wait to hear back from the Legal Entities. If you've written to NBC Intellectual Property, you will get a letter back from them in about four weeks. Two copies of a legal contract will be enclosed, specifying what you may and may not do with the recording. Sign both copies, and send one of them back to NBC.

7. NBC will advise the LOC that it has granted permission, and in about three weeks you will get back a requisition form from the Library's Phonoduplication Lab. You'll need to check it over, sign where specified, and send one copy back to them with your check for the lab fee -- which starts at $86 per hour, not including the cost of tape stock. Then, fax the other copy of the form, and a photocopy of your check to the lab, and they'll begin processing your duplication request. (Yes, the fee is outrageous -- but there are worse places to spend your money than with the entity which has done more for the physical preservation of broadcasting history than any other organization in the United States....)

8. In about four weeks, FedEx will deliver your tape. Needless to say, you may not make any commercial use of the recording in whole or in part -- and you had to sign a contract to that effect in order to get access to it. Commercial permissions are a whole separate case.

> Like I said, this is not for everyone -- but if you're working on a serious project, it can be a valuable resource for getting access to material that simply isn't available anywhere else and which is unlikely ever to be released on the commercial market.
>
> Elizabeth

---

Q42. Where can I find OTR to download?

A42. The number and location of FTP sites that provide OTR changes more rapidly than does this FAQ. Your best bet is to check the backissues of the various alt.binaries.sound(s).radio.oldtime groups on USENET.

Hint: point your browser to www.groups.google.com and try your search from there

---

Q43. I bought some CDs with OTR MP3s. Some of the programs sound pretty bad. Why is this, and how can I make them sound better? If I make an audio CD from the MP3s, will it be better?

A43. Wow. The answer to that question could fill a whole FAQ by itself. I'll try to keep it short.

Poor-sounding audio can be due to several causes. The audio on the tape from which the MP3 was made could have been poor, or the person that converted the analog audio to digital audio could have done a bad job. The statement: "remastered to digital audio" doesn't mean much, if the person doing the remastering does not pay attention to enhancing the source material.

MP3 and other digital compression techniques are lossy. That means the encoding process throws away data in order to make the file smaller. Although digital copies may not have noticeable loss, re-encoding, or encoding in a different digital format will lose even more data. Example: If somebody took a 32/22 MP3 and encoded it as a 64/44, it would sound no better than the 32/22, since data was lost in the original encode. Similarly, making a 128/44 MP3 out of an old, high-compression RealAudio(R) file would not improve the sound. The advantage to the higher bitrate is the possibility that the new encode will play in a larger number of MP3 players.

Some people record their RAs or MP3s onto cassette, and then trade the cassettes. At some time in the future, somebody else might try making an MP3 from the cassette. This analog - digital - analog - digital conversion results in a very quick deterioration of the sound because of the lossy compression I mentioned before. The new encode is a "sample of a sample". The sound deteriorates much more rapidly than does the "generation loss" experienced when duplicating tapes.

How can one tell if an MP3 was originally made with a high bitrate, or merely upsampled to a high bitrate? Listen to it, and compare it with a low bitrate sample. After all, the objective is to get as good an audio rendition as possible.

On a purely non-ideological level, re: the new "liberal talk venture"...

Their biggest problems will be signal-related. All the decent AM signals in most markets are gone, and many of them are running the right-leaning talk the new venture will be going up against.

If their Chicago affiliate is any indication...well, WNTD/950's signal isn't exactly a Windy City powerhouse. It's 1000 watts day, non-directional, and 5000 watts night, directional. Here's a look at it, via the "for entertainment only" pattern at radio-locator.com:

Daytime:
http://www.radio-locator.com/cgi-bin/pat?call=WNTD&service=AM&status=L&hours=D

Looks good on a map, until you realize that A) basically anything outside the inner "red" ring will give static, and B) ANY AM signal in a major metro area like Chicago is subject to static, especially if it's not a 50KW powerhouse.

The daytime pattern would appear, assuming the map is anywhere close to reality, to give poor service to Chicago's northern and western suburbs, especially.

Its only signal advantage over AM band newcomer WRLL/1690 Berwyn ("Real Oldies") would apparently be the lower dial position, and perhaps a more central tower site.

Nighttime:
http://www.radio-locator.com/cgi-bin/pat?call=WNTD&service=AM&status=L&hours=N

Two site operation, here? It appears to have some of the same problems as the day site, with a tighter east/west pattern.

It'll be interesting how they overcome such signal problems. There's a rumor that they're looking at many of the Radio Unica stations (WNTD was the network's Chicago affiliate).

In the San Francisco Bay Area, this would mean KIQI/1010, a 10KW day/500w nighttimer that's probably one of Unica's better signals:

http://www.radio-locator.com/cgi-bin/pat?call=KIQI&service=AM&status=L&hours=D

But overall...the "signal advantage" in most of the markets already belongs to whichever station runs Rush or conservative talk in general. Chicago's Rush affiliate, WLS/890, blows 950 out of the signal water with its 50KW stick. San Francisco's KSFO/560 is not the strongest signal in the market, but had much higher visibility as a long-time market leader in its past days, and is run by current market leader KGO. 1010 would have to come out of nowhere.

In nearby Sacramento, Rush's "adopted hometown", the Unica station is KATD/990 Pittsburg (down in the Delta in the extreme East Bay). I used to listen to this station occasionally in its days as English-language AC/oldies "The Cat", and it does very well in Sacramento during the day, but disappears at night. And my old home station (also Rush's old home) KFBK blows 990 off the dial in terms of coverage, history and visibility.

Not only that...Sacramento's fastest growing suburbs are in the far northeast and eastern areas of the market...areas where 990's signal is not nearly as good. Someone oughta tell the Progress Media folks about market growth patterns outpacing once centrally-located AM stations.

Mike

Nobody gives a shit what you, a member of the public will accept, not any more
than I, a member of the public will accept. This is an exercise in mental
gymnastics accompanied by an argument that commonsense, though becoming less
common, will prevail. Beat your chest and lead the least common denominators
on to victory. What an accomplishment that will be.

There is overwhelming support in Congress for laws restricting indecency on the airwaves. That support is fueled by public pressure -- the same sort of public pressure that produced the "do not call" list and pretty well eviscerated the telemarketing industry.

>Tell that to HBO and the other cable providers who are taking viewers
>from broadcast TV because their content is more adult.

Cable's not the same thing as broadcast; it uses private spectrum that viewers have to pay to receive. You don't get HBO by default, and it doesn't show up on the TV screens of viewers who don't want it.

Because there are only so many megaHertz in the radio spectrum and so many advertising dollars in a local market, radio can't offer the vast array of choices that cable does. Moreover, radio is more intrusive than television; it's portable, it's ubiquitous, and you can hear a radio without looking at it or even being in the same room. Indecency on the radio is therefore a twofold evil: it invades ears that do not wish to hear it, and it takes up spectrum that could be used for higher quality programming.

The fact that someone in my market might get a 10 share with Howard Stern does not impress me.

No, not at all.. What I am suggesting is that very few liberals can face an uncensored audience day after day like  the successful conservatives can, because their emotion-based politics falter under the light of logical argument.

As a long time member of the broadcating industry I certainly care
what the public wants.

For someone so concerned about purity in the medium you're very free
with your own obscenities. Frankly, the place to start in cleaning up
the industry is with individuals cleaning up their acts. If you feel
free to use obscenities and other vulgar language how can I take you
seriously when you complain about hearing it on the radio?

Rich

Precisely.  It's about what advertisers will accept.  And what advertisers
will accept is anything that brings better Arbitrons.

Too many people out there forget that Limbaugh wasn't exactly a ratings machine for the first couple of years out in California and that most stations originally took him because he was free programming.  Even then stations in major markets were tape delaying him into odd hours/weekends until the show took root.  To expect that anyone will be able to short-circuit that process and jump straight into the spot light is asking to hit the lottery the first time they buy a ticket.

Further, there is no doubt that Franken is a bright, funny guy but as we all know too well radio is a different animal.  He might be brilliant and he might crater.  Your guess is as good as the next guys.

Try a remedial arithmetic class. You're assuming there's only one
station. The other 90% share is captured by others who possibly do the
same thing. If you want to make that point you should use the rating.
```

It includes the entire population, listening or not. Share is simply the percentage of the population using radio.

I still say the premium cable channels are doing pretty well with frontal nudity and people seem to be willing to pay for it. I doubt the web would be making much money if the porn sites didn't exist.

Let's rephrase your original statement. Let's say "some of the public doesn't want this material." That would be accurate. To say "the public", including everyone, doesn't want it can easily be disproved.

>I don't care what stations put on their Web sites, but the public owns
>the radio spectrum and it's right and proper that the public, through
>its elected representatives, should prescribe how it shall be used.

Since when does the public elect the FCC? "The Public" must let its representatives know what it wants, otherwise we'll be governed by the likes of John Ashcroft who is so erotically challeneged that he tries to cover up a great national symbol because it has a naked breast.

How many times have "preachers" tried to eliminate pornography (even soft core stuff like Playboy) and failed? While they're doing this they probably have a stash of Hustler in the nightstand or an underage child behind the altar.

I doubt it. The percentage of the population complaining about "dirty radio" is very small. What would happen if the letters to the FCC suddenly said "we want naked people on TV." Which politician would be first to introduce a bill to allow it?

People who like it or don't care (the majority, I believe) simply don't write.

Don't forget, it's also an election year. It's a much safer topic than asking why we're at war and where are those weapons of mass destruction. Why are Bush's buddies the only people sucking money from that $87 billion pool of cash.

Pontificating about the dangers of dirty words and naked bodies are wonderful ways to divert the public's attention from serious issues.

When young kids consider oral sex no more intimate than a good night kiss I want to see what "the public" 20 years from now will be complaining about.

A couple of minutes with Google and the keywords Sony CD Recorder will
find the CDRW33 at a street price of about $500.

Kinda pricey for a one-shot deal when you can get software and
hardware for a PC for a lot less.....

And you are claiming that Rush Limbaugh is not also playing to the emotions
in the same way?

Playing to the emotions with ludicrous arguments that aren't logical is what
talk radio is all about.  Logical arguments don't bring in callers.  Getting
people riled up and angry (either for, or against you) is what brings in
callers.

Until someone complains...and that someone doesn't have to be a majority of people...a handful of complaints and the negative publicity that goes along with them, potentially reaching a much larger group of consumers than what Arbitron represents as listeners to a particular show or station, often does the trick and then advertisers disappear and Arbitron becomes irrelevant. How many affiliates has Stern picked up only to lose for exactly that reason, and he can't even get away with four letter words.

OHMYGOD, this is ridiculous! Try listening to the tone and style of discourse of right-wing political commentary shows, and then tuning to an NPR affiliate and checking out one of its day-time talk shows. See for yourself where you hear "logical argument".

I consider an "uncensored audience" one where the calls aren't screened. Are you telling me that conservative talk shows don't screen their calls? Are you tellng me that hanging up on callers is facing an audience? Usually you hang up on a caller because you don't know the answer or you're doing schtick not because you're trying to make a logical argument. Logical arguments don't get ratings in Talk Radio.

Unscreened talk shows are, generally, very boring because the same callers get through repeatedly and really, really dull callers get on and drone away. One after another.

Whether you like it or not it's the talent of the individual host rather than their political slant. Many, many conservative hosts have failed.

Hmm I thought that was LIST for the w33. Not so bad when you actually read the w33 features. If I needed a dedicated CD audio recorder today, it would be the w33 or w66 Sony.

A couple of minutes with Google and the keywords Sony CD Recorder will
```

find the CDRW33 at a street price of about $500.

Kinda pricey for a one-shot deal when you can get software and
hardware for a PC for a lot less.....

>he can't even get away with four letter words.

That's what makes Howard a pro. I'll bet, even if he could use them, he wouldn't. Howard Stern is a bad example to use because advertisers flock to his show. Not the Proctor & Gambles but the advertisers who want the audience he delivers. If I'm a car dealer who wants to sell a pickup to a 23 year old male I'd be smarter to use Stern than Limbaugh.

The "get to the advertiser" approach works in situations like Laura Schlessinger bashing the gay community. They fought back. According to the top honcho at Premiere it cost her show $30 million in lost billing. Her advertisers were the kind that sell soap and don't care who buys it. They don't want controversy and wouldn't be attracted to foul language in the first place.

It's an election year and the gummint has to look like it's doing something so their guy gets elected. Dirty words and bad taste is always an easy target because no legislator in his right mind is going to go on record advocating either one. They'll make laws. Someone will file suit and the Supreme Court will strike down the law and take the blame. It's standard operating procedure and leads to calls for more conservative judges who don't turn out to be as conservative as was hoped and we still can blame the judges.

It's a beautiful system that let's citizens believe they make a difference while being ignored.

Rich

Yes, but NPR is fairly conservative these days.  You want to hear liberals,
you have to tune into Pacifica.  And even they aren't HALF as radical as
they were even a decade back.

I bought my Ramsey Am1 for about $30 in 2003,things i have found after hooking it up is getting it to make the distance,i first hooked up a '30 foot wire,and grounded it to a outdoor ground,it broadcast 1000 feet.. i changed the Antenna to a 10 foot conductor with 20-30 turns of coated copper wire on a Toilet paper tube as a loading coil,i grounded it 2 ways...First,i grounded the RF out ground side to my electric meter box,next i took a Tap off the 20-30 turn end to a 10 foot antenna and coupled it with 4700pf to the 3rd prong ground in your house wiring,,i turned up my CD /Radio AUDIO source to higher sound loud and clear,Probably at the point of OverModulation for best Distance...i get ranges past 100 feet and at different times Day/Night-it goes unstoppable to 1/4 mile,,it measures on a CB SWR meter on the Field strength tap...i can read it on my Radio Shack 3-30mhz CB SWR meter,using it i adjust my transmitter for the Highest read...adjust the Frequency coil,by turning the iron core center of the Tuning coil,i raised my up until it extends 1/8-1/4 inch above coil.....

Well there certainly isn't anything rational about giving tax cuts to people who don't pay taxes. Tax cuts are for taxpayers, to which the emotional libs say are "for the rich". Who the hell do you think pays most of the taxes? Listen to the left and hear their class warfare, race-baiting, etc. Very logical.

Quite true...and unfortunate. We are passing through a dark time.

Leonard

This isn't an advert, honest. I'm looking for advice on how to put potential customers in touch with the agency responsible for the broadcast archives of the former USSR and  Russian Federation.

I have a friend working in the agency and they are very proud of the materials, much of which has been digitised. In part they want to see the material aired and used, and in part they are looking for income to fund their archiving activities. It covers TV, radio, recorded concerts, still photography etc.

If anyone can point me at potentially interested bodies please reply here, or email me on phil [at] yarwell dot demon dot co dot uk

(The hotmail address above is primarily a spam trap)

Thanks,

Phil

Yeah, they also understood that slaves were just fine and dandy.

There is no word that offends me. And please don't expect anyone to believe that you know what "the founders" understood or meant in any instance where they didn't spell it out. Everything goes because you can't find words that say otherwise?

"A question and a follow-up Mr. Jefferson..."

"Yes Mr. Franklin?"

"In the event that radio or television are invented 150 years in the future, would you favor something in writing that prohibits the word "fuck" from being broadcast?"

"Fuck no!"

"Can I quote you on that?"

I have no problem with vulgarity. It's readily available for anyone interested and whatever floats your boat, but on public airwaves is not the place. Do you believe that most people would not object to vulgarity on any/every station they flip through on the radio or that they watch on television? That no one would care if vulgarity were commonplace on public airwaves? I think you're so far left you're slipping off the edge.

The program is Streambox Ripper.  I believe it's no longer available from Streambox because of legality challenges from Real.  But unsupported copies are around the web.  Alternatively, you'd play the file in RealOne, or preferably the Real browser plugin, while using an MP3 encoding program that captures from your sound card mixer.

And of course the reasons to do this are:

1)  Real's tight control over its proprietary format
2)  An unwillingness to harbor on your PC Real's obnoxious, buggy, maddening and intrusive RealOne software.
3) A desire to enjoy the content on the tens of millions of MP3 or MP3/WMA devices out there that don't support the Real encoding, such as car CD's, headphone units, DVD players.

But that is the reason why the stuff was encoded with Real in the first
place, to prevent this from being done.  Realaudio exists so that the
folks that created the file have control over how it is decoded.

If you don't like it, don't encode with Real.

You can, of course, use a differant program to record the sound while you
play in realaudio. This is a real-time conversion as the real audio plays.

I use a free program called Audacity, which has a plugin to convert wav to
MP3 format.

The reason to get MP3 is, of course, is so that you can play the audio on a
device which doesn't handle wav or realaudio.

CBC, for example, makes Quirks & Quarks available for download in .ra form. They happen to make it available in Mp3 and Ogg as well. Of course they don't want you redistributing this program, but the mere act of encoding in .ra isn't evidence the content provider doesn't want you to listen on the device of your choice.

There is quite a bit of .ra on the web that can be streamed but not downloaded, and I do accept that the content provider doesn't want you storing that stuff. But I'm pretty sure common law will allow you to record it to your VCR, let's say, for personal use.

Try www.totalrecorder.com.  It has a trial version and you can register for $12.  It takes what you hear and makes it an MP3.

Saying "fuck" on radio or TV is such a liberating and expansive breath of fresh air. Are you only pretending you don't get the point or are you serious? Why should the majority need to search the public airwaves to find something that doesn't offend them? If "fuck" doesn't offend you, you're free to find the "fuck" channel, but the rest of us shouldn't be subject to it because people without a sense of decency nor even a vestige of moral compass beat their chests and trot out their left-wing rote Constitutional rights speech.

John Webster

>please don't expect anyone to believe that you know what "the founders" understood or meant in any instance where they didn't spell it out. Everything goes because you can't find words that say otherwise?<

Unlike you, I can read English...the same language the Constitution was written in.  "Congress shall make no law...abridging the freedom of speech, or of the press..." is pretty plain.

>Do you believe that most people would not object to vulgarity on any/every station they flip through on the radio or that they watch on television? That no one would care if vulgarity were commonplace on public airwaves?<

Oh NOOOOOOOOOOOOOOO!!!  We have to be kept SAFE from VULGARITY on the PUBLIC AIRWAVES!!!!  The republic will collapse because someone used the f-word!!!!!

Just keep digging yourself in deeper.  At least you're good for some entertainment.

>I think you're so far left you're slipping off the edge.<

Since you obviously require a clue, it's the RIGHT that claims to be in favor of less governmental control over our lives (regardless of whether or not that's actually true in practice). They should be the first ones to oppose efforts to dilute the First Amendment. Instead, ever increasing numbers of right-wingers have turned into the Carrie Nations of language, aided and abetted by people like you.

BTW, it's a pity that you haven't learned more about the great American orator whose last name you share. He's one of the people spinning in their graves, seeing what's become of his concepts of freedom and liberty. You could actually learn something from him.

This past weekend I heard a station broadcasting on 87.9 fm in the NYC metro area. It played reggae music Saturday a.m. I tuned in Sunday and it was on the air. Come Monday and Tuesday - no signal.

Anybody know anything about this station?
Exactly, what kinds of stations - commercial, non-commecial, lpfm - are allowed to broadcast on 87.9?

It's a business.

I realize freedom and capitalism is a tough pill for some to swallow, but talk radio is giving its listeners what they want.  Whether you like it or not, radio is a business.

>of less governmental control over our lives (regardless of whether or not
>that's actually true in practice).

The flaw in that supposition is the fact that the right equals conservative, and left equals, well, you and those of your ilk. The right favors less governmental control as it affects the wallet mostly. Tell you what, light up a radio station all your own and fill it up with vulgarity.That'd be a test, wouldn't it? Put your money where your mouth is and see if the market will bear out your wildly skewed interpretation of the Constitution.

>BTW, it's a pity that you haven't learned more about the great American orator
>whose last name you share.  He's one of the people spinning in their graves,

Not that "spinning in the grave" thing again. Good thing we're not grading these.

Thrill us again with that thing about Bono having done us a favor? That was cute.

Repeat after me...

"Go Michael Moore! Go Martin Sheen! Go Rob Reiner! Go Barbra Streisand! Go Mike Farrell! Go Leonard Nimoy!"

Even tough for you to do, right? Boy, who wouldn't be clamoring for their support?

Face it, you folks are on the way out. If my dog was a Republican running for President, there isn't anyone on the Democratic hopefuls list that she couldn't beat. Doesn't that tell you anything?

You're just arguing for something to do, right?

You can respond to this if you like, or just pretend you lost interest which would be the best thing for you to do really.

>Why should the majority need to search the public airwaves to find something
>that doesn't offend them?

How can you be sure your opinion is that of the majority. I used to enjoy watching members of the "Moral Majority" sneak into porn shops and bars in Dallas because they came from the Chriswell Baptist Church "dry" and pure side of town.

>If "fuck" doesn't offend you, you're free to find
>the "fuck" channel, but the rest of us shouldn't be subject to it because
>people without a sense of decency nor even a vestige of moral compass beat
>their chests and trot out their left-wing rote Constitutional rights speech.

Actually, it used to offend me, but now it means nothing. I find it tasteless, but many have survived lack of taste. I also find that the word has no bearing on moral compasses.

Things that make moral compasses twirl off their bearings are things like Enron, Worldcom and the pillars of the community who, secretly, rip us off and destroy our trust in our employers, brokers and clergy.

I agree with Sid that the people who should be protecting our freedoms are true Conservatives. We have very few of those today. When you find one he or she is usually ridiculed by the radical, controlling neo-conservatives who are Hell bent on limiting out rights rather than protecting them.

The complaints are usually religiously (family "protect the kids) types who have no concept that their lack of guidance of their children has led them into the hands of their peers who use vulgarity even before they know what the sexual terms mean.

I also get a kick out of religious people who oppose gay marriage because marriage is so sacred in a nation with a larrger than 50% divorce rate. If it's so special and so sacred, they should be encouraging couples of all descriptions to participate. It's not a moral issue. It's a money issue. The gummint will have to require equal treatment of people who pay the same, often higher, taxes than those devoted straight married folks. It seems to me that those who are excluded from the benefits that their taxes pay for should have their taxes reduced because of reduced services.

Please don't bring up the issue of childless couples paying for schools. They're not being excluded. If they had kids, they'd be entitled to all the benefits schools provide.

I think Diogenes would wear out hundreds of pairs of sandals and waste barrels of kerosene, candles or other oils in his lantern if his charge were to find one true Conservative.

87.9 is also active in the Newburgh , NY area with Latino music. I suspect it is a pirate station.

>to broadcast on 87.9?

87.9 FM is called "channel 200." It is sort of in the FM band but it's a special allocation. A station cannot be licensed for 89.7, but an existing station can be moved to 89.7 in order to avoid interference if there is no TV Channel 6 nearby.

Strictly speaking, this is in the guard band of TV channel 6, but it's also in the FM band.

Almost certainly the station you heard was a pirate and not legally licensed for that frequency.

RealAudio exists to make money for its manufacturer. I believe they couldn't care less about the security of the material their customers create. It's proprietary. Ya gotta pay them.

>If you don't like it, don't encode with Real.

An excellent idea.

Besides places like mandy.com, are there websites that have radio broadcasting jobs available? I have the major congloms already, but I think there are many AM's still here in the Hudson Valley, that I could apply to.

Ideas?

Thanks!

What are your thoughts concerning the ban imposed back in the early 70's
on broadcast cigarette advertising?

...and for Rich Wood (or whomever might be current on the law), does
that advertising restriction apply also to cable? If not, why are there
no spots for the product in that medium?

```

in two words John - Fuck Off
where do you stand on violence - how much graphic gore will you tolerate?
Lets talk reality shows now in vogue - looking for the reality in the reality show
-
but to be honest - only watched one early reality show and do not watch any of
these
now - so maybe I am missing the real deal so you answer on this one - but they do
seem
to draw an audience which is the point of the show - lets think about this -
audience -
ratings - advertising $ - well - guess that if it do not sell, it is not on as
"entertainment" and do not have ratings or air time - don't know - who is watching
-
besides you not watching - lots of someone's must be - wonder why. Do not agree
with
this at a personal level, but agree that should be available regardless of what I
think
concerning propriety.

I have absolutely no sense of decency or no "vestige of moral compass" though I am
not
sure what that means - please expand

>Repeat after me...

"Go Michael Moore! Go Martin Sheen! Go Rob Reiner! Go Barbra Streisand! Go Mike Farrell! Go Leonard Nimoy!"

Even tough for you to do, right?<

I should have known that your type would turn this into a political argument.

Tell you what:  If Constitutional rights are too much for you, go find a country without free speech and live there.  Live in a place where every shred of free speech is stifled by the government, as you want to do here.  Your holier-than-thou moral crusade would land you in jail in a place like that, if you're not 100% in agreement with the government's view.

>you ignored my brilliant "Jefferson/Franklin" imaginary dialogue altogether.<

Brilliant?  Don't flatter yourself.  For your edification, the various forms of the word "fuck" predate either Jefferson or Franklin, who would both, as framers of the Constitution, be appalled by your lack of understanding of it. But it's apparent that history isn't your long suit.

>The flaw in that supposition is the fact that the right equals conservative, and left equals, well, you and those of your ilk.<

Making another ASS-U-mption?

>Thrill us again with that thing about Bono having done us a favor?<

He certainly showed you for what you are.

Hi,

I'd like to know if/how it is possible to buy airtime (1-2 hours) on weekends, in an economically feasible way (for an individual or a really small group of people), in the San Diego area.  I'd greatly appreciate  any/all information in this regard.  Please write to vayuputra369@yahoo.com

Thanks.
Vayuputra

Since the FCC database shows exactly two allocations on 87.9...one in California, and an experimental license in Texas...it's a good bet the one you heard was a pirate.

Guys, tone it down. It's getting pretty nasty in the First Amendment It's For The Children But We Should All be Allowed to Say What We Want Because That's the Principle This Country Was Built On thread.

I've posted everything up until now, but the thread has disintegrated into a lot of name calling that's not doing anything to advance either side of the argument.

On 22 Jan 2004 00:18:22 GMT, webster@icontech.com (John Webster) wrote:

>Which is why we're about to watch Al Franken crash and burn.

No. If Franken crashes and burns it'll probably be because he doesn't have the infrasructure of his competing networks. If his backers accomplish what they claim he'll have stations in only a few markets compared to about 650 for Limbaugh. In New York, for example, Limbaugh has 50KW WABC. There are no such options for Franken. In Boston there are no talk signals comparable to WRKO or WTKK. Both are conservative and not for sale. Any station that might be for sale in Boston will be one of the close-in suburban brokered stations dying on the vine. In Chicago where they claim to have an affiliate it won't be comparable to WLS. At this point in time the playing field will not only not be level, it'll be vertical. All the major WABC, WLS, WRKO, KFI, KGO, KSFO quality signals have already been taken.

I was at ABC when we gave Limbaugh 2 hours of the ABC TalkRadio Network satellite time. It took well over a year for Limbaugh to begin to take off. It took longer than that to build the affiliate base and get the ratings he's got. He wasn't an overnight success.

I created the WOR Radio Network for Buckley Broadcasting. It was built one station at a time and took about 3 years to reach critical mass with non-political programming that fit all forms of talk. Franken will be political. His success or failure will be based on more than just his politics or abilities as a Talk Show Host.

Your prediction, to be fair, won't be proven either way for many years.

Rich

Thanks for the responses about this frequency.  What is most interesting, the host of one of the shows was reading commercials and gave a request line phone number.  No call sign was ever announced.

How's that for brashness. :)

>

Wow...we've wandered a bit OT. <grin>

I agree with Rich about the economic impact that the lack of marriage rights has for gay couples.

To tie this back into the morality arguments, I (as a gay man) think it's morally outrageous that, without serious documentation, it's difficult or impossible for me to visit my partner (of six years) in the hospital, have inheritance rights, property rights; etc.

My family are fundamentalist Christians, and because of their bigotry (and self-serving sense of morality) we've had to go to extraordinary legal lengths to protect our joint assets in the event of my death. Piles of legal documents and legal fees to protect the person I've shared my life with...if we had a legal marriage or even a civil-union, all of that legal work would have been unnecessary.

There's a great editorial this month in The Advocate magazine by a U.S. citizen who has been forced to live in the U.K. in order to remain with his partner of nine years because the U.S. government won't acknowledge their relationship and permit his partner to immigrate. It's naked discrimination - and it's morally reprehensible.

http://www.advocate.com/html/stories/907/907_symington.asp

Could a married heterosexual please answer this one question: How does legally recognizing my relationship threaten your marriage?

Alright - I'm off the soap box. Let's get back to radio, OK?

Jeremy Powell

Where's the infrastructure Rich? Doesn't exist because it doesn't sell because
most people don't embrace what Franken will be spouting. There's no audience
for it. Rush et al have been around long enough for the other side of the coin
to emerge. They haven't. How come?

>Your prediction, to be fair, won't be proven either way for many

Al Franken won't last a year. By the way, did you hear about Al's
little tizzy at the airport in Iowa Tuesday? From the ticket counter he
didn't like the looks of the lonnnnnngggg line waiting to get through
security. He told the agent he was going to miss his flight. The agent
informed Al that he'd have to wait in line and hope for the best. Al,
obviously put off by the whole episode, asked the agent, "Well, isn't there
some mechanism in place for people like me?"

>From www.radioworld.com....

## NAB Radio Board Wants FCC to Permit AM Nighttime IBOC Operation

The NAB Radio Board believes the FCC should authorize AM nighttime IBOC on an interim basis. In language approved at its semi-annual board meeting, members state: "The dramatically improved audio quality from IBOC service at night is well worth the predicted and limited reductions in analog coverage."

The FCC should "take steps to address those problems," state board members, should any AMs experience reduction in nighttime analog coverage "beyond those predicted by the studies." Presumably the AM nighttime data Ibiquity recently completed and delivered to an NAB committee working on AM nighttime IBOC issues.

## NAB Radio Board Supports Leaving Codec Out of IBOC Standard

The standards-setting body, The National Radio Systems Committee, and Ibiquity Digital have been going back and forth over how much information Ibiquity needs to divulge so the NRSC can set its IBOC, or HD Radio, standard. Ibiquity has said that its new HDC codec is proprietary and unique. NAB SVP Science and Technology Lynn Claudy told the board Ibiquity is unable to disclose the technical details of the codec, in turn, delaying the standards-setting process.

The board decided to recommend that the NRSC should pursue "modulation and transmission" standards for AM and FM HD Radio, standards that include provisions for advanced data applications. All of these are elements Ibiquity can disclose, the technology developer told Radio World.

The codec would be left out of the standard, so "audio compression methods thus would be subject to selection by market forces," according to board minutes released by NAB.

Ibiquity says the HDC codec would still be included in the technology
it licenses to broadcasters.

>that's actually true in practice).

The flaw in that supposition is the fact that the right equals conservative, and left equals, well, you and those of your ilk. The right favors less governmental control as it affects the wallet mostly. Tell you what, light up a radio station all your own and fill it up with vulgarity.That'd be a test, wouldn't it? Put your money where your mouth is and see if the market will bear out your wildly skewed interpretation of the Constitution.

>BTW, it's a pity that you haven't learned more about the great American
orator
>whose last name you share.  He's one of the people spinning in their graves,

Not that "spinning in the grave" thing again. Good thing we're not grading these.

Thrill us again with that thing about Bono having done us a favor? That was cute.

Repeat after me...

"Go Michael Moore! Go Martin Sheen! Go Rob Reiner! Go Barbra Streisand! Go Mike Farrell! Go Leonard Nimoy!"

Even tough for you to do, right? Boy, who wouldn't be clamoring for their support?

Face it, you folks are on the way out. If my dog was a Republican running for President, there isn't anyone on the Democratic hopefuls list that she couldn't beat. Doesn't that tell you anything?

You're just arguing for something to do, right?

You can respond to this if you like, or just pretend you lost interest which would be the best thing for you to do really.

>no spots for the product in that medium?

1970 - Pub. L. 91-222 substituted provision that after January 1, 1971, it shall be unlawful to advertise cigarettes on any medium of electronic communication subject to the jurisdiction of the Federal Communications Commission, for provision that a violation of this chapter should constitute misdemeanor and be punishable by fine.

I take this to include cable.

While I abhor cigaretes I find it hard to justify banning the advertising of a legal product. If a product is deadly it should be illegal.

People don't have to embrace it. They might hate it, and still keep listening.
Talk radio isn't about telling people things they agree with, talk radio is
about telling people things that keep them listening.

If people are horrified at what's being said, they'll keep tuning in just
as much as if they agree completely, maybe even more.

The name of the game is to keep them listening at all cost.

I can't argue with that. But I don't think he'd be able to hold even them long
enough or in numbers large enough to matter. You're one hundred percent
correct though, about "keep them listening at all costs". I just think
that Franken and the left envision/hope for the kind of support that
conservative radio hosts enjoy, that is, large numbers of people who share
similar values...and if there were enough of them to make liberal talk radio
```

viable, it would have already happened.

There it is in a nutshell. Why you have such a problem with someone who doesn't believe there is room for vulgarity on public airwaves. You don't agree and you KNOW you're right...that vulgarity ought to be allowed because it's free speech and we have a Constitution that you have a laserlike, precisely keen insight into exactly what the Founding Fathers were thinking when they wrote it...in particular the parts they didn't write, the ones in there between the lines...yet somewhere in the back of your mind is that one, tiny little brain cell with a teeny-weeny little neuron that every once in a while lights up a synapse with, "What kind of an asshole could act so holier-than-thou...unless..."

>>you ignored my brilliant "Jefferson/Franklin" imaginary dialogue altogether.<

>
>Brilliant?  Don't flatter yourself.  For your edification, the various forms of
>the word "fuck" predate either Jefferson or Franklin,

Irrelevant and not particularly edifying either, but mighty impressive that
you know the history of a word!

And... "predate either Jefferson OR Franklin"??? Imagine what it would have
been like if THEY had lived at the same time, eh?

>

For anyone interested, here's a reminder of upcoming DX tests; if anyone has any additions or corrections, please contact me. (BE SURE TO NOTE THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Daily, from 2:55am-3:05am EST - WRIB-1220, Providence, RI - This test is scheduled to run "through at least March (2004)".

Sunday, February 15, 2004 - WQMA-1520, Marks, MS 12:00-2:00 am CST.
WWW: http://www.q1520radio.com/

Please remember, what's listed as being on, say, Monday *may* be what you think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message letting me know, and please, drop the station personnel a note, via e-mail or snail mail, thanking them for running the test! Also, for brevity's sake, I didn't post the QSL addresses; if you need these, let me know!

Lynn.

As if things weren't bad enough in the daytime.  Are there any small stations/groups in NAB now, or is it run by the Clear Channels, Infinitys and the like?

>NAB Radio Board Supports Leaving Codec Out of IBOC Standard

Hey, this could be the best "HD Radio" (*ptui*) news I've heard in a long time.  Go ahead.  Leave out the standard.  Let the AM stereo mess play out again and we'll be mostly rid of this crap.

(The "Radio Crazy".....It is baaaaaaaaak!!!)

For sale:
Partial ownership in AM radio station. Location is upstate NY in small college town. Near Albany. 1 KW daytimer with PSA/PSSA and some night power.

Total asking price is only $120,000 and this includes transmitter land of about 11.5 acres plus transmitter shelter plus 192' guyed tower and two transmitters. Lots of modern studio gear. Station is on the air since 1981.

Joint venture. Active or inactive investors with at least $10,000 each are welcome. All investors would be on the board with full voting rights if desired. No individual can own more than 49 percent. That goes for me too!

I am NOT a shill, agent, broker, owner or part owner and even more importantly, I am NOT a crook!

References:
a-My parole officer. Mr. Larson E. Rapp. Zing Zing prison, Osstink, NY.

b-Brazilian Bandit Airways. (Purchased from them a one-way ticket to Rio using all unmarked small bills).

Please! No "AM bashers" or other negative nabobs.

Tel: (478)741-1710 in Macon, GA

73,

Meyer Gottesman, W6GIV
aka "The Radio Crazy"

Can't speak for Sid, but I think there's lots of junk on the airwaves. I, however, am one of those people who think that we have enough serious trouble right now with curtailing civil rights (and yes, freedom to say what you want is one of those rights) that we don't need to add fuel to the fire. Here are some examples --

Two words: Patriot Act.

Four letters: RIAA.

I personally think we have enough erosion of our rights that we have much more serious things to worry about than regulating the use of the word "fuck".

Thing is, the legislators and the idiot president who want to crawl up your butthole with an enema are using some of the same arguments that you are using to justify their actions.

Rich is right--WNTD is a 1,000-watt pea-shooter that was a daytime-only for many years. The last time there was anything drawing listeners on that frequency was when it was R&B WJPC (and WGRT before that) in the 70s. There was some pop in the mid-90s when it was simulcasting Barry Mayo's WEJM "106 JAMZ" hip-hop format (it then had the format to itself when the FM was sold to Crawford) and One-on-One tried to get listeners when they briefly owned the station, but it's been low profile, for the most part, including the current Spanish news-talk Radio Unica.

WBEZ pulled a 2.3 in the last book, good for middle-of-the-pack. The Pacificistas, of course, consider NPR capitalist sell-outs now, but Progress isn't really aiming their station at the Pacificistas, who would consider it too slick to begin with. If they can market themselves, they could at least get some curiosity listening going--but their signal will have a hard time reaching the North Shore, where a big chunk of 'BEZ's audience comes from.

On 22 Jan 2004 17:01:31 GMT, webster@icontech.com (John Webster) wrote:

>Where's the infrastructure Rich? Doesn't exist because it doesn't sell because most people don't embrace what Franken will be spouting. There's no audience for it. Rush et al have been around long enough for the other side of the coin to emerge. They haven't. How come?

We don't really know that no audience exists. It's never been done on the scale that's being proposed. Most of the liberal hosts have been dull as dirt. Don't forget that there have been dozens of conservative hosts who have bitten the dust even though they spouted the same stuff as those who succeeded.

I believe that, if Franken takes this as a serious day job and doesn't take time off for speeches, book signings and other non radio events, he'll be a success when on a signal comparable to the other side.

I've had lots of experience with big name talent whose fame came from elsewhere. They're very reluctant to be tied to a fixed time show five days a week.

>Al Franken won't last a year. By the way, did you hear about Al's little tizzy at the airport in Iowa Tuesday? From the ticket counter he didn't like the looks of the lonnnnnngggg line waiting to get through security. He told the agent he was going to miss his flight. The agent informed Al that he'd have to wait in line and hope for the best. Al, obviously put off by the whole episode, asked the agent, "Well, isn't there some mechanism in place for people like me?"

Al isn't the first to feel special. There have been conservatives and just plain famous people who felt they deserved special treatment. Do a Google search on "special" people who have caused a ruckus when confronted with a long line of little people.

I don't care how he acts at airports. I'm concerned with the entertainment value of what comes out of the radio. No one ever said assholes couldn't be talk show hosts, too.

Rich

For sale:

Partial ownership in AM radio station. Upstate NY near Albany. 1 KW, daytimer, some night power. On the air since 1981. College town.

Joint venture. Active or inactive investors with at least $10,000 each are welcome. All investors would be on the board with full voting rights if desired. No individual may own over 49 percent. This rule applies to me too!

References:
a-My parole officer. Mr. Larson E. Rapp. Syng-Syng, Ossneat, NY

b-Brazilian Bandit Airways. (Purchased one-way ticket to Rio using all small unmarked bills).

Please! No "AM bashers" or other negative nabobs.

Tel: (478)741-1710 in Macon, GA

73,

Meyer Gottesman, W6GIV

```

>>
>>What is a clear channel station?
>
> It's now an obsolete term ...
>>

Hardly.

Clear channels are: 540, 640-780, 800-900, 940, 990-1140, 1160-1220, 1500-1580.

Local channels are: 1230-1240, 1340, 1400, 1450, 1490

All other channels are Regional channels.

It's clear that the most channels are clear channels.

The popular meaning of the term may have changed, but the legal definition hasn't.

There is at least one Class I station (either Class I-A or Class I-B) on every clear channel, and all such clears are clearly identified in the NARBA and Rio treaties as to power and antenna efficiency (although for some Mexicans, the antenna efficiency may be bogus).

>>
Also known as single stick stations, as their antennas use only a single tower and radiate omnidirectionally.
>>

In general, Class I-As are single-stick.

But, there are as many Class I-Bs which are single stick as there are Class I-As which are DA-1.

Class I-As which are or have operated DA-1: 660, 870, 1030, 1100, 1580.

Class I-Bs which operate ND: 680, 810, 850, 940, 1070, 1550

Also, there is a single stick Class II-B on a clear channel where the Class I-A is DA-1: 1580

And, there is a Class I-A which protects a Class I-B: 1540, protecting KXEL, which is a Class I-B.

Finally, there are Class I-Bs which protect Class II-Bs: 710 and 1510.

i am helping a grass roots nonprofit looking for diretory of all radio
stations in the US.

Ideally would like it in electronic to enable search by state, city, address, phone and fax # -- to make use easy.

Tips appreciated where we can get a slightly outdated CD, or how to
time-effectively access online directories to get this info.

Paul Schleck doesn't manage rec.radio.broadcasting, and I don't know much about him except that he's e-mailed me a couple times about xposting between rrb and rec.radio.info.

I moderate rrb, and while (like the original moderator) I try to be liberal in what I accept, there are certain basic guidelines that you must follow or I won't post your stuff.

HI<

Isn't there sitll an online database of all radio stations searchable by
AM/FM city/state etc. at fcc.gov.

I believe you can find ownership./contact within those records.

That would be free.

just came back from a surf at the beach

Its over 100 today and hot

keitha

----------------------------------------------------------
 Great fucking article.
by Mary

That means it's okay to tell a policeman how un-fucking grateful you
are about the Force without being charged for abusive language.
------------------------------------------
.
Oh for fuck's sake
by R

I'll bet the "American Family Association" probably don't object to
the illegal war being carried out by their government, yet they get
into a tizzy about a washed-up warbler saying the word "fuck". Have
they ever objected to the rightwing hatred being spewed forth on radio
by some of the 'shock jocks'?
As much as I detest this egotistical git, and the way he hob-nobs with
the rich and powerful, if it's a question of a dust-up between him and
these hypocrits I would have to back his right to say the fucking
word. Anyway the affair has been blown out of all proportion, and the
"American Family Association" should just fuck off.
```

And Bono should try to keep better company.

Google it.

Go to www.google.com and do a query.

I put in directory radio stations and got several results, including
http://www.100000watts.com/.

You might also search the FCC's site.

Sid, you're getting no argument from me....but if this continues the way we're going (what's next, a constitutional amendment that will prohibit same-sex marriages), I'm packing my bags and getting the hell outta here. It's really freaking me out.

Yeah, like anyone cared....what's worth even less than a fleapower AM radio
station?
One entangled through "partial ownership"...sheesh!  I'd get more enjoyment taking
my
money and watching it circle around the bowl before disappearing forever down the
sewer.

For anyone interested, here's a reminder of upcoming DX tests; if anyone has any additions or corrections, please contact me. (BE SURE TO NOTE THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Daily, from 2:55am-3:05am EST - WRIB-1220, Providence, RI - This test is scheduled to run "through at least March (2004)".

Please remember, what's listed as being on, say, Monday *may* be what you think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message letting me know, and please, drop the station personnel a note, via e-mail or snail mail, thanking them for running the test! Also, for brevity's sake, I didn't post the QSL addresses; if you need these, let me know!

Lynn.

What happened to 92.7 in New York City? IT WAS THE BEST RADIO STATION IN NYC. It's now a spanish station! It used to be this hip rock, dance, new wave station......and for a LI station it was gaining popularity in the city. Now it's gone...

The other stations in NYC pretty much suck. Even 101.1 FM isn't playing good oldies.....I tend to listen to CD's now for oldies and stuff from the 70's.

105.1 FM and 97.1 FM are ok if dat music is your "thang" (you go girl!) ........just kidding, I like hip hop, although it's starting to sound boring since they play the same old songs over and over again. Z100 is too teen bop.....and their morning show is incredibly boring.

As for dance music, 92.7 played all sorts of great imports from EUROPE (which has the best dance music) With 92.7 now gone (which supported dance music a lot), KTU is the only station playing dance music, and they suck at it. The DJ's are extremely unprofessional (e.g. Vic Latino's talks over all the songs he plays at night, speaks over lyrics, etc...plays from his sound effects machine) and during the day, they play old crappy songs that no one has ever heard of before

Overall, I just want to say that New York radio sucks right now. What can help it? I believe NYC needs new radio stations.....it would really help.

Then I think most of us are using the popular term which meant there
was only one station on the frequency. Not even a daytimer shared it.

>bogus).

Where would this listing be located on the web?
>>

The FCC AM site.

List all stations on any clear channel (by specifying no call letters and restricting the frequency range to any one specific clear channel) and observe the class letter.

"A" is Class A, "B" is Class B, etcetera.

On a clear channel, you should find only As, Bs and Ds.

Central American stations will show up, too, and some of these are notified as described, but many are not.

My assumption is if the FCC database has no class letter, then the United

States has not "accepted" the station's notification, or the class is indeterminate.

It is common for any change to be submitted to Canada and Mexico for acceptance, particularly in border areas, and vice versa.

This is one reason why almost all of L.A.'s FM's are operating way above Part 73 power ... because they started out that way, and when it came time to formalize those existing operations, Mexico was requested to accept those operations, which Mexico did, thereby "grandfathering" those stations with very high (most) or even super power (KPFK).

>It's really freaking me out.

I seriously doubt that there will be any constitutional amendment. That's all we've been hearing, lately. The jerk with the 10 Commandments in a public place has followers wanting an amendment. Listen to talk radio "I don't like it, so let's amend the Constitution."

I believe the nation is far less religiously Conservative than it might seem. A Constitutional Convention is a terrible risk, since the entire document would be open for change. It's a double edged sword where separation of church and state could be strengthened, guns gould be forbidden, except for the military.

The only time I'd want it changed would be to give people more freedom, not less.

WLIR was a beacon in the darkness for many years.  For more gorey details, see this week's Northeast Radio Watch at

<http://www.fybush.com/nerw.html>

But really, hasn't New York radio mostly sucked for a long time anyway? In that respect, it's no different from most other markets where stations play the same songs over and over again thinking that's the way we like it.

I've just gotten XM satellite radio in my car and don't have to put up with it any more.  I suggest you check out XM and Sirius.

Why should a multiple or group owner station suffer over a one man, or
woman owner station?

Sometimes three heads and wallets are better than one.

The scumbags at The Morey Organization just pushed me over the edge
by selling out NYC radio.

I got my Sirius for the car and home and I am a happy camper!

>>

U.S. Class I-A clears are: 640-670, 700, 720, 750-780 820-840, 870-890, 1020-1040, 1100, 1120, 1160, 1180, 1200-1210

Canadian Class I-A clears: 540 (first), 690, 740, 860, 990, 1010, 1580

Mexican Class I-A clears: 540 (second), 730, 800, 900, 1050, 1220, 1570

I'm having trouble thinking of a single U.S., Canadian or Mexican Class I-A clear channel which did not have at least one co-channel daytimer somewhere in the U.S.

And, remember that stations in the U.S. territories (and former territories, now states) were allowed to operate on U.S. Class I-A clears many decades before "Rio" caused all clears to be completely broken down.

Sure....that way there'll be more money to try and fill up the money pit that
these
properties represent.  Besides, I get the impression that Meyer doesn't have any
money of his own, and would prefer to skim off the top using other people's money.

That could be taken as a mean-spirited response. Meyer seems to be trying to
put together a limited partnership of sorts to buy a station of the kind
most people do not want and to actually run it. If he makes money by putting
a deal together, what is wrong with that?

Most Americans don't have "any money on their own." 75% of retirees will
live off Social Security alone. Why not try to improve one's situation?

AND.....starting March 1st....XM will add 10 continous traffic channels and
cease ALL commercials! Subscriptions are still $9.95 for the first unit per
month..with #2,3,4 and 5 at $6.95 a month....deal with that Cheap-Channel,
Infinity and the spanish blasters.

NY radio isn't alone in terms of just very poor radio. It is nationwide now. Most all CHR Rhythmics sound the same. Most countries are homogenized as hell. News-Talks all sound the same. All of this "on the 5s" garbage! Hahaha!! There is just extremely weak radio now, and it probably won't improve for sometime. Notice, I made no reference to Clear Channel, Entercom, Infinity, etc. as the reason for this. That goes without saying-:)

I'm looking for somebody to record tomorrow's Westwood One National version of the NFC Championship game for me.  We don't get that feed in our area and I much prefer their games to the Carolina radio team's.  I'd prefer an FM signal or direct recording from their satellite feed because the quality would be better.

It can be on MiniDisc, 128kbps mp3 file, or Reel to Reel.  Cassette or CD would be accepted as a last resort.

Please E-MAIL me if you can help so I'll know not to look further.

Look, people like you and I would not know these stations were for sale
if it were not for Meyer.

Not everyone posts on: http://www.buysellradio.com/

or for that matter likes to deal with brokers.

He's doing a service.

Like ePay, nobody's making you buy the station.

Very old examples would be WOI in Ames on 640, KVFD/KPOP/KGBS on 1020, KOB and WEW on 770, Kannapolis on 760, Lansing on 870, Oklahoma City on 890. 1100 in San Francisco. 1160 in Chicago. 660 in Dallas.
>
> And, remember that stations in the U.S. territories (and former territories,

650, 760, 830, 870, 1040, 1210 in Hawaii. 660, 700, 750 in Alaska.

Here's your hat, what's your hurry?

You folks are all barking up the wrong tree. Everyone here bristling because someone (Powell), who runs the goddamn organization, thinks profanity ought not be qualified by whether or not it's used as a verb or a noun versus used as an adjective?

Or do you think it necessary that four-letter words be allowed in broadcasting? For what purpose? Don't you have enough coarsening of the culture we're mired in? Your children will sit in front of the television and you don't care...or even welcome...if someone is allowed to take them further along the path of de-sensitization? Championing someone's right to be vulgar boggles the mind. I'm embarassed for you.

Please save the "it's up to you what your children watch" and "there's an on/off switch on the TV you know" argument. To welcome vulgarity over public airwaves will quickly lead to saturation and there will soon be nothing to watch or no choice to make that doesn't include it. Talk about the decline of civilization...

Seems the "morality police" are at it again...

>Please save the "it's up to you what your children watch" and "there's an on/off switch on the TV you know" argument.<<

Please save the "it's for the children" argument.  Government isn't your nanny, and it also isn't your childrens' parent.  And if it's court rulings you want, federal courts have repeatedly upheld the rights of adults to hear and see adult material, and have repeatedly struck down bans on certain material because children "might" see it.

>To welcome vulgarity over public airwaves will quickly lead to saturation and there will soon be nothing to watch or no choice to make that doesn't include it. Talk about the decline of civilization...<

...and once all that vulgarity we're being saved from now becomes commonplace, it will cease to be vulgar.  At various times in our history, automobiles, light bulbs, phonographs and yes, even radios, were considered "vulgar"...a nice little word which in too many cases means "I don't like it, so it has to be banned."

Shield your children from vulgarity, if that floats your boat.  Don't presume to shield me or any other adult from it, just because you don't want your children to hear it.  That's not government's job.  That's yours.

```

I want to thank those who took my side with respect to raising funds to acquire small market AM stations.

As I said before, I am not an agent, shill, broker, owner or part owner. I am DEFINITELY not a crook!

For those who don't know it, my last job in radio (2001) was Chief Engineer for a 5 KW fulltime AM in New York City. Would you trust a $45 million dollar plant to a crook?

I was the founder and past President of non-commercial KPOO FM radio in San Francisco, CA. It is on the air since 1973. Senator Dianne Feinstein (Dem.)gave me a written endorsement circa 1971. She almost was Bill Clinton's running mate in 1992.

73,

Meyer Gottesman, W6GIV

Look, save the preachy shit. A liberal is a conservative who hasn't been mugged yet.

Tell me again why it's a good idea that everyone is allowed to say fuck on the radio or TV? Pfft...have someone read aloud to you the shit that you leave here because even though it's coming out of your head, I don't think you're getting the full effect of it.

I'm not in favor of "saving" anyone from vulgarity. I'm only in favor of not subjecting them to it. You want vulgar, you have plenty of places you can wallow in it. One of the definitions of vulgar is "common". So go be common all you want. I don't presume to shield you from anything at all. I just think if you want it, you ought to have to seek it out. Because you place importance on it doesn't mean reasonable folk ought to be awash in it. There's no place for it on public airwaves. And on top of all that, Bono is an asshole.

Correction: XM will add traffic channels (I believe 15 major markets) and remove commercials from their music channels. Commercials will still appear on non-music channels.

You're going to have to deal with Clear Channel one way or the other. Clear Channel is a stockholder in XM. You're going to listen to them whether you like it or not; whether you pay for them or not.

I suspect Clear Channel, Infinity and the "Spanish blasters" will do just fine even with the loss of a signal in a suburb of New York. I liived in Greenwich Village for 20 years and, not once, was I able to receive WLIR.

On 17 Jan 2004 19:27:10 GMT, webster@icontech.com (John Webster) wrote:

> Or do you think it necessary that four-letter words be allowed in broadcasting? For what purpose? Don't you have enough coarsening of the culture we're mired in? Your children will sit in front of the television and you don't care...or even welcome...if someone is allowed to take them further along the path of de-sensitization? Championing someone's right to be vulgar boggles the mind. I'm embarassed for you.

Since the Constitution "champions" someone's right to be vulgar I think we're in good company. As I recall, the Supreme Court declared that people didn't have the right not to be offended. I think you might want to save your "embarrassed for you" effort for violence rather than sex. It appears that human bodies are more beautiful when riddled with bullets or slashed by knives.

If you really want to prevent your kids from learning vulgar words take them out of school and off the street. That's where they learn them, not from radio and TV.

Unless, of course, you have cable or satellite radio. One of the biggest barriers to stemming the loss of over-the-air TV audiences is the fact that they can't run the kind of programming that's so popular on premium cable channels. Satellite radio is free to be as obscene as they like. You'll have to spend weeks watching and listening to cable and satellite radio to know which channels to lock out. Then you'll lock out an entire channel because of one or two shows.

> Please save the "it's up to you what your children watch" and "there's an on/off switch on the TV you know" argument. To welcome vulgarity over public airwaves will quickly lead to saturation and there will soon be nothing to watch or no choice to make that doesn't include it. Talk about the decline of civilization...

What do you mean by "quickly?" We've been having this argument since cultures carved naked images on cave walls. Greek and Roman cultures celebrated eroticism. Please save the "sex caused the fall of the empire" argument until someone can actually prove that's why it happened.

As I recall, the former Soviet Union was one of the most sexually repressive cultures ever. They fell. So, we can make the counter argument that lack of sex destroyed their empire. We all know it's much more complicated than that.

I think a few weeks with the History Channel might change your perspective. Compared to much of history I think we're a pretty civilized bunch.

Amateur Radio Newsline™ Report 1379 – January 16,  2004

The following is a closed circuit advisory for Amateur Radio Newsline bulletin stations.  It is not necessarily for broadcast.

According to Support Fund Administrator Andy Jarema, N6TCQ, Amateur Radio Newsline has only received enough funding of late to keep the service going for another month or so.  In other words, the bills from last November have been paid , but now money has to be raised to keep from loosing the phones and e-mail service from bills accrued in December.

Andy says that Newsline continues to exist hand to mouth on a week to week basis.  He says that It is up to you and the listeners to make sure that it is funded so that it can continue to provide this vital service.  Otherwise he may soon be forced to pull the plug.

Please help us to keep The Amateur Radio Newsline on the air.   Our address is the Amateur Radio Newsline Support Fund, Post Office Box 660937 in Arcadia California.  The Zipcode is 91066.  Again and as always, we thank you.

That ends the closed circuit advisory with Amateur Radio Newsline report number 1379 with a release date of Friday, January 16, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. The ARRL Board meets to discuss the future of ham radio and lots of news on the B-P-L front. Find out the details on Amateur Radio Newsline report number 1379 coming your way right now.

**

RESTRUCTURING: ARRL BOD MEETS IN CT JAN 16-17 TO DISCUSS WRC-03

Look for some major changes in the structure of the United States Amateur Radio service to be proposed or at least put open to study. This as the American Radio Relay Leagues Board of Directors holds its first annual meeting of 2004 as this newscast goes to air. Amateur Radio Newsline's Henry Feinberg, K2SSQ, reports:

--

What's to come under the ARRL Board of Directors scrutiny? The ARRL Letter points to the big item being the implementation of changes in US Amateur Radio rules. This, in the wake of World Radiocommunication Conference of 2003.

Among other significant changes, W-R-C 03 delegates agreed last summer to leave up to individual countries whether to require a Morse code test for access to amateur high-frequency allocations. Several nations have already dropped the code testing requirement for High Frequency access. In the United States, the FCC last year invited public comments on 14 Morse-related petitions for rule making, but it has not yet acted on the issue. When it meets, the ARRL Board is expected to discuss in detail recommendations in response to W-R-C 03 that were developed during last November's meeting of the ARRL Executive Committee.

Most observers generally believe that there will not be any major action by the FCC to implement W-R-C 03 changes until it hears from the League. This Board meeting is expected to generate an ARRL position that will be transmitted to the regulatory agency, but you will have to wait until the meeting is over and the League issues its own statement to find out what that position is. We suggest you keep an eye on www.arrl.org the next few days for any breaking news on ARRL Board decisions.

For the Amateur Radio Newsline, I'm Henry Feinberg, K2SSQ, in New Jersey.

--

Among other actions, the Board also will elect members to the Executive Committee and appoint three directors to the ARRL Foundation Board. The Board also will elect officers for the next two years. Incumbent President Jim

Haynie, W5JBP, has indicated that he plans to run for a third term. (ARRL Letter, others)

**

RESTRUCTURING: IARU REGION 1 TO MEET IN FEB

Meantime the International Amateur Radio Union will be holding its next regional conference in a few weeks. Q-News Graham Kemp, VK4BB, is here with that story:

--

The Twelfth Regional Conference Is being held from February 16 - 20, 2004 in Taipei, Taiwan. There are Working Groups, where most if not all the business is discussed and these run parallel to one another. A wealth of information is exchanged on the floor at these Working Groups.

There are formal discussion times and of course many informal discussions and gatherings such as over meals and receptions and so on. Contacts made at these conferences assist when an issue comes up back home, help can be sought on a first name basis.

There will be workshops on two important topics. The first is a Workshop on WRC 2003. It will include a detailed discussion on the new Article 25. To facilitate the discussion, a paper by Michael Owen VK3KI is being circulated with the Conference papers so that all societies will be able to make an advance study and brief their delegation on issues to raise and matters for seeking clarification.

The other Workshop will be on The Society's IARU Liaison Officer. The Workshop will help gain a better appreciation of the duties and responsibilities of the Liaison Officer and hopefully lead to greater satisfaction from the work carried out by Liaison Officers.

Graham Kemp, VK4BB, reporting.
--

More information on this upcoming conference can be found on-line at the Japan Amateur Radio Leagues website at www.jarl.or.jp/iaru-r3 (Q-News)

**

THE BPL FIGHT: AUSTRIA TURNS OFF ITS BPL

And a big win overseas on the B-P-L front as reported by the ARRL Letter. The Austrian Amateur Transmitter Federation says that a Broadband over Power Line field test in the city of Linz has been cut short as a result of excessive radio interference. According to the national ham radio society, the Government Ministry for Commerce, Innovation and Technology closed down Linz Power Company's B-P-L pilot project because it was generating interference on the HF bands.

Shortwave broadcaster Radio Austria says the case that brought the issue to a head was a Red Cross report.  One that documented that emergency services radio traffic during a disaster response drill last May was the victim of massive B-P-L interference. According to the broadcaster, measurements were said to have indicated that radiation from the B-P-L system exceeded permissible field strength levels by a factor of 10,000.

Last fall, Linz amateurs and their national leaders got together with power company representatives in an effort to resolve BPL's incompatibility with High Frequency ham radio operation.  The meetings followed news reports of interference to emergency service communications and QRM complaints from several area hams.

The Commerce Ministry Order not only means the end of the Linz B-P-L pilot project.  It also perminently curtails any future the deployment of this technology in Austria.  (ARRL)

THE BPL FIGHT:  PANASONIC TO INTRODUCE HOME BPL SYSTEM

A form of Broadband Over Powerline may be coming to a house near you.  This as Matsushita Electric announces that it has developed a high-speed home power line IP networking technology capable of high-definition video transmission. Amateur Radio Newsline’s Bruce Tennant, K6PZW has more:

--

Best known for its Panasonic-brand products, a newly developed Matsushita Electric technology will make it possible to provide broadband connectivity to every room in a house via existing home power lines.  This, using an Panasonic branded adapter about the size of an audiocassette that the company says cannot be interfere with by radio amateurs.

The adapter contains a power plug, power supply, LAN connector and an L-S-I chipset that converts broadband data  into signals that can travel over a power line.  The unit  connects a broadband Internet link such as D-S-L or optical fiber lines to the existing power lines in the home. According to Panasonic, a user simply plugs the P-L-C adapter into any AC power outlet to create a home broadband networking without installing new cabling.

The most interersting claim being made by Panasonic is that the new technology it calls H-D P-L-C resists interference from other signals such as those from ham radio that the company says often use the same frequencies as wired communications. In order to realize this capability, Panasonic claims that it combined Orthogonal Frequency Division Multiplexing and Wavelet technology to reduce the noise caused by the interference down to one-fifth of typical noise levels. This the company says creates a proprietary interference-resistant and ultra-high-speed modulation-demodulation method without use of additional filter circuitry that eliminates the frequencies where interference is likely to occur. What impact that this new technology will have on over-the-air radio reception by hams and other spectrum users is not addressed.

Panasonic expects to introduce P-L-C adapters for both consumer and office use by the end of 2004 providing that the HomePlug Powerline Alliance determines a final specification in the summer of 2004. An L-S-I chipset will also become commercially available at the same time.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, reporting.

--

Matsushita Electric and its Panasonic subsidiary exhibited this new Powerline Communications technology at 2004 International CES held last week in Las Vegas. Both companies are members of the HomePlug Alliance which has been working with the ARRL to notch out amateur frequencies from its powerline communications signals. (ARNewsline(tm), CQ -- from news releases)

**

THE BPL FIGHT: W1RFI SPEAKS IN PA

Meantime, one of the leading experts in the area of Broadband Over Powerline interference has made his thoughts known. Speaking at Frankford Radio Club meeting on in Philadelphia last Tuesday night, Ed Hare, W1RFI, said that B-P-L is not good news for the radio spectrum. Amateur Radio Newsline’s Mark Abramovich, N-T-3-V, was there and has this report:

--

When Ed Hare talks, amateurs and others listen.

During an hour-long presentation at the FRC's meeting on the University of Sciences campus here in Philadelphia, Hare made the case that Broadband Over Power Lines is a threat to the future of the hobby.

"If these B-P-L systems came to my neighborhood, HF Amateur Radio as I know it would be over," he explains. "I mean S-9 on multiple bands would seriously cripple me.

Oh, we've had more serious threats when Amateur Radio was shut down after the world wars, but this ranks up there with it in terms of the potential to cause harm to the types of Amateur Radio that many of us enjoy doing."

The reason: Hare says B-P-L field tests by a handful of electric utilities use power line systems to carry high-frequency or HF signals to homes and businesses to give them connections to the internet.

"My neighbor's computer system is a local interference problem," he says. "I'm not going to hear the one three blocks up the street.

But Broadband over Power Line, they're going to intentially conduct those signals onto the overhead lines that will run through my house and then they're going to build this as big as an entire neighborhood. Clearly it has a different interference potential."

Hare says he's charted the interference on 20-meters, calculating it on a national and worldwide scale should B-P-L be rolled out.

"The ability of HF to sustain worldwide communication if you have 30-microvolts per meter of noise will not exist," Hare says.

He says the interference potential goes beyond the ham bands.

"This will affect military spectrum, this will affect international broadcasting spectrum, this will affect other government spectrum," Hare says. "This will affect commercial HF spectrum and as I tune outside the ham bands, you know what? That's not a radio wasteland, there's a lot of stuff there."

And, Hare notes, there's serious concern about medical-diagnostic devices.

"I go to my doctor's office, it's a house in a residential neighborhood," Hare says. "And he's going to hook me up to the E-K-G machine to find out whether I'm going to die before the end of the day.  And, if that thing's interfered with, maybe I'll get a false positive or a false negative."

Finally, Hare says the amateur community is not alone.

"I'm very pleased to see groups like FEMA, NTIA and others getting involved with this saying essentially the same things ARRL is doing based on their work," Hare says.

"They, too, see a serious inteference potential to HF that needs to be addressed before B-P-L could ever be considered in any way."

For Amateur Radio Newsline, I'm Mark Abramowicz NT3V in Philadelphia.

--

More on the fight to stop B-P-L in future Amateur Radio Newsline reports.

RESCUE RADIO:  NIUE DEVASTATION REPORTED BY HAM RADIO

>From the rescue radio file, word that radio amateurs became a lifeline when

tropical cyclone Heta ripped through the tiny island republic of Niue two weeks ago. The storm left the tropical paradise with no regular means of communicating with the outside world and summoning much needed relief aid. Enter ham radio.

According to news reports, a radio operator on the island put out a a call for help which was answered by Steve McCully, W7TZ/ZF2CQ, in the California community of Oak Hills. In fact, it was McCully who phoned the New Zealand Consul General in Los Angeles and provided that government with its first notification that Niue had been ravaged by 186 mile per hour winds.

## RADIO ALLOCATIONS: RULES FOR 5.9 GHZ INTELLIGENT TRANSPORTATION ADOPTED

The FCC has adopted service and licensing rules for the 5.9 GHz Band for Dedicated Short Range Communications or D-S-R-C. This, from 5.850 to 5.925 Ghz in the Intelligent Transportation Systems Radio Service.

According to the Commission, DSRC systems will provide a limited-range, wireless link to transfer information between vehicles traveling at high speeds and roadside units or other vehicles. Some examples include intersection collision avoidance, work zone warnings, road condition warnings, electronic toll collections, and electronic payment for gas, fast food, or parking.

## ENFORCEMENT: $5.4 MILLION DOLLAR FAX FINE

Some good news for anyone who is sick and tired of getting unsolicited junk faxes. Federal regulators approved a record $5.4 million fine against a company for faxing unsolicited advertisements to consumers.

The five-member commission unanimously approved the penalty on Wednesday, December 31st but did not announce its decision until Monday, January 5th.

The FCC said Fax.com accrued the penalty because it violated the rules 489 separate times incurring an $11,000 fine for each instance. In affirming the fine the commission rejected arguments from Fax.com that the ban on unsolicited faxes was unconstitutional and that the fine was excessive.

The Federal Communications Commission said the fine given to Fax.com, Inc. was the largest ever for violating do-not-fax rules that went into effect in 1992. Fax.com sends faxes on behalf of clients that pay a fee. Its website claims that the company offers the industry's largest fax number database of more than 30 million numbers. Company officials did not immediately respond to a requests from the media for comment. (FCC)

COMMUNICATIONS LAW: BLAME THE COMPUTER

Prosecutors looking to throw the book at accused computer hackers have come across a legal defense. In four words, “the computer did it.” And in this era of hijacked PCs and laptops, jury’s are believing it.

In one case in the U-K, nineteen year old Aaron Caffrey was recently acquitted on charges of hacking into the computer system of the Houston Pilots back in 2001. Houston Pilots is an independent contractor for the Port of Houston.

Caffrey had been charged with breaking into the system and crippling the server that provides scheduling information for all ships entering the world's sixth-largest port. Although authorities traced the hack back to Caffrey's computer, he claimed that someone must have remotely planted a "trojan program" onto it. That it was the trojan and not him that did the hacking. (Published reports)

HAMFESTS AND CONVENTIONS: THE 44TH MIAMI TROPICAL HAMBOREE

Turning to the hamfest and convention scene, the 2004 season really kicks off the weekend of February 7th and 8th. This, when the doors of the Miami Dade County Fair Expo Center in Florida swing open to welcome the 44th Tropical Hamboree.

This years Hamboree has a long list of great programs with speakers that include such notables as ARRL President Haynie W5JPB, FCC chief rules enforcer

Riley Hollingsworth K4ZDH, IARU President Larry Price W4RA, CQ Communications' Rich Moseson W2VU and Radio School's Gordon West WB6NOA. They will take part in a free form round-table discussion of the future of the Amateur Radio service. Moseson and West will later join Florida's own Sherri Bower, W4STB, in the conventions Public Relations Forum.

Attendees will also get to hear the latest DXpedition Adventures presented by South Florida DX Association and learn about Amateur Radio at the National Hurricane Center. There will be lots of vendors and all the other niceties that make the Miami Tropical Hamboree a must attend on the convention circuit. The event is sponsored by the Dade Radio Club of Miami, Inc. More information is on-line at www.hamboree.org (Tropical Hamboree)

**

HAMFESTS AND CONVENTIONS: CHARLOTTE COUNTY HAMFEST

Meantime, March 6th is the date for the Charlotte County Hamfest in Englewood, Minnesota. Sponsored by the Englewood Amateur Radio Society, the event will feature swap tables, tailgating and overnight hookups for those bringing a recreational vehicle. The venue is the Charlotte County Fairgrounds and you can find out more in cyberspace at www.earsradioclub.org (Worldradio)

HAM RADIO IN SPACE: AIR LEAK ON ISS LEADS TO CONTACT CANCELLATION

A small air leak on board the International Space Station forced cancellation of the Monday, January 12th scheduled contact with the Armstrong Middle School in Flint, Michigan. The I-S-S recently began experiencing the slight loss of air pressure, which the crew had to locate and repair. This meant that they had to devote all their time to resolving this issue using special ultrasonic monitoring. The leak was located and repaired late the same day. Contacts missed are in the process of being rescheduled. (ARISS)

**

HAM RADIO IN SPACE: UPDATE ON OPERATIONS FROM ARISS

We also have an update on what's happening with the new radio gear on board the International Space Station and why hams on the ground heard un proto packets for a while. Amateur Radio Newsline's David Black, KB4KCH, is here with the details:

--
Frank Bauer, KA3HDO, is the Chairman of ARISS. Amateur Radio on the International Space Station. And Bauer says that he has been sifting through the many e-mails he has received over the past few days regarding ham radio operations from the orbiting outpost.

Bauer says that the new Kenwood D 700 radio recently delivered to the ISS is still in what he terms as its "raw" form. In other words, the ARISS team has not yet run a formal engineering checkout of the new hardware and the ISS crew has not gotten the operations procedures uplinked to them.

According to Bauer, at this point in time the Kenwood radio system is not properly configured for digital operations. A reconfiguration change occurred after it was brought on line which has led to this issue. So, what hams see in the way of packets coming from the station right now will probably not be what they will see in the future.

As to the signal fading problem Bauer says that its probably due to the antenna that's currently in use. The astro-hams are now using the new antenna system located on the Service Module and is a single, bottom mounted unit. Since the structure of ISS is very large, it is quite possible that the ham radio signals are getting some blockage.

Bauer says that ARISS will continue to evaluate the antenna system performance. He notes that there are now 4 antenna systems that can support 2 meter and 70 cm operation. This says Bauer gives a lot of possibilities with the antennas, including signal splitting, if need be.

As to the packet signals heard during a recent school contact? Those who heard it heard history being made. The first ever multiple radio operations from the International Space Station. While the older Ericsson radio system was doing the school contact, the new Kenwood radio system was active doing packet. It was also -- perhaps -- the first man made Q-R-M from space.

For the Amateur Radio Newsline, I'm David Black, KB4KCH

--

Bauer says that the astro-hams kind of surprised everyone on the ground by getting the radio system installed much earlier than they had anticipated. As a result, the Amateur Radio on the International Spasce Station team has been working feverishly with the space agencies to get the procedures uplinked and engineering checkouts scheduled. (ARISS)

INTERNATIONAL - INDIA: HAM RADIO AT THE CHILDREN'S SCIENCE CONGRESS

On the international scene, ham radio was a part of India's 11th National Children Science Congress. Organized by the an educational group in the city of Lucknow the event ran from the 27th to the 31st December with more than 2000 students, teachers and science promoters from various parts of that nation taking part.

According to VU2DCT, Lucknow hams were also called by program organizers to give the demonstration on Amateur Radio for the benefit of participants. Most of attendees were astonished to listen a live QSO between VU2WAP and a ham in Columbia, South America. During their presentation the hams emphasized the role of Amateur Radio in disaster situations. (Q-News)

## INTERNATIONAL - SOUTH KOREA:  HOMEGROWN SOFTWARE IS BEST

South Korea is considering requiring mobile phone operators to use locally developed software for downloading music and games.  According to news reports, that nations  Information and Communication Ministry is pushing for the compulsory use of in-country developed software for downloading on new mobile phones in order to standardize the wireless Internet platform.

South Korea is Asia's third largest mobile market and one of the fastest-growing wireless Internet markets.  As of the beginning of 2004 there are 33.44 million mobile phone subscribers, or about 70 percent of the country's 48 million population.  (Science Today)

**

## DX

In D-X, word that the Five Star DX’ers Association has announced plans for a very large-scale DXpedition to Rodrigues Island in March and April next year. The callsign will be 3B9C.  An international team of nearly 30 will operate no fewer than 15 separate stations will take to the air on virtually every band and mode possible.  The Five Star DX’ers Association is the same group that organized the very successful operation from the Spratly Islands in 1998 and the subsequent record breaking D68C DXpedition to the Comoros in February 2001. (IRTS)

Also, word that DJ4KW and D-K-9-G-G will be active from Belize until the end of February.  Callsigns being used are V31YN on CW and V31GW on RTTY.  Activity is on 160 through 10 meters.  Please QSL as directed on the air.  (OPDX)

And for those of you who perfer your D-X and D-X awards a bit higher in frequency, Peter Heins, N6ZE says that he will be able to conduct VUCC field checking in Springfield, Massachusettes several times during the next few weeks. You must be a current ARRL member to avail yourself of this service. Those wanting to take advantage of Pete’s offer should e-mail him as soon as possible to n6ze@aol.com  (N6ZE)

## THAT FINAL ITEM:  THE POTTY MOUTH AND THE VURGER

And finally this weeek, customers at a Troy, Michigan  Burger King are getting something extra with their orders that’s a little harder to swallow than a hamburger and fries.  And its coming by radio.  Rick Johnson, KA9VZD, is here with a complete menu on this one:

--

The Detroit News is reporting that police in nearby Troy are looking for the person who has found a way to broadcast on the same frequency as a local Burger King drive-through radio system. The jammer has interrupted business transactions with obscene remarks on several occasions that have startled customers.

The most recent incident took place on January 8th. It happened when the manager went outside to apologize to customers and look for the source of the salty talk. Suddenly a voice boomed from the speaker and said -- quote: “There’s nothing you or the police can do about this, so get your fat -- err -- lets say posterior -- take your fat posterior back inside and take your goons with you.”

Police suspect the calls are being made by a mobile radio transmitter or walkie-talkie in the vacinity of the restaurant. Illegal use of any telecommunications device is a misdemeanor in the city of Troy. And as we all know, its also a serious violation of Federal law.

Heading out the door for some fast food, I’m Rick Johnson, KA9VZD, reporting for the Amateur Radio Newsline.

Hey -- can you make that a double cheeseburger and a double order of rings. Yeah and hold the mayo....

--

Sounds as if the story made Rick a bit hungry. And oh yes. Troy police say that they have the FCC for assistance to track down this all beef potty-mouth with a mustard laced tongue. (ARNewsline(tm) from vasrious sources)

>I'm not in favor of "saving" anyone from vulgarity. I'm only in favor of not subjecting them to it.<

Guess what?  NO ONE ASKED YOU TO!

Attitudes like yours are making the founders spin in their graves.  Just because a word offends you is no reason to ban it.  They understood that. Obviously you don't.

>I just think if you want it, you ought to have to seek it out.<

Once again, that isn't your call.  Nowhere in American law or jurisprudence has it ever been established that "vulgarity" is not protected by the First Amendment.

>And on top of all that, Bono is an asshole.<

That would actually be a funny comment if it weren't so pathetic.  Bono actually did us Americans a great service.  He exposed once and for all the rampant puritanism and over-extended noses in this country that seem to want to be stuck in everyone else's business.  He brought the petty moral arbiters out of the closet and into the limelight, where they can be exposed for the bigoted busybodies they are.

At a time when we're threatened by global terrorism, when we're fighting a war in a foreign country, when our president is spending our children's money worse than any Democrat of the past 25 years, the chairman of the FCC and a few assorted Congress-creatures are hung up over a word.  I'd better laugh about it now before I start crying.
